

SB 26/2014

25 March 2014

## Initial Teacher Training in Wales, 2012/13

This bulletin provides information about students on courses of Initial Teacher Training (ITT) leading to Qualified Teacher Status (QTS) in 2012/13. It mainly focuses on information about students on courses provided through higher education institutions (HEIs) in Wales.

Following an internal assessment and a subsequent review, published in 2006, the Welsh Government has reduced the overall number of new entrants to ITT courses during the period covering academic year 2006/07 to 2013/14 to better meet the needs of maintained schools in Wales.

In 2012/13, numbers were maintained at 750 for Primary phase and decreased from 1,030 to 930 for Secondary phase. Both primary phase undergraduate courses and postgraduate courses stayed the same. Secondary phase undergraduate courses stayed at 95, but postgraduate courses were reduced from 935 to 835. These figures do not include an additional 25 postgraduate secondary places at the Open University.

There are alternative employment-based routes to obtaining QTS but these are not covered in this bulletin. The data included here are taken from the Higher Education Statistics Agency's (HESA) Student Record. Unless otherwise stated, comparisons are with 2011/12 figures.

### Key points

- There has been a year on year decline in first year enrolments on ITT courses in Wales in recent years, but this must be viewed in the context of the policy to reduce the number of new entrants to ITT courses.
- There were 1,740 first year enrolments on ITT courses in Wales, one per cent lower than in 2011/12 and 25 per cent lower than in 2005/06.
- The number of first year Welsh domiciled students enrolled on ITT courses in Wales increased by two per cent over the last year to 1,425. There was a 13 per cent decrease in enrolments from outside Wales.
- 82 per cent of first year students on ITT courses in Wales were Welsh domiciled, two per cent higher than in 2011/12 and five percentage points higher than in 2005/06.
- The number of students completing ITT courses in Wales was eleven per cent lower than in 2011/12. Of these completers, 18 per cent completed a course that either enabled them to teach bilingually or led to a formal certificate of bilingual education, five percentage points higher than in 2011/12.

## **Policy context**

Each year the Welsh Government sets intake targets for recruitment to ITT courses in Wales. Following an internal assessment and subsequent review, the Welsh Government has, since 2004/05, been reducing the number of new entrants to ITT courses to better meet the needs of maintained schools in Wales. The Review of ITT Provision in Wales was held in 2005/06 and reported in January 2006. A copy of the report can be seen on the Welsh Government's website at:

[Welsh Government: ITT Provision Report](#)

Following this, the then Minister for Education, Lifelong Learning and Skills published a statement on 29 March 2006 setting out an ITT Change Plan to restructure ITT so that intake targets, courses and course availability could deliver teachers with Qualified Teacher Status to better meet the needs of maintained schools in Wales. A copy of this can be seen on the National Assembly for Wales's website at:

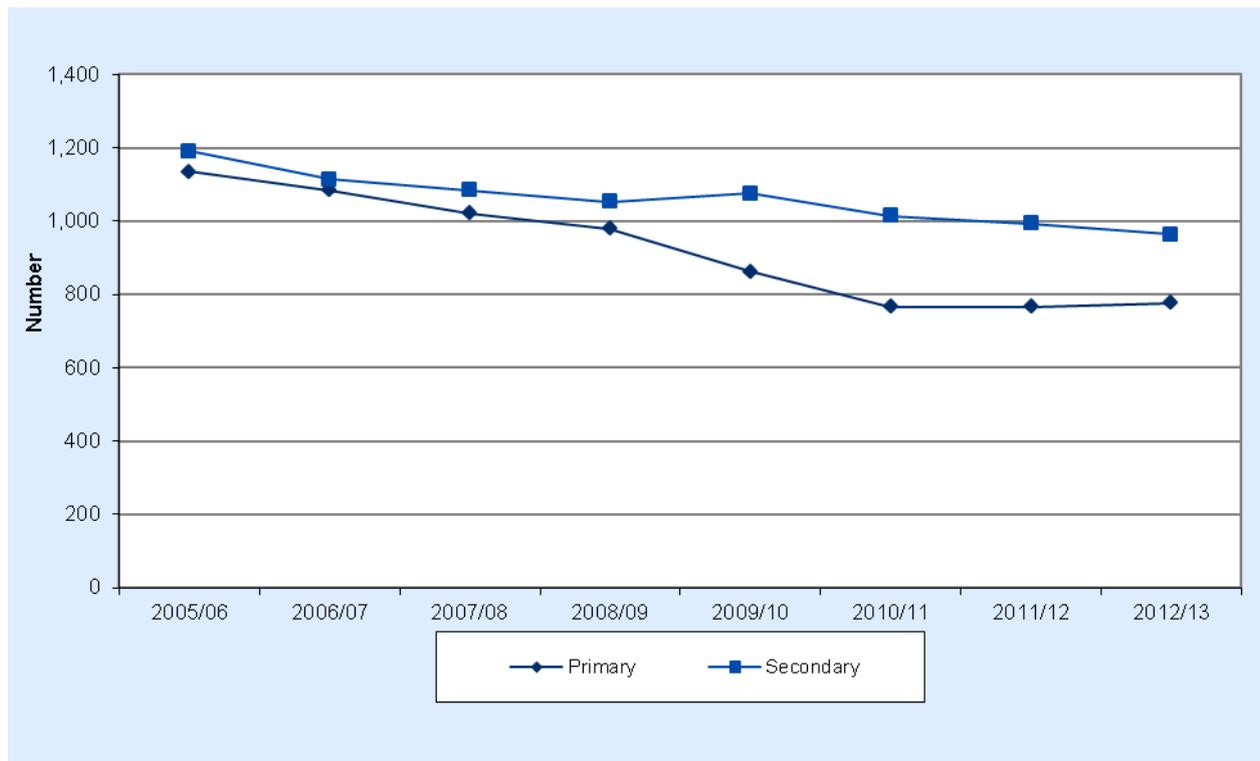

[National Assembly for Wales: Statement on ITT Restructuring](#)

The intake targets set by the Welsh Government are notified to the Higher Education Funding Council for Wales (HEFCW). HEFCW allocates the total intake figures, varying the figures within agreed limits if necessary, to individual institutions. Further details can be found on the HEFCW website at:

[HEFCW: Intake Targets](#)

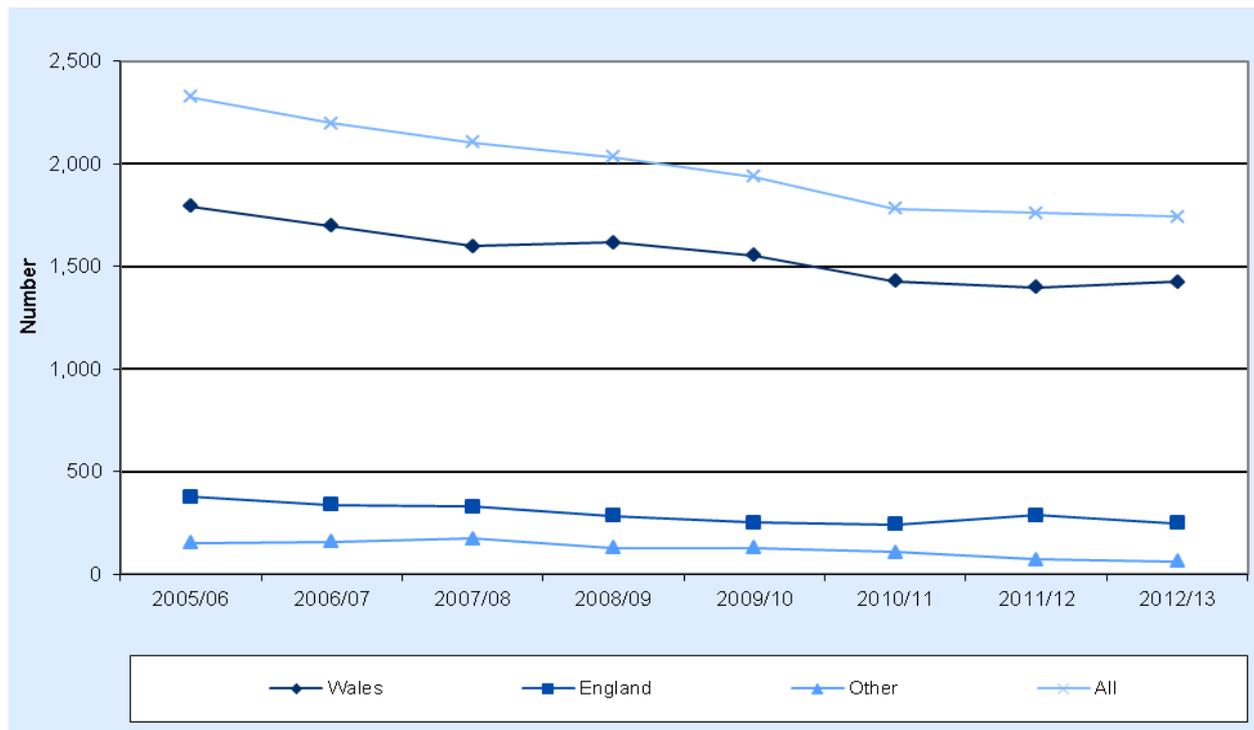

## **Section A: ITT students and qualifiers from Welsh HEIs**

**Chart A.1: First year students on ITT courses in Wales by phase**

- Between 2011/12 and 2012/13, first year enrolments on Primary phase courses in Wales increased to 780, a two per cent increase on the previous year (*Table A.1*).
- Enrolments on Secondary phase courses decreased by three per cent to 965, after a two per cent decrease in the previous year (*Table A.1*).

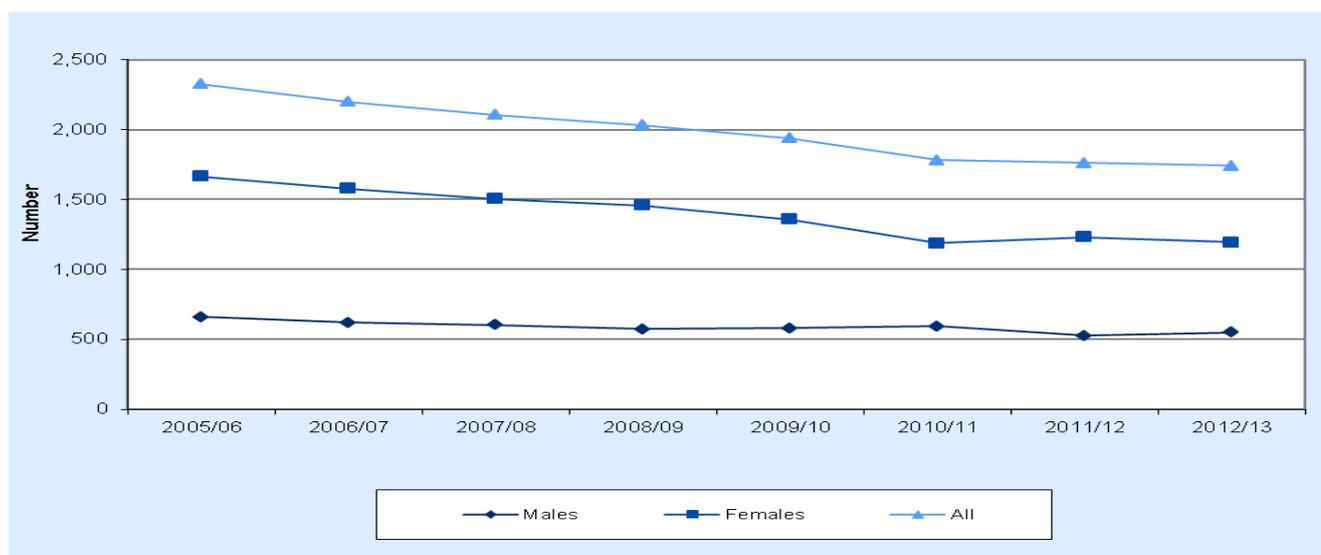

**Chart A.2: First year ITT students in Wales, by country of domicile (a)**

(a) Other includes Scotland, Northern Ireland, UK unknown, Republic of Ireland, Other EU, Other Europe and Other Overseas

- The number of all first year enrolments on ITT courses (1,740) was one per cent lower than the previous year and 25 per cent lower than in 2005/06, (Table A.2).
- The number of first year Welsh domiciled students enrolled on ITT courses in Wales increased by two per cent over the last year to 1,425. There was a 13 per cent decrease in enrolments from outside Wales.
- 82 per cent of first year ITT students were Welsh domiciled and 14 per cent were English domiciled (Table A.2).

**Chart A.3: First year ITT students in Wales, by gender** 

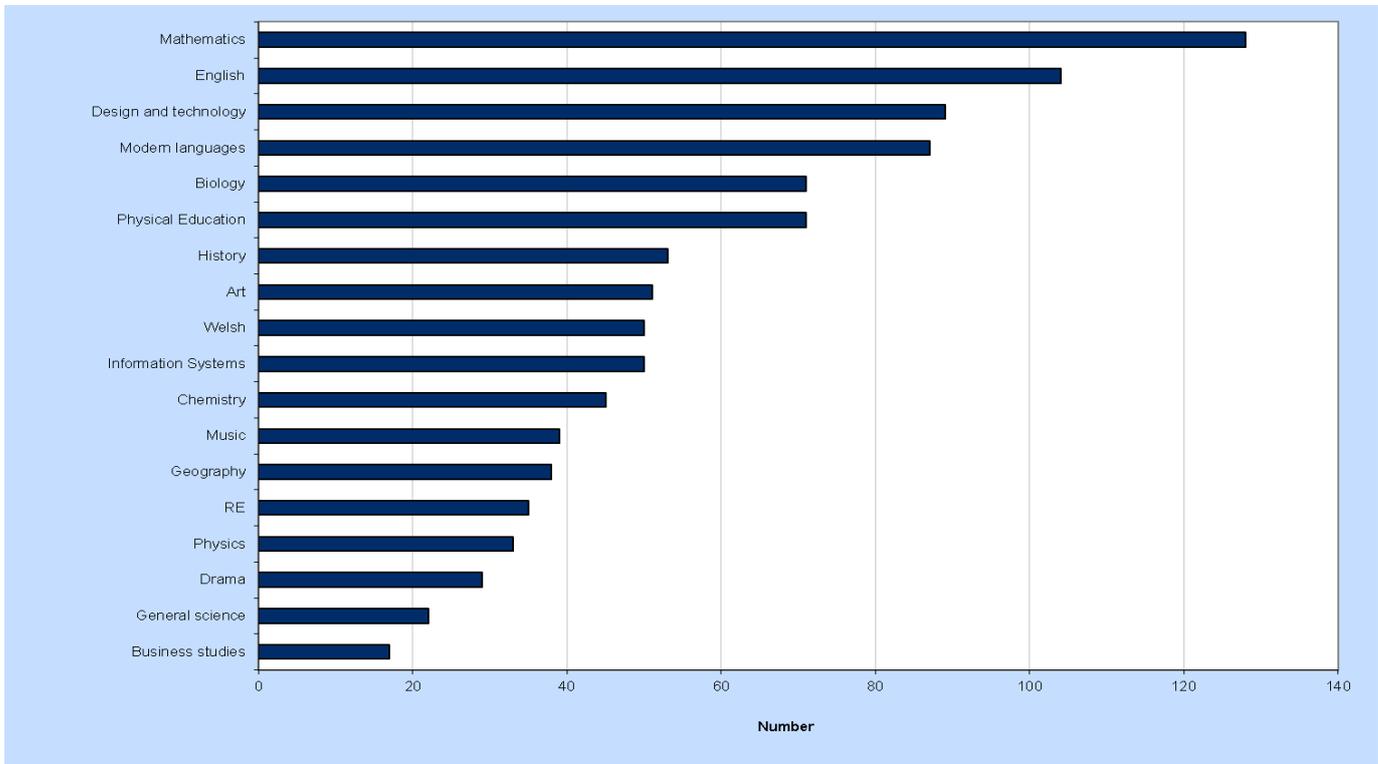

- First year female enrolments decreased by three per cent in the past year whilst first year male enrolments increased by four per cent (Table A.1).

- Compared with 2005/06 both first year female and first year male enrolments have decreased, female enrolments by 28 per cent and male enrolments by 17 per cent (*Table A.1*).

**First year ITT students by level of study, language, ethnicity and age**

- In 2012/13, 77 per cent of first year ITT students were enrolled on PGCE courses, unchanged from the previous year, and 10 percentage points higher than in 2005/06. (*Table A.1*).
- 17 per cent of first year ITT students opted to take a course that either enables them to teach bilingually or leads to a formal certificate of bilingual education, two percentage points higher than in 2011/12 (*Table A.1*).
- 94 per cent of first year ITT students recorded their ethnicity as white in 2012/13, while 55 per cent of students were aged between 21 and 24, a two percent increase from the previous year. (*Table A.3*).

**Chart A.4: First year ITT students in Wales, by secondary subject grouping 2012/13**

- The highest proportion of first year Secondary phase enrolments was Mathematics (13 per cent) and English (ten per cent) (*Table A.4*).
- Biology accounted for seven per cent of the all first year enrolments to Secondary phase ITT courses compared to four per cent for Chemistry and three percent for Physics and two percent for General Science.
- Business studies made up only two per cent of all first year enrolments to Secondary phase ITT courses.

**All students on ITT courses in 2012/13**

- In total, 2,455 students were enrolled on ITT courses in Welsh HEIs, a decrease of five per cent from the previous year. Of these, 71 per cent were female (*Table A.5*).

### **Students completing ITT courses in 2012/13**

- The number of students completing ITT courses in Welsh HEIs was 1,470, 11 per cent lower than in 2011/12 (*Table A.6*).
- 80 per cent of students in Welsh HEIs completing ITT courses were from PGCE courses (*Table A.6*).
- 18 per cent of students (255) in Welsh HEIs completed a course that either enabled them to teach bilingually or led to a formal certificate of bilingual education, five percentage points higher than in 2011/12 (*Table A.6*).

### **Section B: Welsh domicile ITT students**

#### **First year Welsh domicile ITT students at UK HEIs, 2012/13**

- There were 1,905 Welsh domiciled entrants onto ITT courses at UK HEIs. Of those, 75 per cent were enrolled at a Welsh HEI and 25 per cent at an English HEI. There were no first year students studying in Northern Ireland and only a small number studying in Scotland in 2012/13 (*Table B.1*).
- Both the number of male and female Welsh domiciled entrants onto PGCE courses at Welsh HEIs were two per cent higher than in 2011/12. (*Table B.1*).

#### **All students on ITT courses, 2012/13**

- In total, there were 2,700 Welsh domiciled enrolments onto ITT courses. Of these 74 per cent were enrolled at a Welsh HEI and 55 per cent of these students were enrolled on a PGCE course while the rest were enrolled on a first degree leading to QTS (*Table B.2*).

### **Section C: All ITT students and qualifiers from English HEIs**

#### **First year ITT students in English HEIs, 2012/13**

- The number of all first year enrolments to English HEIs in 2012/13 was 27,865, a two per cent decrease on the previous year, and 12 per cent lower than in 2005/06 (*Table C.1*).
- The majority of first year ITT students at English HEIs were female, 73 per cent (*Table C.1*).

#### **All students on ITT courses at English HEIs in 2012/13**

- There were 45,305 students enrolled on ITT courses at English HEIs, of these 52 per cent were enrolled on a PGCE and 77 per cent were female. (*Table C.2*).

#### **Students completing ITT courses in 2012/13**

- 24,620 students completed ITT courses in England in 2012/13. Of these completers, 77 per cent completed a PGCE (*Table C.3*).

Source: Higher Education Statistics Agency (HESA)

(a) Enrolments throughout the year.

(b) Students may be recorded under more than one subject e.g. if a student studies Mathematics and IT then that student will appear under both subjects. This table provides two lines, the number of subject enrolments and the number of individual student enrolments. The number of individual student enrolments matches the secondary phase totals in Table A.1.

(c) Students who were studying at the Open University and were funded by HEFCW are included in the figures.

(d) From 2010/11 the ITT intake targets in respect of science (previously one figure for all science courses) have become more specific. Providers were told that chemistry and physics subjects could be linked with wider science content, but only courses where chemistry or physics were the main component would qualify for inclusion in the priority subject intake grouping. Providers were therefore told that they needed to be certain that they made the specialism and type of course clear to all trainees from the outset. The fall in General Science enrolment numbers since 2009/10 are likely to reflect changes in the way courses are being recorded, rather than changes in enrolment patterns.

(e) All numbers are rounded to the nearest 5.

(f) From 2012/13 students studying 'Information Technology' are now coded as studying 'Information Systems'.

## **NOTES**

### **1. Related Publications**

The Welsh Government releases a headline and tables covering destinations data for those completing ITT courses. The headline for 2011/12 was published in September 2013 and can be found here:

<http://wales.gov.uk/statistics-and-research/destination-students-completing-initial-teacher-training-courses/?lang=en>

### **2. Data Source**

The Higher Education Statistics Agency (HESA) collects data on students, staff and resources of Higher Education Institutions (HEIs) in the UK. The data presented in this bulletin are taken primarily from the HESA Student Record which contains information on all students enrolled on credit bearing courses at UK HEIs, including those enrolled on ITT courses.

A summary of the Student data collection process for 2012/13 covering timescales, validation and business rules and checking processes is included on the HESA website at:

[http://www.hesa.ac.uk/index.php?option=com\\_studrec&Itemid=232&mnl=12051](http://www.hesa.ac.uk/index.php?option=com_studrec&Itemid=232&mnl=12051)

In addition, HESA published a circular in July 2009 (REF: C08051) to provide further guidance to institutions returning data, covering a summary of previously announced changes to the data collection system, guidance on fields identified as having data quality issues in 2007/08, plus a summary of the data collection system and timetable and checks required to optimise the quality of data returned. A link to circular C08051 is provided here:

[http://www.hesa.ac.uk/index.php?option=com\\_content&task=view&id=1543&Itemid=233](http://www.hesa.ac.uk/index.php?option=com_content&task=view&id=1543&Itemid=233)

### **3. Definitions**

#### **3.1 Coverage**

This bulletin provides information about courses of Initial Teacher Training (ITT) leading to Qualified Teacher Status (QTS) provided through higher education institutions.

To teach as a qualified teacher in a maintained school or non-maintained special school in Wales or England, students need to obtain QTS. Students can do this at higher education institutions by either undertaking a first degree course which combines a degree – usually a BEd, BA or BSc – with QTS or by completing a postgraduate course which leads to QTS. PGCE courses are usually postgraduate courses; however, some non postgraduate courses such as the Professional Graduate Certificate in Education (which is pitched at an undergraduate level) are classified as PGCE. Other levels such as Postgraduate Diploma in Education may also be offered.

Professional Graduate Certificate in Education courses are offered by English providers as a level 6 qualification which is classed as ‘other undergraduate’, but requires a first degree on entry. In Wales only the Open University offers this qualification with the ‘leading to QTS’ option, although other Welsh HEIs may award this qualification if a student studying for a Postgraduate Certificate in Education is deemed not to have achieved sufficient credits at masters level.

In this Bulletin figures for English HEIs includes the numbers on Training and Development Agency for Schools (TDA) funded flexible provision.

There are alternative employment-based routes to obtaining QTS but these are not covered in this bulletin.

### 3.2 Level of study and length of course

Initial teacher training courses vary in length. Most first degree courses which combine a degree with QTS are 3 year courses but 2 and 4 year courses are also offered, depending upon qualifications on entry and the type of course. Postgraduate Certificate in Education (PGCE) courses which lead to QTS are almost all one year courses taken following completion of a degree course.

Course lengths can change: for example, many previously 4 year first degree courses are now 3 year courses, which can make comparisons with previous years difficult.

### 3.3 Year of study

Figures for **first year students** cover those entering both types of course in one academic year.

Figures for **all students** on ITT courses will also include those on first degree courses, which started in the previous academic years. Similarly figures for **all students** completing ITT courses include the completion of courses which started in different academic years.

### 3.4 Disabilities

With the introduction of the Disability Equality Duty, and on the recommendation of the Equality Challenge Unit (ECU), HESA has introduced a version of the coding frame introduced by the Disability Rights Commission (DRC). The disability categories indicate the type of disability that a student has on the basis of their own self-assessment, and are consistent with those used by the Universities and Colleges Admissions Service (UCAS). For continuing students, where the information is not already known, institutions have the option of recording the student's disability as not sought. As a result, some institutions have not returned disability data for some of their students. In addition, students are not obliged to report a disability. HESA therefore advises that the figures reported in analyses are derived from a subset which may not be representative of the total student population.

### 3.5 Subject of study

All secondary ITT students must be trained in at least one specialism. Prior to 2007/08 the main specialism was recorded in the first subject of study field. Up to two other specialisms may also have been recorded. The analysis by subject of study is a headcount of enrolments by main specialism. From 2007/08 students were counted under more than one subject grouping rather than being placed under their subject of specialism. Table A.4 provides a count of enrolments falling within each subject area but also gives a count of individual student enrolments. These student level totals match those in Tables A1, A2 and A3 and eliminate the double counting which occurs at subject level. From 2012/13 the JACS3 subject coding framework was used.

### 3.7 Open University

The Open University restarted ITT provision in Wales in July 2008. From 2007/08 the tables and charts showing students on ITT courses in Wales include those students at the Open University who were funded by HEFCW. Those charts and tables showing students on or completing ITT courses in England now exclude those students who are at the Open University and funded by HEFCW.

## 4. Rounding Strategy

The presentation of figures in this Statistical Bulletin follows the principals of the HESA rounding strategy. The strategy is intended to prevent the disclosure of personal information about any individual. This strategy involves rounding all numbers to the nearest 5. A summary of this strategy is as follows:

- 0, 1, 2 are rounded to 0 and represented as ‘\*’.
- All other numbers are rounded to the nearest multiple of 5.

Total figures are also subject to this rounding methodology; the consequence of which is that the sum of numbers in each row or column may not match the total shown precisely. Percentages have been calculated using precise raw numbers. Percentages less than 0.5 per cent are represented by ‘-’.

## 5. Key Quality Information

This section provides a summary of information on this output against five dimensions of quality: Relevance, Accuracy, Timeliness and Punctuality, Accessibility and Clarity, and Comparability. It also covers specific issues relating to quality of 2012/13 data, and describes the quality management tool applied to this area of work.

### 5.1 Relevance

HESA is the official agency for the collection, analysis and dissemination of quantitative information about higher education. It was set up by agreement between the relevant government departments, the higher education funding councils and the universities and colleges. The primary purpose of the Student data collection is to provide each of the bodies listed above with accurate and comprehensive statistical information regarding student enrolments.

The statistics are used both within and outside the Welsh Government to monitor trends in ITT provision at Welsh HEIs and also to monitor provision across the UK for Welsh domiciled students. Some of the key users are:

- Ministers and the Members Research Service in the National Assembly for Wales;
- Officials in the Welsh Government;
- Other government departments;
- The Higher Education Funding Council for Wales;
- Higher Education Institutions and representative bodies;
- Students, researchers, and academics;
- Individual citizens, private companies, and the media;

These statistics are used in a variety of ways. Some examples of these are:

- Advice to Ministers;
- To inform the education policy decision-making process in Wales;
- To forecast future expenditure of student support schemes for Welsh domiciled students;
- To help model future supply and demand for teachers and inform ITT intake targets.

### 5.2 Accuracy

The Student Record contains information about individual enrolments, which, because a student can be enrolled on more than one programme of study, will exceed the number of students. Previous analysis has shown that for Welsh HEIs full-time enrolments are less than 1 per cent higher than full-time student numbers; part-time enrolments are less than 2 per cent higher than part-time student numbers.

Postdoctoral students are not included in the HESA Student Record.

The Student record is an annual census of students. The steps taken by HESA to ensure data qualities were outlined in the 'Data Source' paragraph earlier in this section.

In September 2011 analysis of data for ITT students identified that some institutions were not always including the award of QTS when recording a student's qualification even though it had been achieved. This led to an undercounting of students included in Tables A.6 and C.3 of the bulletin that was originally published on 16 March 2011. Table A.6 and C.3 were revised in their entirety in September 2011 (years 2004/05 to 2009/10) to show the number of completers who actually gained QTS rather than

those completers who were studying towards QTS award. The revised version of Table A.6 also incorporated changes necessitated by coding errors which were discovered at two Welsh HEIs.

The errors occur where completers who were on ITT courses were coded as 'First degree with honours' rather than 'first degree with honours leading to QTS/ registration with a GTC', which meant that they were missing from the original table. Figures have been revised for all academic years to allow accurate comparisons across years to be made.

### **5.3 Timeliness and Punctuality**

HESA collected student enrolment data for the 2012/13 academic year between August and October 2013.

### **5.4 Accessibility and Clarity**

This statistical bulletin is pre-announced and then published on the Statistics section of the Welsh Government website. It is accompanied by more detailed tables on StatsWales, a free to use service that allows visitors to view, manipulate, create and download data.

### **5.5 Comparability**

There are no published figures for the 2012/13 academic year for other UK countries that can be directly compared to figures in this bulletin.

The Training and Development Agency for Schools (TDA) operates as a national agency and recognised sector body responsible for the training and development of the school workforce in England; its website is located here: <http://www.tda.co.uk/>

### **5.6 Data quality issues**

From 2007/08 those students enrolled at the Open University and funded by HEFCW were no longer counted under English HEIs, but instead were counted under Welsh HEIs. Although the numbers are small, it was felt that these changes helped to better inform funding policy.

The HESA standard registration population is a count of all enrolments with the reporting year 1 August until 31 July. In 2007/08 the standard population was redefined to no longer include students who were writing up or on sabbaticals. This change has not affected the data in this bulletin.

For 2006/07 one institution incorrectly coded postgraduate students with 'Welsh' as their main specialism as 'enables to teach bilingually or leads to a formal qualification'. This accounts for the relatively large change between the years.

For 2006/07 one Welsh institution incorrectly coded some students to the Foundation Phase, Key Stages 1 and 2 rather than the Foundation Phase and Key Stage 1. This accounts for the relatively large change between the years.

Prior to 2007/08 subject level enrolment counts were not available. Table A.4 has been revised for this 2011/12 bulletin to provide both subject level and individual student level counts.

The Higher Education Funding Council for Wales (HEFCW) publishes information on ITT enrolments in 'Initial Teacher Training in Wales – Performance Information' each year. The enrolment figures may differ to those presented in this Bulletin, as institutions are able to make corrections to their data after the HESA Student Record has closed.

Destination data are not yet available. A supplementary analysis of destinations of all UK and EU domiciled ITT students, who obtained relevant qualifications in 2012/13 will be published at a later date and will be provided on [www.wales.gov.uk](http://www.wales.gov.uk).

#### STATS WALES

Tables associated with this bulletin containing a greater amount of detail are available on the Welsh Government's interactive data dissemination service StatsWales ([www.statswales.gov.uk](http://www.statswales.gov.uk)).

Prior to 2005/06 the enrolment population used in the Initial Teacher Training (ITT) bulletin was based on enrolments at 1 December. The following link provides a time series from 1994/95 by gender and level until the academic year 2009/10 based on the December population.
