

Learning Network Analysis : 2005/06

Summary:

This publication provides both regional and national level information about the post-16 education and training sector in Wales. It covers two full academic years – 2004/05 and 2005/06.

Original Publication Date:

30 April 2007

Reissue Date:

23 May 2007

Annex B: Details of analysis	111

▪ OVERVIEW

- 1 This publication provides data about post-16 learners (excluding learners at higher education institutions) in Wales at both a national and regional level. It is the second of an annual series of publications intended as a source of information to support national and local strategic planning and policy making within the post-16 education and training sector. The previous publication in this series was issued by the National Council – ELWa in March 2006.
- 2 The information within this publication relates to Welsh-domiciled learners enrolled during the 2004/05 and/or 2005/06 academic years at further education (FE) institutions, other training (OT) providers, Local Education Authority community learning (CL) providers and school sixth forms; and has been sourced from the Lifelong Learning Wales Record (LLWR) and Post-16 Pupil Level Annual Schools Census (PLASC).
- 3 As such, this publication does not include information about Welsh-domiciled learners enrolled at providers situated outside Wales. A detailed analysis of the distance to learn travelled by learners domiciled in Wales enumerating cross-border flow will be produced and issued later in 2007.
- 4 Note that this publication differs slightly from its predecessor in terms of analysis-methodology and coverage and, as such, direct comparisons should not be made. However, comparative figures for the 2004/05 academic year have been produced and detailed within this document.

▪ INTRODUCTION

- 5 The publication is divided into five sections and each section contains eleven identically formatted tables. The tables are divided into three groups:

- Tables 1L to 5L information on learners at providers
- Tables 1A to 4A information on learning activities pursued by learners
- Tables 1P and 2P information on Work Based Learning (WBL) programmes

The first of the five sections gives an overview of post-16 learning accessed by learners domiciled in Wales, and the following sections provide a disaggregation of this information for those learners who are domiciled in each of the four regions of Wales.

- 6 The same analysis is also available in spreadsheet format on a unitary authority basis. These spreadsheets include provider tables at a more disaggregated level as well as an additional WBL table. For information on how to access these unitary authority reports please contact the staff cited on the cover of this publication.
- 7 The information in this publication is based on recorded learner postcodes. In total there were 356,465 learners enrolled during 2004/05 (at FE institutions, OT providers, CL providers and school sixth forms in Wales) and 373,645 learners enrolled during 2005/06. In both 2004/05 and 2005/06 approximately 2.3% of each total were domiciled outside Wales and a further 3% had unidentifiable postcodes. Only learners known to be domiciled in Wales were included in the analysis.
- 8 Learners that were enrolled at multiple providers during the course of the academic year have been included once at each provider with whom they were enrolled. This methodology introduces an element of double-counting and differs to that used in other statistical publications, most notably the Statistical First Releases SDR36/2006 and SDR53/2007 which detail counts of unique learners but omit sixth form provision.

- 9 Cartographic analysis detailing the main sites of learning attended by learners domiciled in each of the four regions of Wales can be found in Annex A; and further information on the data definitions and analysis techniques underlying the derivation of the tables can be found in Annex B.

▪ COMMENTARY

Learners

- 10 There were 354,060 learners domiciled in Wales and pursuing learning at an FE institution, OT provider, CL provider or school sixth form during 2005/06.
- 11 Of these learners, 58% were female and 42% were male.
- 12 42% of learners were aged under 25 as at 31 August 2005 and 38% of learners were aged between 25 and 49 as at the same date.
- 13 96% of learners whose ethnicity was known were white. Of those learners for which a disability status was recorded, 8% of learners reported themselves as having a disability.
- 14 69% of learners were enrolled at FE institutions (including their training subsidiaries), 17% were enrolled at OT providers, 6% were enrolled at CL providers and 8% were enrolled at school sixth forms.
- 15 Of the learners enrolled at FE institutions, 17% were full-time learners, 78% were part-time learners and 5% were undertaking WBL provision.

Learning Activities

- 16 Aside from the 'Other' category (which amalgamates a number of different types of learning aim and accounts for 32% of all learning activities), the most prevalent types of learning aims were key skills (26% of all learning activities), AS/A2 levels (10%) and NVQs (10%).
- 17 The most popular subject area was 'Preparation for Life and Work' (36% of all learning activities). However, this can be attributed to the majority of key skills qualifications being categorised into this subject area. The next two most popular subjects in all regions were 'Information and Communication Technology' (11% of all learning activities) and 'Health, Public Services and Care' (9%). In the south of Wales 'Arts, Media and Publishing' was the next most popular subject, although in Mid Wales it was 'Languages, Literature and Culture' and in North Wales it was 'Business, Administration and Law'.
- 18 Nationally 2% of learning activities were delivered through the medium of Welsh and 4% were delivered bilingually.

WBL Programmes

- 19 There were 78,390 WBL programmes pursued in 2005/06 by learners domiciled in Wales. Of these, 49% were undertaken by female learners and 51% by male learners.
- 20 The most popular sectors pursued by female work based learners on MA, FMA, MSD and Skills Learning programmes were Health, Care and Public Services (31% of all female learners), Business Administration (20%) and Retailing & Customer Service (17%). The

most popular sectors pursued by male work based learners were Construction and Engineering (22% and 19% of all male work based learners respectively).

Trend Analysis

- 21 Compared to the equivalent figure for 2004/05, the number of learners domiciled in Wales and pursuing learning at an FE institution, OT provider, CL provider or school sixth form increased by 5% in 2005/06. The percentage increase in learners varied by region from 9% in both South West and Mid Wales to 5% in North Wales and 2% in South East Wales.
- 22 The number of learners pursuing learning at FE institutions increased by 3% compared with a 19% increase in the number of learners at OT providers and a 2% increase in the number of sixth form learners. However, the number of learners at CL providers decreased by 7%.
- 23 The number of Key Skills pursued by learners increased by 15% between 2004/05 and 2005/06 whereas the number of NVQs increased by 10%. This compares with a 1% increase in the number of A/AS levels and a 34% decrease in the number of GNVQs/AVCEs.
- 24 In 2004/05, 4% of learning activities were pursued either bilingually or through the medium of Welsh. This increased to 5% of learning activities in 2005/06. However, this varied from 17% in Mid Wales to 10% in North Wales to 4% and 1.5% in the South West and South East of Wales respectively.
- 25 The number of learning activities in the subject area 'Education and Training' increased by 56% between 2004/05 and 2005/06. This compares with a 17% increase in the subject area 'Business, Administration and Law', a 16% increase in the subject area 'Preparation for Life and Work' and a 14% increase in the subject area 'Retail and Commercial Enterprise'.
- 26 The number of WBL programmes pursued by learners increased by 17% between 2004/05 and 2005/06. However, the number of WBL programmes pursued by female learners increased by 23% compared with a 12% increase in the number of WBL programmes pursued by male learners.
- 27 In particular, the number of FMA programmes pursued by female learners increased by 40%. This compared with a 24% increase in the number of FMA programmes pursued by male learners and a 32% increase in the overall number of FMA programmes undertaken.

ANNEX A: CARTOGRAPHIC ANALYSIS

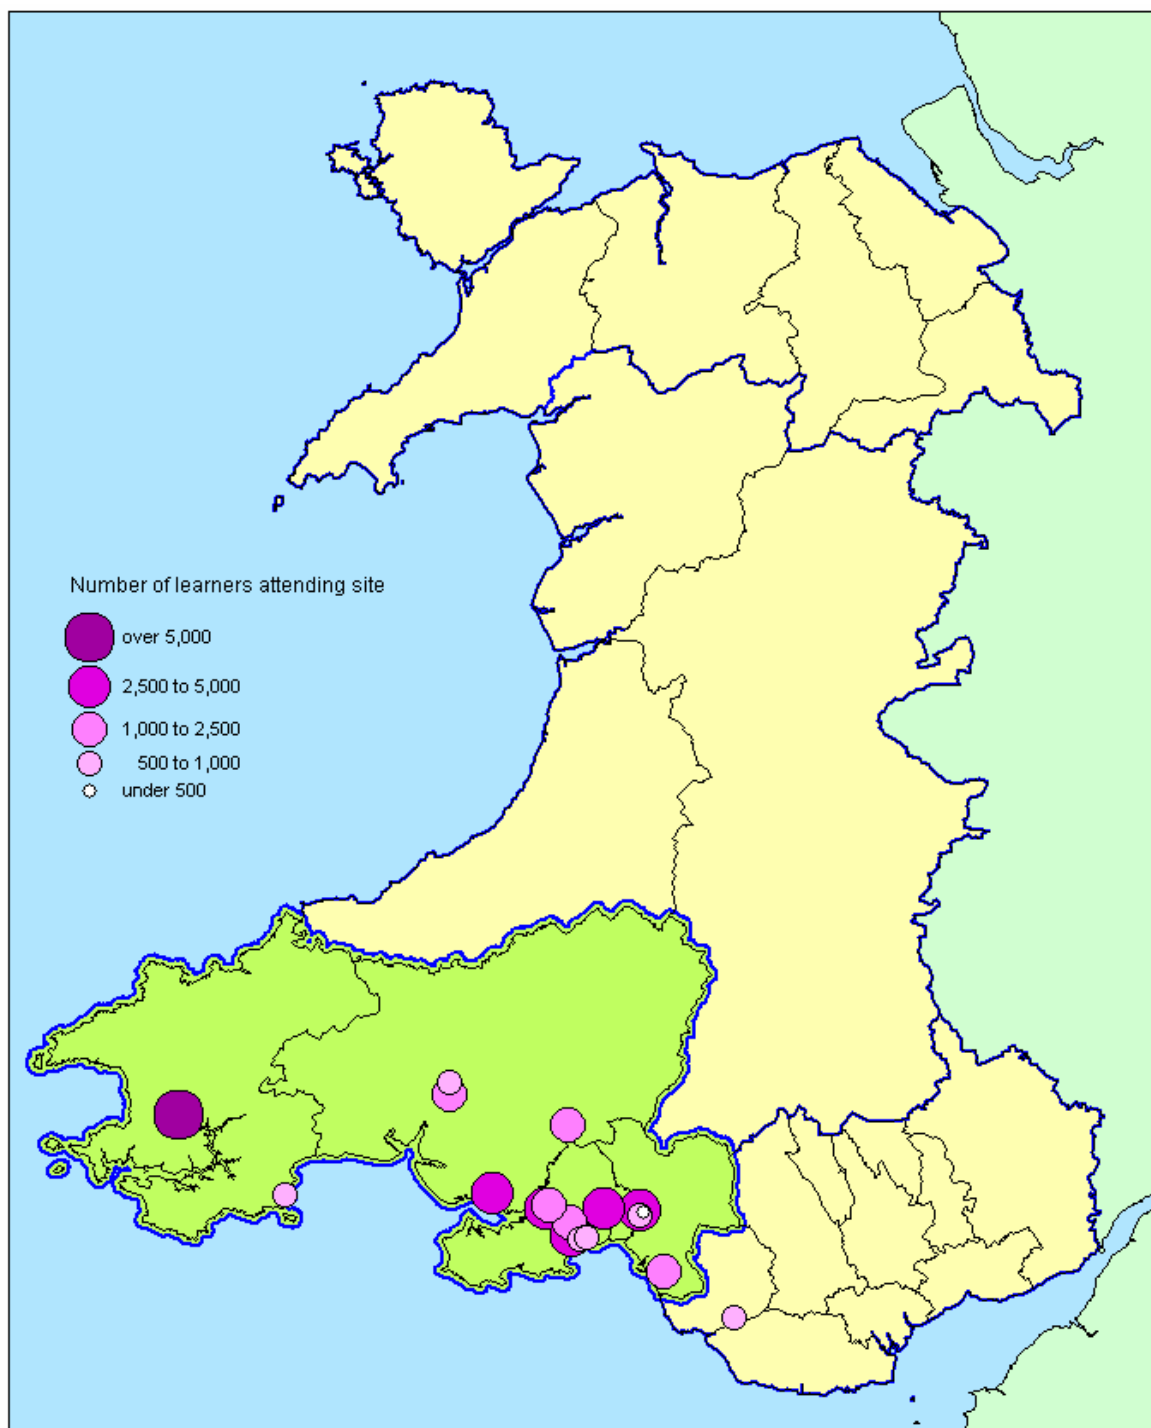

Main sites attended by North Wales domiciled learners

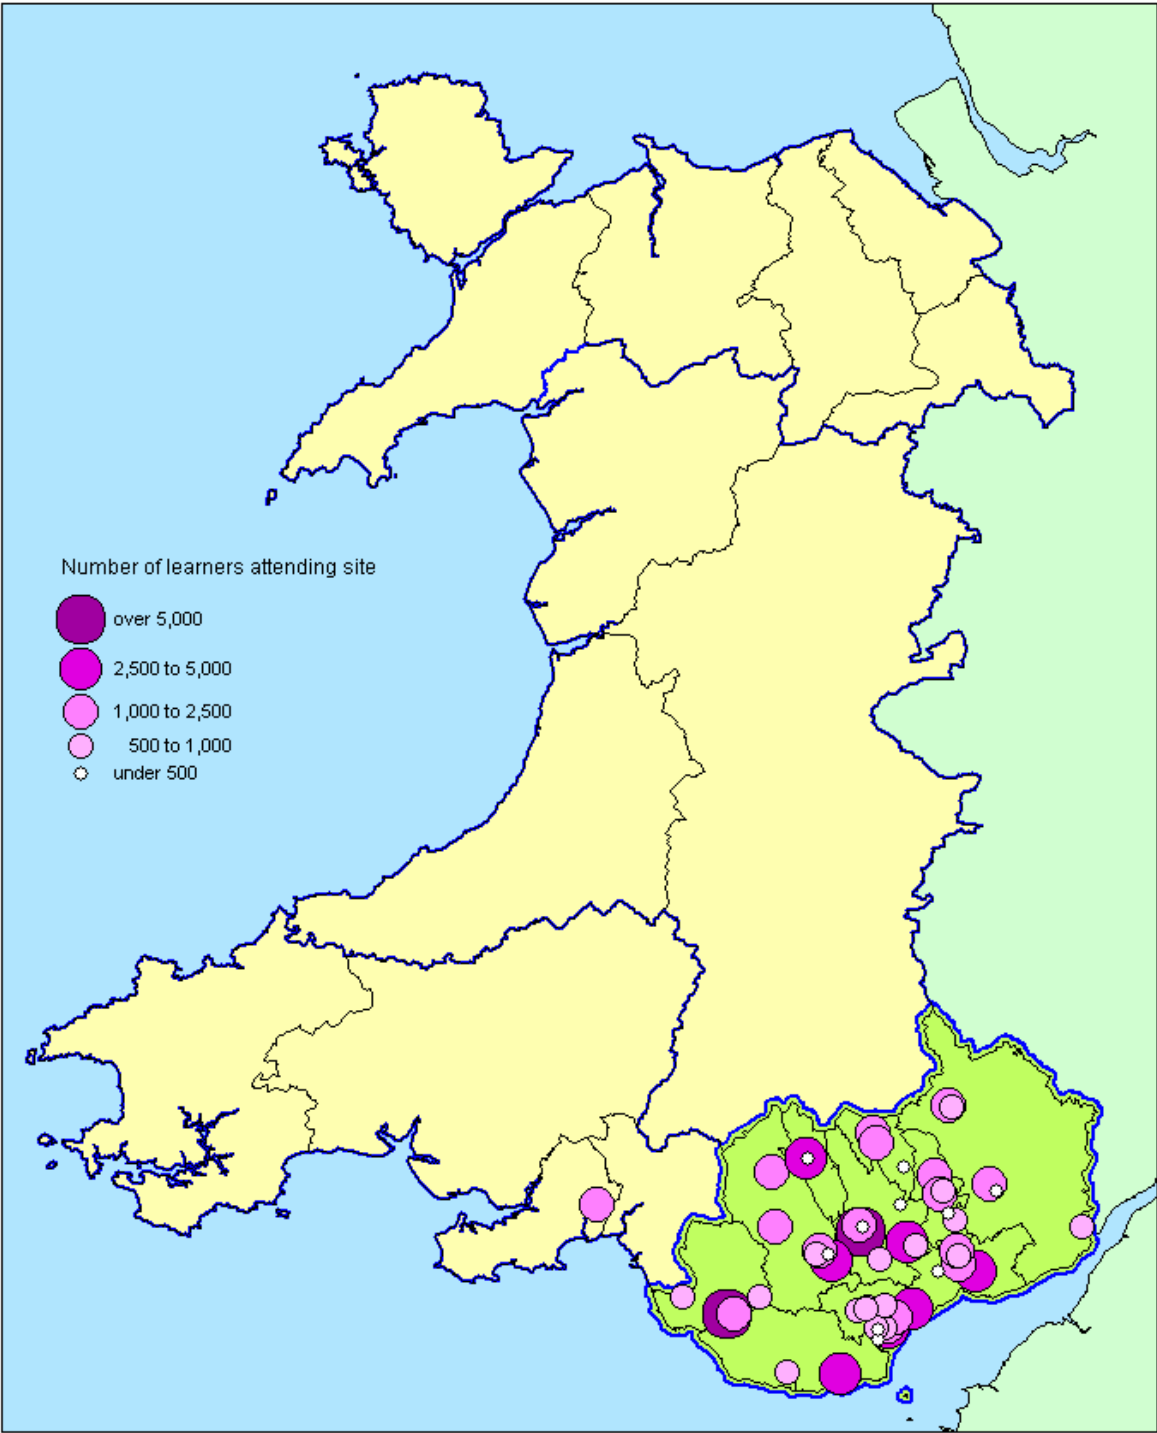

Main sites attended by Mid Wales domiciled learners

Main sites attended by SW Wales domiciled learners

Main sites attended by SE Wales domiciled learners

ANNEX B : DETAILS OF ANALYSIS

▪ Cohort of Learners

- 1 The cohort underpinning the all Wales tables comprises all post-16 learners (excluding learners at higher education institutions and English providers) domiciled in Wales and engaged in learning during 2004/05 and/or 2005/06.
- 2 The cohorts underpinning the regional tables comprise all learners domiciled within the respective region according to their postcode.
- 3 Learners with unidentified postcodes are excluded from all tables. As such, the figures detailed may differ from those reported in other publications. The coverage of learners with known postcodes was 97% and analysis has identified that the distribution of unknown or unidentified postcodes was not regionally biased.
- 4 Learners with non-Welsh postcodes are also excluded from all tables. The impact of this on learner numbers by provider is most notable for those FE institutions situated in Wrexham (Yale College, Coleg Llŷfasi), Flintshire (Deeside College, Welsh College of Horticulture) and Monmouthshire (Coleg Gwent).
- 5 Learners that were enrolled at multiple providers during the course of an academic year have been included once at each provider with whom they were enrolled. This methodology introduces an element of double-counting and differs to that used in other statistical publications, most notably the Statistical First Releases SDR36/2006 and SDR 53/2007 which detail counts of unique learners.
- 6 Learners that were enrolled at an FE institution but were receiving learning from an LEA as part of a subcontracting arrangement are counted as part of the FE institutions provision for the purposes of tables 4L, 5L, 2A and 3A. Learners shown to be learning with a CL provider are undertaking maintained provision delivered by an LEA.
- 7 Tables 1A - 4A and 1P – 2P detail the learning activities and learning programmes pursued by learners respectively. Each learner will have one or more learning programmes and each learning programme one or more constituent learning activities.

▪ Mode of Attendance

- 8 The mode of attendance detailed in tables 1L and 4L was calculated at a learner level. The methodology used is not necessarily consistent with that employed in analysing historic data sources and hence mode of learning data from different sources should not be compared.
- 9 Learners who were either enrolled at a designated WBL training provider or were pursuing a WBL designated learning programme at an FE institution have been categorised as 'work-based learning'. Note that this definition of 'work-based learning' differs from that used for funding purposes.
- 10 Other learners at FE institutions and CL providers have been categorised as either 'full time' or 'part-time' as follows:
 - Learners who were undertaking learning activities/programmes comprising at least 450 guided contact hours per academic year are categorised as 'full time',
 - Learners who were pursuing learning activities/programmes comprising less than 450 guided contact hours per academic year are categorised as 'part-time'.

Guided contact hours are defined as the number of teaching, instructional or assessment contact hours provided for the learner.

- 11 All learners at school sixth forms have been categorised as 'full-time'.

▪ **Disability Status**

- 12 The disability status detailed in table 3L is based on the learner's own self-assessment.

▪ **Subject Areas**

- 13 The subject areas detailed in tables 1A, 3A and 4A are the 15 first-tier areas of learning in QCA/ACCAC's subject sector framework. For more details refer to <http://www.qca.org.uk/239.html>.

▪ **Work-based Learning**

- 14 Tables 1P and 2P are at a learning programme level and provide information relating to WBL provision. These tables are without reference to funding criteria and therefore the definition of WBL differs from that used for funding purposes. For example, some of the learning programmes detailed may relate to technical certificates delivered at FE institutions and funded via FE funding methodologies.

▪ **Rounding**

- 15 All figures are rounded to the nearest 5 and therefore there may be apparent slight differences between the sum of the constituent rows/columns and the totals. A '*' represents numbers greater than 0 but less than 5.

▪ **Cartographic analysis**

- 16 The cartographic analysis contained in Annex B presents the main sites of learning attended by learners domiciled in each region in 2005/06. The sites detailed in each map account for 50% of learners domiciled in the region.
