## Science sampling

### Booklet 2B

First name						
Middle name						
Last name						
Date of birth	Day		Month		Year	
School name						

**[BLANK PAGE]**

Please do not write on this page.

## Instructions

Please read this carefully.

### Questions and answers

You have **25 minutes** to complete this test.

Follow the instructions for each question.

This pencil shows where you will need to put your answer.

For some questions you may need to draw an answer instead of writing one.

Do not write or draw over any barcodes or in the grey margins.

If you cannot do one of the questions, **go on to the next one**.

You can come back to it later, if you have time.

If you finish before the end, **go back and check your work**.

### Marks

The number under each box at the side of the page tells you the maximum number of marks for each question.

# 1 Duck pond

**a** Peter goes to the duck pond with his grandad and his dog.

Tick **TWO** boxes to show two things that are true about a **dog** and a **duck**.

They both have fur.

They both move.

They both lay eggs.

They both breathe.

a1 a2

a3 a4

1 mark  
S000362\_01

**b** Two of the ducks come out of the pond.

Male duck

Female duck

(i) Describe how a duck's feet are adapted for swimming.

\_\_\_\_\_

b1

1 mark  
S000362\_02

Why do the two ducks look different?

The female needs to stay hidden when she sits in her nest.

(ii) Why would the female duck be hard to see in a nest?

\_\_\_\_\_

bii

1 mark  
S000362\_03

(iii) Explain why the female duck needs to stay hidden when she is in her nest.

\_\_\_\_\_

biii

1 mark  
S000362\_04

c

Peter sees some piles of soil on the grass near the pond.

Grandad tells him that the piles of soil are made by animals called moles.

Look at the picture of a mole.

- (i) Describe how a feature of the mole helps the mole to live underground.

Feature: \_\_\_\_\_

How it helps: \_\_\_\_\_

ci

1 mark  
S000362\_05

- (ii)

Why do moles live in soil?

To find earthworms to eat, and to hide in the soil.

Which word **cannot** be used to describe a mole?  
Tick **ONE** box.

prey

producer

predator

consumer

cii

1 mark  
S000362\_06

## 2 Seed dispersal

**a** The diagram shows a flower cut in half.

Put a **cross (X)** on the diagram to show where the seed develops.

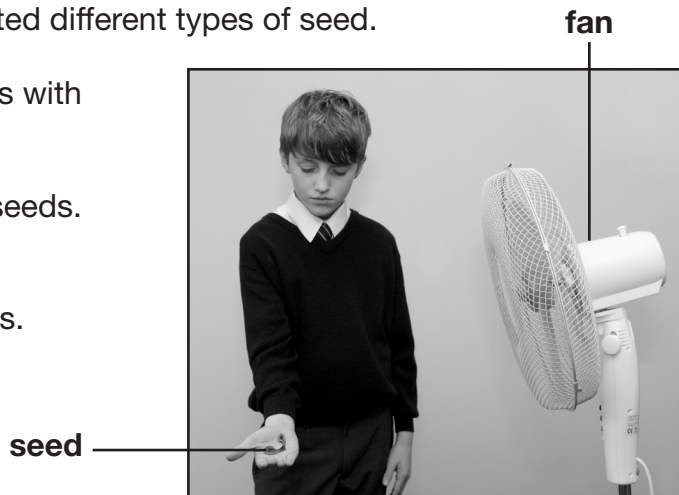

1 mark  
S000273\_01

**b** Class 6 have collected different types of seed.

They blow the seeds with a fan.

This disperses the seeds.

They measure how far each seed travels.

What equipment can measure how far the seeds travel?

\_\_\_\_\_

1 mark  
S000273\_02

**c** The seeds can be blown by the children's mouths or with a fan.

Explain why the fan helps to make the test fair.

\_\_\_\_\_  
\_\_\_\_\_

1 mark  
S000273\_03

d

Here is a table of the children's results using a fan.

Plant	sycamore	apple	bulrush	oak
Seed				
Distance travelled (cm)	76	27	149	0

The sycamore seed and bulrush seed travel the furthest distances.

They fall slowly from the plant so the wind has more time to blow them away.

Tick **ONE** box to show which features of the seeds help them to fall slowly.

They are smooth and soft.

They have a large area and are heavy.

They have a large area and are light.

They are flexible and soft.

d

1 mark  
S000273\_04

e

Name the force that **slows** the seeds as they fall.

\_\_\_\_\_

e

1 mark  
S000273\_05

f

The children dispersed the seeds with a fan.  
The fan disperses seeds like the wind does in nature.

Name **ONE** other way seeds are dispersed in nature.

\_\_\_\_\_

f

1 mark  
S000273\_06

### 3 Grass heads

a

Class 6 are investigating how grass grows.

They grow grass on grass heads filled with sand.

They keep their grass heads standing in dishes of water so they do not dry out.

All plants need water to grow.

Name **TWO** other things that all plants need to grow.

\_\_\_\_\_ and \_\_\_\_\_

a1

a2

1 mark  
S000226\_01

b

Some children give their grass head a hat.

They keep all other conditions the same.

The children **predict** that when the grass under the hat grows, it will look more yellow than the grass not covered by the hat.

Give **ONE** reason why the grass under the hat might look more yellow.

\_\_\_\_\_

b

1 mark  
S000226\_02

c

Class 6 use a ruler to measure the height of the grass every week.

The grass grows to different heights so it is difficult to know which piece of grass to measure.

Write **yes** or **no** next to each idea to show if it is a good way for class 6 to measure the height of the grass each week.

 <b>Class 6 could measure the height of the grass by...</b>	<b>Yes or no?</b>
finding an average length of several pieces of grass.	
measuring the length of a different piece of grass each week.	

c1  
c2

1 mark  
S000226\_03

d

Some other children put their grass head in a sealed, dry plastic bag.

They keep all other conditions the same.

They observe that droplets of water form on the inside of the bag.

plastic bag

Tick **ONE** box to explain why droplets of water form on the inside of the plastic bag.

 Water...

condenses from the grass head and evaporates on the bag.

dissolves from the grass head and evaporates on the bag.

evaporates from the grass head and condenses on the bag.

dissolves from the grass head and condenses on the bag.

d

1 mark  
S000226\_04

## 4 Smallpox

a

Smallpox and cowpox are diseases. People who catch smallpox can die.

Dr Jenner discovered how to stop people catching smallpox.

I think that people who have had cowpox will not catch smallpox.

**Dr Jenner (1749 – 1823)**

(i) What sort of statement did Dr Jenner make? Tick **ONE** box.

explanation

prediction

comparison

observation

 ai

1 mark  
S000360\_01

(ii) Dr Jenner did a test to find out if his statement was true.

He infected a boy called James with cowpox.

James got better.

Describe what Dr Jenner must have done next **and** also describe the evidence needed to show that his statement was true.

---

---

 aii

2 marks  
S000360\_02

(iii) Dr Jenner tested other people.

Why did Dr Jenner test other people?

---

 aiii

1 mark  
S000360\_03

**b**

Not everyone had Dr Jenner's treatment.

In 1844 many people died from smallpox.

The table shows how many people died from smallpox at different ages in London.

Age (years)	Number of people who died from smallpox
10	226
20	240
30	98
40	43
50	13
60	19
70	10
80	10

How many people who were 30 years old died from smallpox?

 \_\_\_\_\_

 b

1 mark  
S000360\_04

**c**

Holly looks at the information in the table.

The younger the person the more likely they were to die of smallpox.

**Holly**

Explain why Holly cannot be sure of her conclusion.

 \_\_\_\_\_  
\_\_\_\_\_

 c

1 mark

# 1 Camels

a

Camels can live in hot places.

Some features of a camel's body help it to survive in a hot desert.

Match each feature below to show how it helps the camel survive in the desert.

One has been done for you.

## Camel's features

long legs

wide feet

thick fur

long eyelashes

thick, leathery lips

## How feature helps

keep the camel's body further from the hot sand

protect camels when eating prickly plants

help camels stay on top of the sand

protect camels against sand blowing in the air

protects camels from getting sunburnt

a1

a2

a3

a4

2 marks  
S000211\_01

## 2 Tree

a

Ella is looking at some leaves.

The key below identifies which tree each leaf comes from.

### Key to tree leaves:

① Is the leaf long and thin?

Yes: GO TO ②

No: GO TO ③

② Is the edge of the leaf smooth?

Yes: **Laurel**

No: **Sweet chestnut**

③ Is the edge of the leaf smooth?

Yes: **Lilac**

No: **Silver birch**

Look at this picture of a leaf from one of the trees.

- (i) Use the key above to identify the tree it comes from.

The leaf is from a \_\_\_\_\_ tree.

ai

1 mark  
S000330\_01

- (ii) Tick **ONE** box to show why it is useful to identify plants and put them into groups.

so we know where to find a plant

because there is a large variety of plants

in case the plants become extinct

so we can observe the plants in their habitats

aii

1 mark  
S000330\_02

b

Complete the sentences below to show the function of the leaves and roots.

 (i) The tree uses its leaves to \_\_\_\_\_.

(ii) The tree has roots to \_\_\_\_\_.

bi

1 mark  
S000330\_03

bii

1 mark  
S000330\_04

c

Ella finds a seed.

Why does the tree need to produce seeds?

 \_\_\_\_\_

c

1 mark  
S000330\_05

d

Squirrels live in trees.

Give **ONE** feature of the **squirrel** from the picture.  
Describe how this feature helps the squirrel to live in a tree.

 Feature of the squirrel that helps it live in a tree: \_\_\_\_\_

How the feature helps: \_\_\_\_\_

\_\_\_\_\_

d

1 mark  
S000330\_06

### 3 Human life cycle and pulse rate

a

Ella is learning about the human life cycle.

She collects pictures of people of different ages.

Label the photographs to name stages **B** and **D** in the human life cycle.

A

B

C

D

E

baby

\_\_\_\_\_

teenage

\_\_\_\_\_

old age

a1

a2

1 mark  
S000279\_01

b

Ella wonders if pulse rate is affected by the different stages in the human life cycle.

Complete the sentence below about pulse rate.

Pulse rate measures how quickly the \_\_\_\_\_ pumps blood around the body.

b

1 mark  
S000279\_02

c

Ella measures the resting pulse rate of people from each of the life stages.

Ella's test would not be fair if she measured some people's pulse rates after they were exercising instead of after resting. Explain why.

---

---

c

1 mark  
S000279\_03

d

The table shows Ella's results.

Stage of the human life cycle	Average resting pulse rate (beats per min)
A (baby)	135
B	97
C	84
D	72
E (old age)	76

Ella concludes, 'The older you are, the slower your resting pulse rate is.'

The evidence in Ella's results does **not** support her conclusion.

Use Ella's results to explain why they do **not** support her conclusion.

---

---

1 mark  
S000279\_04

e

People who are fit have lower resting pulse rates than people who are unfit.

Write **yes** or **no** on each row of the table to show if the activities are likely to affect a person's resting pulse rate.

Activity	Will the activity affect a person's resting pulse rate? Yes or no?
swim every day	
go for a walk every day	
read every day

S000279\_05

## 4 Penicillin

a

In 1928 a scientist called Alexander Fleming grew micro-organisms called bacteria. Growth shows that bacteria are living things.

The bacteria grew on agar (jelly) in glass dishes.

After a few days Fleming saw mould growing in one of the glass dishes.

- (i) Sort the five things in the box below into **living** and **non-living** things. One has been done for you.

bacteria    glass dish    mould    agar (jelly)    human

Living things	Non-living things
bacteria	

ai1

ai2

ai3

ai4

1 mark  
S000204\_01

- (ii) Growing is a life process.

Name **ONE** other life process.

aii

1 mark  
S000204\_02

**b**

Bacteria can cause disease.

Fleming thought he could use the mould to help cure disease caused by bacteria.

Look at the pictures opposite for **Day 1** and **Day 6**.

Use the evidence in the pictures opposite to explain why Fleming thought the mould could be used to cure disease.

---

---

1 mark  
S000204\_03

**c**

Fleming used the mould to make a medicine called penicillin.

It took over 10 years for penicillin to be first used by doctors.

Write **true** or **false** next to each statement to show why it took a long time for penicillin to be used as a medicine.

**True or false?**

The medicine had to be tested to make sure it was safe. \_\_\_\_\_

Scientists had to find a way of making lots of penicillin at a time. \_\_\_\_\_

It took 10 years for the mould to start growing. \_\_\_\_\_

Fleming needed to check that his ideas were correct. \_\_\_\_\_

c4

2 marks  
S000204\_04

## 5 Plants on the school field

a

Some children are finding out about plants. They get three buttercup plants. They put each plant in a place with different conditions.

After two weeks, the buttercup plants look like this:

Place A

Place B

Place C

Write **A**, **B**, and **C** in the table below to match each place to the conditions found there.

Place	Conditions	
	Does the plant have light?	Does the plant have water?
	✓	✓
	✓	✗
	✗	✓

a1

a2

a3

1 mark  
S000289\_01

b

There are differences between plants. These differences help people sort plants into groups.

Write **true** or **false** next to each reason that explains why plants need to be sorted into groups.

Plants need to be sorted into groups...

**True or false?**

to stop plants becoming extinct.

\_\_\_\_\_

to help people identify plants.

\_\_\_\_\_

to help plants reproduce.

\_\_\_\_\_

b1

b2

b3

1 mark  
S000289\_02

c

The children look at different plants on the school field.

They record the number of common plantain and buttercup plants in 1m<sup>2</sup> in different places.

Common plantain

Buttercup

The children think they see a pattern in the place that the plants grow.

The table shows their results.

How many children are playing in each place?	Number of plants (in 1m <sup>2</sup> )	
	common plantains	buttercups
lots	12	0
some	4	3
few	1	9

Describe the relationship between **how many children** are playing in a place and the **number of common plantains** found there.

---

---

1 mark  
S000289\_03

d

The buttercup plant has a long thin stem.

The long thin stem of the buttercup plant stops it surviving in places where lots of children play. Explain why.

## 2 Flowing oil

a

Jay and Lana want to find out how quickly cooking oil flows at different temperatures.

Jay has some oil at room temperature. He pours it into a cup with a hole in the bottom.

Lana measures the time it takes for 20 ml of oil to drip out of the cup.

They repeat this with oil heated to 30°C, 35°C and 40°C.

They record their results on a graph.

Use the graph to estimate how long it would take for the oil heated to **25°C** to drip out of the cup.

\_\_\_\_\_ seconds

1 mark  
S000431\_01

b

As the oil becomes hotter, it flows more easily.

This changes the time it takes to drip out of the cup.

Use the graph. Describe how the **temperature** of the oil affects the **time** taken for the oil to drip out of the cup.

## Science sampling

### Booklet 12P

First name						
Middle name						
Last name						
Date of birth	Day		Month		Year	
School name						

**[BLANK PAGE]**

Please do not write on this page.

## Instructions

Please read this carefully.

### Questions and answers

You have **25 minutes** to complete this test.

Follow the instructions for each question.

This pencil shows where you will need to put your answer.

For some questions you may need to draw an answer instead of writing one.

Do not write or draw over any barcodes or in the grey margins.

If you cannot do one of the questions, **go on to the next one**.

You can come back to it later, if you have time.

If you finish before the end, **go back and check your work**.

### Marks

The number under each box at the side of the page tells you the maximum number of marks for each question.

# 1 Magnetic forces

**a** Ali has four different magnets and some paperclips.

The paperclips are attracted to the magnets.

Draw **ONE** arrow on the photograph to show the direction of the magnet's force on the paperclip.

1 mark  
S000278\_01

**b** Name the force on the paperclip that pulls in the opposite direction to the magnet.

\_\_\_\_\_

1 mark  
S000278\_02

**c** Ali wants to find the strongest magnet. He adds paperclips to a magnet one at a time so they make a chain. He stops when no more paperclips stick.

He repeats this with the other three magnets.

How will Ali know which magnet is the strongest?

\_\_\_\_\_  
\_\_\_\_\_

1 mark  
S000278\_03

d

The graph below shows Ali's results.

One axis on the graph has been labelled.

Write the label for the **other** axis.

## 4 Investigating grip

a

Andy and Jun have different ways of testing how well different shoes grip.

**Andy's plan**

- 1) Ask someone to run in the playground.
- 2) Time how long it is before they fall over.
- 3) Do the test again with different shoes.

**Jun's plan**

- 1) Put the shoe on a table and tie string to it.
- 2) Add a weight to the other end of the string and let it hang over the edge of the table.
- 3) See how much weight it takes to move each shoe.

Complete the table below to show the units that Andy and Jun could use to measure their results.

What will be measured?	What is the unit of measurement?
how much <b>time</b> it takes to fall over	 _____
how much <b>weight</b> it takes to move the shoe	 _____
