Introduction and purpose of the document

1. This document provides technical information about how we process information provided in the Individualised Learner Record (ILR) and Large Employer Outcome Pilot (LEOP) data collections to produce the qualification achievement rates (QAR) dataset.
2. This dataset produces the education and training 2017 to 2018 QAR and minimum standards dashboard. This document also provides information about how we generate the information in the QAR and minimum standards dashboard.
3. Please read this document alongside the [ILR standard file specifications and reference data documents](#).

Understanding the terminology

4. The terms 'we' and 'ESFA' refer to the 'Education and Skills Funding Agency' and associated staff.
5. When we refer to 'you' or 'providers', this includes colleges, training organisations, local authorities and employers that receive funding from us, or Advanced Learner Loans (loans) payments from the Student Loans Company (SLC) on behalf of learners, to deliver education and training.

Changes from version 1 of this document

6. We have made these changes to the QAR dataset:
 - aims recorded with a withdrawal reason of transfer to another aim with the same provider are only included in the transfer exclusions for overall and timely QARs where a new aim is recorded with a start date that is within 120 days of the end date of the withdrawn aim
 - excluded former Employer Ownership Pilot (EOP) provision
 - identify High Needs Students (HNS) in the dataset to enable analysis of them

Changes from the 2016 to 2017 document

7. We have made these changes to the QAR dataset:
 - excluded directly funded 14 to 16 year-old students, recorded using the Learning Delivery Monitoring (LDM) code 320 ('14 to 16 direct funded students in FE')
 - included the rules for adding aims from the 2017 to 2018 ILR data

Changes from the 2016 to 2017 QAR dataset

8. The changes to the QAR dataset are below.

Fields whose derivations have changed

About qualification achievement rates

Purpose of qualification achievement rates

9. Education and training QARs, and the associated pass rates and retention rates, are a measure of the quality of the education and training courses that a provider ran in a particular funding year.
10. We use QARs to identify provision that falls below the minimum quality standards. Provision falling below the minimum quality standards is one of the factors identified in [New Challenges New Chances](#) that prompts us to take action under our [Approach to Intervention process](#).
11. We use QARs in the National Achievement Rate Tables to show learners and employers the relative quality of provision. The Office for Standards in Education, Children's Services and Skills (Ofsted) also use them as part of their inspection process.

Education and training qualification achievement rate methodology

12. The education and training QAR methodology has two measures – the 'overall' QAR and the 'timely' QAR.
13. We use the overall QAR to assess whether a provider meets minimum quality standards.
14. We base the overall QAR on the hybrid end year. The hybrid end year is the latter of:
 - the actual end year of a learning aim
 - the planned end year of a learning aim
 - the reporting year

The reporting year is included to capture those overdue continuing learning aims, overdue planned breaks or late completions recorded in the following academic year (up to R04).

The learning aims included in the 2017 to 2018 overall QAR are those with a hybrid end year of 2017 to 2018.

15. We base the timely QAR on the planned end year of a learning aim. The learning aims considered for the 2017 to 2018 timely QAR measure are those with a planned end date in the funding year ending 31 July 2018. In the timely QAR measure, a learning aim is counted as achieved if it is achieved:
 - on or before the planned end date, or
 - no more than 90 days after the planned end date

16. There can be a delay between completing a learning aim and the notification of the achievement. To account for this delay and ensure all relevant achievements are included, we use information from the 2018 to 2019 R04 ILR return to identify completed and achieved learning aims with a planned end date in 2017 to 2018 that were not recorded in the final return of the 2017 to 2018 ILR. The aim must be achieved no more than 90 days after the planned end date to be included in the timely achievement rate.

Education and training business rules

17. We produce the [business rules](#) that describe how we calculate the QARs, and which learning aims will not be included in the QAR calculations.

18. We do not include some learning aims when calculating the QAR, the main reasons for exclusions are where the learning aims are:

- part of a new programme of learning, such as a new pilot, that providers need time to get used to delivering
- not funded by us, or is not financed by an advanced learner loan
- not a qualification
- is affected by circumstances where we have agreed an exception (for example, if the learner is transferred to a new provider due to intervention from us)

Exclusions from education and training qualification achievement rates

19. We produce a file for you that contains the learning aims that are not included in the QAR calculations. This file also shows the reason they are not included.

20. The table below describes the scenarios where we exclude learning aims. The definition of the derived variables below are in the [ILR standard file specifications and reference data documents](#).

Processing standard files

Process flow diagram

21. This flow diagram below shows how ILR information for multiple funding years is processed to produce the QARs dataset, which is the source of the information used for the QAR and minimum standards dashboard.

Identifying education and training aims

22. The method for choosing learning aims from the 2013 to 2014 ILR files onwards are:

- the **Aim Type** is not 1 (Programme aim) and
- the **Programme Type** is not 2, 3, 10, 20, 21, 22, 23 or 25 (Advanced level apprenticeship, Intermediate Level Apprenticeship, Higher Apprenticeship, Higher Apprenticeship – level 4, Higher Apprenticeship – level 5, Higher Apprenticeship – level 6, Higher Apprenticeship – level 7+, Apprenticeship standard respectively)

23. The workplace learning aims from the LEOP 2013 to 2014 and 2014 to 2015 datasets are those where:

- the **Aim Type** is not 1 (Programme aim) and
- the **Programme Type** is not 2, 3, 10, 20, 21, 22 or 23 (Advanced level apprenticeship, Intermediate Level Apprenticeship, Higher Apprenticeship, Higher Apprenticeship – level 4, Higher Apprenticeship – level 5, Higher Apprenticeship – level 6, Higher Apprenticeship – level 7+ respectively)

Processing further education college mergers

24. For Further Education college mergers that take place up to and including 31 July 2018, we will combine the ILR learning aims from any pre-merger UKPRNs and we will produce the QAR for the 2017 to 2018 reporting year for the post-merger UKPRN. Where the Further Education college merger took place on or after 1 August 2018, this falls in the new funding year, therefore we will produce the QAR for the 2017 to 2018 reporting year under the pre-merger UKPRNs.

25. Programme aims are combined by changing the merged college's provider number (UKPRN) to the new college's provider number. The original provider number is kept in the QAR dataset in the UKPRN_orig field.

26. This merger process only applies to colleges. It does not apply to the mergers of any other types of provider (for example, private training providers).

Processing learner reference number changes

27. Providers assign the Learner reference number and we use this number to match aims across years.

28. If, for any reason, a learner's Learner reference number changes, either within a funding year or between years, then you must record this using the Learner reference in previous year field.

29. We use the information in the Learner reference in the previous year field to change the Learner reference numbers for previous years to the latest Learner reference number. We keep the original Learner reference number in the QAR dataset in the LearnRefNumber_orig field.
30. If you do not return the Learner reference in previous year field when there has been a change, then the process of matching aims does not work correctly. This creates two records in the QAR dataset for the same aim: one using the old Learner reference number and one using the new Learner reference number. Where the aim from the previous year's ILR file does not have any achievement data, this will reduce your QAR.
31. If you use the Learner reference number in previous year field when there **has not** been a change in the learner's Learner reference number, then this will prevent us from correctly matching that learner's aims.
32. You **must** remove the data from this field between years, as detailed in the [ILR specification](#), otherwise the learners will not match correctly.

Example:

Learner A has a Learner reference number of 'LNA1234' in 2016 to 2017. Due to a change in the provider's management information system, Learner A has a new Learner reference number in 2017 to 2018 of 'LRA9876'. In order for QAR matching to occur correctly, this must be recorded as follows:

- In 2016 to 2017:
 - Learner reference number = LNA1234
 - Learner reference number in previous year is not returned
- In 2017 to 2018:
 - Learner reference number = LRA9876
 - Learner reference number in previous year = LNA1234
- In 2018 to 2018:
 - Learner reference number = LRA9876
 - Learner reference number in previous year is not returned

Matching learning aims across years

33. Many learning aims take more than one year to complete, meaning that the same learning aims for a particular learner can appear on more than one ILR or LEOP file.
34. We use various combinations of variables to ensure we match the correct records across years. The matching process matches records by UKPRN, Learner Reference Number, and Aim Reference together with the following combinations, in the following sequence.
- Learning start date, Learning planned end date, Learning actual end date
 - Learning start date, Learning planned end date
 - Learning start date, Expected end year (P_Expendyr), Learning actual end date
 - Learning start date, Expected end year
35. Once we have matched the learning aim records, we discard those from previous years, leaving just the latest information for each learning aim in the QAR dataset.

Identifying overdue continuing aims and planned breaks

36. Continuing learning aims (aims with a Completion status of 1 'The learner is continuing or intending to continue the learning activities leading to the learning aim') in the R14 ILR return for a funding year, that do not have a corresponding record in the following funding year, are treated as a withdrawal for the overall methodology.

For example, if the year you submitted the record on the ILR is '2016/2017' and there is no corresponding record in 2017 to 2018 R14 ILR return:

- the hybrid end year (P_Hybridendyr) is set to 2017; and
 - P_Count_Overall is set to 1; and
 - P_Ach_Overall is set to 0
37. Aims where the learner is on a planned break (aims with a Completion status of 6 'Learner has temporarily withdrawn from the aim due to an agreed break in learning), are treated as a withdrawal for the overall methodology where:
- they do not have a corresponding restart record in the same funding year; or
 - they do not have a corresponding restart record in the following funding year; or
 - if the planned break was recorded in the ILR R14 return for funding year 2016 to 2017, they do not have a corresponding restart record by the R04 ILR return of the funding year 2018 to 2019

38. An ILR record is a restart record if it has a Learning Delivery Funding and Monitoring Type of 'RES' with a Learning Delivery Funding and Monitoring Code of 1 (Learning aim restarted).
39. We match restart records to planned break records by matching on UKPRN, Learner reference number and Learning aim reference where the Original learning start date on the restart record matches the Learning start date or Original learning start date of the planned break record; this allows for situations where the planned break was itself a restart.
40. For example, an aim where the learner is on a planned break, that is submitted in the 2015 to 2016 ILR (YearAimSubmitted is '2015/16'), has a corresponding restart record if:
- the UKPRN, Learner reference number and Learning aim reference number on the planned break record is the same as the UKPRN, Learner reference number and Learning aim reference number on a restart record; and
 - either the Learning start date or the Original learning start date on the planned break record is the same as the Original learning start date on the restart record; and
 - the restart record was submitted in the 2015 to 2016, 2016 to 2017 or 2017 to 2018 ILR (YearAimSubmitted is '2015/16', '2016/17' or '2017/18')
41. If an aim where the learner is on a planned break that is submitted in the 2015 to 2016 ILR (YearAimSubmitted is '2015/16'), does not have a corresponding restart record:
- the reporting year is set to one year after the later of the expected end year or actual end year; and
 - P_Count_Overall is set to 1; and
 - P_Ach_Overall is set to 0
42. An aim where the learner is on a planned break, that is submitted in the 2016 to 2017 ILR (YearAimSubmitted is '2016/17'), has a corresponding restart record if:
- the UKPRN, Learner reference number and Learning aim reference number on the planned break record is the same as the UKPRN, Learner reference number and Learning aim reference number on a restart record; and
 - either the Learning start date or the Original learning start date on the planned break record is the same as the Original learning start date on the restart record; and
 - the restart record was submitted in the 2016 to 2017 or 2017 to 2018 ILR, or the 2018 to 2019 R04 ILR (YearAimSubmitted is '2016/17', '2017/18' or '2018/19')

43. Where an aim where the learner is on a planned break that is submitted in the 2016 to 2017 ILR (YearAimSubmitted is '2016/17'), does not have a corresponding restart record:

- the reporting year is set to one year after the later of the expected end year or actual end year; and
- P_Count_Overall is set to 1; and
- P_Ach_Overall is set to 0

Key principles for QAR, pass rate and retention rate calculations

44. The key principles of calculating QARs, pass rate and retention rates are as follows:

- we only include learning aims funded by us or by an advanced learner loan
- we exclude the aims described in paragraph 20
- we class uncashed AS levels as non-achievement

Overall qualification achievement, pass and retention rate calculations

45. We use the following fields from the QAR dataset to calculate overall QARs, pass rates and retention rates.

- Hybrid end year (P_Hybridendyr)
This field is later of the actual learning end year (P_Actendyr), the expected learning end year (P_Expendyr), or the reporting year.
- P_Count_Overall
This field indicates whether a learning aim has ended (a Learning actual end date is present) or it is an overdue continuing learning aim or an overdue continuing planned break. Learning aims where P_Count_Overall is 1 are included in the overall QAR calculations.
- P_Ach_Overall
This field indicates whether a learning aim has been achieved (achieved learning aims have an Outcome of 1 or 7 (Achieved or Achieved and cashed (AS levels only))).
- P_Complete_Overall
This field indicates whether a learning aim has been successfully completed (successfully completed learning aims have a Completion status of 2 (The learner has completed the learning activities leading to the learning aim)).

46. For a given funding year the overall QAR percentage is:

$$\frac{\text{Number of learning aims that have achieved}}{\text{Number of learning aims that have ended}} \times 100$$

47. For a given hybrid end year (P_Hybridendyr) the overall QAR percentage is:

$$\frac{\text{Number of learning aims where P_Ach_Overall is 1}}{\text{Number of learning aims where P_Count_Overall is 1}} \times 100$$

48. For a given funding year, the overall pass rate percentage is:

$$\frac{\text{Number of learning aims that have achieved}}{\text{Number of learning aims that have been successfully completed}} \times 100$$

49. For a given hybrid end year (P_Hybridendyr), the overall pass rate percentage is:

$$\frac{\text{Number of learning aims where P_Ach_Overall is 1}}{\text{Number of learning aims where P_Complete_Overall is 1}} \times 100$$

50. For a given funding year, the overall retention rate percentage is:

$$\frac{\text{Number of learning aims that have successfully completed}}{\text{Number of learning aims that have ended}} \times 100$$

51. For a given hybrid end year (P_Hybridendyr), the overall retention rate percentage is:

$$\frac{\text{Number of learning aims where P_Complete_Overall is 1}}{\text{Number of learning aims where P_Count_Overall is 1}} \times 100$$

Timely QAR calculation

52. We use the following fields from the QARs dataset to calculate timely QARs:

- Expected end year (P_Expendyr)
This field is the first calendar year of the funding period which the Learning planned end date falls in. For example, if the Learning planned end date falls within the 2017 to 2018 funding year, P_Expendyr is '2017'.

- P_Count_Timely
This field indicates whether the learning aim was expected to be completed in a particular funding year. Learning aims where P_Count_Timely is 1 are included in the timely QAR calculations.
- P_Ach_Timely
This field indicates whether a learning aim has been achieved.

53. For a given funding year the timely QAR percentage is:

$$\frac{\text{Number of learning aims achieved by their planned end date or no more than 90 days after it}}{\text{Number of learning aims expected to be completed}} \times 100$$

54. For a given expected end year (P_Expendyr) the timely QAR percentage is:

$$\frac{\text{Number of learning aims where P_Ach_Timely is 1}}{\text{Number of learning aims where P_Count_Timely is 1}} \times 100$$

Calculating the percentage of leavers below the minimum standards threshold

55. We only include learners aged 19 and over (19+) in minimum standards. Minimum standards use the overall QAR and only use data for the hybrid end year 2017/2018.
56. The first stage in calculating the percentage of provision that is below minimum standards is to identify whether the 19+ age band's overall QAR for a learning aim reference is below the minimum standards threshold for the qualification type (for example, A level, Diploma). Minimum standard thresholds are accessible via the [qualification achievement rates](#) webpage.
57. If the 19+ age band's QAR for a learning aim reference is below the minimum standard threshold, then all the aims for that learning aim reference are classified as being below the minimum standards threshold.
58. The aims below the minimum standard threshold for all qualification types are added together to give a figure for the total number of aims below the minimum standards threshold for the provider.
59. The percentage of leavers below the minimum standard threshold is:

$$\frac{\text{The total number of aims below the minimum standard threshold}}{\text{The total number of learning aims where P_Count_Overall is 1}} \times 100$$

60. We compare the percentage of aims below the minimum standard threshold to the minimum standards tolerance level, which is 40%.

61. If the percentage of aims below the minimum standard threshold is equal to or greater than the minimum standards tolerance, the provider's provision is below minimum standards and there may be formal intervention by us, as set out in the [Approach to Intervention process](#).

Source or derivation of fields in the QAR dataset

63. Three reference files are used in some of the derivations:

- a) The 2017/2018 LARS Hierarchy file – this file holds the learning aim data from the Learning Aims Reference System (LARS), as at the hard close of the 2017 to 2018 ILR data collection (18 October 2018).
- b) The 2017/2018 Provider Details file – this file holds providers' details from the Provider and Organisation Information Management System (PIMS), as at 31 July 2018.
- c) We obtain the lookup used to determine the delivery region and delivery local authority of a delivery location postcode from the National Statistics Postcode Lookup (UK) May 2018. This will be available to download from the Office of National Statistics website in May 2018.

- set to 'Basic Skills Maths and English' if **BasicSkillsType** is 29 or 30
- set to 'GCSE Maths and English' if **BasicSkillsType** is 33 or 34
- set to 'ESOL' if **BasicSkillsType** is 36, 37, 38 or 39
- set to 'QCF unit' if **LearnAimRefType** is 1448 (QCF Unit) and **BasicSkillsType** is not 29, 30, 33, 34, 36, 37, 38 or 39

- is -2; or
- is 1, 2 or 3 and the **RegulatedCreditValue** is less than 1, 0 or blank; or
- has no value
