Summary

The Erasmus+ scheme provides funding for education, training and sport, with a particular focus on youth work, but it also provides funding for activities aimed at all ages. The EU sees these programmes as a means of addressing socio-economic issues that Europe may face like unemployment and social cohesion.

The Erasmus Programme, known officially as ‘Erasmus+’, began its current incarnation in 2014. Erasmus+ continues a range of European Union (EU) funding streams that have existed since 2007, such as the Socrates Programme and the Lifelong Learning Programme.

10,944 students in higher education in the UK participated in the 2016 ‘call’ (application period) for study placements abroad through the Erasmus+ scheme. Trends by academic year are shown opposite.

In 2015-16, the most popular host countries for UK higher education students were France (2,388), Spain (2,131), Germany (1,312), Netherlands (701), and Italy (687).

The total value of all Erasmus+ projects funded in the UK has increased in each year from €112million in 2014 ‘call’ to €143million in 2017.¹

The UK was the 7th highest participating country in the programme in 2015.

31,067 students came to the UK (all study and work placements).

In the UK the Department for Education oversees Erasmus+ and the programme is managed by the UK National Agency which is a partnership between the British Council and Ecorys UK.

Information on the programme is available on the UK Erasmus+ website.

The UK Government has promised to underwrite funding that was due to continue after Brexit and UK citizens are currently encouraged to apply for funding under Erasmus+.

The Erasmus+ programme is run on seven yearly cycles and the current cycle will end in 2020.

The UK could potentially continue to be an active member of Erasmus+ post 2020 as various degrees of involvement in the

---

¹ Erasmus+ statistics
programme are available for countries both inside and outside the EU. On 30 May 2018 the EU Commission announced that it is proposing to double funding for the Erasmus programme and for the next cycle starting in 2021 any country in the world will be able to participate if they meet set requirements. It is unclear at present what the UK’s participation in Erasmus+ will be after Brexit but the EU Commission’s announcement opens up the possibility of the UK’s continued involvement in the programme.

**Box 1: Short overview of the Erasmus programme**

Erasmus was launched in 1987 with 11 members, including the UK. Since then, the scheme has enabled more than four million students to study in another European country by funding their grants and waiving their tuition fees.

In 2014, the scheme became Erasmus+ and expanded to include apprentices, volunteers, staff and youth exchanges and jobseekers. The number of countries involved has tripled over the years. Today, Erasmus has 33 full members, including several non-EU nations such as Norway and Iceland. It also has more than 160 partner countries.

A debate the Future of the Erasmus+ Scheme after 2020 will take place in the House of Commons on Thursday 21st June 2018.

This briefing focuses on the Erasmus+ programme from a higher education perspective.
1. History of the Erasmus Programme

The Erasmus programme began in 1987-88. The programme launched with the first exchange of just over 3,000 students between eleven Member States (Belgium, Denmark, Germany, Greece, France, Ireland, Italy, Netherlands, Portugal, Spain and United Kingdom). An overview of the history and development of the Erasmus programme is available in a European Commission document, *Erasmus changing lives opening minds for 25 years*, 2012:

- The Erasmus programme has flourished throughout its development, evolving through different phases.
- Originally it was a stand-alone project for 11 Member States. In its first year 3,244 students went abroad, providing for many their first insight into different cultures and ways of life.
- During the 1990s, the programme became part of a much wider higher education programme called Socrates.
- In 2003, the Erasmus University Charter was introduced, underpinning the quality assurance of student and staff exchanges.
- From 2007 onwards Erasmus has been part of the Lifelong Learning Programme and new activities, such as students going abroad for a traineeship, have been added to the programme.

33 countries currently take part in the programme and almost all higher education institutions in Europe are involved.

The European Commission website states that the Erasmus+ Programme builds on 25 years of European programmes.

Erasmus+ is the result of the integration of the following European programmes implemented by the Commission during the period 2007-2013:

- [The Lifelong Learning Programme](#)
- [The Youth in Action Programme](#)
- [The Erasmus Mundus Programme](#)
- [Tempus](#)
- [Alfa](#)
- [Edulink](#)

Programmes of cooperation with industrialised countries in the field of higher education²

The European Commission has compiled a guide to [Erasmus+ predecessor programmes](#), which goes into more detail.

---

The incorporation of other streams into Erasmus+, means that the programme now provides funding for education, training, youth and sport for individuals of all ages.

A timeline showing the expansion and development of the programme is given in the European Commission document, *Erasmus changing lives opening minds for 25 years*, 2012 on pages 6-8.

An interview on the Erasmus+ website, *Origins of the Erasmus programme – interview with Hywel Ceri Jones*, gives an insight into the political negotiations around the establishment of the programme.
2. Aims of the Erasmus Programme

The European Commission has ultimate authority over the Erasmus+ programme.

The Erasmus guide, *Learning together: An introduction to Erasmus+ for the UK*, provides an overview of the programme’s purpose:

- Erasmus+ is the European Union programme for education, training, youth and sport. It runs for seven years, from 2014 to 2020, with organisations invited to apply for funding each year to undertake creative and worthwhile activities.

- Erasmus+ aims to modernise education, training and youth work across Europe. It is open to education, training, youth and sport organisations across all sectors of lifelong learning including school education, further and higher education, adult education and the youth sector.³

A more detailed description can be found in the *Erasmus+ Programme Guide for 2014-2020*, on pages 5 to 10. The document states that the European Commission wants to use Erasmus+ to help tackle ‘socio-economic issues’ that Europe will face in the future, including unemployment, developing ‘cohesive and inclusive societies’, youth participation in society and the problems associated with physical inactivity.⁴

³ Erasmus+ UK National Agency and the Department of Education, *Learning together: An introduction to Erasmus+ for the UK*, December 2017

3. Structure and funding streams

Although Erasmus+ is funded via the EU, each country involved manages most of the funding decisions via a National Agency. In the UK, the Erasmus+ programme is delivered by the UK National Agency, a partnership between the British Council and Ecorys UK. The National Agency reports to the Department for Education (DfE).\(^5\)

The funding provided by Erasmus+ is organised into four categories known as Key Actions. The first three categories (Mobility, Strategic Partnerships, and Policy Development) are decentralised and managed by the National Agency. The Education, Audio-Visual and Culture Executive Agency (EACEA) in Brussels retains control over the fourth category of funding, which includes sport, the Jean Monnet higher education programme, and joint Master’s Degrees.

The total value of all Erasmus+ projects funded in the UK has increased in each year from €112million in the 2014 ‘call’ to €122million in 2015, €129million in 2016 and provisionally €143million in the 2017 ‘call’.\(^6\)

Funding for Mobility is perhaps the best known element of the Erasmus programme. In the 2017 ‘call’ grants for mobility projects totalled €104million. It offers people the chance to go to another European country, either to work, volunteer, get vocational training, study, teach, or participate in a youth exchange:

**Funding for Mobility**

Erasmus+ provides funding for organisations to offer opportunities to young people and students, teachers and trainers, learners and providers, apprentices, volunteers, youth leaders, and those working in grassroots sport. This activity is known as Mobility and is Key Action 1 of the programme.\(^7\)

Information about the other categories of funding is given on pages 7-8 of *Learning together, December 2017*.

**Funding for Strategic Partnerships**

The programme will also support organisations from across the fields of education, training, youth and sport to develop partnerships, share best practice and work collaboratively to help improve provision, boost growth and create jobs. This Strategic Partnership activity is **Key Action 2 of the programme**.

**Funding** for policy development

Under Key Action 3 of the programme, organisations can get involved in policy development, including bringing young people and decision-makers together to improve youth policy.

[...]

**Centralised funding**

---

6. Erasmus+ statistics
7. Erasmus+ UK National Agency and the Department of Education *Learning together: An introduction to Erasmus+ for the UK*, December 2017
Some funding is centralised, which means it is managed directly by the Education, Audiovisual and Culture Executive Agency (EACEA) in Brussels, an executive branch of the European Commission’s Directorate General for Education and Culture.

Centralised activities include Sport, the Jean Monnet higher education programme, and Joint Master’s Degrees. The UK National Agency is not involved in promoting or managing centralised parts of the Erasmus+ programme, and so enquiries and applications must be made directly to EACEA.8

Educational institutions and youth groups as well as voluntary and sporting organisations can apply for funding. Any public or private organisation which is “active in the field of education, training, youth or sport” may also be eligible to apply.9 If awarded a grant, these organisations can make this money available to their respective members.

---

8 Erasmus+ UK National Agency and the Department of Education Learning together: An Introduction to Erasmus+ for the UK, December 2017
9 Ibid p9
4. UK higher education student participation in Erasmus+

10,944 students in higher education in the UK participated in the 2016 ‘call’ (application period) for study placements abroad through Erasmus+. This was down from 11,328 for the 2015 ‘call’. A further 6,618 students participated in the 2016 call for work placements.\(^{10}\) T

The chart opposite gives trends in the actual uptake of Erasmus/Erasmus+ places by academic year. Numbers fell from above 10,000 in the late 1990s to almost 7,000 in the middle of the last decade. Since then this trend has been reversed. Erasmus+ numbers in 2014/15 were below the earlier figures for the previous scheme. This may, in part, reflect the introduction of the new scheme.

In 2015-16 73% of UK students on Erasmus+ were from England, 19% from Scotland, 4% from Wales and 3% from Northern Ireland. UK students from across 139 different institutions participated in 2015/16. The highest number were from the University of Edinburgh (358) and University College London (349).\(^ {11}\) Data from 2007 onwards on the number UK Erasmus+ students by institution and home (UK) country can be found at: [http://www.erasmusplus.org.uk/statistics](http://www.erasmusplus.org.uk/statistics)

A report by Universities UK, *Gone International: Expanding Opportunities. Report on the 2015-16 graduating cohort* showed that more than half of student mobilities in 2014-15 were facilitated through the Erasmus+ programme.\(^ {12}\)

4.1 Destination of UK students

In 2015-16, the most popular host countries were France (2,388), Spain (2,131), Germany (1,312), Netherlands (701), and Italy (687). The same countries made up the four most popular destinations in 2007/08. Overall UK Erasmus+ students went to 44 different host countries in 2015/16 including 12 which were outside Europe.\(^ {13}\)

4.2 Participation by disadvantaged students

So far the only data on participation by disadvantaged groups of students is up to 2013/14. This can be found at: [Statistics and results for Erasmus+](http://www.erasmusplus.org.uk)

---

\(^{10}\) Erasmus+, 2014-2016 Key Actions 1 & 3 Outputs Funded - Placements (estimates) data tables 06-09-2017

\(^{11}\) Erasmus+ statistics (Higher education mobility statistics)

\(^{13}\) Erasmus+ statistics (Higher education mobility statistics)
**Erasmus.** When compared to the general student population 2013/14 Erasmus participants from the UK were:

- More likely to be white
- Around half as likely to be Black and around one-third as likely to be Asian
- Slightly less likely to have a physical or mental disability
- More likely to be from ‘higher’ socio-economic backgrounds

### 4.3 Funding received by UK students in Erasmus support grants

Erasmus grants awarded to individual higher education institutions in 2013-14 are given in a document *Erasmus Mobility final grants by UK institution 2013/14*. These grant figures include all funding received, including that for student mobility, staff mobility and the organisation of mobility.

The 2016 Erasmus+ ‘call’ resulted in 163 successful projects or bids from the UK. Total grant funding for these was *€47.5 million*. The majority was grant funding for students which totalled *€38.7 million* or around *€2,250 per student*.

### 5. Participation compared to other EU countries

Data from the Erasmus+ call 2015 showed that the UK was the **7th highest participating country** in the programme. The data covers all study and work placements taken up by higher education students. The UK had less than half the number of student on Erasmus+ than the highest ranked countries.

31,067 students came to the UK through the 2015 ‘call’ including study and work placements. This was almost twice as many as UK participants in the scheme.

France sent the most students to the UK in 2015 with **7,697**, followed by Germany, Spain and Italy.

6. Erasmus+ post Brexit

It is possible that the UK will be able to participate in Erasmus+ in some way even if it leaves the EU - numerous non-EU countries are currently involved in the programme in some way.

**Programme Countries** are eligible for all the benefits of the Erasmus+ programme. Currently, this category contains all full member states of the EU and Norway, Turkey, the former Yugoslav Republic of Macedonia, Iceland and Liechtenstein.

**Partner Countries** are eligible for some parts of Erasmus+ subject to specific criteria or conditions being met. Applicant countries also have to be in line with the overall EU values of respect for human dignity, freedom, democracy, equality, the rule of law and respect for human rights. This category includes non-EU states on the European continent, such as Albania, and many other countries across the world including Australia, Japan, India, China, Brazil and Nigeria. There are currently 160 partner countries.

The criteria for country participation in Erasmus+, are set out in Regulation (EU) 1288/2013 of the European Parliament and of the Council of 11 December 2013 establishing “Erasmus+”: the Union programme for education, training, youth and sport.

Art. 24 sets out who can participate in Erasmus+ as programme countries and partner countries. The criteria are set out as follows:

1. The Programme shall be open to the participation of the following countries (the ‘Programme countries’):
   
   (a) the Member States;
   
   (b) the acceding countries, candidate countries and potential candidates benefiting from a pre-accession strategy, in accordance with the general principles and general terms and conditions for the participation of those countries in Union programmes established in the respective framework agreements, Association Council decisions or similar agreements;
   
   (c) those EFTA [European Free Trade Area] countries that are party to the EEA [European Economic Area] Agreement, in accordance with the provisions of that agreement;
   
   (d) the Swiss Confederation, on the basis of a bilateral agreement to be concluded with that country;
   
   (e) those countries covered by the European neighbourhood policy which have concluded agreements with the Union providing for the possibility of their participation in the Union’s programmes, subject to the conclusion of a bilateral agreement with the Union on the conditions of their participation in the Programme.

2. The Programme countries shall be subject to all the obligations, and shall fulfil all the tasks set out in this Regulation in relation to Member States.

3. The Programme shall support cooperation with partner countries, in particular neighbourhood countries, in actions and activities as referred to in Articles 6, 10 and 12.
Information on the countries involved can be found on pages 21-22 of the Programme Guide 2014-2020. In later chapters, the descriptions of available funding streams explain exactly which groups of countries are eligible for particular support: these groups have different agreements with the EU.

**Box 2: The Swiss situation**

In 2014 a referendum in Switzerland voted in favour of limits to immigration. As a result negotiations for their full entry into Erasmus+ were suspended. As an interim measure the Swiss government paid for its own version of Erasmus+, the cost is estimated as $115 million to cover the 2018-2020 period. It has been suggested that there are specific challenges to creating a bespoke mobility model, such as negotiating complex bilateral agreements in order to maintain European programmes, and being excluded from the development of the EU Programme for Education.

### 6.1 UK options post Brexit

The UK’s position after it leaves the UKEU is not known; this will depend on the Brexit negotiations. The Erasmus+ website has the following information on UK participation in Erasmus+ post Brexit at [Brexit update](#), 29 September 2017:

The National Agency for Erasmus+ in the UK, a partnership between the British Council and Ecorys UK, remains wholly committed to the Erasmus+ programme and its benefits. The National Agency strongly supports continued full membership of the programme for the UK through to 2020 as planned, under the proposed Brexit implementation period, so that at least 250,000 people across the UK have the chance to study, train or volunteer abroad, and that UK organisations can continue to collaborate on international projects.

We have been working closely with the UK National Authority (the Department for Education) to ensure that accurate information on Erasmus+ activity in the UK is provided to UK Government. The National Agency has a mandate to cover all sectors of the programme, and will continue to liaise with UK Government to ensure that higher education, vocational education and training, schools, adult education and youth activities are represented equitably.

Information for UK organisations applying for funding

The UK Government has stated publicly that the United Kingdom is committed to continuing full participation in the Erasmus+ programme up until we leave the European Union. The Government has now agreed a fair financial settlement with the EU enabling it to move to the next stage of negotiations. With the caveat that “nothing is agreed until everything is agreed”, in principle the UK will continue to benefit from all EU programmes, including Erasmus+, until the end of the current budget plan (2014-2020).

[…].

The UK Government has made clear that it values international exchanges. In the unlikely event of a ‘no deal’ scenario, the Government guarantee already made still stands, and successful Erasmus+ applications which are submitted while the UK is still a Member State, even if they are not approved until after we leave, can continue beyond the point of exit. The guarantee applies to
funding allocated to UK organisations, whether in applications submitted to Brussels (centralised) or to a National Agency (decentralised), whether or not the UK is the lead partner. Applications for Higher Education submitted before the exit date will include mobility in the 2018/19 and 2019/20 academic years. Practical details regarding how this would be implemented will be discussed with the Department for Education (the UK’s Erasmus+ National Authority) over the coming months.

**Continued participation in Erasmus+**

Issues like free movement and paying into EU programmes will be significant in deciding the UK’s participation in Erasmus+ and other EU programmes post Brexit. It is possible that the UK would have to contribute financially towards the programme should it want to retain ties to Erasmus+; and it might also be the case that the UK would need to make other concessions on the freedom of movement.

An Education Committee report, *Exiting the EU: challenges and opportunities for higher education*, 19 April 2017<sup>17</sup> discussed the possibility of the UK becoming a partner country of the programme:

> Another option instead of full membership is participation as a partner country, who can take part in some elements of Erasmus+ but not all. This was suggested by several universities, including Coventry University and the University of Liverpool. Others told us that partner countries have fewer places and less funding to offer, causing students and staff to face more mobility obstacles. Rosie Birchard, Director of External Relations for the UK Erasmus Student Network, criticised the idea of the UK being a partner country:

> It is constraining. I have spoken to the version of me—education officer—in ESN countries that are partner members, and they have told us that this limits people’s opportunities, so we need to pursue maintaining our programme membership at all costs.<sup>18</sup>

**A new UK mobility programme**

The Education Committee report also considered the possibility of creating a new alternative programme to Erasmus+:

> We asked several witnesses whether Erasmus+ was replaceable if membership post-Brexit was unattainable. The response was mixed. Professor Alistair Fitt said that if we had to sacrifice something, Erasmus+ could be replaced with “Erasmus++” which could reach further around the world. Others expressed concern about how long it would take to rebuild a well-established programme, including setting up bilateral relationships with individual countries and ensuring widening participation. Estimating the cost of replacing Erasmus+ is not simple. The UK receives around €71 million a year for outward mobility. When the Swiss government set up the Swiss-European Mobility Programme to replace the loss of Erasmus+ membership, it spent around €23 million to fund 6,000 outward placements and close to 5,000 inward placements. A basic analysis is that UK higher education mobility is around four times bigger, so a UK equivalent

---

<sup>17</sup> Education Committee, *Exiting the EU: challenges and opportunities for higher education*, 19 April 2017 HC 683

<sup>18</sup> ibid p22
might cost around €100 million a year. This would be higher if it were to target countries further afield.\textsuperscript{19}

</tr>
</thead>
<tbody>
<tr>
<td>The Education Committee report, \textit{Exiting the EU: challenges and opportunities for higher education}, made the following recommendation on membership of Erasmus+:</td>
</tr>
<tr>
<td>Continued membership of Erasmus+ would be the best outcome for the UK and the Government should consider this as a priority programme in its negotiations with the EU. If this proves impossible, it is vital that the mobility of students and staff is not impeded. The Government should guarantee it will underwrite any Erasmus+ placements potentially under threat in 2019. A replacement mobility programme will need to be drawn up at an early stage so it is ready to begin for the 2019/20 academic year. This replacement could focus on a wider net of countries around the world as long as it safeguards support for disadvantaged groups. (p30 para 10)</td>
</tr>
</tbody>
</table>

### 6.2 Ministerial response October 2017

In October 2017 Jo Johnson, the then Minister for Universities and Science, stated that the government was considering future arrangements for Erasmus+ participation:

The Government is considering future participation in Erasmus as part of the European Union (EU) Exit negotiations. We see future co-operation in education programmes (as with research) as an area of mutual benefit to both the UK and the EU, provided we can agree a fair ongoing contribution.

There is, of course, a range of wider international mobility activity supported by organisations such as the British Council, UK and others. The Government has made clear many times that it values the Erasmus+ programme and international exchanges more generally and has stated publicly that the UK is committed to continuing full participation in the Erasmus+ Programme up until we leave the EU.\textsuperscript{20}

<table>
<thead>
<tr>
<th>Prime Minister’s comment 16 May 2018</th>
</tr>
</thead>
</table>
| In May 2018 the Prime Minister made the following comment on membership of Erasmus+:

\begin{quote}
\textbf{Gordon Marsden} (Blackpool South) (Lab)

\textbf{Q9}. Erasmus+ is the EU programme that, for 30 years, has given 600,000 people from the UK—apprentices, students, businesses and workers—the chance to train, study or volunteer abroad. The Government have said that Erasmus+ is safe until 2020 but have made no commitments to keep it thereafter. Erasmus+ is being forgotten about. Keeping all those benefits, especially for younger people, many in Blackpool, is one thing that unites both leave and remain. Will the Prime Minister make sure that Erasmus+ is now a top-line item for her Ministers and give us this pledge today?

[905346]
\end{quote}

\textbf{The Prime Minister}

We have not forgotten about Erasmus, or indeed a number of other programmes that give opportunities for universities and students here in the United Kingdom. We have said there are

\textsuperscript{19} Education Committee \textit{Exiting the EU: challenges and opportunities for higher education}, 25 April 2017 HC 683 p22 para 57

\textsuperscript{20} \textit{PQ 106641 [ERASMUS]} 16 October 2017
certain programmes that we wish to remain part of when we leave the European Union, and Erasmus is one of those we have cited that we may wish to remain part of, but of course we are in a negotiation with the European Union and we will be dealing with these matters in that negotiation. [HC Deb 16 May 2018 c277]
7. European Commission proposal 2021-27 cycle

On 30 May 2018 the EU Commission announced that it is proposing to double funding for the Erasmus programme and for the next funding cycle starting in 2021 any country in the world will be able to participate if they meet set requirements. An article in the Times Higher Education discussed the proposal:

The European Union’s next student exchange programme is set to be opened to any country in the world, paving the way for UK universities and students to take part in Erasmus+ post-Brexit.

In its proposal for the Erasmus+ programme for the period 2021-27, published on 30 May, the European Commission said that countries outside the EU and the European Economic Area would be able to participate fully as long as they do not have a “decisional power” on the programme and agree to a “fair balance” of contributions and benefits.

Any agreement with “third countries” would include “the calculation of financial contributions to individual programmes and their administrative costs”, it added.

Erasmus+ is currently fully open only to EU countries, plus some countries that are in the process of joining the bloc, and those in the European Free Trade Association. Nations neighbouring the EU may take part in some parts of the programme.

Thomas Jørgensen, senior policy coordinator at the European University Association, said that the new rules “allow the UK to join [Erasmus+] as a third country” after the country leaves the EU.

“It is no surprise as we know that the [chief EU negotiator Michel] Barnier team has association to EU programmes as a part of the plans for the Future Partnership [with the UK]. What is surprising is that Erasmus opens up for the rest of the world for association at the same time,” he said.

[...]

The commission’s proposal document also confirms plans to double the budget for Erasmus+ to €30 billion (£26 billion) and to allow about 12 million students to travel abroad in the period 2021-27, up from 4 million during the current programme, as announced earlier this month.

7.1 Situation for students applying now

Currently the UK remains part of the Erasmus+ scheme and British citizens can still get access to funding, as the Government has clarified:

Joseph Johnson: The Government has stated publicly that the United Kingdom (UK) is committed to continuing full participation in the Erasmus+ Programme up until we leave the European Union. We will underwrite successful bids for Erasmus+ that are

---

21 European Commission, EU budget: Commission proposes to double funding for Erasmus programme, 30 May 2018
22 “Erasmus+ exchange programme set to open to all countries in 2021”, Times Higher Education, 31 May 2018
submitted while the UK is still a member state, even if they are not approved until after we leave, and/or payments continue beyond the point of exit.

Bids for higher education study periods submitted before the exit date will include mobility in the 2018/19 and 2019/20 academic years. The underwrite will cover funding for those successful bids which are submitted before exit and we are encouraging participants to continue to apply for funding until we leave.23
8. Further reading

To keep up to date with the latest developments on Brexit, including Erasmus+, the Library will continue to updates its papers. The Library has published a number of papers that consider EU funding, EU programmes the UK is involved in, and the impact on the Education sector, including:

- **International and EU students in higher education in the UK FAQs** (see section 6.1 for the Erasmus+ programme)
- **The UK’s contribution to the EU Budget** (the Erasmus+ programme is considered in chapters 1.2 and 3.2)
- **Brexit: UK Funding from the EU** (Erasmus+ is mentioned in chapter 4)

The European parliamentary Research Service has published a *guide to EU funding 2014-20*, which considers the Erasmus+ scheme on pages 52-59.

Erasmus+ also updates a [Brexit update website](#) which aims to keep interested parties up to date with the latest implications of Brexit.

**Other articles**

- “UK students ‘may be barred from Erasmus after Brexit’*, *Times Higher Education*, 1 August 2017
- “Why Brexit won’t spell the end for our European exchange programme*, *The Telegraph*, 6 February 2017
About the Library

The House of Commons Library research service provides MPs and their staff with the impartial briefing and evidence base they need to do their work in scrutinising Government, proposing legislation, and supporting constituents.

As well as providing MPs with a confidential service we publish open briefing papers, which are available on the Parliament website.

Every effort is made to ensure that the information contained in these publicly available research briefings is correct at the time of publication. Readers should be aware however that briefings are not necessarily updated or otherwise amended to reflect subsequent changes.

If you have any comments on our briefings please email papers@parliament.uk. Authors are available to discuss the content of this briefing only with Members and their staff.

If you have any general questions about the work of the House of Commons you can email hcenquiries@parliament.uk.
