

OFFICE FOR NATIONAL STATISTICS

STANDARD OCCUPATIONAL CLASSIFICATION 2000

Volume 2
The coding index

About the Office for National Statistics

The Office for National Statistics (ONS) is the Government Agency responsible for compiling, analysing and disseminating many of the United Kingdom's economic, social and demographic statistics, including the retail prices index, trade figures and labour market data, as well as the periodic census of the population and health statistics. The Director of ONS is also Head of the Government Statistical Service (GSS) and Registrar-General in England and Wales and the agency carries out all statutory registration of births, marriages and deaths there.

Editorial policy statement

The Office for National Statistics works in partnership with others in the Government Statistical Service to provide Parliament, government and the wider community with the statistical information, analysis and advice needed to improve decision-making, stimulate research and inform debate. It also registers key life events. It aims to provide an authoritative and impartial picture of society and a window on the work and performance of government, allowing the impact of government policies and actions to be assessed.

Information services

For general enquiries about official statistics, please contact:

The National Statistics Public Enquiry Service: TEL 020-7355 5888
TEXTPHONE (MINICOM) 01633 812399

Alternatively write to the National Statistics Public Enquiry Service, Zone DG/18, 1 Drummond Gate, London, SW1V 2QQ. Fax 0171 533 6261 or e-mail info@ons.gov.uk

Most National Statistics publications are published by The Stationery Office and can be obtained from The Publications Centre, P.O. Box 276, London, SW8 5DT. Tel 0870 600 5522 or fax 0870 600 5333

ONS can be contacted on the Internet at <http://www.statistics.gov.uk> (from the 7th June 2000)

Alphabetical index for coding occupation	1

Standard Occupational Classification 2000: Volume 2

Introduction

The Standard Occupational Classification (SOC) manual comprises two volumes.

Volume 1 - The structure of the classification with descriptions of the unit groups. Outlines SOC principles and concepts, and gives an explanation of continuity between SOC 1990 and SOC 2000.

Volume 2 - The coding index. Lists job titles alphabetically and includes notes on coding.

Volume 3 of SOC 1990 included the derivation tables for the social classifications; Social Class based on occupation and Socio-economic Groups. Both of these social classifications have been superseded with the introduction of National Statistics Socio-economic Classification (NS-SEC), which was initially designed on SOC 1990. Information on the NS-SEC as based on SOC 2000, including the derivation tables, will be available after the classification has been re-based on SOC 2000.

The Job Title Coding Index

1 Volume 2 of the Standard Occupational Classification 2000 provides the coding index for the classification. The basic design of the index is the same as that used in the second edition of the SOC 1990 index but there are two noticeable differences.

- the SOC 2000 unit group code has four digits
- the SOC 1990 unit group code is also listed.

The numbering system for SOC 2000 is described in Volume 1.

2 The SOC 2000 coding index has been compiled so that users can achieve good quality coding to SOC 2000; new index entries have been added and some deleted. The SOC 1990 equivalent of the SOC 2000 code has been given but not all of the index entries required for the finer points of coding to SOC 1990 have been retained. Where the link to SOC 1990 is known to be less reliable, the SOC 1990 code is printed in italics. Users needing to code closely to SOC 1990 should consult the coding index within SOC volume 2 published in 1995.

3 In the SOC 1990 coding index, and the 1995 edition of the index, some codes were prefixed by **M** or **F** to denote the two employment statuses

Manager and Foreman/Supervisor respectively. Employment status is needed to derive the social classifications. The M and F prefixes to SOC 1990 codes are not shown in this index. However some SOC 2000 codes are prefixed by **S** to denote the employment status of Foreman/Supervisor, which is used in the derivation of the National Statistics Socio-economic Classification.

4 The coding index for SOC 2000 contains 26,160 entries, including 10,309 changes (6,616 additions, and 3,693 deletions) to deal with new job titles, changes in usage and some removal of redundant titles. Only the SOC 2000 code will be given in the examples quoted in these notes.

5 The index in SOC 2000 volume 2 follows the principles and layout style which were first adopted in the *Classification of Occupations 1960* to improve the efficiency of clerical coding. The main principle is listing job titles in reverse word order, for example, 'Pest control inspector' will be found as:

6292 Inspector, control, pest

This locates related titles in a single list and with a default code for cases where one code covers many variations. The index is compiled in this way so that the user only needs to search in one place.

Updating the index

1 All index entries have been examined in the process of allocating them to the groups of SOC 2000. Staff in the Occupational Information Unit have also gathered information on new occupation titles from advertisements for job vacancies and scrutinised queries from all sources to identify changes to update the index. The main sources are the queries raised from allocating occupation codes to:

- the 1991 Census of Population,
- the Labour Force Survey, and
- Deaths registration records.

Another useful source of information was the extract of anonymised job seeker and vacancy records from the Employment Service.

Electronic version of the index

1 As with the second edition of the SOC 1990 volume 2, the coding index of SOC 2000 will be available in a file from the Occupational Information Unit, ONS, Titchfield. This file contains the contents of the coding index. It is not a coding package such as **CASOC** (Computer Assisted Standard

Occupational Coding¹) which was published in 1993 and designed to make the coding of occupational information simple, quicker and more reliable. The development of **CASOC 2000** is being considered and those interested should contact Professor Peter Elias in the Institute for Employment Research at the University of Warwick.

2 If you are interested in obtaining a file of the job titles in the index please contact staff in the Occupational Information Unit to discuss your requirements.

Keeping in touch

1 The use of job titles changes over time and new titles are introduced. The Occupational Information Unit seeks to increase its knowledge of jobs, their titles and associated tasks. SOC 2000 users are invited to forward information which will help in the compilation of the job title index and feed into the work for the next update. Also contact the Occupational Information Unit if you wish to register as a user of SOC 2000 and receive news on SOC and related classifications.

Section 1 General notes

1.1 Indexing word

Job titles are arranged **alphabetically** under **indexing** words. The **indexing** word is usually the word which describes the job. However some indexing words are very general terms which give no indication of the work being performed, such as:

Boy
Employee
Girl
Hand
Lad
Man
Woman
Worker
Workman

Please note that in previous editions of the coding index these general terms were not treated as indexing words.

1.2 Equivalent words

The feminine form of a job title is not indexed unless it is very common or its coding is different from the coding of the masculine form, so actor is in the index but not actress. Similarly, use index entries listed as man for 'woman' (where there is no index entry for **woman**), and 'person'.

1.3 Job titles

Sometimes a job title is just a single word which links exactly to an index entry and therefore is simple to code.

3413 Actor
2411 Solicitor

The indexing word is rarely sufficient to enable the job title to be correctly coded. Frequently an indexing word is made specific by the use of a qualifying term, for example to code, 'Brass turner' use the indexing word 'Turner' and the qualifying word 'brass'.

1.4 Reverse word order

The entries in the index generally appear in reverse word order, for example:

'Billiard table cushion maker' will be found under

8115 Maker, cushion, table, billiard

1.5 Qualifying terms

In most cases the job title is made specific by words which are called **qualifying terms**. There are occupational, industrial and additional qualifying terms.

1.6 Occupational qualifying terms

Words shown separated from the indexing word by a comma are called **occupational qualifying terms** and **must** precede the indexing word in the job title being coded. For example, use the index entry

3564 Adviser, careers

to code 'Careers adviser'

Occupational qualifying terms are indexed in reverse word order, for example the job title 'Medical laboratory scientific officer' is indexed as:

2112 Officer, scientific, laboratory, medical

A job title may contain a further qualifying word that is not listed in the index. For example, there is no index entry 'Controller, depot, freight' but the job title 'Freight depot controller' is coded using the index entry:

4133 Controller, depot

Similarly, 'White clay modeller' is coded from the index entry:

5491 Modeller, clay

and 'Boot buckler' is coded from the index entry:

8139 Buckler

It is important to work in the order of the words. For example 'Sales office manager' must be coded from:

1152 Manager, office
NOT
1132 Manager, sales

Sometimes a job title is recorded with the indexing word written before the occupational qualifying term, for example 'Controller purchasing'. Where no other words are recorded in the job title, the corresponding index entry can be used, for this example:

3541 Controller, purchasing

1.7 Compound words

For compound words, such as 'Caddymaster', where the last element is an indexing word, go to the list for that indexing word:

6211 Master, caddy

and 'Storekeeper' is indexed under

9149 Keeper, store

Some very common terms have also been indexed in their natural word order, for example, 'Stockbroker' under letter **S** and 'Coastguard' under letter **C**.

1.8 Use of 'ad', 'and', 'at', 'de', 'for', 'in', 'of', 'on', 'the', 'to'

Some job titles may be qualified by a clause following the indexing word, for example:

2419 Clerk of the court

Titles like these are indexed in their alphabetical position at the end of the list for the relevant indexing word, but before any hyphenated double-barrelled entries, for example:

3535 Inspector of taxes

is in the clause entries at the end of the Inspector list.

These job titles are usually very specific so the index entries must be used with special care. For example, 'Council clerk' must **NOT** be coded from the index entry:

1113 Clerk to the council

1.9 Double-barrelled job titles

Sometimes a job title is expressed as two titles connected by a hyphen. Commonly used hyphenated job titles are listed in the index at the end of the list for the first job title. Do not reverse the order of the words, so for example to code 'Loader-checker' go to the end of list for indexing word 'Loader' to find

9149 Loader-checker

Do not use the second title in the pair which would lead to:

4134 Checker-loader

The hyphen can be read as an oblique. For example, 'Receptionist/typist' is coded from:

4216 Receptionist-typist

Where a double-barrelled job title does not appear in the index, look up the first title. For example 'Cataloguer-lister', is coded from:

4131 Cataloguer

Only use the second title if the first is not in the index. For example, 'Pestman-fumigator' is coded from:

6292 Fumigator

See also note 3.5.

1.10 Industrial and additional qualifying terms

These qualifying terms can be more freely interpreted than the strict observance of occupational qualifying terms. They may be used where they are part of the job title, or where they can be inferred from it, or they may have been provided in answer to a question other than one asking for details of a person's job title. Some examples are shown in the notes which follow.

1.11 Industrial qualifying terms

Industrial qualifying terms are shown within brackets and in italics and can take the form of an industry or branch of industry in which the person works. The abbreviation 'mfr' is used to cover manufacturing, making, building and repairing.

The industrial qualifying term *food products mfr* does not include *flour confectionery mfr* or *sugar confectionery mfr*. The industrial qualifying term *government* includes both government departments and government agencies.

An industrial qualifying term is used in the example, 'Tractor driver on a farm', which is coded from the index entry:

8223 Driver, tractor (*agriculture*)

Similarly, the job title 'Furnaceman' – industry 'steelworks' is coded from the index entry:

8117 Furnaceman (*metal trades*)

1.12 Additional qualifying terms

Sometimes the qualifying term is more easily stated in terms of the type of material worked

with, the machinery used or the process involved. These additional qualifying terms enable a number of specific terms to be summarised in a more general word and are shown in the index within brackets. Two examples of additional qualifying terms are:

The job title 'Steel drawer' is coded from the index entry:

8117 Drawer (metal)

because steel is a metal.

The job title 'Gold leaf cutter' is coded from the index entry:

5495 Cutter, leaf (precious metals)

because gold is a precious metal.

Additional qualifying terms can also, in a few cases, take the form of professional qualifications to differentiate between occupations. Two examples are:

The job title 'Cost Accountant' has the following index entries:

2422 Accountant, cost (qualified)

4122 Accountant, cost

The job title 'Thermal Engineer' has the following index entries:

2129 Engineer, thermal (professional)

5314 Engineer, thermal

The coder is referred to the Engineer (professional) list so that any information on the professional specialism can be used to reach the appropriate occupation code. For example, for the job title 'Marine technical consultant' go to the index entry:

Consultant, technical - *see also* Engineer (professional)

to use

2122 Engineer (professional, marine)

1.13 Order of qualifying terms

The list for an indexing word may contain some or all types of qualifying terms. Use the qualifying terms in the order they are listed in the index: occupational, additional, industrial.

1.14 Default index entries

Where a code number appears against an indexing word, the indexing word is used as a **default** index entry.

The default index entry is used to code all job titles which include the indexing word but which cannot be coded from any of the index entries with occupational, additional, or industrial qualifying terms. The following examples explain the **default** convention.

The job title 'Cinema Cashier' is coded from the default index entry:

7112 Cashier

because 'cinema' is not in the list of occupational qualifying terms and none of the additional or industrial qualifying terms for indexing word 'cashier' relate to 'cinema'.

For job title 'School laboratory technician' the default index entry:

3111 Technician, laboratory

is used since none of the other index entries for 'laboratory technician' include the word 'school'. In the same way, the job title 'Sales office manager' is coded from:

1152 Manager, office

because sales is not in the list of other index entries for 'office manager', the default entry is used. As mentioned previously, the order of the words is significant. The index entry:

1132 Manager, sales

must **NOT** be used for 'Sales office manager'.

Another example of the use of a default code is the entry:

9233 Cleaner

There are several entries for the indexing word 'Cleaner' with occupational, additional and industrial qualifying terms.

The default entry is used when

- a) none of the qualifying terms apply, or,
- b) only the word 'Cleaner' has been recorded with **NO** other occupational, additional or industrial information.

The use of the default entry, as described in item b) above, does not apply when there is an 'nos' entry in the list for the indexing word, see 1.15.

1.15 Use of 'nos' - not otherwise specified

An index entry with nos listed as an occupational qualifying term is used more precisely than a default index entry. The abbreviation nos is used to denote that the index entry can only be used where the job title has been recorded without any other information to use as occupational, additional or industrial qualifying terms.

For example the list of index entries for Chemist has an nos entry and a default entry.

The job title 'Pigment chemist' is coded using the default index entry:

2111 Chemist

because the word 'pigment' does not appear in the occupational qualifying terms in the list for chemists.

The job title 'Chemist' working in the retail trade is coded using the index entry:

2213 Chemist (*retail trade*)

The job title 'Chemist', with **no** other information, is coded using the index entry:

2213 Chemist, nos

1.16 Use of 'see.....' and 'see also.....'

Where the list for one indexing word can be used for another indexing word the coder is directed to 'see...' or 'see also...'. These referral statements are used in different ways.

For a job title that has alternative spellings, for example:

Advisor - *see* Adviser

Where a job title is sufficiently similar in its coding to that of all, or some of the entries, for another job title, for example:

Minder, machine - *see* Machinist

A pair of brackets indicates words enclosed by brackets, so only use that part of the list which starts at the end of the occupational qualifying terms, for example:

Manager, section - *see* Manager ()

use the manager entries starting at Manager (catering)

The words '*see also..*' appear where the coder must check the entries at that point in the index before going to the other list, for example:

1231 Factor, estate (Scotland)
3232 Factor, housing (Scotland: *local government*)
1231 Factor, housing (Scotland)
1234 Factor, motor
 Factor - *see also* Dealer

use the Dealer list only after checking the entries for Factor.

1.17 Abbreviations

It is common for some job titles to be abbreviated and these abbreviations are indexed at the beginning of each relevant letter, for example:

1111 MEP

is the index entry for MEP (which is the abbreviation for Member of the European Parliament) and it is in the list of abbreviations at the beginning of letter **M**.

3312 WPC

is the index entry for WPC (which is the abbreviation for Woman Police Constable) and it is at the beginning of letter **W**.

Sometimes grades or qualifications are used as job titles and written as abbreviations. These are listed in the index.

For example:

5243 T2B (*telecommunications*)

for Technician grade 2B in the telecommunications industry, and

2213 MPS

for Member of the Pharmaceutical Society.

The abbreviations 'cnc' and 'nc' are occupational qualifying terms which stand for computer numerically controlled, and numerically controlled. They are most often used with job titles such as Press Setter, Machine Setter, Programmer and Operator.

1.18 Assistant, Deputy, Principal, etc. - as prefixes

Job titles prefixed by words which indicate a position in a hierarchy, for example, 'apprentice', 'assistant', 'chief', 'departmental', 'deputy', 'head', 'principal', 'trainee', 'under', are normally coded as though the prefix words were not present.

For example, the job title 'Deputy accounts manager' is coded from:

1152 Manager, accounts

The job title 'Assistant Funeral Director' is coded from:

6291 Director, funeral

There are a few exceptions where the coding is altered by such a qualifying word and in those instances the complete title is indexed, for example:

2441 Secretary, private, principal

4215 Secretary, private

See note 3.1 for the conventional coding of certain apprentices and trainees, and 3.6 for terms used with Engineer.

1.19 Assistant, Deputy, Principal, etc. - as indexing words

As well as prefixing a job title, 'assistant', 'deputy', and 'principal' can also be titles in their own right.

For example, in the job title 'Manager's assistant', assistant is the indexing word so this title is coded using the index entry:

4150 Assistant, manager's

Similarly, 'Funeral director's assistant' is coded from:

6291 Assistant, director's, funeral

1.20 Major organisation

Some of the entries in the index include the term *major organisation*, which is defined as a company or organisation that employs 500 or more persons. In some data collections, for practical purposes, this is based on the number of employees at the workplace.

Section 2 Coding conventions

2.1 Conversion to job title

Occupation information is not always given as a job title and sometimes the response has to be converted before it can be found in the index. Verbs or parts of verbs are normally converted to nouns, **except in the following instances:**

Banking
Building
Catering
Engineering
Printing

For example, 'engineering' is **not** converted to Engineer and 'banking' is **not** converted to Banker but descriptions such as 'packing' can be converted to 'Packer'.

Similarly convert 'inspection' to Inspector, 'repair' to Repairer and 'work' to Worker, except for 'shop work' and 'brick work'.

2.2 The Armed Forces and the Civil Service

Many members of the Armed Forces and, to a lesser extent the Civil Service, have jobs which are unique to those industrial sectors. The most common job titles for Forces personnel are included in the index, for example:

Commander
Corporal
Sergeant

Where the specific term is not given, for members of the Armed Forces, if officer rank is known, code to **1171**, otherwise code to **3311**.

Similarly many terms used in the Civil Service will be found in the index.

However where members of the Armed Forces and the Civil Service give job titles that equate to jobs found outside these organisations, for example, 'Vehicle mechanic', 'Radio operator', 'Statistician', use these titles to code the occupation, rather than rank or grade.

2.3 Diplomatic personnel

Members of foreign or Commonwealth diplomatic staffs are coded **1111**.

2.4 Polytechnic

To reflect changes in the educational system, the word polytechnic is treated as synonymous with university. If an occupation includes polytechnic use the entry for university.

For example the job title 'Lecturer in polytechnic' is coded from:

2311 Lecturer (*higher education, university*)

2.5 Teaching staff

Teaching staff are generally coded according to the type of educational establishments where they work.

Higher educational establishments **2311**
(for example, university, law college, medical school)

Further educational establishments **2312**
(for example, agricultural college, secretarial college, technical college)

Secondary schools **2314**
(and middle schools deemed secondary schools)

Primary schools and nursery schools **2315**
(and middle schools deemed primary schools)

Teachers of children, at different levels of education, who have special needs are coded **2316**

Teachers of recreational subjects at evening institutes and similar establishments, and private tutors of music and dancing, are coded **2319**

Vocational and industrial trainers teaching occupational skills are coded. **3563**

Section 3 Index entries which refer to notes

3.1 Apprentice/Graduate apprentice/Management trainee/Trainee

All persons in training for an occupation or profession should be coded to the relevant occupation or profession for which they are training.

In cases where it is **NOT** possible to determine the occupation or profession for which they are in training, the following conventions apply for these specific cases:

'Management trainee' code **1239**

'Graduate apprentice' code **2129**
'Student apprentice' code **2129**

'Apprentice', with no occupational qualifying terms where there is information on industry

construction trades code **5319**
electrical trades code **5249**
engineering code **5223**

where there is **NO** information on industry
code **5499**

3.2 Foremen, Supervisors, and Team Leaders

Although the index includes lists for these job titles, for those responses that also include a specific job title, use the relevant index entry for that job title.

For example, the job title 'Foreman carpenter' is coded from index entry:

5315 Carpenter

There are no index entries for foreman over particular groups of workers, so for example 'Foreman of labourers' is coded from the index entries for Labourer.

The job title 'Supervisor of telephonists' is coded from the index entry:

4141 Telephonist

The following terms are regarded as synonymous with Supervisor² or Foreman:

Boss
Chargehand
Chargeman

² The term 'Supervisor' is not always a synonym for Foreman. For example when used in the context of supervising children with the job title 'Playground supervisor'.

Gaffer
Ganger
Headman
Overlooker
Overseer
and also assistant foreman, assistant supervisor, etc.

All these job titles are indexed in their own right but to aid coding also refer to the index entries for Foreman.

3.3 Company Director/Director/Director of/Managing Director

Directors with specific titles, for example, 'Sales director' are coded as shown in the index or from the list for Managers with occupational qualifying terms.

Where 'Company Director', 'Director', or 'Managing director' is recorded without any occupation qualifying terms code as follows:

(a) if it is known that the person works for a *major organisation*, code to **1112**

(b) if any industry information is available code from the Manager () entries.

(c) if no other information is available code to **1239**.

3.4 Chairman

Apart from the industry of glass blowing, where chairman is a specific job title, a chairman is regarded as a company chairman and coded as a Company Director (see note 3.3).

3.5 Owner/Partner/Proprietor

The list for indexing word Owner is also used for Partner and Proprietor but where another job title is stated, code to that job title. For example, 'Owner taxi driver' is coded from the index entry:

8214 Driver, taxi

The job title 'Partner bookkeeper' is coded from the index entry:

4122 Bookkeeper

The job title 'Proprietor and hairdresser' is coded from the index entry:

6221 Hairdresser

Where no other job title is stated, refer to the index entries for Owner.

3.6 Engineer

The job title engineer presents difficulty in coding because it is commonly used in a variety of circumstances. The index includes various job titles for specific engineers that may be used by both professional engineers (usually classified in Major group 2) and by those who are not regarded as professional within the classification. If the title to be coded is prefixed by the terms 'advisory', 'chief', 'chartered', 'consultant', 'design', 'development', 'principal', 'research', 'senior', it can be assumed that the person is a professional engineer. A list of professional specialisms is included at the end of the index entries for Engineer.

For example 'Chief aviation engineer' is coded from the index entry:

2122 Engineer, aviation (professional)

Where there is only a single index entry that links to a professional unit group, that can be used, so for example, the job title 'Senior quality engineer' is coded from the index entry:

2128 Engineer, quality

The job title 'Senior engineer in public health' is coded from the index entries:

Engineer, senior – see Engineer
(professional)

which leads to

2121 Engineer (professional, public health)

In cases of doubt, the person is regarded as non-professional.

There are a few industries in which the job titles 'Engineer' and 'Electrical engineer' are used in a specific sense so these industries are listed as industrial qualifying terms in the index entries for:

Engineer, nos
Engineer, electrical, nos

For example, where the job title 'Electrical engineer' is recorded with no other information, except that the person is working on merchant vessel Oil Mariner, it is coded from the index entry:

3513 Engineer, electrical, nos (*shipping*)

3.7 Journeyman

The word 'journeyman' is ignored when it is used with another job title. For example, 'Bookbinder journeyman' is coded from:

5423 Bookbinder

3.8 Leading hand

Where another job title is stated, code to that job title. For example, 'Leading hand precision engineer' is coded from:

5224 Engineer, precision

Where no other job title is stated, refer to the index entries for Leading hand indexed as Hand, leading.

ALPHABETICAL INDEX FOR CODING OCCUPATIONS

A

SOC 1990	SOC 2000		SOC 1990	SOC 2000	
103	2441	A (<i>Cabinet Office</i>)	410	4122	Accountant, financial (<i>coal mine</i>)
103	2441	A (<i>Northern Ireland Office</i>)	250	2421	Accountant, financial
