Objectives from the *Framework for teaching English: Years 7, 8 and 9*
General introduction
to Literacy in series

The aim of the subject-specific material in the Literacy in series is to exemplify aspects of the Literacy across the curriculum training file for individual subjects.

Where appropriate, the relevant section from the Literacy across the curriculum training file is indicated so that trainers and teachers can refer to it as and when they wish. This training file is available in every school and LEA. Further copies have been sent to the appropriate subject associations.

Methods of delivery

- LEAs can decide when and how to deliver the Literacy in series through 2002–2003 so that it fits with their action plans and/or the current needs of schools. It can be repeated as needs arise; it can be amended as expertise within schools grows.
- The material can be delivered as days or as individual sessions as appropriate to fit with current LEA practice and school needs.
- The material can be amended in response to local circumstances and by involving local expertise. The final session on schemes of work will help where a department from one school can share its experience and expertise with others. This would ensure that local priorities, for example, the needs of pupils for whom English is an additional language, can be met.
- Further examples from local schools can be added to the sessions or substituted for some of the existing examples.
- Trainers can be drawn from the LEA (for example, teacher advisers or LEA subject advisers) or from schools (for example, advanced skills teachers or respected heads of departments or teachers).

Key principles

- To develop consistent approaches to teaching and learning in literacy across departments, and to build increased awareness of the skills, knowledge and understanding that pupils could be expected to bring to lessons
- To use speaking and listening to develop subject learning
- To develop active reading strategies to increase pupils’ ability to read for a purpose and engage with text, and the learning to be gained from it
- To demonstrate the sequence for writing and modelling writing for a key text type within the subject; seeing how it is done helps pupils to achieve it for themselves more quickly
- To make suggestions for the learning of subject-specific vocabulary

English Framework objectives

- At the end of each folder, the objectives from the Framework for teaching English: Years 7, 8 and 9 which apply across the curriculum appear in an appendix: most are the key objectives (in bold) but others have been added for clarity or exemplification.
- This will help schools identify their literacy curricular targets and ensure common approaches through the objectives.
Developments in cross-curricular literacy

- As expertise grows, schools may wish to decide which department teaches a particular aspect of literacy, for example, explanations in non-fiction writing, and how other subject areas can support and develop pupils’ learning by reinforcing it and applying it to their subject as appropriate. This will save time and ensure that pupils have a consistent approach to, for example, the writing of explanations.

- As expertise in, for example, active reading strategies or managing group talk develops and pupils know the expectations across the curriculum, their confidence will grow and their ability to take responsibility for their learning will also develop. This, again, will save time for teachers as they will not have to keep teaching the skills.
1 Introductory session

You will need:
- OHTs 1.1 and 1.2

Timing:
This session lasts 15 minutes.

1.1 Aims (15 minutes)
Welcome the participants, introduce the presenters for the session and deal with any administrative/housekeeping information.

Show OHT 1.1.

<table>
<thead>
<tr>
<th>OHT 1.1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aims</td>
</tr>
<tr>
<td>- To demonstrate how focused literacy teaching can enhance historical understanding</td>
</tr>
<tr>
<td>- To highlight some useful classroom strategies to improve the quality of reading, writing and talk in the subject</td>
</tr>
</tbody>
</table>

Explain that:
- the training is intended to build on, and disseminate, current good practice in supporting pupils’ literacy skills as part of history teaching;
- links between history objectives and teaching objectives in the Framework for teaching English: Years 7, 8 and 9 are more explicit in history than in some other subjects;
- examples of these clear links between history objectives and literacy objectives are shown in OHT 1.2.
Show OHT 1.2.

<td>Pupils should be taught to communicate their knowledge and understanding of history using a range of techniques, including spoken language, structured narratives, substantiated explanations and the use of ICT</td>
<td>Year 9 Wr9 Integrate diverse information into a coherent and comprehensive account</td>
</tr>
</tbody>
</table>

Explain that:

- in OHT 1.2 history objectives have been linked to a possible key objective from the Framework for teaching English: Years 7, 8 and 9;
- it will be helpful if teachers of all subjects take note of the Framework objectives so they can work together when appropriate, to ensure consistency;
- further examples of planning literacy objectives in history occur in session 5.
Aims

- To demonstrate how focused literacy teaching can enhance historical understanding
- To highlight some useful classroom strategies to improve the quality of reading, writing and talk in the subject

2 Speaking and listening

You will need:
- OHTs 2.1–2.3
- Handouts 2.1 and 2.2, copied onto card; each pair of participants will need a set of cards from both handouts, cut up and placed in two envelopes
- Handout 2.3, copied onto card; each pair of participants will need a set of cards cut up and placed in an envelope
- large sheets of paper (A3 or sugar paper)

2.1 Introduction (5 minutes)
Show OHT 2.1 to introduce the aims for the session.

OHT 2.1
Aims for the session
- To understand some of the ways in which speaking and listening can develop understanding in history
- To identify teaching strategies to support that development

Use OHT 2.2 to explain how talk is a tool for learning.

OHT 2.2
Talk can help us to:
- think through ideas
- express thoughts, feelings and opinions
- influence other people
- articulate ideas
- share knowledge
- feed back and review ideas
- adapt and refine ideas
- reach closure, accommodation or acceptance of different ideas
- negotiate solutions
- and more...

Add that:
- we expect pupils to use talk, but rarely teach them how to do it in the way we would with writing, for example;
- some diffident pupils find it hard to contribute to unstructured talk;
- talk is most productive when it is well-focused and purposeful.
2.2 Using talk to engage with ideas (40 minutes)
Explain that short starter activities can stimulate speaking and listening, rapidly making an effective contribution to learning.

Activities like these, although brief, can help pupils to gain confidence while learning the rules of effective talk.

Tell participants that they are going to work through four short activities which will serve as examples.

Activity 1: Medieval realms word guessing game (15 minutes)
Ensure that participants are seated so they can work in pairs. Each pair needs a set of Medieval realms word cards (Handout 2.1).

<table>
<thead>
<tr>
<th>feudalism</th>
<th>William the Conqueror</th>
</tr>
</thead>
<tbody>
<tr>
<td>Peasants' Revolt</td>
<td>Battle of Hastings</td>
</tr>
<tr>
<td>Black Death</td>
<td>Domesday Book</td>
</tr>
<tr>
<td>the Pope</td>
<td>Magna Carta</td>
</tr>
<tr>
<td>monarchy</td>
<td>Thomas Becket</td>
</tr>
<tr>
<td>parliament</td>
<td>King John</td>
</tr>
</tbody>
</table>

Explain how to play the Medieval realms word guessing game.
- Place the cards face down on the table in front of you.
- Each person in the pair takes their turn to pick a card, keeping it concealed.
- They define the word on the card for their partner.
- The second person must guess what the word is.
- The time limit for guessing each word is 30 seconds.

After 5 minutes, stop the game.

In their pairs, ask participants to discuss for a few moments:
- how this activity could support pupils’ learning in history;
- how it might improve their speaking and listening skills.
Take feedback, ensuring that the following points are made.

- This activity requires pupils to refine their ideas and convey meaning explicitly.
- This type of game involves careful listening if words are to be guessed correctly within the time limit.
- History-specific vocabulary is defined and learned interactively.

Now distribute blank cards (*Handout 2.2*) to the same pairs.

Give participants 5 minutes to prepare their own word guessing cards for a history topic of their choice.

Take brief feedback about any difficulties encountered or foreseen and make the following points.

- Sets of game cards can be copied onto card and laminated in advance (for example, when reprographic support is available) for use by teachers across a department.
- Other possible games include Definition bingo. This involves making bingo cards beforehand using either words or definitions, or a mix of the two. Each pupil is given a card. The teacher or another pupil calls out a word and the pupils cover up its definition; a definition and pupils cover up the word being defined. A mix of both words and definitions on each card keeps the pupils on their toes, sorting and matching words and meanings.

**Activity 2: Gathering ideas into a mind map** (5 minutes)

Organise participants into pairs, giving each pair a sheet of sugar paper. Ask them to write ‘Why did Britain need an Empire?’ in the centre of the sheet.

Give them 2 or 3 minutes to write down on the sugar paper all the responses they can think of to answer this question.

Ask them to make any relevant, logical links between the responses they have noted, using lines, branches or arrows.

Take feedback and collect an overview of ideas, factors and views on a whiteboard or flipchart.

Make the following points.

- These notes can be used as a resource, to refer to as the teaching of the topic progresses.
- The activity can give the teacher a clear idea of the knowledge and misapprehensions pupils may be bringing to the topic, allowing them to focus the teaching and learning more tightly.

Ask participants to consider how this activity develops learning in history through speaking and listening.

Take brief feedback.

During the discussion, ensure the following points are made.

- The activity allows pupils to build on the suggestions of others.
- It helps them to clarify and modify their thinking.
- They will need to justify their ideas and make comparisons.
They will need to summarise before moving on to the next idea.
Follow-on work will help them to make causal links.
Pairs could combine into groups of four or six and develop their ideas further.
It provides opportunities to emphasise and develop historical significance.

To conclude the activity, make the following points.

- Asking pupils to collect their ideas can help the teacher to find out or check what they already know before starting work on a new topic.
- Transforming randomly-noted words and phrases into mind maps encourages the development of thinking skills, such as making links, categorising and prioritising.
- It caters for pupils whose preferred learning style is visual.

**Activity 3: History odd one out** (5 minutes)
Ask participants to work in groups of three. Give each group a set of three words from *Handout 2.3*.

Ask them to decide which of the three words is the odd one out, saying why they came to that particular decision.

<table>
<thead>
<tr>
<th>Handout 2.3</th>
<th>History odd one out</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bible</td>
<td>Latin</td>
</tr>
<tr>
<td>monarch</td>
<td>king</td>
</tr>
<tr>
<td>roads</td>
<td>canals</td>
</tr>
<tr>
<td>Holocaust</td>
<td>shoah</td>
</tr>
<tr>
<td>Harald Hadraada</td>
<td>Harold Godwin</td>
</tr>
<tr>
<td>Domesday Book</td>
<td>feudalism</td>
</tr>
</tbody>
</table>

Ask participants what kind of talk is elicited by the activity and how it contributes to their understanding of history.

Take brief feedback.
Ensure that the following points are made about this activity.

- It helps pupils to develop their understanding of concepts and subject-specific vocabulary in history.
- It encourages questioning and reasoning.
- It builds confidence in terms of knowledge, understanding and thinking.
- It encourages the recognition of similarities and differences.
- It can be carried out at any point during a topic, e.g. to introduce, to develop or check understanding thus far, or to conclude the topic.
- It can be a quick starter activity with words projected onto a whiteboard and mini whiteboards used for answers.
- It can be extended by asking pupils to add further words.

**Activity 4: Snowball activity** (10 minutes)

Ask participants to work in pairs and give each pair a piece of A3 paper.

Ask them to write ‘Why did communism in Russia collapse?’ at the top of the A3 paper, then divide the paper into two columns.

They should head one column ‘Events/influences in Russia’ and the other ‘Events/influences outside Russia’.

Ask them to write down possible answers to the question in the appropriate column. Anything which is more general should be written across the bottom of the page. (4 minutes)

Ask the pairs to double up to fours and share their answers, adding anything new to their sheets. (3 minutes)

Next, ask the fours to double up to eights and repeat the sharing process.

Then take feedback from each group by asking for two answers from each column.

Explain that the way the groups worked in this activity is often described as ‘snowballing’. Its value lies in:

- encouraging pupils to review and extend their first ideas;
- obliging pupils to explain and justify their ideas;
- equipping less confident pupils with points to make;
- rehearsing and refining points.

2.3 **Oral frames** (30 minutes)

Introduce the subject using the following points.

- We often use group work and pair work, but pupils will benefit from being taught how to use these ways of working effectively.
- We don’t always take full advantage of the range of types of talk available.
- Talk has as many, if not more, ‘text types’ than writing. The main categories, e.g. explanation, instruction, description and information, are used in talk as well as in written text.
- Talk is also quick, fluid and shared. It can do some things better than writing, e.g. exploratory work or quick sharing.
Show OHT 2.3.

OHT 2.3
Useful phrases for explaining cause and effect

- The result is
- This results in
- As a result
- Resulting in
- Precipitating
- Initiating
- Triggering
- The effect of this is
- As a consequence
- Consequently
- Inevitably
- This, in turn, causes

Participants will immediately recognise these as phrases that can be deployed in both speech and writing when you explain cause and effect.

Use the first four examples on the OHT to show how variations on a key phrase can be used to fit any sentence. This sort of grammatical reshaping is a valuable asset to speakers because people often start an explanation before the sentence is grammatically polished.

Activity: Key phrases for talk

Now ask participants to spend 2 minutes coming up with similar phrases for exploratory, hypothetical and speculative talk. Start them off with: ‘What if…?’

Take feedback, getting someone to log the suggestions on a flipchart. Suggestions might include:

- Supposing…
- Imagine…
- Conceivably…
- Perhaps…
- Maybe…
- Could we…?
- It might…
- I wonder if…?
- Ought we to…?
- What about…?
- Why would…?
- It’s possible that…
- It’s probable that…

Suggest to participants that gathering useful terms would make a very good starter activity prior to group work, and would feed into written work, too.
Divide participants into four groups, giving each a large sheet of paper. Each group should head their sheet with one of these kinds of talk:

- Arguing a point of view
- Drawing out similarities and differences
- Explaining a process
- Drawing a conclusion from evidence

Ask the groups to list some phrases under their heading.

Display the results and offer to copy them for circulation.
Aims for the session

■ To understand some of the ways in which speaking and listening can develop understanding in history

■ To identify teaching strategies to support that development
Talk can help us to:

3 Reading

You will need:
- OHTs 3.1–3.6
- Handout 3.1, a copy for each pair of participants
- Handouts 3.2–3.4, each group of three will need a copy of each of the three handouts
- flipchart or large whiteboard
- some typical textbooks – each department could bring its own
- highlighter pens

Timing:
- 3.1 Reading strategies 10 minutes
- 3.2 Textbooks 10 minutes
- 3.3 Active reading strategies 30 minutes
- 3.4 Use of fiction 15 minutes
- 3.5 Conclusion 5 minutes
- Total 70 minutes

Aim for the session
Put up OHT 3.1.

OHT 3.1
Aim for the session
- To consider ways in which active reading strategies can be used in history lessons

3.1 Reading strategies (10 minutes)
Make the following points.
- Pupils encounter a wide range of different text types during history lessons, as both primary and secondary sources. List a few examples quickly on a flipchart or whiteboard, e.g. pictures, diary, recounts, reports, lists, video.
- A typical textbook moves frequently between these. History places demands on pupils’ range and versatility as readers.

Show OHT 3.2 and invite participants to consider when and why they might use each of the reading strategies in history lessons.

OHT 3.2
Reading strategies
- Continuous reading
  Uninterrupted, linear read of a piece of text
- Close reading
  Reflective reading to study, pausing to reread or think back
- Skimming
  Glancing quickly through a text to get the gist of it
- Scanning
  Searching for a particular piece of information

© Crown Copyright 2002
Take feedback, ensuring that the discussion includes examples of each strategy in relation to history.

Examples might include:
- skimming for dates to get an overview of a time line;
- scanning for a particular name in a dense text;
- close reading to analyse, develop understanding and compare;
- continuous reading of a longer text, such as a novel, to provide a broad base of background information and to create interest in the topic being covered.

Ensure that the following points are made.
- Pupils need a clear purpose for reading if they are to select an appropriate strategy.
- They need strategies for working with challenging or longer texts rather than simplified texts.
- They need strategies to help them to engage with the text and process the information.
- Signposting pupils to one particular reading strategy (such as skimming or scanning) can provide a good starting point for closer reading of the most relevant parts of the text.

3.2 Textbooks (10 minutes)
If participants have brought along an example of a typical textbook, ask small groups to look quickly through these and make a list of literacy features and literacy demands. Support the brief discussion with a list of prompts such as:
- presentational and organisational features;
- text types used;
- what a typical page or section demands of the reader.

Alternatively, display a range of textbooks and provide one per table or group.

Make the following points.
- Most texts use a range of presentational and organisational devices such as flow charts, drawings, colour coding, various fonts, labels and symbols.
- Written text is often organised into paragraphs – easily accessible chunks.
- Sometimes pictures and illustrations add new information, sometimes they supplement or exemplify the text.

Pupils need active reading skills to benefit from such devices and most pupils need to be taught these skills.

Ask participants whether they teach pupils how to use reading skills to access the textbooks in their own subject and, if so, how they go about it.

Take brief feedback.

During the discussion, suggest that teachers may wish to:
- explain to pupils how they can use the main organisational and presentational features of a textbook when they first introduce it;
- refer to specific examples in the relevant textbooks as they occur;
- demonstrate the way that the features can be used to support different reading strategies, e.g. scanning a page for key information, using sub-headings.
3.3 Active reading strategies (30 minutes)
Remind participants that ‘active reading strategies’ (often called by the acronym DARTS – which stands for ‘Directed Activities Related to Texts’) are designed to enable pupils:

- to engage with texts in an active way by having something specific to do with the text – such as sequencing it, or supplying missing words, or highlighting specific information.

The teaching skill lies in choosing an activity that will help pupils achieve the lesson objective.

Distribute *Handout 3.1* and allow 5 minutes for participants to fulfil the task in pairs. Take feedback, drawing out the importance of matching objectives to reading activities.

Tell participants that you have in your hand a list of some benefits and some limitations of using active reading strategies like these. Ask if anyone can suggest one or two benefits; then ask for limitations. Round off by showing *OHT 3.3.*
Now explain that you are going to use a short case study to enable participants to apply this approach of using active reading strategies to some specific historical texts.

Activity: Using active reading strategies to enable pupils to access challenging texts  (20 minutes)

Explain that this activity:

- shows how pupils can be supported as readers in accessing and making sense of challenging, complex texts – the particular texts used might, for instance, be part of a wider historical enquiry into how attitudes towards slavery changed;
- explores the contribution that literacy teaching can make to developing pupils’ critical thinking and historical reflection – in particular the skills of analysis and interpretation of contemporary accounts;
- contributes to whole-school literacy teaching objectives from the Framework for teaching English: Years 7, 8 and 9 such as Year 9, Reading 2: ‘synthesise information from a range of sources, shaping material to meet the reader’s needs’.

Distribute Handouts 3.2, 3.3 and 3.4, briefly giving them a context. Two are written accounts from a former slave describing how he was kidnapped into slavery and then how he was treated on board the slave ship. The third is an eye-witness account of the sale of slaves in the West Indies.

Ask participants to work in groups of three. Each group member should take one of the accounts.

Allow a few minutes for reading then ask the groups to carry out the tasks shown on OHT 3.4.
Olaudah Equiano, an Ibo from Nigeria, was just 11 years old when he was kidnapped into slavery. He was held captive in West Africa for seven months and then sold to British slavers, who shipped him to Barbados and then took him to Virginia. After serving a British naval officer, he was sold to a Quaker merchant from Philadelphia who allowed him to purchase his freedom in 1766. In later life, he played an active role in the movement to abolish the slave trade.

My father, besides many slaves, had a numerous family, of which seven lived to grow up, including myself and a sister, who was the only daughter. As I was the youngest of the sons, I became, of course, the greatest favourite of my mother, and was always with her; and she used to take particular pains to form my mind. I was trained up from my earliest years in the arts of agriculture and war; and my mother adorned me with emblems, after the manner of our greatest warriors. In this way I grew up till I was turned the age of eleven, when an end was put to my happiness in the following manner: Generally, when the grown people in the neighbourhood were gone far in the fields to labour, the children assembled together in some of the neighborhood’s premises to play; and commonly some of us used to get up a tree to look out for any assailant, or kidnapper, that might come upon us; for they sometimes took those opportunities of our parents’ absence, to attack and carry off as many as they could seize. One day, as I was watching at the top of a tree in our yard, I saw one of those people come into the yard of our next neighbour but one, to kidnap, there being many stout young people in it. Immediately, on this, I gave the alarm of the rogue, and he was surrounded by the stoutest of them, who entangled him with cords, so that he could not escape till some of the grown people came and secured him. But alas! ere long, it was my fate to be thus attacked, and to be carried off, when none of the grown people were nigh. One day, when all our people were gone out to their works as usual, and only I and my dear sister were left to mind the house, two men and a woman got over our walls, and in a moment seized us both; and, without giving us time to cry out, or make resistance, they stopped our mouths, and ran off with us into the nearest wood. Here they tied our hands, and continued to carry us as far as they could, till night came on, when we reached a small house, where the robbers halted for refreshment, and spent the night. We were then unbound; but were unable to take any food, and, being quite overpowered by fatigue and grief, our only relief was some sleep, which allayed our misfortune for a short time.

This extract is taken from the website of the Gilder Lehrman Institute of American History, New York – www.gliah.uh.edu – and is reproduced by kind permission of the Institute.

I was soon put down under the decks, and there I received such a salutation in my nostrils as I had never experienced in my life; so that with the loathsomeness of the stench, and crying together, I became so sick and low that I was not able to eat, nor had I the least desire to taste any thing. I now wished for the last friend, Death, to relieve me; but soon, to my grief, two of the white men offered me eatables; and, on refusing to eat, one of them held me fast by the hands, and laid me across, I think, the windlass, and tied my feet, while the other flogged me severely. I had never experienced any thing of this kind before; and although, not being used to the water, I naturally feared that element the first time I saw it; yet, nevertheless, could I have got over the nettings, I would have jumped over the side, but I could not; and, besides, the crew used to watch us very closely who were not chained down to the decks, lest we should leap into the water; and I have seen some of these poor African prisoners most severely cut for attempting to do so, and hourly whipped for not eating. This indeed was often the case with myself.

I inquired of these what was to be done with us. They gave me to understand we were to be carried to these white people’s country to work for them. I then was a little revived, and thought if it were no worse than working, my situation was not so desperate. But still I feared that I should be put to death, the white people looked and acted in so savage a manner. I have never seen among my people such instances of brutal cruelty, and this not only shown towards us blacks, but also to some of the whites themselves.
Take feedback from the groups, drawing out the following points.

Reading challenges include:
- unfamiliar or archaic vocabulary;
- complexity and unfamiliarity of sentence structure;
- density of the text and lack of signposting to the reader.

Helpful reading activities will include:
- shared reading, with the text on an OHT so that the teacher can demonstrate how to ask questions of the text, work out an unfamiliar word, or highlight key pieces of evidence;
- reading the passages aloud: pupils might be asked to prepare a reading in groups, accompanying this with a drama activity such as ‘freeze frame’ – showing visually one moment from the account;
- pair discussion to extract key information which is then presented in a grid;
- highlighting words and phrases in Handout 3.4 that provide an insight into the writer’s attitude to what he witnessed.
3.4 Use of fiction (15 minutes)
Divide participants into small groups, asking half of the groups to consider historical novels and the other half to consider historical films. Show OHT 3.5 and ask them to spend 10 minutes discussing the issues raised.

OHT 3.5
Historical novels and films
- What are the benefits of using or recommending historical novels or films?
- What are the limitations?
- What suggestions do you have for using them with pupils?

Take feedback, looking for the following points to be made.

Benefits
- They bring the past alive for pupils.
- They are an alternative source of information for pupils who shun factual prose.
- Film is accessible, even to pupils who cannot read well.
- They offer insights into the feel and texture of everyday life at the time.

Limitations
- They take liberties with historical facts.
- They suffer from anachronisms.
- The focus is on story rather than historical observation.
- They blur fantasy and reality.

Possible uses
- View a film or sequence critically for historical accuracy.
- Show sequences that illustrate a particular setting or period well.
- Encourage wider reading by issuing a reading list related to the current topic.
- Ask the librarian to mount a display of relevant titles.
- Arrange a lunchtime showing of a relevant film.

3.5 Conclusion (5 minutes)
Conclude by showing OHT 3.6.

OHT 3.6
Active reading supports learning by:
- encouraging pupils to actively engage with a range of sources
- providing structured activities which support pupils in reflecting on the material and making links between and across sources
- prompting discussion during the process which encourages thinking and the clarification of ideas
Further ideas for approaches to reading can be found in module 5, Active reading strategies, and module 6, Reading for information, in the *Literacy across the curriculum* training file. A further video example of active reading in history is included in module 5.

Also useful are module 9, Making notes, and module 10, Using the library/learning centre.
Aim for the session

- To consider ways in which active reading strategies can be used in history lessons
Reading strategies

Continuous reading
Uninterrupted, linear read of a piece of text

Close reading
Reflective reading to study, pausing to reread or think back

Skimming
Glancing quickly through a text to get the gist of it

Scanning
Searching for a particular piece of information
Active reading tasks:

- oblige close reading
- engage pupils and encourage participation
- make daunting passages more accessible
- give purpose and focus to reading
- go beyond ‘just reading’ to constructing meaning
- draw out key points very clearly

But

- Beware of over-use
- They only work if they match the objective
- They take time to prepare
- They can diminish the content to a game
- You still need to draw out the learning

Tips

- Laminate materials for durability
- Always debrief
Briefly sum up for each other the extracts you have been reading

Highlight particular features of the extracts, identifying the specific reading challenges these would present to pupils

Identify the reading activities you would use to enable pupils to:

- read the extracts closely, with understanding
- identify evidence from the texts to support the enquiry question
- begin to appraise the usefulness of the source in relation to the enquiry
Historical novels and films

- What are the benefits of using or recommending historical novels or films?
- What are the limitations?
- What suggestions do you have for using them with pupils?
Active reading supports learning by:

- encouraging pupils to actively engage with a range of sources

- providing structured activities which support pupils in reflecting on the material and making links between and across sources

- prompting discussion during the process which encourages thinking and the clarification of ideas
Engaging with texts

Link the texts and objectives to the appropriate reading activity. Some may link to more than one activity. Use the objectives to guide your choice.

‘They ... carry off as many as they could seize’

Olaudah Equiano, an Ibo from Nigeria, was just 11 years old when he was kidnapped into slavery. He was held captive in West Africa for seven months and then sold to British slavers, who shipped him to Barbados and then took him to Virginia. After serving a British naval officer, he was sold to a Quaker merchant from Philadelphia who allowed him to purchase his freedom in 1766. In later life, he played an active role in the movement to abolish the slave trade.

My father, besides many slaves, had a numerous family, of which seven lived to grow up, including myself and a sister, who was the only daughter. As I was the youngest of the sons, I became, of course, the greatest favourite of my mother, and was always with her; and she used to take particular pains to form my mind. I was trained up from my earliest years in the arts of agriculture and war; and my mother adorned me with emblems, after the manner of our greatest warriors. In this way I grew up till I was turned the age of eleven, when an end was put to my happiness in the following manner: Generally, when the grown people in the neighbourhood were gone far in the fields to labour, the children assembled together in some of the neighborhood’s premises to play; and commonly some of us used to get up a tree to look out for any assailant, or kidnapper, that might come upon us; for they sometimes took those opportunities of our parents’ absence, to attack and carry off as many as they could seize. One day, as I was watching at the top of a tree in our yard, I saw one of those people come into the yard of our next neighbour but one, to kidnap, there being many stout young people in it. Immediately, on this, I gave the alarm of the rogue, and he was surrounded by the stoutest of them, who entangled him with cords, so that he could not escape till some of the grown people came and secured him. But alas! ere long, it was my fate to be thus attacked, and to be carried off, when none of the grown people were nigh. One day, when all our people were gone out to their works as usual, and only I and my dear sister were left to mind the house, two men and a woman got over our walls, and in a moment seized us both; and, without giving us time to cry out, or make resistance, they stopped our mouths, and ran off with us into the nearest wood. Here they tied our hands, and continued to carry us as far as they could, till night came on, when we reached a small house, where the robbers halted for refreshment, and spent the night. We were then unbound; but were unable to take any food; and, being quite overpowered by fatigue and grief, our only relief was some sleep, which allayed our misfortune for a short time.

Boarding a slave ship

This extract describes Olaudah Equiano’s entry into a slave ship

I was soon put down under the decks, and there I received such a salutation in my nostrils as I had never experienced in my life; so that with the loathsomeness of the stench, and crying together, I became so sick and low that I was not able to eat, nor had I the least desire to taste any thing. I now wished for the last friend, Death, to relieve me; but soon, to my grief, two of the white men offered me eatables; and, on refusing to eat, one of them held me fast by the hands, and laid me across, I think, the windlass, and tied my feet, while the other flogged me severely. I had never experienced any thing of this kind before; and although, not being used to the water, I naturally feared that element the first time I saw it; yet, nevertheless, could I have got over the nettings, I would have jumped over the side, but I could not; and, besides, the crew used to watch us very closely who were not chained down to the decks, lest we should leap into the water; and I have seen some of these poor African prisoners most severely cut for attempting to do so, and hourly whipped for not eating. This indeed was often the case with myself.

I inquired of these what was to be done with us. They gave me to understand we were to be carried to these white people’s country to work for them. I then was a little revived, and thought if it were no worse than working, my situation was not so desperate. But still I feared that I should be put to death, the white people looked and acted in so savage a manner. I have never seen among my people such instances of brutal cruelty, and this not only shown towards us blacks, but also to some of the whites themselves.

This extract is taken from the website of the Gilder Lehrman Institute of American History, New York – www.gliah.uh.edu – and is reproduced by kind permission of the Institute.
Alexander Falconbridge describes the reaction of enslaved Africans to their sale

Being some years ago, at one of the islands in the West Indies, I was witness to a sale by scramble, where about 250 Negroes were sold. Upon this occasion all the Negroes scrambled for bear an equal price; which is agreed upon between the captains and the purchasers before the sale begins. On a day appointed, the Negroes were landed and placed together in a large yard belonging to the merchants to whom the ship was consigned. As soon as the hour agreed on arrived, the doors of the yard were suddenly thrown open and in rushed a considerable number of purchasers, with all the ferocity of brutes. Some instantly seized such of the Negroes as they could conveniently lay hold of with their hands. Others being prepared with several handkerchiefs tied together, encircled as many as they were able. While others, by means of a rope, effected the same purpose. It is scarcely possible to describe the confusion of which this mode of selling is productive. It likewise causes much animosity among the purchasers who not infrequently fall out and quarrel with each other. The poor astonished Negroes were so terrified by these proceedings, that several of them, through fear, climbed over the walls of the courtyard and ran wild about the town, but were soon hunted down and retaken...

4 Writing

You will need:

- OHTs 4.1–4.4
- Handouts 4.1–4.4, one for each participant
- Handout 4.5, one for each pair of participants
- Handouts 4.6 and 4.7 copied onto card: each pair of participants will need both sets of cards, cut up and placed in envelopes
- video from the *Literacy across the curriculum* training file

Note: Much of this session is based on extracts from the video which accompanies the Writing non-fiction module in the *Literacy across the curriculum* training file. If participants have already used the video extensively they will be well aware of the contents.

Timing:

| 4.1 Text types | 20 minutes |
| 4.2 Sequence for writing | 30 minutes |
| 4.3 Organising writing | 25 minutes |

Total 75 minutes

Aims for the session

Put up OHT 4.1.

OHT 4.1

Aims for the session

- To consider the text types used in history
- To look at the stylistic features of the text types
- To explore the benefits of a sequence for the teaching of writing in history

4.1 Text types (20 minutes)

Explain that it is helpful to know which text types pupils will meet and use in each subject. For example, although most text types will be used in the teaching of history, some will occur more frequently than others, especially as pupils move through Key Stage 3 and into Key Stage 4.

Show OHT 4.2.

OHT 4.2

Main categories of non-fiction writing

- Instruction
- Recount
- Explanation
- Information
- Persuasion
- Discursive writing
- Analysis
- Evaluation
Remind participants of the ‘health warning’ that goes with genre theory: many texts are actually examples of not one but two or more text types combined in some way. As pupils’ skills develop they will recognise this as readers and employ it to their advantage as writers. They will be able to inform and discuss, for example, or recount and analyse.

Ask participants to decide which of the text types shown on OHT 4.2 occur most frequently in history and invite them to suggest one or two brief examples. Take feedback, making notes on the flipchart.

The main text types selected will probably be:
- recount
- information
- discursive writing
- analysis

Explain that in order to write effectively, pupils need to know the main features of each text type.

Show OHT 4.3.

**OHT 4.3**

**Conventions**

**Purpose**
- What is its purpose?
- Who is it for?
- How will it be used?
- What kind of writing is therefore appropriate?

**Text level**
- Layout
- Structure/organisation
- Sequence

**Sentence level**
- Viewpoint (first person, third person, etc.)
- Prevailing tense
- Active/passive voice
- Typical sentence structure and length
- Typical cohesion devices

**Word level**
- Stock words and phrases
- Specialised or typical vocabulary
- Elaborate/plain vocabulary choices

Make the following points.
- Pupils need this knowledge/information before they start to write.
- The conventions grid can be useful if completed by teachers across a department so that there is agreement about features of text types.
- Pupils can use the grid to record their findings as they investigate the generic features of a text type or the specific features of an individual text.
- The grid can be used as a wall display to inform the writing of a particular text type.
Distribute Handout 4.1.

Handout 4.1
Analysing text types:
Analysis, including essay writing

Purpose
- What is its purpose?
- Who is it for?
- How will it be used?
- What kind of writing is therefore appropriate?
- To analyse a topic/question or to present a reasoned response to a text/series of texts/other media products.
- In schools, used as means of assessing pupil knowledge/understanding of the topic/texts/media products.
- Often in essay form, broad topic, to be addressed through attention to detail, e.g. 'What were the reasons for the development of the cotton industry in Lancashire?'

Text level
- Layout
- Structure/organisation
- Sequence
- Title often invites debate, e.g. 'How can one justify the continuing cost of space exploration?'
- Statement of the issue, followed by preview of the main points to be made in text, followed by each point in turn, followed by summary/conclusion
- Writing takes into account the degree to which the reader is familiar with the subject, e.g. does not retell the plot of a novel
- Use of quotes to support points

Sentence level
- Viewpoint (first/third person, etc.)
- Present/past tense depending on the focus
- Active voice more common; passive used when identity of agent is not relevant or need not be repeated, e.g. Sherlock Holmes is portrayed as...
- Connectives often used for contrast/comparison in areas of debate, e.g. whereas, though, while, unless, however; on the other hand, similarly, equally, also

Word level
- Stock words and phrases
- Specialised or typical vocabulary
- Elaborate/plain vocabulary choices
- Connectives used to establish cause and effect, e.g. because, since, therefore, so, as a result
- Connectives used to indicate the use of evidence, e.g. as in, I know this because...

Explain that 'analysis' is a common feature in the teaching and learning of history. Handout 4.1 fleshes out the key conventions of this type of text.

Invite participants in pairs to select two or three specific features of this text type that they might usefully highlight with pupils before they set them an essay in history. Take brief feedback. Likely responses will focus on ‘cohesive devices’:

- connections used to link ideas;
- overall text organisation;
- use of evidence and example;
- how to focus ideas in a paragraph using a topic sentence.

Now distribute page 1 of Handout 4.2 which exemplifies this text type.

Handout 4.2
See full-size version of the handout at the end of this session.

Ask participants to read, then in pairs discuss, the annotations they would supply for the blank boxes.

Take feedback then supply page 2 of Handout 4.2 – the completed handout – for reference.
4.2 **Sequence for writing** (30 minutes)

In order to raise standards, it is important that pupils are able to express their historical knowledge and understanding clearly and appropriately for their audience and purpose.

In order to provide a secure basis for pupil progress, the Key Stage 3 National Strategy recommends a clear sequence for the teaching of writing.

Show OHT 4.4 and distribute *Handout 4.3*, both of which give the same information.

Make the following points.

- Any teaching sequence should be used as a guide, and not as a pattern for every single lesson.
- It is important that pupils know the purpose and audience for their writing.
- Pupils will write more effectively if they have first explored features and conventions.
- Teacher demonstration is a very effective way of showing pupils how a writer thinks, makes decisions and applies writing skills and knowledge. Demonstration is often linked to shared writing where pupils are invited to compose short sections, or to discuss choices and decisions as writers.
- Scaffolding the first attempt provides an additional step for some pupils before they go on to write independently. They take on the responsibility for the writing but have support from the teacher or another adult or from a resource that has been designed to guide them through the task.
- Summarising key points at the end of a lesson helps to cement pupils’ learning and consolidates their understanding by ‘bookmarking’ what they have covered. It also provides a useful starting point for the next lesson.

Tell participants that the video clip they are about to see shows an example of the writing sequence in a historical context.

It is taken from the video which accompanies module 2, Writing non-fiction, in the *Literacy across the curriculum* training file. The clip shows Fiona Smyth’s Year 7 group at Robert Clack School, Dagenham. The context for the lesson is: ‘Why was the Roman army so successful?’.
Ask participants to follow through the stages of the teaching sequence as they watch, and to consider the ways in which it provides a supportive context for writing.

Show the video extract, then allow a few moments for discussion in pairs, showing OHT 4.4 again. Ask participants to focus specifically on the impact of this teaching on:
- pupils’ writing;
- their grasp of the key historical understanding.

Take brief feedback, and then explain that you will now look at some of the written outcomes from the lesson.

Give out Handout 4.4 and allow participants time to read the examples.

Ask participants to work in pairs and to select one example to identify how the teaching points from shared writing have been applied by the pupil in independent work.

4.3 Organising writing (25 minutes)
Remind participants of the familiar situation where a pupil has good historical knowledge and understands historical concepts and yet is unable to write effectively in history lessons, producing writing that does not convey what s/he knows and is ineffective in relation to purpose and audience.

Pupils often struggle to organise what they want to write even when the text types required are clear and even when they have the historical information they need.

This is often because they are having difficulty with the writing process rather than with the history.

If pupils organise the content of their writing before they begin, it can inform their thinking and improve the quality and coherence of their written outcomes.

Activity: Sorting information
Explain that sort activities can help pupils to understand that there are usually several different ways to organise the information they want to include in their writing.

Explain that this activity:
- is from work done by Christine Counsell, and is related to the classroom work shown in the video clip around the topic: ‘Why did the Normans win the Battle of Hastings?’;
- should follow a speaking and listening group discussion on why the Normans won the Battle of Hastings, to contextualise the work and to ensure pupils are fully aware of the reasons.
Organise participants into pairs.

Distribute *Handout 4.5* to each pair – this is the sort sheet onto which participants will place cards.

**Handout 4.5**  
*Why did the Normans win the Battle of Hastings?*  
Sort sheet

Give each pair *Handout 4.6*, the heading cards they are going to place at the top of the columns on the sort sheet.

**Handout 4.6**  
*Battle of Hastings*  
Heading cards

Then give them *Handout 4.7*. These cause cards show reasons for the Normans’ success at the Battle of Hastings.
Ask the pairs to put the headings ‘Before the battle’, ‘During the battle’ and ‘After the battle’ onto the sort sheet, organising the cause cards into the three columns under the headings. (3 or 4 minutes)

Stop the activity and ask participants to rearrange the cards under the headings ‘William’s strengths’, ‘Harold’s weaknesses’ and ‘Other aspects which were nothing to do with either side’. (2 minutes)

Now ask participants to think of two other possible headings under which to sort the cards. They could use the blank cards provided for their headings. (2 minutes)

Stop the activity and ask one pair to say briefly which method of organising their cards would provide the best basis for a structured essay.

How would they advise pupils to start and end the essay? Advice could go in the top and bottom boxes.

Ask participants to take 2 minutes to discuss why this sort of activity helps pupils prepare to write an essay, and to think of another history topic where the sort activity would help pupils to plan an organised activity.

Elaborate on the comments made so that the following points are included.

The sorting activity:
- allows pupils to consider what they will include in their writing;
- helps them to prioritise the information that should be included, so that they are able to select what is important, what is peripheral and what is irrelevant;
- reminds them that there will be more than one way to organise the content;
- helps them to decide on the best way to organise the content;
allows pupils to use column headings to organise the essay into sections, and the ‘cause’ cards to compose topic sentences;

supports pupils who may be unsure about what to write and how to get started.

Briefly take feedback on other topics where the sort activity would help.
Aims for the session

- To consider the text types used in history
- To look at the stylistic features of the text types
- To explore the benefits of a sequence for the teaching of writing in history
Main categories of non-fiction writing

- Instruction
- Recount
- Explanation

5 Demonstrate how it is written
6 Compose together
7 Scaffold the first attempts
8 Independent writing
9 Draw out key learning
### Analysing text types: Analysis, including essay writing

#### Purpose
- What is its purpose?
- Who is it for?
- How will it be used?
- What kind of writing is therefore appropriate?
- To analyse a topic/question or to present a reasoned response to a text/series of texts/other media products
- In schools, used as means of assessing pupil knowledge/understanding of the topic/texts/media products
- Often in essay form: broad topic, to be addressed through attention to detail, e.g. *What were the reasons for the development of the cotton industry in Lancashire?*

#### Text level
- Title often invites debate, e.g. *How can one justify the continuing cost of space exploration?*
- Statement of the issue, followed by preview of the main points to be made in text, followed by each point in turn, followed by summary/conclusion
- Writing takes into account the degree to which the reader is familiar with the subject, e.g. does not retell the plot of a novel
- Use of quotes to support points

#### Sentence level
- Third person; perhaps first person when giving summary of views, or when asked in title for personal response
- Present/past tense depending on the focus
- Active voice more common; passive used when identity of agent is not relevant or need not be repeated, e.g. *Sherlock Holmes is portrayed as..., The castles were strongly fortified...*
- Connectives often used for contrast/comparison in areas of debate, e.g. *whereas, though, while, unless, however, on the other hand, similarly, equally, also*
- Connectives used to establish cause and effect, e.g. *because, since, therefore, so, as a result*
- Connectives used to indicate the use of evidence, e.g. *as in, I know this because.... This shows that...*

#### Word level
- Critical vocabulary related to subject under review, e.g. in literature: *personification, alliteration*; in art: *texture, chiaroscuro*
- Vocabulary associated with value judgements, e.g. *convincing, amusing*
Why did the Normans win the Battle of Hastings?

The Battle of Hastings took place in 1066 when Edward the Confessor died, leaving no heir. Harold Godwinson took his place, but he had two rivals, Harald Hadraada, the king of Norway, and William, Duke of Normandy. William eventually won, and this piece of writing explores the reasons why.

William was a very determined and ambitious leader. He claimed that Harold had promised to help him to become king, and so, when Harold claimed the throne, he did all he could to conquer England. He left Normandy undefended, and took 3000 ships with horses and soldiers across the English channel. He must have been very determined to do this, as the channel was very dangerous. His bravery is shown again during the battle, when he took off his helmet and said to his soldiers, 'Look at me well. I am still alive and, by the grace of God, I shall yet prove victor.'

William also had a strong army, and a good strategy. For example, he put the archers in the front, then infantry, and behind them the men on horse-back. The Anglo-Saxon Chronicle says, 'All the English were on foot. The Normans had foot-soldiers, archers and cavalry with horses.' This would have been a great advantage. Also he pretended to retreat, and then the English broke the shield wall, so when the Normans turned back, the English were not very well protected. Therefore William chose a good time to invade, before Harold had established his position as king.

Harold's bad luck also helped William to win. Harold Godwinson was fighting Harald Hadraada at Stamford Bridge when William invaded in the south. Harold had to march 300 km, having lost many of his best men in the previous battle. If the wind had not changed just then Harold would have had more men, and he would have had more time to set his army up. There is a picture in the Bayeux Tapestry of Harold being killed with an arrow through his eye. When he died, the English were frightened, and deserted. William won the battle for many reasons. It was a mixture of good leadership, planning and luck. If the wind hadn't changed, or if Harald Hadraada hadn't invaded, I think that Harold could have won, and England would be a different place.

"Why did the Normans win the Battle of Hastings?" is taken from a pamphlet entitled Analytical and Discursive Writing in History at Key Stage 3, by Christine Counsell (1997), and is reproduced here by kind permission of the author and the publishers, The Historical Association.
Why did the Normans win the Battle of Hastings?

The Battle of Hastings took place in 1066 when Edward the Confessor died, leaving no heir. Harold Godwinson took his place, but he had two rivals, Harald Hadraada, the king of Norway, and William, Duke of Normandy. William eventually won, and this piece of writing explores the reasons why.

William was a very determined and ambitious leader. He claimed that Harold had promised to help him to become king, and so, when Harold claimed the throne, he did all he could to conquer England. He left Normandy undefended, and took 3000 ships with horses and soldiers across the English channel. He must have been very determined to do this, as the channel was very dangerous. His bravery is shown again during the battle, when he took off his helmet and said to his soldiers, 'Look at me well. I am still alive and, by the grace of God, I shall yet prove victor.'

William also had a strong army, and a good strategy. For example, he put the archers in the front, then infantry, and behind them the men on horse-back. The Anglo-Saxon Chronicle says, 'All the English were on foot. The Normans had foot-soldiers, archers and cavalry with horses.' This would have been a great advantage. Also he pretended to retreat, and then the English broke the shield wall, so when the Normans turned back, the English were not very well protected. Therefore William chose a good time to invade, before Harold had established his position as king.

Harold's bad luck also helped William to win. Harold Godwinson was fighting Harald Hadraada at Stamford Bridge when William invaded in the south. Harold had to march 300 km, having lost many of his best men in the previous battle. If the wind had not changed just then Harold would have had more men, and he would have had more time to set his army up. There is a picture in the Bayeux Tapestry of Harold being killed with an arrow through his eye. When he died, the English were frightened, and deserted. William won the battle for many reasons. It was a mixture of good leadership, planning and luck. If the wind hadn't changed, or if Harald Hadraada hadn't invaded, I think that Harold could have won, and England would be a different place.

'Why did the Normans win the Battle of Hastings?' is taken from a pamphlet entitled Analytical and Discursive Writing in History at Key Stage 3, by Christine Counsell (1997), and is reproduced here by kind permission of the author and the publishers, The Historical Association.
A sequence for teaching writing

1. Establish clear aims
2. Provide example(s)
3. Explore the features of the text
4. Define the conventions
5. Demonstrate how it is written
6. Compose together
7. Scaffold the first attempts
8. Independent writing
9. Draw out key learning
Why did the Normans win the Battle of Hastings?

The Battle of Hastings took place in 1066 when Edward the Confessor died, leaving no heir. Harold Godwinson took his place, but he had two rivals, Harald Hadraada, the King of Norway, and William, Duke of Normandy. William eventually won, and this piece of writing explores the reasons why.

William was a very determined and ambitious leader. He claimed that Harold had promised to help him become king, and so, when Harold claimed the throne, he did all he could to conquer England. He left Normandy undefended, and took 3000 ships with horses and soldiers across the English channel. He must have been very determined to do this, as the channel was very dangerous. His bravery is shown again during the battle, when he took off his helmet and said to his soldiers, "Look at me well. I am still alive and, by the grace of God, I shall yet prove victor."

William also had a strong army, and a good strategy. For example, he put the archers in the front, then infantry, and behind them the men on horseback. The Anglo-Saxon Chronicle says, "All the English were on foot. The Normans had foot-soldiers, archers and cavalry with horses." This would have been a great advantage. Also he pretended to retreat, and then the English broke the shield wall, so when the Normans turned back, the English were not very well protected. Therefore William chose a good time to invade, before Harold had established his position as king.

Harold’s bad luck also helped William to win. Harold Godwinson was fighting Harald Hadraada at Stamford Bridge when William invaded in the south. Harold had to march 300 km, having lost many of his best men in the previous battle. If the wind had not changed just then, Harold would have had more men, and he would have had more time to set his army up. There is a picture in the Bayeux Tapestry of Harold being killed with an arrow through his eye. When he died, the English were frightened, and deserted.

William won the battle for many reasons. It was a mixture of good leadership, planning and luck. If the wind hadn’t changed, or if Harald Hadraada hadn’t invaded, I think that Harold could have won, and England would be a different place.
Why did the Normans win the Battle of Hastings?

The Battle of Hastings took place in 1066 when Edward the Confessor died, leaving no heir. Harold Godwinson took his place, but he had two rivals, Harald Hardraada, the King of Norway, and William, Duke of Normandy. William eventually won, and this piece of writing explores the reasons why.

William was a very determined and ambitious leader. He claimed that Harold had promised to help him become king, and so, when Harold claimed the throne, he did all he could to conquer England. He left Normandy undefended, and took 3000 ships with horses and soldiers across the English channel. He must have been very determined to do this, as the channel was very dangerous. His bravery is shown again during the battle, when he took off his helmet and told his soldiers, "Look at me well, I am still alive and, by the grace of God, I shall yet prove victor."  

William also had a strong army, and a good strategy. For example, he put the archers in the front, then infantry, and behind them the men on horseback. The Anglo-Saxon Chronicle says, "All the English were on foot. The Normans had foot-soldiers, archers and cavalry with horses." This would have been a great advantage. Also he pretended to retreat, and then the English broke the shield wall, so when the Normans turned back, the English were not very well protected. Therefore William chose a good time to invade, before Harold had established his position as king.

Harold's bad luck also helped William to win. Harold Godwinson was fighting Harald Hardraada at Stamford Bridge when William invaded in the south. Harold had to march 300 km, having lost many of his best men in the previous battle. If the wind had not changed just then, Harold would have had more men, and he would have had more time to set his army up. There is a picture in the Bayeux Tapestry of Harold being killed with an arrow through his eye. When he died, the English were frightened, and deserted.

William won the battle for many reasons. It was a mixture of good leadership, planning and luck. If the wind hadn't changed, or if Harald Hadraada hadn't invaded, I think that Harold could have won, and England would be a different place.
Why was the Roman army so successful?

The Roman army's armour and weapons were of high quality and were thoughtfully designed. Additionally, the equipment they handled were made out of strong materials so they could withstand the harshest things. They made them out of steel and leather. This led to all soldiers carrying not one but four pieces of equipment. Subsequently, they were never caught off guard.

Organisation was very important as the Roman army was split into small sections so that it was easier to control. Furthermore, the divisions into section were called legions. Each legion was divided into smaller units, which was a big section needing support. Each legion which was a big section needed support staff, such as blacksmiths who helped to fix horses shoes, cooks so they could battle with happy stomachs and doctors for aid.

Life as a Roman soldier was easy as they had got 75 denarii and were treated well which made them more likely to work hard. However, they had to work hard of fear because every tenth man/soldier was executed/killed. Sometimes soldiers volunteered to fight for their country.

The Roman army was successful for many reasons. These reasons were they had excellent weapons and great but important organisation plus e.g., when to hit the enemy/target. Therefore, with all the weapons in the world and great organisation nothing could have defeated the great and brave ROMANS!
Why was the Roman Army so successful?

The Roman's armour and weapons were of very high quality, they were also very thoughtfully designed. They were made of very reliable and strong materials such as steel or leather. Every soldier within this formidable army had 4 pieces of equipment including spares, this way, they could never be caught by surprise.

The army was organized into different sections to make the army more successful, for example, the soldiers were divided into legions, then into centuries. The legions had roughly about 600 people in support staff, the support staff was made of cooks, blacksmiths, doctors, clerks and messengers.

The Roman soldiers were treated very well, this made them happier to work harder during battles and training. They also worked harder because of a sense of fear, the fear was because, if they lost a battle every 10th man would die. They also thought it was better to work than rest, they thought this because it was better to work hard and get paid than to sit around month after month and get bored.

The Romans were very successful for a number of different reasons. It was partly because of their very high sense of discipline during training. This soon got became a habit and they became like it in battle. It was also because of their armour and weapons and their organisation. Overall, these were the reasons that the Romans became very successful.
Why was the Roman army successful?

The armour and weapons owned by a Roman soldier were made of very high quality and were thoughtfully designed. They were made with strong materials such as leather and steel which gave the soldiers good protection in battle and training. Every soldier had to carry four pieces of equipment with them so they always had weapons. As the soldiers always had weapons with them they could never be caught by surprise.

The Roman army was not one big mass, instead it was split into smaller sections. The sections were split as the following; firstly as legions then into centuries. The organization of the Roman army was an integral part of their success and not all the members of the legions were always fighting, some were support staff which included cooks and blacksmiths.

The soldiers in the Roman army were treated very well. They were able to put 20 denarii into their savings bank after four months of being working. On the other hand, fear probably played an important part of a Roman soldier's life. For example, Suetonius, a Roman in the time of Emperor Augustus describes one of the punishments of desertion: "If a company broke in battle, Augustus ordered the survivors to draw lots, then he executed every tenth man. The remainder would be fed on barley bread instead of the usual wheat ration. All the Roman soldiers wanted to work hard and felt that if they weren't a soldier left would be a bore.

The Roman army was successful for many reasons. These reasons included all the hard training the Roman soldiers put into it. If they hadn't trained as much then they would have been caught by surprise. Also if life wasn't strict for a Roman soldier then the soldiers would have slackened and not bothered. They would have neglected their duties and not bothered training. These are some of the main reasons why the Roman army was so successful.
All the Roman armour and weapons were high quality and thoughtfully designed. They were made of strong materials, e.g. steel and leather. All soldiers carried four pieces of equipment which meant they always had the right weapons and were never caught by surprise. All weapons were very important in the Roman Army.

Having the Roman Army split into sections was important. It meant that it would be easier to control if they had to fight. They were divided into legions, then into centuries. Also, the Romans had support staff which consisted of cooks, blacksmiths etc. Having support staff meant the soldiers and everything else was looked after.

Every Roman soldier was treated well. Being treated well meant that they would work hard. If they didn’t work hard and lost a battle it meant that every 10th man would be killed.

Also they were paid well. They received 75 denarii, most of this went towards weapons, food etc. If the soldiers had to pay for their own equipment it was more likely they would look after it.

The Roman army was very successful. It was a mixture of training, tactics and battle plans, armour and weapons, organisation and the way the soldiers were treated. If the army hadn’t been so good as they were history would be very different.

5 Planning for literacy objectives

You will need:
- OHT 5.1
- Handout 5.1

Participants will need to bring their current schemes, units or modules of work with them.

Timing:
5.1 Aims for the session and introduction 10 minutes
5.2 Planning literacy objectives into schemes or units of work 35 minutes
Total 45 minutes

5.1 Aims for the session and introduction (10 minutes)
Put up OHT 5.1.

OHT 5.1

Aims for the session

- To consider how literacy objectives can be made clear in schemes or units of work
- To provide time for teachers to look at their own schemes or units of work and consider where they might teach literacy objectives to support learning in history

Explain that Handout 5.1 is an example from a history department of a unit of work on medieval realms for Year 7. It outlines briefly the content and timings for the work, the intention being that teachers use this as a basis for their short-term planning. Timings will vary according to the number and length of lessons.
Refer back to session 1, where links were made between broad history objectives and those objectives from the Framework for teaching English: Years 7, 8 and 9 that apply across the curriculum.

This time the aim is to be more specific and encourage teachers to link objectives directly into their schemes or units of work.

Ask participants to consider, in pairs, how adopting and teaching literacy objectives will lead to improved standards in history.

Take brief feedback, ensuring the following points are drawn out.

- Using a small number of literacy objectives ensures that teachers can focus on specific areas of literacy that will result in gains both in pupils’ attainment in history, as well as in their literacy development.
- Pupils can be explicitly taught how to ask questions to elicit clarification or expand thinking in history.
- They can be explicitly taught the reading strategies needed to understand historical information.
- They can be explicitly taught appropriate strategies for reading and recording or note taking.
- They can be explicitly taught how to use evidence to persuade the reader of relative merits, e.g. of King John as king.
5.2 Planning literacy objectives into schemes or units of work (35 minutes)

Explain that:
- participants will now have 35 minutes to begin to plan objectives from the Framework for teaching English: Years 7, 8 and 9 into their own schemes or units of work;
- at the end of 30 minutes participants will feed back to the whole group.

After 30 minutes, ask one participant to feed back. (5 minutes)

The following might be useful prompts.
- How did s/he find the process?
- How easily did the objectives fit into the existing scheme or unit of work?
- Was the process helpful in making more explicit the strategies pupils could use?
- Did it help to identify how pupils might be supported in learning history?

Quickly invite comments from the other participants.

Make sure that by the end of the session participants:
- are clear about the need to plan literacy objectives into their schemes as appropriate;
- recognise that literacy objectives will raise attainment in history, explicitly through the teaching of the vocabulary, reading approaches and text types required in history.

Conclude the session with these points.
- Remind participants that further support is available in the Literacy across the curriculum training file.
- Point out that module 9, Taking notes, might be particularly useful to history teachers.
- Invite participants to state two things they will go back and do as a result of the training. Ask them to record these on their evaluation forms, if that is usual for their LEA.
Aims for the session

- To consider how literacy objectives can be made clear in schemes or units of work

- To provide time for teachers to look at their own schemes or units of work and consider where they might teach literacy objectives to support learning in history
### Unit of work: Medieval realms

Appendix
from the Framework for teaching English: Years 7, 8 and 9

Year 7 teaching objectives

Word level

Spelling
Pupils should revise, consolidate and secure:
7 the spellings of key words in each subject;

Spelling strategies
To continue learning, constructing and checking spellings, pupils should be able to:
8 recognise and record personal errors, corrections, investigations, conventions, exceptions and new vocabulary;
10 draw on analogies to known words, roots, derivations, word families, morphology and familiar spelling patterns;

Vocabulary
To continue developing their vocabulary, pupils should be able to:
14 define and deploy words with precision, including their exact implication in context;
21 read accurately, and use correctly, vocabulary which relates to key concepts in each subject, distinguishing between everyday uses of words and their subject-specific use, e.g. energy, resistance;

Sentence level

Sentence construction and punctuation
Pupils should be taught to:
1 extend their use and control of complex sentences by:
a recognising and using subordinate clauses;
b exploring the functions of subordinate clauses, e.g. relative clauses such as ‘which I bought’ or adverbial clauses such as ‘having finished his lunch’;
c deploying subordinate clauses in a variety of positions within the sentence;
3 use punctuation to clarify meaning, particularly at the boundaries between sentences and clauses;
5 use the active or the passive voice to suit purpose;

Paragraphing and cohesion
8 recognise the cues to start a new paragraph and use the first sentence effectively to orientate the reader, e.g. when there is a shift of topic, viewpoint or time;
12 organise ideas into a coherent sequence of paragraphs, introducing, developing and concluding them appropriately;

Stylistic conventions of non-fiction
14 recognise and use stylistic conventions of the main forms of writing used in subjects, e.g. science report, book review;

Standard English and language variation
15 vary the formality of language in speech and writing to suit different circumstances;
17 use standard English consistently in formal situations and in writing;
Year 7 teaching objectives

Text level – Reading

Research and study skills
Pupils should be taught to:
1 know how to locate resources for a given task, and find relevant information in them, e.g. skimming, use of index, glossary, key words, hotlinks;
2 use appropriate reading strategies to extract particular information, e.g. highlighting, scanning;
3 compare and contrast the ways information is presented in different forms, e.g. web page, diagrams, prose;
4 make brief, clearly-organised notes of key points for later use;
5 appraise the value and relevance of information found and acknowledge sources;

Reading for meaning
7 identify the main points, processes or ideas in a text and how they are sequenced and developed by the writer;
8 infer and deduce meanings using evidence in the text, identifying where and how meanings are implied;

Understanding the author’s craft
13 identify, using appropriate terminology, the way writers of non-fiction match language and organisation to their intentions, e.g. in campaign material;

Text level – Writing

Plan, draft and present
Pupils should be taught to:
1 plan, draft, edit, revise, proofread and present a text with readers and purpose in mind;
2 collect, select and assemble ideas in a suitable planning format, e.g. flow chart, list, star chart;
3 use writing to explore and develop ideas, e.g. journals, brainstorming techniques and mental mapping activities;

Write to inform, explain, describe
10 organise texts in ways appropriate to their content, e.g. by chronology, priority, comparison, and signpost this clearly to the reader;

Write to persuade, argue, advise
15 express a personal view, adding persuasive emphasis to key points, e.g. by reiteration, exaggeration, repetition, use of rhetorical questions;
Speaking and Listening

**Speaking**
Pupils should be taught to:
1. use talk as a tool for clarifying ideas, e.g. by articulating problems or asking pertinent questions;
4. give clear answers, instructions or explanations that are helpfully sequenced, linked and supported by gesture or other visual aid;
5. promote, justify or defend a point of view using supporting evidence, example and illustration which are linked back to the main argument;

**Group discussion and interaction**
10. identify and report the main points emerging from discussion, e.g. to agree a course of action including responsibilities and deadlines;
13. work together logically and methodically to solve problems, make deductions, share, test and evaluate ideas;
Word level
Pupils should be taught to:

Spelling
4 learn complex polysyllabic words and unfamiliar words which do not conform to regular patterns;
5 secure the spelling of key terms and new words from across the curriculum;

Vocabulary
9 appreciate the precise meaning of specialist vocabulary for each school subject, and use specialist terms aptly in their own writing;
10 extend the range of prepositions and connectives used to indicate purpose, e.g. in order to, so that, or express reservations, e.g. although, unless, if;

Sentence level
Pupils should be taught to:

Sentence construction and punctuation
1 combine clauses into complex sentences, using the comma effectively as a boundary signpost and checking for fluency and clarity, e.g. using non-finite clauses;
5 recognise and exploit the use of conditionals and modal verbs when speculating, hypothesising or discussing possibilities;

Paragraphing and cohesion
6 explore and compare different methods of grouping sentences into paragraphs of continuous text that are clearly focused and well developed, e.g. by chronology, comparison or through adding exemplification;
7 develop different ways of linking paragraphs, using a range of strategies to improve cohesion and coherence, e.g. choice of connectives, reference back, linking phrases;

Standard English and language variation
11 understand the main differences between standard English and dialectal variations, e.g. subject-verb agreement, formation of past tense, adverbs and negatives, use of pronouns and prepositions;
Year 8 teaching objectives

Text level – Reading
Pupils should be taught to:

Research and study skills
1 combine information from various sources into one coherent document;
2 undertake independent research using a range of reading strategies, applying their knowledge of how texts and ICT databases are organised and acknowledging sources;
3 make notes in different ways, choosing a form which suits the purpose, e.g. diagrammatic notes, making notes during a video, abbreviating for speed and ease of retrieval;

Reading for meaning
6 recognise bias and objectivity, distinguishing facts from hypotheses, theories or opinions;

Understanding the author’s craft
10 analyse the overall structure of a text to identify how key ideas are developed, e.g. through the organisation of the content and the patterns of language used;

Text level – Writing
Pupils should be taught to:

Plan, draft and present
2 re-read work to anticipate the effect on the reader and revise style and structure, as well as accuracy, with this in mind;
3 use writing for thinking and learning by recording ideas as they develop to aid reflection and problem solving;

Write to inform, explain, describe
11 explain complex ideas and information clearly, e.g. defining principles, explaining a scientific process;

Write to persuade, argue, advise
14 develop and signpost arguments in ways that make the logic clear to the reader;

Write to analyse, review, comment
16 weigh different viewpoints and present a balanced analysis of an event or issue, e.g. an environmental issue or historical investigation;
Speaking and Listening
Pupils should be taught to:

Speaking
1. reflect on the development of their abilities as speakers in a range of different contexts and identify areas for improvement;
5. ask questions to clarify understanding and refine ideas;

Listening
7. listen for a specific purpose, paying sustained attention and selecting for comment or question that which is relevant to the agreed focus;

Group discussion and interaction
10. use talk to question, hypothesise, speculate, evaluate, solve problems and develop thinking about complex issues and ideas;
## Word level
Pupils should be taught to:

### Spelling
2 spell accurately all high-frequency words and new terms from all subject areas;

### Spelling strategies
3 recognise their strengths as spellers, identify areas where they need to improve and use appropriate strategies to eliminate persistent errors;

### Vocabulary
7 recognise layers of meaning in the writer’s choice of words, e.g. connotation, implied meaning, different types or multiple meanings;

## Sentence level
Pupils should be taught to:

### Sentence construction and punctuation
1 review and develop the meaning, clarity, organisation and impact of complex sentences in their own writing;
3 write with differing degrees of formality, relating vocabulary and grammar to context, e.g. using the active or passive voice;

### Paragraphing and cohesion
5 evaluate their ability to shape ideas rapidly into cohesive paragraphs;

### Standard English and language variation
9 write sustained standard English with the formality suited to reader and purpose;
Text level – Reading
Pupils should be taught to:

Research and study skills
2 synthesise information from a range of sources, shaping material to meet the reader's needs;
3 increase the speed and accuracy of note-making skills and use notes for re-presenting information for specific purposes;
4 evaluate the relevance, reliability and validity of information available through print, ICT and other media sources;

Reading for meaning
7 compare the presentation of ideas, values or emotions in related or contrasting texts;

Text level – Writing
Pupils should be taught to:

Plan, draft and present
3 produce formal essays in standard English within a specified time, writing fluently and legibly and maintaining technical accuracy when writing at speed;

Inform, explain, describe
9 integrate diverse information into a coherent and comprehensive account;

Persuade, argue, advise
13 present a case persuasively enough to gain the attention and influence the responses of a specified group of readers;
14 make a counter-argument to a view that has been expressed, addressing weaknesses in the argument and offering alternatives;

Analyse, review, comment
16 present a balanced analysis of a situation, text, issue or set of ideas, taking into account a range of evidence and opinions;
Year 9 teaching objectives

**Speaking and Listening**
Pupils should be taught to:

**Speaking**
2 use standard English to explain, explore or justify an idea;

**Listening**
7 identify the underlying themes, implications and issues raised by a talk, reading or programme;

**Group discussion and interaction**
9 discuss and evaluate conflicting evidence to arrive at a considered viewpoint;
10 contribute to the organisation of group activity in ways that help to structure plans, solve problems and evaluate alternatives;
