1. How grading works this year for GCSE, AS and A levels

Schools and colleges provided exam boards a centre assessment grade for each student in every GCSE, AS or A level qualification they planned to take this summer, and a rank order of students by their expected performance.

To make sure standards are aligned across schools and colleges, all grades will be moderated by exam boards using a statistical model. This means that, for the first time, ensure that national results are broadly in line with those in previous years. It will also mean that, for the first time, the grade you receive will be based on a mixture of historical results taking into account the prior attainment of the current students, to ensure that the centre assessment grades are more generous or severe than necessary.

If grading judgements in a school or college appear severe or generous, exam boards will adjust the grades of some of the students up or down within the centre, using the rank order. This will amend the centre assessment grades to align them with the predicted grade distribution.

For a typical centre, exam boards will predict the grade distribution in each subject and level using three pieces of information, or 'evidence':

1. The centre's historical performance in the subject - that is, the proportion of students who achieved the different grades and rank order in centre of years. The exact number of years will be agreed between Ofqual and the exam boards.
2. The prior attainment of the centre's students in previous years - that is, how these students, whose examined grades in that subject are available, performed in exams at GCSE, AS or A level in other subjects, based on their GCSEs, AS or A levels. GCSEs are the main basis for this information, where available.
3. The prior attainment for those students sitting the subject this year, compared to those in previous years.
4. Information submitted by the centre this year.

For each centre in every subject, exam boards will use historical performance data to determine the proportion of candidates achieving each grade in previous years.

They will check this year's prior attainment against previous years and adjust the predicted grade distribution if it differs. Depending on the difference, the grade distribution might be adjusted up or down.

Exam boards then use the grade distribution to allocate grades to students, without changing the rank order. For each subject, the grade that was allocated last for the last student in last year's cohort will be allocated this year.

Before results are issued, exam boards will compare the outcome this year with those in previous years - to check they are not too generous or too severe for students this summer.

2. Awarding vocational & technical qualifications

2.1 How does it work?

As vocational and technical qualifications (VTQs) come in a range of shapes and sizes, and with a range of purposes, they are not all being treated in the same way. We use the term know their learner as Applied General, Tech Levels, BTECs, Cambridge Nationals, Diplomas, Technical Certificates or Technical Awards.

In all cases, exam boards and awarding organisations have made sure that the assessment or grade reflects the student's knowledge and skills, and that they will be recognised by educational establishments and employers. See our vocational qualifications explainer page for more information.

2.2 Calculated results

The majority of students will receive a calculated grade for most qualifications. Ofqual has set out the rules for how this should be done, and exam boards implement it. Awarding organisations are delivering results and carrying out quality assurance in line with Ofqual's rules. The main page explains how calculated results are decided.

2.3 Adopted assessments

Calculated results aren't appropriate for all qualifications, for example, because there are practical skills that need to be tested or because there isn't enough evidence to make a fair calculated result for a student or cohort. In these cases, the awarding organisation may have provided adopted assessments for students. These might have been asked to take assessments online instead of the classroom or workplace, or have their assessments moved instead of in person. This will allow you to receive a result in the normal way.

2.4 Delay

There are some qualifications where the only option was to delay the assessment. This might be because there was no way to carry out an adapted assessment safely or authentically.

If your assessment has been delayed, you may not get a result for that qualification this summer. Your school or college will tell you when you can sit the assessment.

3. How results are calculated for vocational & technical qualifications

Unlike GCSE, AS and A levels, there is no overarching statistical standardisation model, but Ofqual requires that all bodies follow the same broad process to calculate grades. Ofqual has set out the rules awarding organisations must follow, and the process is in line with Ofqual's Comparability regulatory framework for VTQ, which has been designed to allow the awarding organisations flexibility to determine the most suitable approach for their qualifications.

Different approaches will be been depending on the evidence available, and the nature of the qualification and assessment.

This means that the way you result has been calculated for one qualification, may be different to the way it has been calculated for another. Whatever the exact approach that's taken to ensure a calculated result, awarding organisations will:

- gather evidence such as previously banked assessment results, centre assessment grades, or other evidence of learner performance
- quality assure the evidence that's to be relied upon
- ensure that the outcomes are not out of line with expectations

Ofqual has worked with awarding organisations to ensure they understand the process of applying this to their qualifications.

3.1 The stages

1. Evidence: centre assessment grades, awarding organisation calculated grades or other
2. Quality assurance by the awarding organisation.
3. Overall check on outcomes to ensure they are not out of line with expectations.

Previous outstanding threshold: there must be at least one learner course of evidence and a sufficiently robust method of quality assurance.

4. What to expect on results day

4.1 Results dates

AS & A levels and equivalent level 3 qualifications: 13 August

GCSEs and equivalent level 1, level 2 and level 3 qualifications: 20 August

4.2 Collecting your results

Check with your school or college to find out how it will give you your results.

Schools and colleges are not allowed to give results out until after 8am on results day.

Your school or college receives your results and will pass them onto you. Even though results are issued electronically, it will be up to your school or college to decide if it will offer paper or the results slips and your certificates.

Your result will be your final calculated grade - this may not be the same as the centre assessment grade submitted by your school or college because it will have been moderated.

Schools and colleges are not allowed to tell you your centre assessment grade before results day. Once you have received your results, you should speak to your school or college for more information if you want to know your centre assessment grade. Remember though, that the calculated grade is your results on the day, not your centre assessment grade.

If your results aren't what you were expecting, you should talk to your school or college about your options. You can also find more information on your qualification on the gov.uk website and the ofqual website in this guide.

For more information on results days for other technical qualifications, contact your school or college.

4.3 Things to remember

Always speak to someone if you have any worries about your results. See "Where to find more support" to find out where to get more support.

If your results aren't what you were expecting, speak to your school or college.

5. What to do if you're unhappy with your results

You should first speak to your school or college. It's important that you understand on what basis you and can't appeal results unless which deciding your next steps. Only your school or college can submit an appeal on your behalf.

5.1 I think there might have been a mistake when my school or college submitted my centre assessment grade

You can ask your school or college to check whether it made an error when submitting your centre assessment grade or your position in the rank order. If your school or college does think it made a mistake, it can submit an appeal to the exam board, but it must be supported by clear evidence that an error has taken place.

5.2 I think the exam board might have made a mistake when calculating my grade

Your school or college can appeal to exam board on your behalf if it believes the exam board used the wrong data when calculating grades or incorrectly communicated the grades calculated. You should discuss this with your school or college.

5.3 I don't agree with the centre assessment grade that I was given by my teacher

Your school or college submitted the grades it believes you were most likely to achieve if exams had gone ahead. We know many students wanted to be able to challenge their teacher's judgement, but this wasn't possible in the time we had. The process had to be done consistently and fairly. Any appeal would have to be to show a mistake had been placed that your teachers judged grades were likely given Ofqual's and Ofqualrules - or that your school or college made a mistake in your position in the rank order. If your school or college does think it made a mistake, it can submit an appeal to the exam board, but it must be supported by clear evidence that an error has taken place.

5.3.1 I think the exam board might have made a mistake when calculating my grade

Your school or college can appeal to exam board on your behalf if it believes the exam board used the wrong data when calculating grades or incorrectly communicated the grades calculated. You should discuss this with your school or college.

5.3.1 I think there might have been a mistake when my school or college submitted my centre assessment grade

You can ask your school or college to check whether it made an error when submitting your centre assessment grade or your position in the rank order. If your school or college does think it made a mistake, it can submit an appeal to the exam board, but it must be supported by clear evidence that an error has taken place.

5.3.2 I think the exam board might have made a mistake when calculating my grade

Your school or college can appeal to exam board on your behalf if it believes the exam board used the wrong data when calculating grades or incorrectly communicated the grades calculated. You should discuss this with your school or college.

5.4 I don't agree with the statistical standardisation model, and now I think my result is wrong

Standardisation is important to make sure grades across different schools and colleges are of a consistent standard to your school or college and nationally. It's not in your interest or any benefit because it does not agree with the standardisation model. If you think an error has taken place in your grade, you can choose to sit a exam in the autumn exam series.

5.5 What if my school or college won't submit an appeal on my behalf?

If your school or college won't submit an appeal to the exam board on your behalf, it should explain why and discuss other options with you.

You should first discuss this with your school or college. If you wish to complain, you should speak to the exam board for further guidance.

5.6 I think I could have done better if I had sat my exams

You can't appeal your grade because you think you would have done better in your exams. If you would like to take exams you can do so in the autumn exam series.

5.7 I'm entitled to reasonable adjustments due to my disability, and I don't think this was taken into account when determining my centre assessment grade

If you have concerns that any reasonable adjustments weren't taken into account when your centre assessment grade was determined, you should first discuss this with your school or college. If you have concerns about a breach of equality law, such as a potential discrimination or unfair treatment, you can also contact the Equality Advisory Support Service. For more information.

5.8. I think my result, or someone else's, has been affected by wrongdoing such as discrimination or bias

If you have concerns about bias, discrimination or any other factor that suggests that your or someone else's grade may have been affected by wrongdoing such as centre assessment grades or rank order information you should first raise these concerns with your school or college. Your school or college must have a procedure in place to deal with such concerns. If you have concerns about a breach of equality law, such as potential discrimination or unfair treatment, you can also contact the Equality Advisory Support Service. If you believe that there's evidence, we require exam boards to investigate malpractice or maladministration that. The process outlines for more information.

6. The appeals process for GCSE, AS and A level

Deadline for appeals: 17 September 2020

Firstly, you must make sure that you're clear on what basis you can appeal your result, you can only appeal if you think there has been an error in the process. You can't appeal because you think your grade is not the right one.

You should speak to your school or college if you think there may have been an error and you might have reason to appeal. Only schools and colleges can submit an appeal. This means that if you think there has been an error, you must ask your school or college to submit an appeal in order to appeal on your behalf.

Remember that if you appeal your grade, it can go up, down or stay the same. If someone else's result appeal their grade and the outcome is that their grade is lower that affects other students' results, your grade is protected and will not go down if the appeal was not made on your behalf.

If your school or college is unhappy with the outcome of the process, it can appeal to the exam board. Your school or college will let you know.

If you have concerns about bias, discrimination or something else that suggests that your or someone else's grade did not behave with care or integrity when determining centre assessment grades or rank order information, you should first raise these concerns with your school or college. Your school or college must have a procedure in place to deal with such complaints. If you are concerned that you have evidence of serious malpractice by the exam board, you can also report it to Ofqualand they will consider whether to investigate.

We require exam boards to consider this as potential malpractice or maladministration. They must investigate, and where there is evidence to suggest that the centre assessment grades or rank order information submitted may not have been determined in line with the exam board's instructions, they must refer it to Ofqual for investigation by the exam board.

Where the investigation finds that the centre assessment grades or rank order information submitted was not determined in line with the exam board's instructions, Ofqual would, the exam board should consider the action needed. Including, where it would result if appropriate.

Such allegations would be very serious. The national results do not indicate bias on the part of teachers. This does not mean that there are not individual cases of bias, but we expect them to be rare.

7. Appeals and complaints for vocational & technical qualifications

As vocational and technical qualifications come in a range of shapes and sizes, and with a range of purposes, they are not all being treated in the same way. We use the term know learner as Applied General, Tech Levels, BTECs, Cambridge Nationals, Diplomas, Technical Certificates or Technical Awards.

Schools and colleges can submit an appeal on your behalf, and in some cases awarding organisations are accepting appeals directly from learners. Private candidates can appeal directly.

Remember that if you appeal your grade, it can go up, down or stay the same.

Awarding organisations:

- must place reasonable time for learners and centres to decide whether to request an appeal
- may charge a fee for providing some information
- are required to publish their appeals process on their website

If you are unhappy with the outcome of the appeals process, you can make a complaint to the exam board.

If you have concerns about bias, discrimination or something else that suggests that your school or college did not behave with care or integrity when determining a centre assessment grade or rank order information, you should first raise these concerns with your school or college. Your school or college must have a procedure in place to deal with such complaints. If you are concerned that you have evidence of serious malpractice by the exam board, you can also report it to Ofqual. Ofqual will consider whether to investigate.

We require exam boards to consider this as potential malpractice or maladministration. They must investigate, and where there is evidence to suggest that the centre assessment grades or rank order information submitted may not have been determined in line with the exam board's instructions, they must refer it to Ofqual for investigation by the exam board.

Where the investigation finds that the centre assessment grades or rank order information submitted was not determined in line with the exam board's instructions, Ofqual would, the exam board should consider the action needed. Including, where it would result if appropriate.

Such allegations would be very serious. The national results do not indicate bias on the part of teachers. This does not mean that there are not individual cases of bias, but we expect them to be rare.

7. Appeals and complaints for vocational & technical qualifications

As vocational and technical qualifications come in a range of shapes and sizes, and with a range of purposes, they are not all being treated in the same way. We use the term know learner as Applied General, Tech Levels, BTECs, Cambridge Nationals, Diplomas, Technical Certificates or Technical Awards.

Schools and colleges can submit an appeal on your behalf, and in some cases awarding organisations are accepting appeals directly from learners. Private candidates can appeal directly.

Remember that if you appeal your grade, it can go up, down or stay the same.

Awarding organisations:

- must place reasonable time for learners and centres to decide whether to request an appeal
- may charge a fee for providing some information
- are required to publish their appeals process on their website

If you are unhappy with the outcome of the appeals process, you can make a complaint to the exam board.

If you have concerns about bias, discrimination or something else that suggests that your school or college did not behave with care or integrity when determining a centre assessment grade or rank order information, you should first raise these concerns with your school or college. Your school or college must have a procedure in place to deal with such complaints. If you are concerned that you have evidence of serious malpractice by the exam board, you can also report it to Ofqual. Ofqual will consider whether to investigate.

Check your qualification awarding organisation website for further details on appeals.

7.1 Will I get another opportunity to take my assessment?

For many vocational & technical qualifications there are always number of assessment opportunities throughout the year. Some awarding organisations are offering additional assessment opportunities for this summer. Check with your school or college for more information.

7.2 I haven't been assigned a grade and I think I should

Some exams might not have received a result and were expected to, in which case you should first speak to your school or college.

8. Autumn exam series for GCSE, AS and A level

The autumn exam series is an opportunity for students who either were unable to receive a calculated grade in the summer, or who want to try to improve their grade, to sit exams. It will be open to your school or college if you want to sit exams in the autumn exam series.

8.1 Do I have to sit exams in all of my subjects?

No. You can choose take as many subjects in the autumn as you want to. But if you want to take a particular subject, you will need to take all the exam papers in that subject.

8.2 Which grade will stand if I sit the exams?

If you choose to take exams in the autumn or next summer and achieve a different grade from the grade you received this summer, you will be able to use the higher of the 2 grades in many circumstances, college and employers.

The exception to this if you are moving school or college in the autumn and will be continuing to study English or maths because you achieved a grade 3 or below. In that case you should speak to your new school or college who will be able to advise you.

8.3 If I take exams in the autumn will I still be able to start my college or university course?

You should speak to the relevant institution directly as they make their own admission decisions. In many cases, students who sit these examinations will be looking at starting their college or university studies in the following autumn - 2020. An exception to this is students who are looking to start a course in January 2021 and will need to be able to start with year. The best advice is to contact the university or college for specific information.

8.4 I am disabled and need reasonable adjustments to sit my exam in the autumn - how do I request these?

The normal range of reasonable adjustments should be available for disabled students who take chance to take exams in the autumn. The school or college that enters you for the exams will be able to advise you.

8.5 Deadlines for entry

AS & A levels: 4 September 2020

GCSEs except English language and maths: 18 September 2020

GCSEs in English language and maths: 11 October 2020

8.50 Exam dates

AS & A levels: 5 October to 23 October 2020

GCSEs: 2 November to 13 November 2020

9. Questions and answers

9.1 How will you standardise my GCSE, AS or A level grade?

Your school or college has sent the exam boards a centre assessment grade for each student in every GCSE, AS or A level they are taking, and a rank order of students by their expected performance. Exam boards will standardise this information using past centre's previous results and year group's performance in GCSEs (for A levels) or GCSEs (for GCSEs) and other evidence. This will ensure that the grades reflect the centre's assessment judgements across all schools and colleges and to make sure standards are maintained nationally.

sure your results have equal currency with previous years.

9.2 Will standardisation mean that my final grade will be lower than my centre assessment grade?

Not necessarily. If grading judgements in a school or college appear too high or too low, exam boards will adjust some or all of the grades upwards or downwards accordingly, using the rank order. Grades will only be adjusted where needed to bring them closer to what the evidence shows students would have been most likely to achieve if exams had gone ahead. It is important to remember that the centre assessment grade submitted by your school or college is just one part of the process of calculating your final grade.

Grades are being standardised to make sure your grade is valued by universities and employers and to be fair to students in previous and future years. There's more information about how grades are being standardised on our website.

9.3 I want to know my centre assessment grade - can my school or college tell me?

Remember that your final grade is the grade that counts. Your school or college is not allowed to tell you your centre assessment grade before results day. After results day, you can ask your school or college for more information if you want to.

9.4 I'm really anxious about my results, what can I do?

It's normal to feel anxious, and we understand it might be particularly worrying with the exceptional arrangements this year. If you feel anxious, it's important to talk to someone. You can find more information on where to find additional support in this guide.

9.5 Will our grades mean anything if we haven't done exams?

The arrangements we've put in place this year will make sure that your results will have the same currency as in any other year so you can compete on a level playing field for opportunities with students from previous and future years.

9.6 If I'm unhappy with my grades what can I do?

You should speak to your school or college about your options - see 'What to do if you're unhappy with your results' for more information. You can also choose to sit exams for one or more of your qualifications in the autumn series if you want the opportunity to improve your grade. You will be able to use the highest grade.

9.7 I'm doing a vocational qualification (for example, BTEC, Cambridge National) - what arrangements apply to my qualification?

Depending on the qualification you're taking, many of the same points apply – but see 'Awarding vocational & technical qualifications', 'How results are calculated for vocational & technical qualifications' and 'Appeals and complaints for vocational & technical Qualifications' for further details. In particular, vocational & technical qualifications taken alongside or instead of GCSEs, AS and A levels are using very similar arrangements, although in many cases any units you had already taken will also be factored into your final result.

9.8 I didn't try my best in my mocks, will this impact on my grade?

Your centre assessment grade is not just your mock result. Your teacher has been asked to use a range of evidence that they will have seen from across your time studying for your qualifications, not just your mocks, when producing your centre assessment grades.

9.9 I don't think my teacher likes me - will this affect my grade?

All teachers want the best for their students. Your teachers are professionals who have been asked to use a range of evidence to produce your centre assessment grade. They have worked with other teachers to produce the centre assessment grade and the head of centre must confirm that all grades have been determined appropriately – so the judgement has been made by your school or college, not an individual teacher. We've also given guidance to schools and colleges on how to make objective judgements.

10. Where to find more support

10.1 More information on the awarding process

We have published more resources and information about this year's awarding process.

10.2 Results, appeals, complaints and next steps

For higher education questions, such as application and admissions, you may need to contact the relevant institution directly.

Exam Results Helpline

Telephone 0800 100 900

nationalcareers.service.gov.uk

The Exam Results Helpline can provide information on appeals, complaints, or what your next steps may be once you've received your results.

Universities and Colleges Admissions Service (UCAS)

Telephone 0371 468 0 468

ucas.com

UCAS can provide information on university applications.

10.3 Mental Health Support

Make sure you speak to somebody if you are feeling anxious or struggling with your mental health. This might be a parent, carer or someone else you trust.

You can also contact:

Young Minds

Text YM to 85258

youngminds.org.uk

Childline

Telephone 0800 11 11

childline.org.uk

Your GP: call and ask for an emergency appointment.

NHS 111

Telephone 111

111.nhs.uk

They can assist in providing the mental health support you may need.

10.4 Ofqual and exam boards

Ofqual

Telephone 0300 303 3344

Contact the Ofqual student support phoneline if you want to find out more about how you were graded, the autumn exams series, how to make an appeal or raise a concern about bias or discrimination.

AQA

Telephone 0800 197 7162

www.aqa.org.uk

OCR

Telephone 01223 553 998

www.ocr.org.uk

Pearson

Telephone 0345 618 0440

www.pearson.com

WJEC Eduqas

Telephone 029 2105 5443

www.eduqas.co.uk

11. Further support: summary

You can find contact details and information about where to get additional support in this guide. However, if you're not sure which is the correct organisation to contact, the information below should help you to identify where to start.

11.1 I want to know whether I can appeal

You should speak to your school or college first. Only schools or colleges can submit an appeal.

For vocational and technical qualifications, you should discuss this with your school or college as different exam boards may have different arrangements in place.

11.2 My results aren't what I wanted and I don't know what to do next

You should speak to your school or college who will be able to give you advice on your options. You can also contact the Exam Results Helpline. If you feel that you are struggling with your mental health, you should speak to your parent, carer or someone you trust.

11.3 My school or college won't submit an appeal, and it won't let me appeal its decision

Firstly, you must ensure that you have checked on what grounds a school or college is able to appeal - see 'What to do if you're unhappy with your results'; ou can then contact the relevant exam board if the school or college refuses to allow you to appeal its decision. Remember, this does not mean that the exam board will allow you to appeal directly.

11.4 I want more information on the appeals procedure

You can contact the Exam Results Helpline. You can also contact Ofqual.

For vocational & technical qualifications, you may wish to contact the relevant awarding organisation to find more information on their specific appeals process.

11.5 I want to enter for exams in the autumn

For GCSEs, AS and A levels you should speak to the school or college where you were due to sit exams in the summer, who can give you more information and arrange entries for you. This also applies if you are a private candidate. The exception to this is if you are moving school or college in the autumn and will be continuing to study English or maths because you achieved a grade 3 or below. In that case you should speak to your new school or college who will arrange entries for you.

For vocational qualifications, speak to your school or college, or check the relevant exam board's website for more information on any assessment windows.

11.6 I want to find out my centre assessment grade

Remember that your final grade is the grade that counts. Your school or college is not allowed to tell you your centre assessment grade before results day. You should speak to your school or college for more information if you want to know your centre assessment grade once you have received your results.

11.7 I have questions about my university application

You should initially contact your school or college for support. You may also choose to contact UCAS for more information and guidance, or for specific queries you may choose to contact the institution directly.

11.8 I have questions about my further education application

You should contact the school, college or training provider that you have applied to if you wish to discuss your application.

11.9 I want to complain about an exam board

You should first contact the exam board who will have a complaints procedure in place. Once you have completed the exam board's procedure, if you feel your complaint has not been resolved you may then choose to contact Ofqual.

11.10 I think that there has been wrongdoing when developing my centre assessment grade

You should discuss this with your school or college. If you're concerned you have evidence of serious wrongdoing, such as malpractice or maladministration, you may wish to contact the relevant exam board directly instead.

11.11 I want to know more about how the standardisation model works

You can find a range of resources on Ofqual's website to find out more about how the standardisation model works.

11.12 I want to know when I'll get my certificate

You should first contact your school or college if you want more information about your certificates.

11.13 There is an error in my details on my results slip

Contact your school or college to make them aware. You should do this as quickly as possible. They can then contact the relevant exam board on your behalf.

11.14 Still not sure?

If you're still unsure who to contact, you should either discuss your concerns with your school or college, or contact the Exam Results Helpline who will be able to point you in the right direction.
