Notice:

All users of the 24+ Advanced Learning Loans report are requested to register their email with fe.statistics@bis.gsi.gov.uk as we are consulting users on changing the frequency of the report from a monthly to quarterly basis. Users are requested to feedback on whether a quarterly report would still meet their needs, and if not, provide evidence on how the report is used each month and why it is needed at that frequency. The deadline for all responses is midnight on Friday 11 March 2016.

Data Source

The data used to produce this report are sourced from the live Student Loans Company (SLC) application database. The data refer to all applications received for 24+ Loans, which include both unprocessed and processed applications, but exclude those ineligible, cancelled, deleted and in data entry. The live database provides information on applications, and is updated on an ongoing basis due to applications being processed, therefore data presented throughout the academic year are subject to change. A database snapshot provides data on applications (including application state) as it was held for any given date. This report uses data on applications on the 31th January 2016 for the 2015/16 academic year. Data presented in this report may also change for particular applications at some point in the future.

Figure 1 provides an overview of different application states. The state of an application can depend on various factors, including how much progress has been made processing the application, as well as the accuracy of the information and supporting evidence provided. In the 24+ Advanced Learning Loans report, the definition of applications received exclude those that are in data entry, ineligible, cancelled or deleted.

Figure 1 – Process map of application states

Applications move between different states on an ongoing basis. For example, an application may be in data entry and move to awaiting approval or an application that has been approved may move into the cancelled, deleted or in data entry state. It is therefore possible that the number of applications received could decrease from one month to the next if a large amount of applications move to the states in the red boxes (and are not classed as an application received). Also, due to the changing of states, the sum of monthly application states over the course of the academic year will not equal the total for the full academic year.

Other Related Statistics

On Thursday 21st January 2016 the Department for Business, Innovation and Skills published the [Further Education and Skills Statistical First Release](#), which contains full year figures relating to the number of learners participating in FE in the 2014/15 academic year who were funded through the 24+ Advanced Learning Loans system ([see Table 11](#)). This includes learners whose course started in the 2013/14 academic year that continued into the 2014/15 academic year, and so these figures are not comparable to those in this report.

The Student Loans Company also published their [24+ Advanced Learning Loans Paid in England](#) publication on Thursday 21st January 2016, which includes information on payments made to FE providers on behalf of loans-funded learners during the 2013/14, 2014/15 and 2015/16 academic years. Data presented here relates to learners who are participating on a further education course funded by a 24+ advanced learning loan, and hence are not directly comparable to the application figures presented in this report.

On Thursday 18th June 2015 the Student Loans Company published [Debt and Repayment statistics for England](#), which included figures debt and repayment relating to some 24+ Advanced Learning Loans for the 2014/15 academic year.
