

Statistical Fact Sheet 1

Higher Education Age Participation Index for Northern Ireland – 1992/93 to 2015/16

The Age Participation Index (API) is a measure used to demonstrate changes in participation of young people in Higher Education over time. More precisely, it is defined as the number of NI domiciled young entrants (aged under 21) to full-time undergraduate Higher Education (in the UK or Republic of Ireland) as a percentage of the 18 year-old population of Northern Ireland.

- The NI API for the 2015/16 academic year was 48.2%, a decrease of 1.2 percentage points from the 2014/15 academic year. However, it has grown substantially in net terms since 1992/93, at which stage it was 32.1%.

Year	Proportion of NI 18 year olds	Year	Proportion of NI 18 year olds
1992/93	32.1%	2004/05	45.0%

Notes:

1. From 2000/01, the data used to calculate the API are based on full-year enrolments. The data used in previous years were based on a snapshot of enrolments at 1st December of the academic year. Full year data are defined by the HESA standard registration population.
2. In 2013/14, the Further Education Statistical Record (FESR) ceased to exist and was replaced by the Consolidated Data Return (CDR).
3. The 2014/15 API figure has been revised from 49.2% to 49.4% since the publication of the fact sheet in 2014/15, due to a revision in the number of NI domiciled students enrolled in Republic of Ireland Higher Education Institutions.
4. There is no single common measure of HE participation across the UK. England and Scotland calculate the Higher Education Initial Participation Rate (HEIPR), which is a more wide ranging measure and includes, in addition to the API, part-time students and students up to the age of 30. Wales does not currently calculate a specific age participation rate.
5. Consideration is being given to developing the HEIPR for NI to facilitate future comparisons with England and Scotland. This will be done in consultation with key stakeholders.
