1 Enquiries about Results (EaR)

Introduction

In order to fulfil our regulatory and accreditation functions as set out in the Apprenticeships, Skills, Children and Learning Act 2009¹, we require awarding organisations to provide exams delivery data for regulated qualifications.

When will data be collected?

Data will be collected according to the reporting schedule which is agreed and maintained by Ofqual's Data Services team.

What data will be collected?

Enquiries about Results data will be collected for GCE and GCSE. If you offer these qualifications, you must upload a line of data for it, even if it is a line of zeros.

How will the data be collected?

Awarding Organisations will need to login to the secure FTP site and upload a CSV file to the relevant folder, e.g. T8 EaR_S1.

In each folder, there will also be two sub folders called **Valid** and **Invalid**. Every time a file is uploaded, the validation process will generate a report, either confirming the file is valid or invalid.

This report will then be placed in the **Valid** or **Invalid** folder for reference. When an invalid report has been generated, a notification e-mail will be sent to AOs and the invalid CSV file will be removed from the folder it was placed in so that a replacement file can be uploaded.

General completion guidelines

- If submitting country specific data, awarding organisations should enter the relevant country. Alternatively, if submitting total figures for all three countries combined, the word '**All**' should be entered in the country field.
- Some of the fields do not require a value to be entered on the first submission of data and some will not be required until the final submission of data. Until a value is available a figure of zero should be entered in these fields.
- Numeric values must not have any formatting.
- Commas must not be present in any field, unless the text is enclosed by speech marks.

2 File formats

Standard formats

The first row of the file must be headers as displayed in the 'Name' column of the table below. The subsequent rows must have the values of the data to be reported which must match the format and validation rules below.
