This statistical bulletin has been produced by the Department for Employment and Learning (DEL) and presents findings from the 2012/13 Destinations of Leavers from Higher Education survey. The survey is carried out 6 months after the students graduate and this bulletin provides information on NI domiciled students qualifying from UK Higher Education Institutions (HEIs) and all students qualifying from NI HEIs. Findings include:

- 77% of NI domiciled full-time leavers from UK HEIs were in employment six months after leaving.
- The average salary of NI domiciled full-time leavers in full-time employment in NI was £18,850. NI domiciled full-time leavers in full-time employment in GB had an average salary of £23,055.
- Full-time leavers from NI HEIs were more likely to be in employment (76%) than leavers from English (74%), Scottish (74%) and Welsh (72%) HEIs.
- The unemployment rate of full-time leavers from NI HEIs varied depending on subject area. The rate was highest for those who studied Mass Communications and documentation and Creative Arts & Design (13%) and lowest for Medicine & Dentistry leavers (0%).

This statistical bulletin has been produced by the Department for Employment and Learning, Northern Ireland (NI) and presents findings from the 2012/13 Destinations of Leavers from Higher Education (DLHE). The DLHE survey is carried out six months after a student leaves Higher Education (HE).

Following a review of the DLHE survey and consultation with government departments, the HE sector and users of the data, the DLHE survey has been re-designed to collect richer information from leavers particularly regarding their activities on the survey date.

Leavers now report all the activities that they are undertaking on the census date and then indicate which one they consider to be most important to them. From these responses, destination categories are derived taking into account the most important activity and, in some instances, other activities the leaver is involved in.

Consequently, the destination categories reported from 2011/12 onwards differ from those reported prior to that year. Direct comparisons should not therefore be made with figures presented before 2011/12.

The coverage of the survey has been expanded to include additional HE qualifications and now includes Non-EU domiciled leavers where it was previously restricted to UK and European Union domiciled leavers only. Surveying these leavers was undertaken as a pilot from 2011/12 with a clear distinction that the information collected should not be published until carefully reviewed. These leavers are therefore excluded from this bulletin.

Additionally, there were leavers who obtained postgraduate research qualifications from dormant status (For example those returning to submit a thesis or to retake exams during the reporting period). The destination outcomes of these leavers are considered to be materially different in nature to the outcomes of the other postgraduate research leavers included in the survey so these leavers have been excluded.

For more information on the DLHE survey see the [notes and definitions](#) section. The statistics presented in this bulletin cover a range of topics including, the proportion of students who go into work or unemployment, the proportion of students who leave NI for employment, the average salary level of graduates, the destinations of students from different subject areas and institutions.

Policy and Operational Context

The Minister for DEL has responsibility within the NI Executive and to the NI Assembly for the NI Higher Education Institutions (HEIs) and their students; and for student support for NI-domiciled students in NI and the rest of the UK. The Assembly's DEL Committee has a scrutiny role in regard to these issues.

The current landscape in HE continues to show strong demand, while changes in fee regimes throughout the UK and the effects of the economic recession continue to cause headlines for the HE Sector.

It is within this context that DEL has developed a Higher Education Strategy for Northern Ireland, which aims to promote and sustain the development of an internationally competitive sector, accessible to all who are able to benefit, given the funding available, and meeting the needs of the Northern Ireland economy and wider society. This bulletin forms part of the evidence base informing the implementation of the HE Strategy, and will help shape the Department's future policies.

The Higher Education Strategy for Northern Ireland can be found at the link below:
Graduating to Success - <http://www.delni.gov.uk/graduating-to-success-he-strategy-for-ni.pdf>

Who will be interested?

The information presented in this statistical bulletin will be of interest to a wide variety of people. For example the statistics within and those derived from this bulletin are currently used by DEL policy officials in their role of assisting and advising the Minister for DEL to discharge his duties; by the NI Assembly and DEL committee to scrutinise the HE sector; by other government departments such as the Department of Education to monitor the destination of teaching graduates; by prospective students to inform their choices around higher education; by local businesses to quantify the supply of graduates in their business area and by researchers and academics to try and understand the underlying trends in HE. Further details about the uses made of HE statistics can be found in the [notes and definitions](#) section.

Structure of Bulletin

The bulletin is divided into two sections. Section 1 focuses on the destinations of NI domiciled students who gained a qualification at a HEI in NI, England, Scotland or Wales. Section 2 concentrates on the destinations of all NI, GB and other EU students who gained a qualification at a NI HEI. This division into two sections reflects the two distinct policy and operational responsibilities of the Minister and the Department. Furthermore, it is clear from customer feedback, the nature of questions on HE asked in the Northern Ireland Assembly, and coverage of HE issues in the local media, for example, that these two aspects are of interest to readers. Therefore it has been decided to present breakdowns of information on HE along these two dimensions in this bulletin.

Section 1 – Destinations of Northern Ireland domiciled leavers from UK Higher Education Institutions (HEIs) in 2012/13

- Six months after leaving, 56% of NI domiciled full-time leavers were in full-time work, 14% in part-time work, 3% primarily in work and also studying and 3% primarily studying and also in work – a total of 77% in some sort of employment (Table 1b).
- The employment rate of NI domiciled full-time leavers varied depending on subject area studied. The rate was highest for those who studied Veterinary Sciences (96%) and Medicine & Dentistry (95%) and lowest for those who studied Physical Sciences (59%) and Mathematical Sciences (55%). However, it is worth noting that 30% of leavers from Physical Sciences and 37% from Mathematical Sciences were engaged in full-time study (Table 3b).
- Most NI domiciled leavers in employment who studied in Great Britain (GB) did not return to NI to work. Only 38% of NI domiciled full-time leavers from GB HEIs in employment were employed in NI. The comparable figure for NI domiciled leavers from NI HEIs is 88% (Table 4d).
- The average salary of NI domiciled full-time leavers in full-time employment was £20,215 in 2012/13, with a median of £20,000 (Table 6).

Section 2 – Destinations of leavers from Northern Ireland Higher Education Institutions (HEIs) in 2012/13.

- Six months after leaving, 53% of full-time leavers from NI HEIs were in full-time work, 15% were in part-time work, 4% primarily in work and also studying and 3% primarily studying and also in work – a total of 76% in some sort of employment (Table 12b).
- The unemployment rate of full-time leavers from NI HEIs varied depending on subject area. The rate was highest for those who studied Mass Communications and documentation and Creative Arts & Design (13%) and lowest for Medicine & Dentistry leavers (0%) (Table 15b).
- 88% of NI domiciled full-time leavers from NI HEIs in employment were employed in NI, whereas non NI domiciled leavers from NI HEIs are more likely to leave NI to work with only 30% of full-time leavers, employed in NI (Table 17d).
- The average salary of full-time leavers from NI HEIs in full-time employment was £19,835 in 2012/13, with a median of £20,000 (Table 19).

SECTION 1: Destinations of Northern Ireland domiciled leavers from UK Higher Education Institutions in 2012/13 (Tables 1a to 11b)

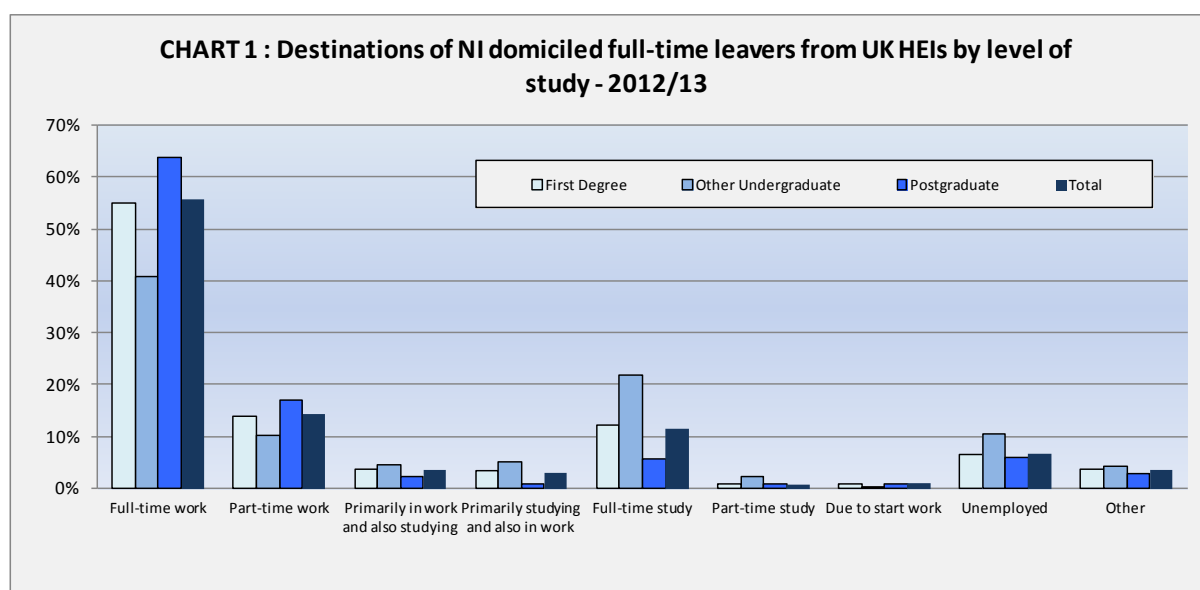

This section presents the findings for NI students who qualified from a HEI in NI, England, Scotland or Wales in 2012/13. Tables relating to this section can be found in [Annex 1](#).

1.1 Destinations six months after leaving

1.1.1 Destinations by mode, level, gender & location of Institution – 2012/13 (Tables 1a-2b, Chart 1)

Full-time leavers

- Six months after leaving, 56% of NI domiciled full-time leavers were in full-time work, 14% in part-time work, 3% primarily in work and also studying and 3% primarily studying and also in work – a total of 77% in some sort of employment¹.
- A further 12% of leavers were in full-time study, 1% in part-time study, 7% unemployed, 1% due to start work and 4% of leavers were engaged in other activities.
- Gender – NI domiciled full-time male leavers (73%) were less likely to be in employment than their female counterparts (79%). Males (9%) were more likely to be unemployed than females (5%).
- Level of study – Chart 1 below displays the variation in outcomes between different levels of study. 76% of NI domiciled full-time first degree leavers were in employment compared to 61% of other undergraduate and 84% of postgraduate leavers. First degree (12%) and other undergraduate (22%) leavers were more likely to be in full-time study than postgraduate (6%) leavers.

¹ See definition point 17

- Location of Institution – The employment rate of NI domiciled full-time leavers differ relatively little depending on the location of their institution. 76% of those from NI HEIs were in employment, compared to 77% from English HEIs, 77% from Scottish HEIs and 73% from Welsh HEIs. Unemployment rates were lower for NI domiciled full-time leavers from Welsh HEIs (5%) compared to those from NI (7%), English (6%) and Scottish (6%) HEIs.

Part-time leavers

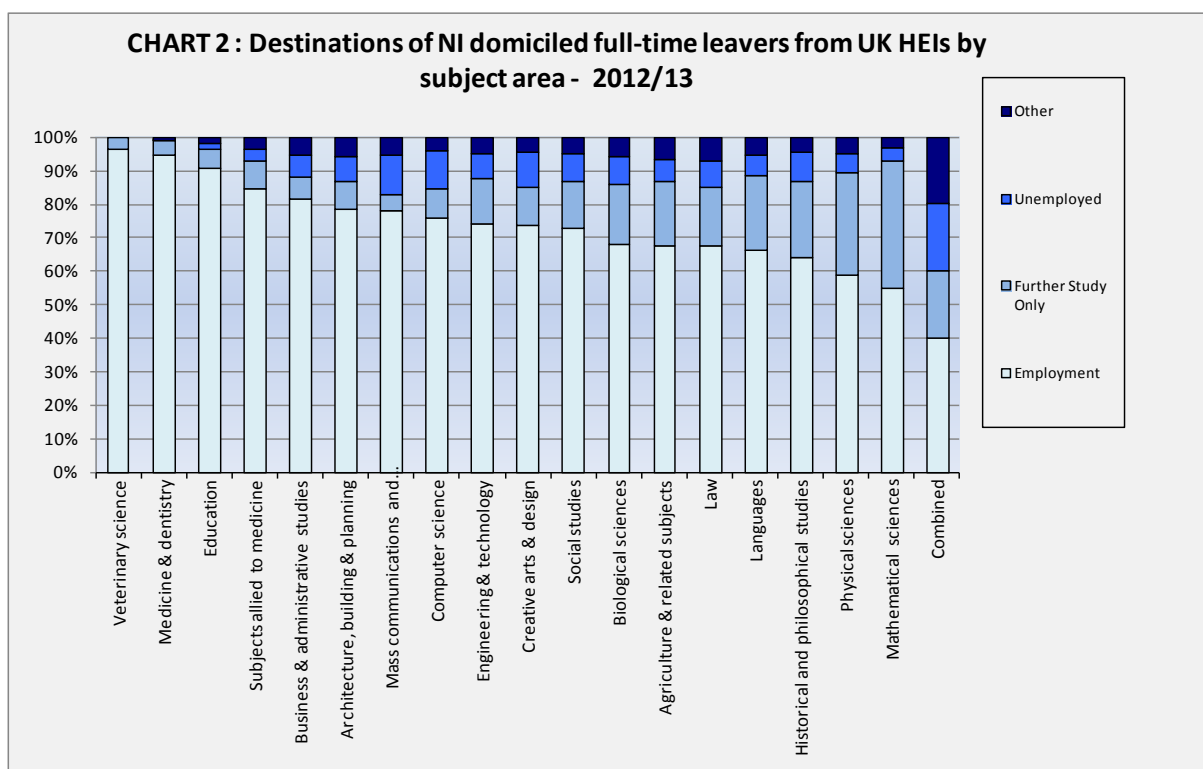

- Of those NI domiciled leavers who studied part-time 6 months after leaving, 66% were in full-time work, 12% in part-time work, 8% primarily in work and also studying and 2% primarily studying and also in work – a total of 88% in employment.
- A further 4% of leavers were in full-time study, 2% in part-time study, 3% unemployed and 3% of leavers were engaged in other activities.
- Gender – 88% of NI domiciled female part-time leavers were in employment compared to 87% of males. However, males (70%) were more likely to be in full-time work than females (63%), with females more likely to be in part-time work (15%) than males (6%).
- Level of study – 83% of NI domiciled part-time first degree leavers were in employment compared to 85% of other undergraduate and 92% of postgraduate leavers. First degree (6%) and other undergraduate (4%) leavers were more likely to be unemployed than postgraduate (1%) leavers.
- Location of Institution² – The employment rate of NI domiciled part-time leavers were relatively high across all locations of institutions. 89% of those from NI HEIs were in employment, 85% from English HEIs and 87% from Scottish HEIs. Unemployment rates were higher for NI domiciled part-time leavers from Scottish (6%) HEIs compared to those from English (3%) and NI (3%) HEIs.

² The number of NI domiciled part-time leavers from Wales HEIs was too small to allow reliable comparison of employment and unemployment rate.

1.1.2 Destinations by subject area studied (Tables 3a and 3b, Chart 2)

Full-time leavers

- Chart 2 below displays how the destinations of NI domiciled full-time leavers vary depending on the subject area studied 6 months after leaving. The proportion in employment was highest for those who studied Veterinary Sciences (96%), Medicine & Dentistry (95%), Education (90%) and Subjects Allied to Medicine (84%).

- The subject areas³ with the lowest proportion of NI domiciled full-time leavers in employment include Historical & Philosophical studies (64%), Physical Sciences (59%) and Mathematical Sciences (55%). However, it is worth noting that these subjects had some of the highest proportion of students going into further study only. For example, 38% of Mathematical Science leavers were in this category.
- The unemployment rate was highest for NI domiciled full-time leavers who studied Mass Communications & Documentation (12%), Creative Arts & Design (11%) and Computer Science (11%). An unemployment rate of 0% was recorded for Veterinary Sciences and Medicine & Dentistry leavers.

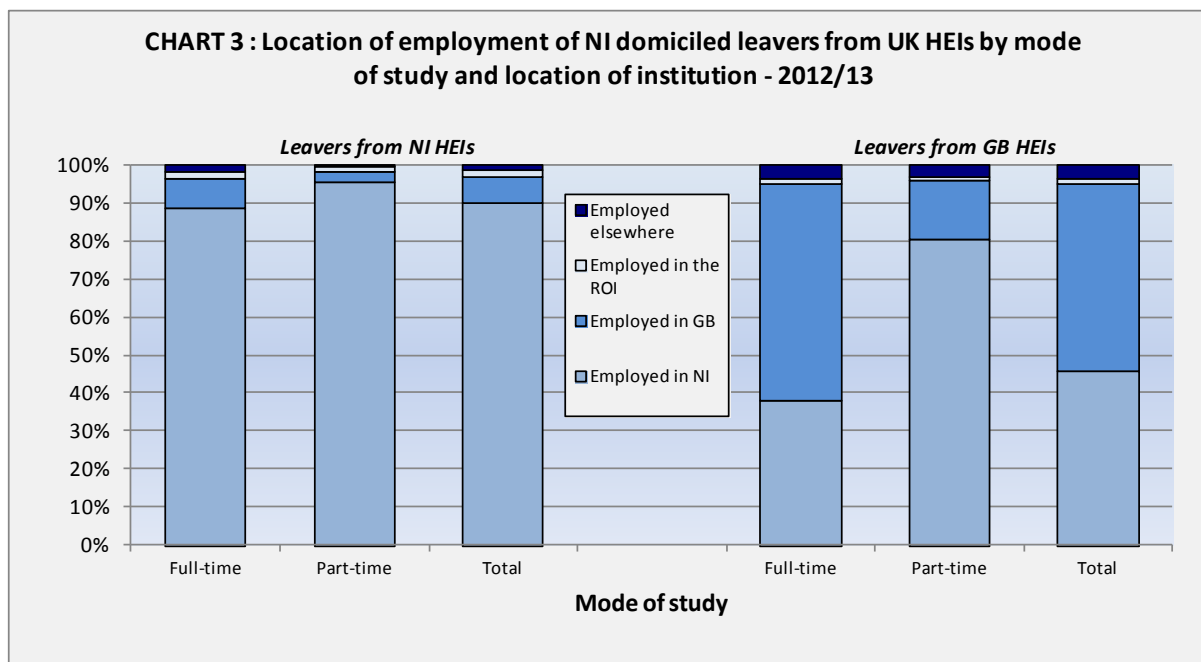

³ The number of NI domiciled full-time leavers from 'Combined Studies' was too small to allow reliable comparison of employment or unemployment.

1.2 Employment

1.2.1 Location of Employment (Tables 4a-g, Chart 3)

Full-time leavers

- Of those NI domiciled full-time leavers from UK HEIs in employment six months after leaving, 72% were employed in NI, 24% in GB, 2% in ROI and 3% elsewhere. However, large differences were observed between those who studied in NI and those who studied in GB.
- Location of institution⁴ – Most NI domiciled leavers in employment who studied in Great Britain (GB) did not return to NI to work. Only 38% of NI domiciled full-time leavers from GB HEIs in employment were employed in NI, 57% in GB, 1% in ROI and 4% elsewhere. The comparable figures for NI domiciled full-time leavers from NI HEIs are 88% employed in NI, 8% in GB, 2% in ROI and 2% elsewhere.

- Gender – 73% of NI domiciled full-time female leavers in employment were employed in NI compared to 71% of males.
- Level of study - 74% of NI domiciled full-time first degree leavers in employment were employed in NI compared to 66% of other undergraduates and 64% of postgraduates.

⁴ Excludes Open University as they are all Part-time for NI Domiciled leavers.

Part-time leavers

- 91% of NI domiciled part-time leavers in employment after six months were employed in NI, 6% in GB, 1% in ROI and 2% elsewhere.
- Location of institution – 95% of NI domiciled part-time leavers from NI HEIs in employment were employed in NI, compared to 80% of NI domiciled part-time leavers from GB HEIs (including OU).
- Gender – 92% of NI domiciled part-time female leavers in employment were employed in NI compared to 89% of males.
- Level of study - 90% of NI domiciled part-time first degree leavers in employment were employed in NI compared to 94% of other undergraduates and 90% of postgraduates.

1.2.2 Standard Occupational Classification (SOC) (Tables 5a and 5b)

Full-time leavers

- Of those entering employment 6 months after leaving, 68% of NI domiciled full-time leavers took up positions in the top three SOC groups (Managers & Senior Officials, Professional Occupations or in Associate Professional & Technical Occupations).
- Gender – NI domiciled full-time males (70%) in employment were slightly more likely to be employed in the top three SOC groups than their female (66%) counterparts.
- Level of study - 65% of NI domiciled full-time first degree leavers in employment were employed in the top three SOC groups, compared to 50% of other undergraduates and 84% of postgraduates.

Part-time leavers

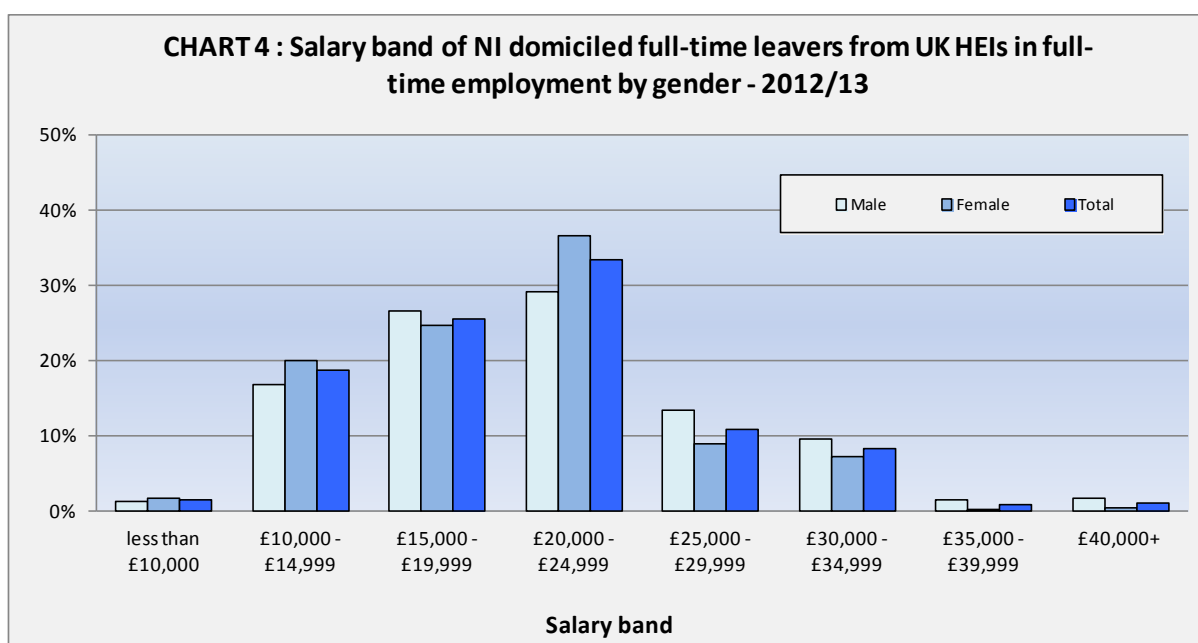

- Of those entering employment 6 months after leaving, 79% of NI domiciled part-time leavers took up positions in the top three SOC groups (Managers & Senior Officials, Professional Occupations or in Associate Professional & Technical Occupations).
- Gender – NI domiciled part-time males (81%) in employment were slightly more likely to be employed in the top three SOC groups than their female (77%) counterparts.
- Level of study - 66% of NI domiciled part-time first degree leavers in employment were employed in the top three SOC groups, compared to 71% of other undergraduates and 92% of postgraduates.

1.2.3 Salary of those in Full-time employment (Tables 6 - 9, Chart 4)

Salary is not a mandatory question in the DLHE survey resulting in a high non-response rate. Leavers in full-time employment whose salary was unknown have been excluded from the analysis; this represents 38% of those respondents in full-time employment. Caution should therefore be taken when using these figures.

Full-time leavers

- 6 months after leaving, the average salary of NI domiciled full-time leavers in full-time employment was £20,215 with a median of £20,000.
- Gender – NI domiciled full-time male leavers in full-time employment had an average salary of £20,925 (median £20,000). The equivalent figure for females was £19,680 (median £20,000).

- Level of study – The average salary of NI domiciled full-time first degree leavers in full-time employment was £19,835 (median £20,000), compared to other undergraduates - £20,120 (median £21,000) and postgraduates - £22,105 (median £22,000).
- Location of institution - NI domiciled full-time leavers from NI HEIs in full-time employment had an average salary of £19,675 (median £20,000). The equivalent figure for NI domiciled full-time leavers from GB HEIs was £21,285 (median £21,000).
- Location of employment – The average salary of NI domiciled full-time leavers in full-time employment in NI was £18,850 (median £18,000). NI domiciled full-time leavers in full-time employment in GB had an average salary of £23,055 (median £22,000). This difference is consistent with findings from DETI's NI annual survey

of hours and earnings. This survey reports that in April 2013 full-time employees in NI had the lowest median gross weekly earnings across the UK regions at approximately 89% of the UK figure.

- Standard Occupational Classification – The average salary of NI domiciled full-time first degree leavers in full-time employment was lowest for those in the Elementary Occupation Classification - £13,155 (median £13,000) and Sales and Customer Service - £13,515 (median £13,000) and highest for those in Professional Occupations - £22,380 (median £22,000).

Part-time leavers

- 6 months after leaving, the average salary of NI domiciled part-time leavers in full-time employment was £29,980 (median £26,550).
- Gender – NI domiciled part-time male leavers in full-time employment had an average salary of £33,590 (median £30,000). The equivalent figure for females was £27,265 (median £25,000).
- Level of study – The average salary of NI domiciled part-time first degree leavers in full-time employment was £24,630 (median £22,000), compared to other undergraduates - £28,245 (median £24,000) and postgraduates - £34,295 (median £31,000).

1.3 Further Study (Tables 10a – 11b)

Further study includes all those leavers primarily in work and also studying, primarily in study and also in work, full-time study and part-time study.

Full-time Leavers

- 19% of NI domiciled full-time leavers were in further study six months after leaving. Of those, 74% were studying for a postgraduate qualification, 8% for a first degree, 5% for other diplomas or certificates, 8% for a professional qualification, 4% for other qualifications and 1% not aiming for a qualification.
- Level of study – 20% of NI domiciled full-time first-degree leavers were in further study compared to 34% of other undergraduates and 10% of postgraduates. Of those in further study, first degree leavers were most likely to be studying for a postgraduate qualification (78%); other undergraduates were most likely to be studying for a first degree (69%) and postgraduates were most likely to be studying for another postgraduate qualification (73%).

SECTION 2: Destinations of leavers from Northern Ireland Higher Education Institutions in 2012/13 (Tables 12a to 24b)

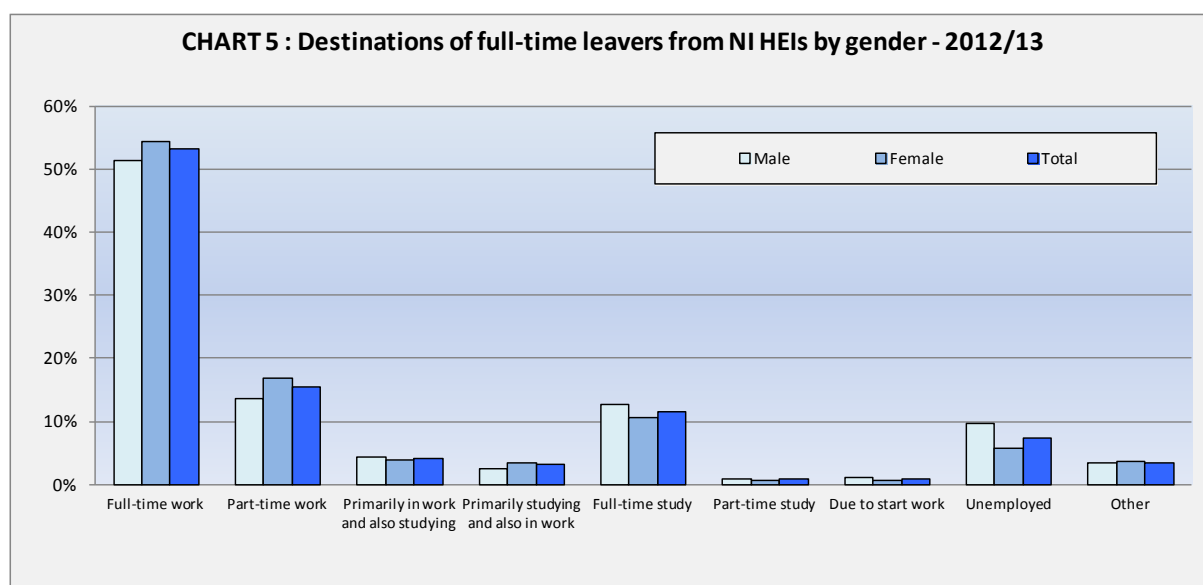

This section presents the findings for students who qualified from a NI HEI in 2012/13. Tables relating to this section can be found in [Annex 1](#).

2.1 Destinations six months after leaving

2.1.1 Destinations by mode, level, gender, domicile and institution (Tables 12a-14b, Chart 5)

Full-time leavers

- Six months after leaving, 53% of full-time leavers from NI HEIs were in full-time work, 15% were in part-time work, 4% primarily in work and also studying and 3% primarily studying and also in work – a total of 76% in some sort of employment.
- An additional 12% of leavers were in full-time study, 1% in part-time study, 7% unemployed, 1% due to start work and 3% of leavers were engaged in other activities.
- Gender – six months after leaving, 72% of full-time male leavers from NI HEIs were in employment compared to 79% of females. Males (10%) were more likely to be unemployed than females (6%).
- Level of study – six months after leaving, 75% of full-time first degree leavers from NI HEIs were in employment compared to 61% of other undergraduates and 81% of postgraduates. First degree leavers (13%) and other undergraduates (20%) were more likely to be in full-time study than postgraduates (5%).

- Country of domicile - NI domiciled (76%) full-time leavers from NI HEIs were more likely to be in employment six months after leaving than GB domiciled (68%) and ROI domiciled (71%) full-time leavers from NI HEIs.
- Institution – Full-time leavers from Stranmillis (80%), University of Ulster (UU) (78%) and St Mary's (78%) were more likely to be in employment six months after leaving than those from Queen's University, Belfast (QUB) (73%).

QUB (17%) and St Mary's full-time leavers (16%) were more likely to undertake full-time study than those from Stranmillis (11%) and UU (7%).

The unemployment rate of full-time leavers was highest at UU (10%). St Mary's (3%) and Stranmillis (3%) experienced low rates while QUB was slightly higher at 6%.

Part-time leavers

- Of those leavers from NI HEIs who were studying part-time 6 months after leaving, 69% were in full-time work, 11% in part-time work, 7% primarily in work and also studying and 1% primarily studying and also in work – a total of 89% in employment.
- The rest of the part-time leavers were in full-time study (4%), part-time study (1%), or unemployed (3%), with 3% of leavers were engaged in other activities.
- Gender – six months after leaving, 90% of part-time female leavers from NI HEIs were in employment compared to 87% of males. Males (72%) were more likely to be in full-time work than females (67%), with females more likely to be in part-time work (14%) than males (6%).
- Level of study – six months after leaving, 83% of part-time first degree leavers from NI HEIs were in employment compared to 86% of other undergraduates and 92% of postgraduates. First degree leavers (6%) and other undergraduates (4%) were more likely to be unemployed than postgraduates (1%).
- Country of domicile - GB domiciled (93%) part-time leavers from NI HEIs were more likely to be in employment six months after leaving than NI domiciled (89%) and ROI domiciled (85%) part-time leavers from NI HEIs.
- Institution⁵ – Part-time leavers from the University of Ulster (90%) and Queen's University, Belfast (88%) were more likely to be in employment six months after leaving than those from Stranmillis (70%).

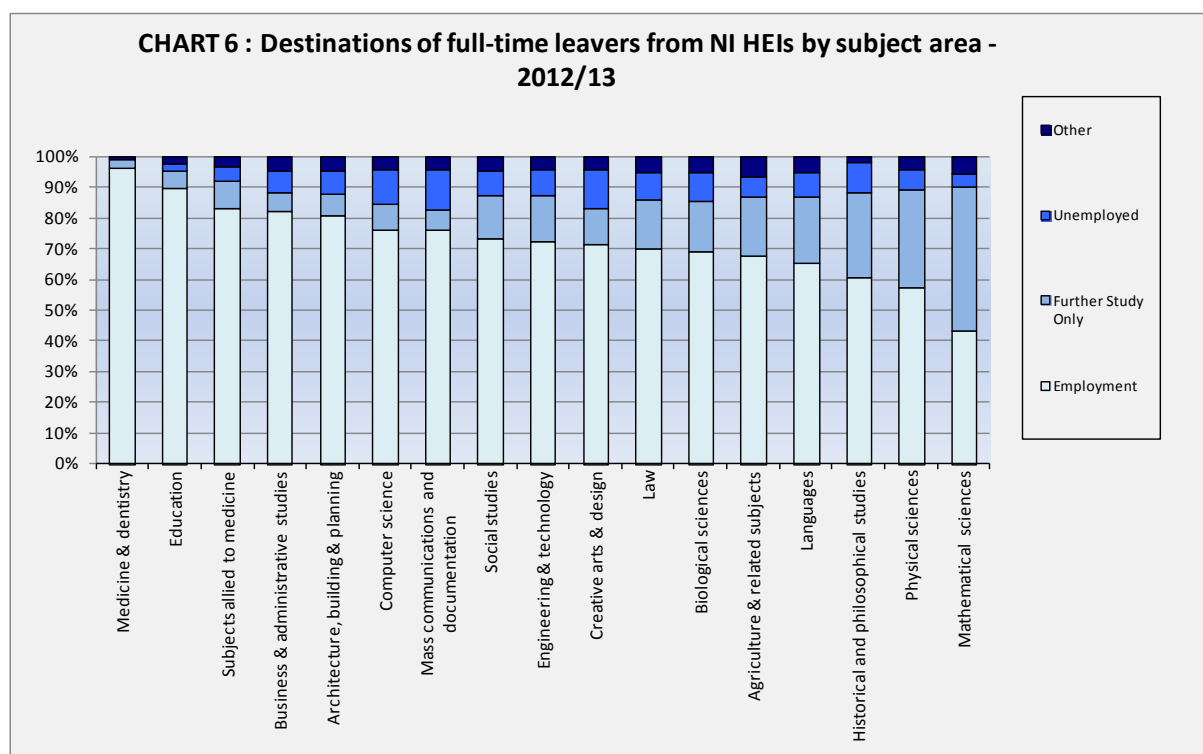

Stranmillis (18%) and QUB (7%) part-time leavers were more likely to undertake full-time study than those from UU (3%).

⁵ The number of part-time leavers from St Mary's was too small to allow reliable comparison of employment or full-time study.

2.1.2 Destinations by subject area studied (Tables 15a and 15b, Chart 6)

Full-time leavers

- 6 months after leaving, the subject areas with the highest proportion of full-time leavers from NI HEIs in employment were Medicine & Dentistry (96%), Education (89%), and Subjects Allied to Medicine (83%).
- The subject areas with the lowest proportion of full-time leavers from NI HEIs in employment were Languages (65%), Historical & Philosophical Studies (60%), Physical Sciences (58%) and Mathematical Sciences (44%). However, these subjects had some of the highest proportion of leavers going into further study only. For example 47% of Mathematical Sciences students were recorded in this category.
- The unemployment rate was highest for full-time leavers from NI HEIs who studied Creative Arts & Design (13%), Mass Communication & Documentation (13%) and Computer Science (11%). An unemployment rate of 0% was recorded for Medicine & Dentistry leavers.

2.1.3 Destinations - UK comparison (Tables 16a and 16b)

Full-time leavers

- Full-time leavers from NI HEIs were more likely to be in employment 6 months after leaving (76%) than leavers from English (74%), Scottish (74%) and Welsh (72%) HEIs, however they were also more likely to be unemployed (7%) than their counterparts from English (6%), Welsh (6%) and Scottish (5%) HEIs.
- 16% of full-time leavers from Scottish HEIs were in full-time study, compared to 12% from NI HEIs, 13% from English HEIs and 15% from Welsh HEIs.

Part-time leavers

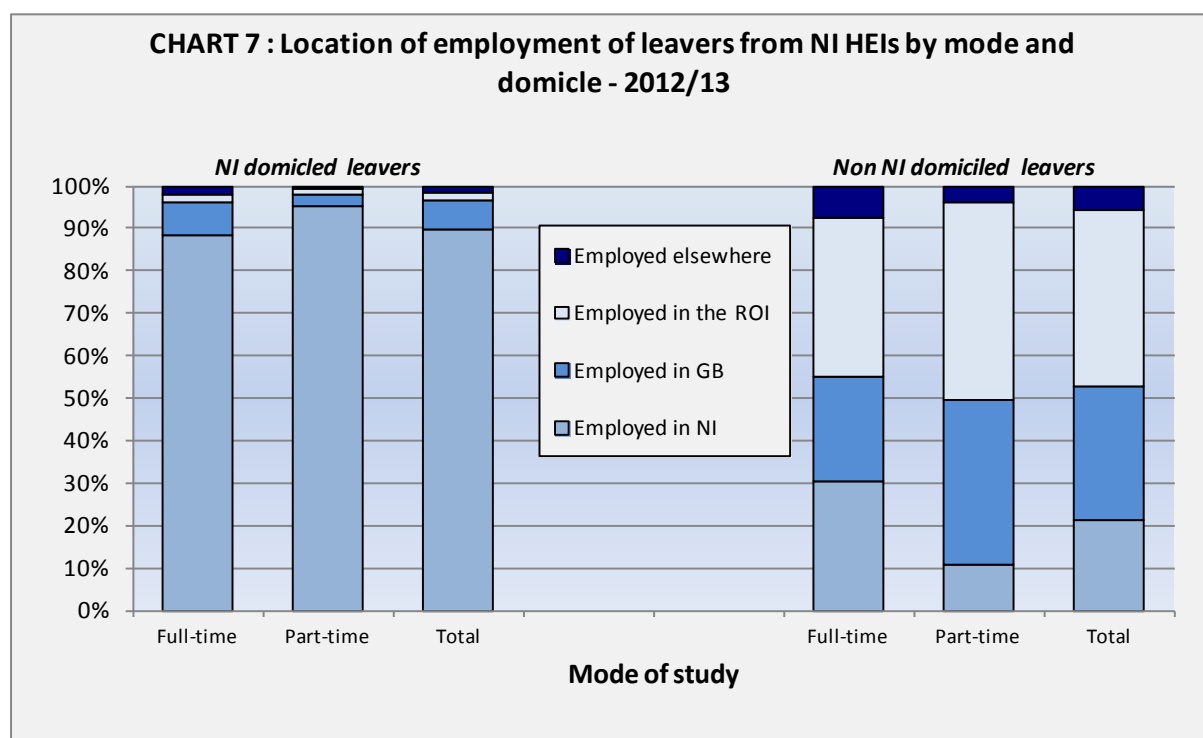

- 89% of part-time leavers from NI HEIs were in employment, compared to 85% from English HEIs, 87% from Scottish HEIs and 91% from Welsh HEIs.
- However, part-time leavers from NI and English HEIs (3%), were more likely to be unemployed than those from Scottish and Welsh (2%) HEIs.

2.2 Employment

2.2.1 Employment - Location of Employment (Tables 17a-g, Chart 7)

Full-time leavers

- Of those full-time leavers from NI HEIs in employment six months after leaving, 84% were employed in NI, 9% in GB, 5% in ROI and 2% elsewhere.
- Country of domicile – Approximately 88% of NI domiciled full-time leavers from NI HEIs in employment were employed in NI, 8% in GB, 2% in ROI and 2% elsewhere. The comparable figures for non NI domiciled leavers from NI HEIs are 30% employed in NI, 25% in GB, 38% in ROI and 7% elsewhere.
- Gender – 84% of full-time female leavers from NI HEIs in employment were employed in NI compared to 83% of males.
- Level of study - 86% of full-time first degree leavers from NI HEIs in employment were employed in NI compared to 93% of other undergraduates and 74% of postgraduates.

Part-time leavers

- 78% of part-time leavers from NI HEIs in employment after six months were employed in NI, 10% were employed in GB, 10% in ROI and 1% elsewhere.
- Country of domicile – 95% of NI domiciled part-time leavers from NI HEIs in employment were employed in NI, compared to 11% of non NI domiciled part-time leavers from NI HEIs.
- Gender – 82% of part-time male leavers from NI HEIs in employment were employed in NI compared to 77% of females.
- Level of study - 87% of part-time first degree leavers from NI HEIs in employment were employed in NI compared to 79% of other undergraduates and 74% of postgraduates.

2.2.2 Employment – Standard Occupational Classification (SOC) (Tables 18a and 18b)

Full-time leavers

- Of those entering employment 6 months after leaving, 66% of full-time leavers from NI HEIs took up positions in the top three SOC groups (Managers & Senior Officials, Professional Occupations or in Associate Professional & Technical Occupations).
- Gender – 69% of full-time male and 63% of full-time female leavers from NI HEIs in employment were employed in the top three SOC groups.
- Level of study - 63% of full-time first degree leavers from NI HEIs in employment were employed in the top three SOC groups, compared to 44% of other undergraduates and 78% of postgraduates.

Part-time leavers

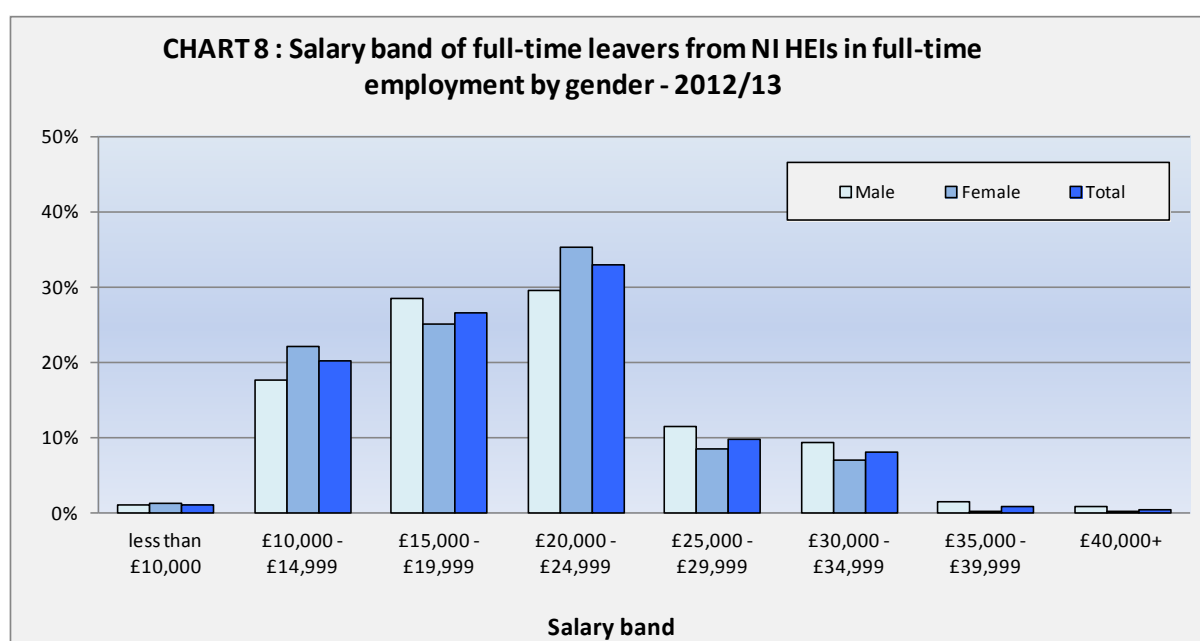

- Of those entering employment, 85% of part-time leavers from NI HEIs took up positions in the top three SOC groups (Managers & Senior Officials, Professional Occupations or in Associate Professional & Technical Occupations).
- Gender – The same proportion (85%) of part-time male and female leavers from NI HEIs in employment were employed in the top three SOC groups.
- Level of study - 71% of part-time first degree leavers from NI HEIs in employment were employed in the top three SOC groups, compared to 81% of other undergraduates and 93% of postgraduates.

2.2.3 Employment – Salary of those in Full-time employment (Tables 19-22, Chart 8)

Salary is not a mandatory question in the DLHE survey resulting in a high non-response rate. Leavers in full-time employment whose salary was unknown have been excluded from the analysis; this represents 38% of those respondents in full-time employment. Caution should therefore be taken when using these figures.

Full-time leavers

- 6 months after leaving, the average salary of full-time leavers from NI HEIs in full-time employment was £19,835 with a median of £20,000.
- Gender – Full-time male leavers from NI HEIs in full-time employment had an average salary of £20,395 (median £20,000). The equivalent figure for females was £19,430 (median £20,000).

- Level of study – The average salary of full-time first degree leavers from NI HEIs in full-time employment was £19,555 (median £20,000), compared to postgraduates - £21,525 (median £21,000). The number of full-time other undergraduates was too small to allow reliable comparison of salary.
- Country of domicile – NI domiciled full-time leavers from NI HEIs in full-time employment had an average salary of £19,675 (median £20,000). The equivalent figure for GB domiciled full-time leavers from NI HEIs was £19,330 (median £18,000), although the GB domiciled figures are based on small numbers in comparison to the NI domiciled.
- Location of employment – The average salary of full-time leavers from NI HEIs in full-time employment in NI was £19,020 (median £19,000). Full-time leavers from NI HEIs in full-time employment in GB had an average salary of £23,545 (median £23,000). This difference is consistent with findings from DETI's NI annual survey of hours and earnings. This survey reports that in April 2013 full-time employees

in NI had the lowest median gross weekly earnings across the UK regions at approximately 89% of the UK figure.

- Standard Occupational Classification – The average salary of full-time first degree leavers from NI HEIs in full-time employment was lowest for those in the Elementary Occupation Classification - £12,570 (median £12,000) and highest for those in Professional Occupations - £21,960 (median - £21,675).

Part-time leavers

- 6 months after leaving, the average salary of part-time leavers from NI HEIs in full-time employment was £31,475 (median £28,000).
- Gender – Part-time male leavers from NI HEIs in full-time employment had an average salary of £35,085 (median £30,000). The equivalent figure for females was £29,370 (median £28,000).
- Level of study – The average salary of part-time first degree leavers from NI HEIs in full-time employment was £25,630 (median £23,500), compared to other undergraduates - £28,575 (median £25,000) and postgraduates - £35,115 (median £32,000).

2.3 Further Study (Tables 23a – 24b)

Further study includes all those leavers primarily in work and also studying, primarily in study and also in work, full-time study and part-time study.

Full-time leavers

- 20% of full-time leavers from NI HEIs were in further study six months after leaving. Of those, 77% were studying for a postgraduate qualification, 6% for a first degree, 5% for other diplomas or certificates, 8% for a professional qualification, 4% for other qualifications and 1% not aiming for a qualification.
- Level of study – 21% of full-time first-degree leavers from NI HEIs were in further study compared to 35% of other undergraduates and 10% of postgraduates. Of those in further study, first degree leavers were most likely to be studying for a postgraduate qualification (79%), while other undergraduates (59%) were most likely to be studying for a first degree qualification and postgraduates were most likely to be studying for another postgraduate qualification (76%).

General

1. This statistical bulletin has been produced by the Department for Employment and Learning, Northern Ireland (NI), using data collected by the Higher Education Statistics Agency (HESA) through the annual Destination of Leavers from Higher Education (DLHE) survey. The DLHE survey is carried out six months after students leave HE.
2. The bulletin is divided into two sections. Section 1 focuses on destinations of NI domiciled students who gained qualifications at Higher Education Institutions (HEIs) in NI, England, Scotland and Wales (UK) and Section 2 concentrates on destinations of all students who gained qualifications at NI HEIs. NI domiciled students at NI HEIs are included in both sections, accounting for 69% of Section 1 and 88% of Section 2.
3. HESA - The Higher Education Statistics Agency (HESA) is the official agency for the collection of information on publicly funded Higher Education institutions (HEIs) in the UK. It was set up in 1993 following the white paper "Higher Education: a new framework", which called for more coherence in Higher Education statistics. HEIs include all publicly funded universities. HESA data do not include enrolments at Further Education colleges in Northern Ireland or Great Britain, or enrolments at institutions in the Republic of Ireland.
4. DLHE survey – This Statistical Bulletin is based on data returned to HESA in respect of the new version of the 'Destinations of Leavers from Higher Education (DLHE) survey. The DLHE survey carried out annually was re-designed to collect richer information from leavers particularly regarding their activities on the survey date. From 2011/12 onwards Leavers now report all the activities that they are undertaking on the census date and then indicate which one they consider to be most important to them. From these responses, destination categories are derived taking into account the most important activity and, in some instances, other activities the leaver is involved in. HESA released a publication on the 2012/13 DLHE on 24th July 2014, providing a high level UK analysis. The HESA report can be downloaded from the HESA website at <https://www.hesa.ac.uk/sfr205>
5. Target population – The HESA DLHE report's target population includes all UK and European Union domiciled leavers at a UK HEI and who obtained relevant qualifications (see note 10) reported to HESA for the reporting period 1st August 2012 to 31st July 2013. The coverage of the survey was expanded to include additional HE qualifications and now includes Non-EU domiciled leavers as part of a pilot. Surveying these leavers was undertaken with a clear distinction that the information collected should not be published until carefully reviewed.
6. Exclusions - The population for this DLHE bulletin does not represent the full cohort of leavers during the reporting period; examples of those excluded from the target population are listed below:
 - Leavers qualifying with professional qualifications (e.g. associate membership or membership of a body such as the Institute of Bankers) or undergraduate diplomas and certificates (other than foundation degrees, HND, DipHE, HNC and CertHE).

- Non EU domiciled leavers.
 - Leavers whose mode of study was recorded as dormant during the reporting period. (This will include for example students submitting a thesis and students retaking exams during the reporting period).
7. Response rate - Of all NI domiciled leavers from UK HEIs and for all leavers from NI HEIs for whom DLHE information was expected, 82% responded (85% of full-time and 74% of part-time leavers).
 8. Not Known – Responses of not known have been included in the tables, but have been excluded for calculating percentages in the analysis.
 9. The survey dates for the 2012/13 DLHE return were 15 April 2013 (if the leaver obtained the qualification between 1 August 2012 and 31 December 2012) and 13 January 2014 (if the leaver obtained the qualification between 1 January 2013 and 31 July 2013).
 10. Leaver's Activities - In the DLHE survey leavers are able to report what they are doing in relation to both employment and study. If not ineligible, or have explicitly refused to provide information, respondents were able to report up to eight individual activities, of which one must be indicated to be the 'most important'.

These activities are as follows:

- Working full-time (including self-employed/freelance, voluntary or other unpaid work, developing a professional portfolio/creative practice or on an internship)
- Working part-time (including self-employed/freelance, voluntary or other unpaid work, developing a professional portfolio/creative practice or on an internship)
- Unemployed and looking for work
- Due to start a job in the next month
- Engaged in full-time further study, training or research
- Engaged in part-time further study, training or research
- Taking time out in order to travel
- Something else

These activities are used to derive a category for publication that reflects the range of activities undertaken. Leavers identified as ineligible, or who have explicitly refused to provide information, are grouped for publication as 'Ineligibility or explicit refusal'. All other respondents are categorised according to their range of activities as follows:

Derived Activity Categories for DLHE Publication 2012/13

Most important activity (Only one category indicated here by the student)	If any other activity includes (Student also indicates other activities they are involved in)	Derived activity Category (Student's most important activity is combined with other activities and used to derive these categories for publication purposes).
Working full-time	Engaged in full-time study, training or research OR Engaged in part-time further study, training or research	Primarily in work and also studying
	Otherwise	Full-time work
Working part-time	Engaged in full-time study, training or research OR Engaged in part-time further study, training or research	Primarily in work and also studying
	Otherwise	Part-time work
Unemployed and looking for work		Unemployed
Due to start a job in the next month	Working full-time	Full-time work
	Engaged in full-time further study, training or research, provided that Working full-time has not been selected.	Full-time study
	Working part-time, provided that Working full-time AND Engaged in full-time further study, training or research have not been selected.	Part-time work
	Otherwise	Due to start work
Engaged in full-time further study, training or research	Working full-time OR Working part-time	Primarily studying and also in work
	Otherwise	Full-time study
Engaged in part-time further study, training or research	Working full-time OR Working part-time	Primarily studying and also in work
	Otherwise	Part-time study
Taking time out in order to travel Something else		Other
		Other

11. UK comparison – Comparative data for England, Scotland, Wales and Northern Ireland can be downloaded from the HESA website at the following page:

<https://www.hesa.ac.uk/sfr205>

12. Further statistics on the NI higher education sector, including enrolments, qualifications gained and various higher education fact sheets can be downloaded from the Department's website - <http://www.delni.gov.uk/higher-education-stats>

13. Quality of HE statistics - Information on the collection, validation and quality assurance of HE data and statistics, and the quality guidance used in managing the production of HE statistics can be accessed from the following link - www.delni.gov.uk/he-statistical-methods.htm

14. Uses made of HE statistics

This bulletin is disseminated directly to approximately 50 users. In addition, it is also published on the Department's website and the UK National Statistics publication hub (www.statistics.gov.uk/hub/index.html). Users include policy colleagues in DEL, academics, researchers, members of the public, the NI Assembly, other government departments and other interested parties and individuals.

The bulletin and further analysis of the data provide an evidence base that is used in a number of DEL policies, strategies and reviews. Some recent examples are: -

- Graduating to Success - DEL's Higher Education Strategy
- Access to Success - DEL's Widening Participation Strategy
- Delivering Success through Excellence – an analysis of the Quality and Performance of DEL's Programmes and Provision.
- Review of Initial Teacher Education.

Further details on these strategies are available from the DEL website:

<http://www.delni.gov.uk/index/further-and-higher-education/higher-education.htm>

In addition, HE data are used within other NI departments and their agencies. Some of the most recent examples are: -

- DFP - as a key indicator in the Education Domain of the Northern Ireland Multiple Deprivation Measure.
- The Northern Ireland Economic Strategy
- Invest NI – to quantify the supply of graduates for potential inward investment to NI

Approximately 200 HE statistical enquiries per year are received by the Department from various sources. These include requests for further breakdowns of enrolments, qualifications and destinations data.

In addition, approximately 25 assembly questions (either written or oral), relating to HE data, are received by the Department each year.

15. Rounding Strategy - Figures in the attached tables are rounded to the nearest 5, with 0, 1, 2 rounded to 0. Due to rounding the sum of numbers in each row or column may not match the total shown. Percentages and averages are based on unrounded figures. Percentages are rounded to the nearest whole number; therefore the sum of percentages may not match totals.

Definitions

16. Higher education students for the purpose of HESA's data collection are those students on courses for which the level of instruction is above that of level 3 of the Qualifications and Curriculum Authority (QCA) National Qualifications Framework (NQF) (e.g. courses at the level of Certificate of HE and above).
17. Qualifiers in employment include those in full-time work, part-time work, voluntary work, those combining work and study and those in work whose mode of work is unknown.
18. Relevant qualifications for inclusion in the 2012/13 DLHE return are listed below:

Postgraduate

Doctorate degrees, Postgraduate Certificates in Education, Other Postgraduate qualifications include masters degrees; other postgraduate qualifications obtained primarily through advanced supervised research; Masters of Business Administration (MBA); pre-registration masters degrees and other taught qualifications at level M leading towards obtaining eligibility to register to practice with a health or social care or veterinary statutory regulatory body; postgraduate bachelors degrees at level M; other taught qualifications at level M including those leading towards registration with the Architects Registration Board (Part 2 qualification).

First degree

Integrated undergraduate/postgraduate taught masters degrees on the enhanced/extended pattern, and first degrees with honours on the enhanced/extended pattern at level H; first degrees with honours/ordinary first degrees (including those leading to qualified teacher status (QTS)/registration with a General Teaching Council (GTC), but excluding those from the intercalated pattern); first degrees with honours leading towards registration with the Architects Registration Board (Part 1 qualification); pre-registration first degrees with honours/ordinary first degrees leading towards obtaining eligibility to register to practice with a health or social care or veterinary statutory regulatory body; first degrees with honours and diploma; postgraduate bachelors degrees at level H.

Other undergraduate

Foundation degrees, graduate diplomas/certificates at level H; other qualifications at level H including those leading towards registration with the Architects Registration Board (Part 2 qualification); graduate diplomas/certificates at level I; Diplomas of Higher Education (DipHE) (including those leading towards obtaining eligibility to register to practice with a health or social care or veterinary statutory regulatory body); Higher National Diplomas (HND); Certificates of Higher Education (CertHE); Higher National Certificates (HNC).

19. Domicile refers to a student's permanent place of residence prior to enrolment on an HE course.

20. GB includes England, Scotland, Wales, Guernsey, Jersey and the Isle of Man.

21. The Open University is counted as a wholly English institution. The administrative centre is located in England, although The Open University teaches throughout the UK.

22. Occupation

In 2011 HESA adopted the SOC2010 Standard Occupational Classification (which replaced SOC2000), for comparability of sector data with other areas of the economy. A variant of the SOC2010 was created for the coding of occupational information collected in the DLHE survey. The classification is termed SOC2010 (DLHE) and details are available from the Downloadable files section of the HESA DLHE coding manual www.hesa.ac.uk/C11018 on the HESA website (Standard Occupational Classification (2010) for the Destinations of Leavers from Higher Education Institutions: SOC 2010 (DLHE)).

23. Mode of study distinguishes students studying full-time or part-time:

- I. *Full-time* includes full-time and sandwich modes plus those writing-up where the mode of study was previously full-time and students changing to dormant status previously full-time.
- II. *Part-time* includes those studying part-time, full-time for less than 24 weeks in the academic year, block release or studying during the evenings, plus those writing-up theses and previously part-time.

Media enquiries should be made to the Department's Press Office in Adelaide House, 39-49 Adelaide Street, Belfast, BT2 8FD, telephone (028) 9025 7793

ANNEX 1: TABLES

Table 1a: Destinations of Northern Ireland domiciled leavers from UK HEIs by mode of study, level of study and gender - 2012/13

Mode	Level	Gender	Destinations										Total respondents	Non-respondents	Target population	Employment
			Full-time work	Part-time work	Primarily in work and also studying	Primarily studying and also in work	Full-time study	Part-time study	Due to start work	Unemployed	Other	Not known				
Full-time	First Degree	Male	1,900	440	140	110	485	30	40	310	125	155	3,735	565	4,300	2,590
		Female	2,720	735	170	180	540	30	40	240	195	205	5,060	865	5,925	3,805
		Total	4,625	1,175	310	290	1,025	65	80	550	320	360	8,795	1,430	10,225	6,395
	Other Undergraduate	Male	80	20	10	5	45	0	0	35	5	15	220	95	315	115
		Female	80	20	5	15	40	5	0	10	10	20	210	85	295	120
		Total	160	40	20	20	85	10	0	40	15	40	430	180	610	240
	All Undergraduate	Male	1,980	460	150	115	530	35	40	345	130	175	3,955	660	4,615	2,705

Note: Although it looks like there is a 100% employment rate for NI domiciled part-time leavers from Wales HEIs, this is based on a very small number of respondents and does not allow for a reliable comparison with NI domiciled leavers from other countries of institution.
