# 1 Malpractice - Candidates

## Introduction

In order to fulfil our regulatory and accreditation functions as set out in the Apprenticeships, Skills, Children and Learning Act 2009<sup>1</sup>, we require awarding organisations to provide exams delivery data for regulated qualifications.

## When will data be collected?

Data will be collected according to the reporting schedule which is agreed and maintained by Ofqual's Data Services team.

## What data will be collected?

Data on malpractice investigated by awarding organisations will be collected for GCSE, AS and A level. If you offer these qualifications, you must provide a row for each country, even if it is a line of zeros.

## How will the data be collected?

Awarding organisations will need to login to the secure SFTP site and upload a CSV file to the relevant folder, e.g. T11\_Malpractice.

In each folder, there will also be two sub folders called **Valid** and **Invalid**. Every time a file is uploaded, the validation process will generate a report, either confirming the file is valid or invalid.

This report will then be placed in the **Valid** or **Invalid** folder for reference. When an invalid report has been generated, a notification e-mail will be sent to awarding organisations and the invalid CSV file will be removed from the folder it was placed in so that a replacement file can be uploaded.

## General completion guidelines

- Column headers must be identical to the Name column in the table below.
- The reporting date entered should be the date the file was due to be reported.
- Numeric values must not have any formatting.

- Additional descriptions of malpractice were added to the JCQ guidance. To ensure data reported is complete, EPG agreed that these categories should be mapped across to existing ones, when reporting data. See below.
