Summary	1
1 Introduction	7
1.1 Aims of the study	7
1.2 Understanding well-being	8
1.3 Education, training, employability and well-being	9
1.4 Structure of the report	10
2 Employability and well-being: a review of findings	11
2.1 Introduction	11
2.2 The concept of employability	13
2.2.1 <i>The core concept</i>	13
2.2.2 <i>Reviewing the concept</i>	14
2.2.3 <i>Extending the concept</i>	14
2.3 Economics of employability	16
2.3.1 <i>Unemployment and employability</i>	16
2.3.2 <i>Sustaining employment and occupational mobility</i>	17
2.3.3 <i>Earnings, education and training</i>	18
2.3.4 <i>Macro-economic impact</i>	18
2.3.5 <i>Micro-economic impact: individuals</i>	19
2.3.6 <i>Micro-economic impact: employers</i>	22
2.4 Employability and well-being	23
2.4.1 <i>Job satisfaction</i>	23
2.4.2 <i>Returns to society</i>	25
2.4.3 <i>Family background, employability and well-being</i>	26
2.5 Conclusion: what is measurable?	26

3	Comparative longitudinal analyses: the 1958 and 1970 birth cohorts	29
3.1	Introduction	29
3.2	Studying the relationships between education, training, employability and well-being	29
3.3	The data modelling strategy	30
3.4	A descriptive comparison of the birth cohorts	31
3.5	Multivariate analysis of the links between employment, education and training	38
3.6	Discussion on the roles of education and training	44
4	Conclusion	47
	Appendix A The measurement of well-being and employability in NCDS and BCS70	49
	Appendix B Details of the specification of regression models	55
	Appendix C Tables of results	57
	Other research reports available	83

List of tables

Table 3.1	Main characteristics of survey respondents, by gender and birth cohort	32
Table 3.2	Education and family resources	36
Table 3.3	Education and work history	37
Table 3.4	Well-being and work history	38
Table 3.5	Marginal effects in percentage points (Men)	39
Table 3.6	Marginal effects in percentage points (Women)	40
Table 3.7	Predicted probabilities (Men)	41
Table 3.8	Predicted probabilities (Women)	42
Table C.1	Employment probability (Men)	57
Table C.2	Employment probability (Women)	59
Table C.3	Earnings (Men)	61
Table C.4	Earnings (Women)	63
Table C.5	Earnings women (Heckman correction)	66
Table C.6	Malaise (Men)	69
Table C.7	Malaise (Women)	70
Table C.8	Life satisfaction (Men)	73
Table C.9	Life satisfaction (Women)	74

List of figures

Figure 3.1	A stylised view of the relationship between family resources, education, training and employment and well-being	30
Figure 3.2	The distribution of Malaise Inventory scores for young men, NCDS (age 33 in 1991) compared with BCS (age 29 in 1999)	34
Figure 3.3	The distribution of Malaise Inventory scores for young women, NCDS (age 33 in 1991) compared with BCS (age 29 in 1999)	35
Figure 3.4	The distribution of life satisfaction scores for young men, NCDS (age 33 in 1991) compared with BCS (age 29 in 1999)	35
Figure 3.5	The distribution of life satisfaction scores for young women, NCDS (age 33 in 1991) compared with BCS (age 29 in 1999)	36
Figure 3.6	Distribution of annual gross earnings in 1999 of male and female graduates aged 29 years - full time employees only	43
