Further Education, work-based learning for young people and adult and community learning – learner numbers in England 2004/05

Introduction

1. This Statistical First Release (SFR) presents information on learner numbers in post-16 education and training in England funded by the Learning and Skills Council (LSC) for the whole academic year 2004/05.

2. This SFR updates early year figures published on 22 March 2005, “Further Education and Work Based Learning for Young People – Learner Numbers in England on 1 November 2004”.

3. This SFR includes data on Adult and Community Learning, and incorporates data from Further Education (FE) and Work Based Learning (WBL) for young people, and Adult and Community Learning in one place.

4. The content of the SFR is similar to that of previous SFRs on learner numbers, with the exception of table 4 which gives a detailed breakdown of age group by gender for all three data sets.

5. The source data for this SFR is the Individualised Learner Record (ILR) 2004/05.
Key points

Further Education

6. There were 4.21 million learners in Council-funded FE in 2004/05. This is an increase of 1.2% on the 2003/04 figure.

7. The number of learners aged under 19 increased by 4.3% between 2003/04 and 2004/05 from 699,000 to 729,000. The number of adults (aged 19 and over) increased by 0.6% to 3.48 million.

8. The total number of adults on level 2 programmes increased by 9.4% per cent in 2004/05 compared to 2003/04. The number on full level 2 programmes – 5 GCSEs, an NVQ level 2 or the equivalent – increased by 6.2%. The numbers of adult learners on programmes contributing to the Skills for Life target increased by 22.3%, while those on programmes where the level was not specified decreased by 10.1%.

9. The most popular areas of learning followed by learners in 2004/05 continued to be Information and Communication Technology (17.8%) and Health, Social Care and Public Services (16.1%).

10. 79.8% of learners in FE were recorded as being of white ethnicity and 16% from ethnic minorities. Information on ethnicity was not available for the remaining 4.2% of learners, this percentage with unknown ethnicity decreasing from 4.9% in 2003/04.

11. 59% of learners in FE in 2004/05 were female, 41% were male.

Work-based learning

12. A total of 519,000 people participated in WBL during 2004/05. The average number in learning was 300,000, a 2.3% decrease over 2003/04.

13. The average number in learning on apprenticeships in 2004/05 was 154,000, an increase of 7.6% over 2003/04. The trend away from NVQ learning and towards apprenticeships has continued. An average of 26,000 were in learning on Entry to Employment (E2E) programmes, a decrease over the numbers on equivalent programmes in 2003/04.

14. The most popular area of learning continues to be Engineering, Technology and Manufacturing (20%). There was a small increase in those learners without a specific area of learning.

15. 92.1% of learners in WBL were recorded as being of white ethnicity and 6.9% from ethnic minorities. Information on ethnicity was not available for the remaining 1% of learners.

16. 43% of WBL learners were female, and 57% male.

Adult and community learning

17. A total of 915,000 learners were enrolled on Adult and Community Learning programmes in 2004/05. This is a decrease of 0.8% on the previous figure.
18. The most popular areas of learning for Adult and Community Learning continued to be Visual and Performing Arts and Media (28%) and Hospitality, Sports, Leisure and Travel (22%).

19. 81.9% of learners in Adult and Community Learning were recorded as being of white ethnicity and 10% from ethnic minorities. Information on ethnicity was not available for the remaining 8.1% of learners.

20. 77% of learners in Adult and Community Learning were female, and 23% male.

Tables

Further Education, work-based learning and adult and community learning

The tables are based on ILR data for 2003/04 and 2004/05

Table 1: Learners on Council-funded FE and WBL provision in 2003/04 and 2004/05 analysed by highest qualification level and by age group

Table 2. Learners on Council-funded FE and WBL provision in 2003/04 and 2004/05, and in Adult and Community Learning in 2003/04, analysed by area of learning and by gender

Table 3. Learners on Council-funded FE and WBL provision in 2003/04 and 2004/05, and in Adult and Community Learning in 2003/04, by ethnicity and gender

Table 4. Learners on Council-funded FE and WBL provision in 2003/04 and 2004/05, and in Adult and Community Learning in 2003/04, by age group and gender

Table 5. Work-Based Learning – Learners on WBL provision from October 2000 to July 2005 at the end of each quarter by programme

Table 6. Work-Based Learning – Starts on WBL provision from October 2000 to July 2005 at the end of each quarter by programme

Table 7. Further Education - Learners on Council-funded FE provision in 2003/04 and 2004/05 by institution type, mode of attendance, and age

Table 8. Further Education – Learners on Council-funded FE provision in 2003/04 and 2004/05 by age band and key LSC programmes

Table 9. FE - Learners enrolled in further education sector colleges and external institutions in England from 1996/97 to 2004/05 by institution type, age, mode of attendance and gender.

Future Statistical First releases

21. The LSC publishes three Statistical First Releases each year:
• Early in-year information on learner numbers, derived from the ILR return relating to learners enrolled on 1 November, published in March.
• Whole-year information on learner numbers, derived from the ILR return relating to the end of the relevant academic year, published in December.
• Outcomes, derived from the ILR return relating to 31 December following the end of the relevant academic year for FE and most recently available data for WBL, published in June.

Statistical First Releases are available on the LSC website at:
http://www.lsc.gov.uk/National/Partners/Data/Statistics/LearnerStatistics/LearnerNumbers

National Statistics

22. This Statistical First Release is a National Statistics publication. National Statistics are produced to high professional standards set out in the National Statistics Code of Practice. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

23. For general enquiries about National Statistics contact: The National Statistics Public Enquiry Service on 0207 7533 588, minicom: 01633 812399, E-mail: info@statistics.gov.uk, Fax: 01633 652747, Letters: Room DG/18, 1 Drummond Gate, London, SW1V 2QQ. You can also find National Statistics on the internet: www.statistics.gov.uk.

Notes to Editors

1. This SFR contains statistics on further education, work-based learning, and adult and community learning. LSC took over responsibility for funding all three of these areas on 1 April 2001.

2. Further education provision was formerly funded by the Further Education Funding Council (FEFC), when it was termed ‘schedule 2’ provision. It takes place primarily in colleges of further education (including sixth form colleges) and in a range of other organisations, known as ‘external institutions’.

3. Work-based learning for young people is a major programme of government-supported training, comprising Advanced Apprenticeships, Apprenticeships at level 2, NVQ Learning and Entry to Employment (e2e).

4. Adult and Community Learning describes the activity formerly designated ‘non schedule 2’ and includes a diverse range of community-based and outreach learning opportunities, primarily taking place through local education authorities.
Source of Data

5. The source for the data for 2003/04 and 2004/05 in this SFR is the Individualised Learner Record (ILR). For the small number of institutions for which 2004/05 data was not available, data for 2003/04 has been used instead.

Classification of Data

Further Education

6. University for industry (UFI) provision is included with the data for further education in this SFR.

7. The distribution of FE learners by areas of learning (table 3) takes into account all the aims followed by the learner population.

8. The level assigned to a learner in table 1 corresponds to the level of the highest-level qualification undertaken by that learner. The qualification type assigned to the learner in table 1 is that of the learner’s qualification aim with the highest guided learning hours.

9. FE students classified for statistical purposes as full-time are defined as those enrolled on programmes of at least 450 guided learning hours per year, or for at least 150 guided learning hours per tri-annual period or more than 16 guided learning hours per week for shorter courses.

10. Full-time students who enrol on a programme of at least 450 guided learning hours per year are classified as full-time full-year. This includes those students who withdraw from the programme during the year and actually attend for less than 450 guided learning hours. Also counted as full-time full-year are students who enrol on programmes of less than 450 guided learning hours but stay longer than expected and actually attend for more than 450 guided learning hours. Full-time students who are not classified as full-time full-year are classified as other full-time. All other students are classified as part-time.

11. Table 8 shows the numbers of FE learners participating in some of the LSC’s priority areas. These learners could contribute to the government’s PSA targets for young people and adult skills. The table shows learners enrolled on:
   - full level 2 learning aims – 5 GCSEs, an NVQ level 2 or the equivalent
   - full level 3 learning aims – 2 A levels, an NVQ level 3 or equivalent; and
   - Skills for Life programmes.

12. The figures in table 9 for 2002/03 onwards are on a different basis from those for earlier years, so are not directly consistent with the figures for years up to 2001/02. The figures for 2002/03 onwards are more comprehensive, as they include some institutions (such as specialist designated institutions) previously excluded from statistical publications, and also take account of changes to funding arrangements made by the LSC since taking over responsibility for FE funding. Figures are included on both the old and new basis for 2002/03 for comparative purposes.

Work-based learning
13. The total in-learning volume for work-based learning (table 1) is a measure of total learning activity in the academic year.

14. Table 5 shows the numbers in learning over a five year time period. The definition of in-learning changed in 2003/04; figures for 2002/03 are presented on both the new and the old basis to show a true picture of the year-on-year change.

**Adult and community learning**

15. 2004/05 is the second year in which individual learner data for adult and community learning has been collected by the LSC in the ILR. Previously, aggregate data was collected by DfES through the AE1 form, and published by DfES in the statistical first release series “Adult Education Enrolments in England” (available on the DfES website: http://www.dfes.gov.uk/rsgateway/). Data for 2003/04 and earlier years are not comparable due to these changes in the data collection systems.

**General notes**

16. In the tables, numbers may not add up exactly to totals because of differential rounding. FE numbers are shown in thousands and the symbol ‘-’ represents fewer than 50 learners. WBL numbers have been rounded to the nearest 100.
