## Table of Contents

## 1: Context

## 1.1: Contextual Information

1.1.1 Basic Characteristics of your school
1.1.2 Basic Characteristics by National Curriculum year group
1.1.3 Ethnicity
1.1.4 Census Information
1.1.5 The Prior Attainment of Pupils at Key Stage 3
1.1.6 The Prior Attainment of Pupils at Key Stage 4

## 1.2: Absence Information

1.2.1-1.2.3 School Level Absence - 3 Year Trend

## 2: Progress Measures

## 2.1: Key Stage 2 to 4

2.1.1 Contextual Value Added Key Stage 2 to 4 : Overall and Subjects
2.1.2-2.1.4 Contextual Value Added Key Stage 2 to 4 against Relative Attainment at Key Stage 4: Overall
2.1.5-2.1.6 Contextual Value Added Key Stage 2 to 4 against Relative Attainment at Key Stage 4: by Subject
2.1.7 Contextual Value Added Key Stage 2 to 4 against Relative Attainment at Key Stage 4: Overall and Subjects
2.1.8-2.1.11 Contextual Value Added Key Stage 2 to 4 : Overall by pupil groups
2.1.12 Contextual Value Added Key Stage 2 to 4 : Overall, Predicted versus Actual for Pupils - 2009
2.1.13 Contextual Value Added Key Stage 2 to 4 : Pupils Achieving 5 or more A* to C (including English and mathematics) at GCSE and Equivalent
2.1.14 Contextual Value Added Key Stage 2 to 4 : 3 Year Average
2.1.15 Non-Contextualised Value Added Key Stage 2 to 4 : Overall and Subjects
2.1.16-2.1.17 Pupil Progress Charts : Key Stage 2 to 4 by Subject
2.1.18-2.1.19 Pupil Progress Charts : Key Stage 2 to 4 High Attainers by Subject
2.1.20-2.1.21 Expected Progress : Key Stage 2 to 4 by Subject

## 3: Attainment Measures

## 3.1: Key Stage 4

3.1.1-3.1.2 Attainment, Average Capped Point Score, Best 8 Subjects
3.1.3-3.1.4 Attainment, Average Total Point Score at Key Stage 4
3.1.5-3.1.6 Attainment, Average Total Point Score at Key Stage 4 for English
3.1.7-3.1.8 Attainment, Average Total Point Score at Key Stage 4 for Mathematics
3.1.9-3.1.10 Percentage of candidates achieving 5 or more $A^{*}$ to $C$ at GCSE and Equivalent
3.1.11-3.1.12 Percentage of candidates achieving 5 or more $A^{*}$ to $C$ (including English and mathematics) at GCSE and Equivalent
3.1.13-3.1.14 Percentage of candidates achieving 5 or more $A^{*}$ to $C$ (including Functional English and mathematics) at GCSE and Equivalent
3.1.15-3.1.16 Percentage of candidates achieving 5 or more $A^{*}$ to $G$ at GCSE and Equivalent
3.1.17-3.1.18 Percentage of candidates achieving at least one pass at GCSE and Equivalent
3.1.19-3.1.20 Percentage of candidates achieving at least one $A^{*}$ to $C$ at GCSE or Equivalent in a Modern Foreign Language
3.1.21-3.1.22 Percentage of candidates achieving at least one A* to G in a Short Course GCSE or Equivalent in a Modern Foreign Language
3.1.23-3.1.24 Percentage of candidates achieving at least two $A^{*}$ to $C$ at GCSE or Equivalent in Science
3.1.25-3.1.26 Attainment, Average Capped (Best 8) Points Score at Key Stage 4 by Pupil Groups - 2009
3.1.27 Attainment, Percentage Achieving Thresholds at Key Stage 4 by Pupil Group - 2009
3.1.28 Attainment, Summary of Full GCSE Results for All Pupils - 2009
3.1.29 Attainment, Summary of Vocational GCSE Results for All Pupils
3.1.30 Attainment, Relative Performance Indicators for full GCSEs, All Pupils - 2009
3.1.31 Attainment, Relative Performance Indicators for Vocational GCSEs, All Pupils

## AIM OF THE FULL REPORT

The Full Report is designed to help schools and inspectors see how effectively a school is performing in terms of achievement and attainment. The report is made available to schools to help with self-evaluation and development of plans to raise standards, and is used by inspectors to raise questions and hypotheses to explore during an inspection.

## DATA

This version of the Full Report contains analysis based on final data. Please refer to the Full Report cover page for further details for each key stage. Analysis based on this data incorporates approved changes to data you may have requested as part of the Achievement and Attainment Tables checking exercise. These will mainly be the result of successful revisions and re-marks. If, however, your school was involved in a late appeal or if the appeal procedure was ongoing at the time of production of this Full Report these changes may not be reflected.

RAISEonline contains a series of interactive reports which allow access to the underlying pupil level data that underpins the analysis contained in the Full Report. If you think your analysis is wrong a first step may be to check this underlying data in RAISEonline in the Pupil List reports. If you think there is an error in the analysis due to a miscalculation rather than the wrong data, then please use the "Contact Us" facility in RAISEonline.

RAISEonline does contain a copy of the underlying data that a school is able to amend themselves (called "Schools Own data"). For further information click on the "Data Management" button within RAISEonline.

The outcome measure used in the KS2-4 2009 Overall CVA and VA models has changed to ensure that English and mathematics outcomes always contribute to the total outcomes for each learner, since they are vital to learners' futures. The outcome measure for the overall CVA/VA score is now capped at the 8 best GCSE or equivalent qualifications plus a separate bonus for English and mathematics performance. The statistical significance of changes from 2008 to 2009 have not been tested because of the change in methodology, and the 3 year average overall CVA covering 2007 to 2009 has not been calculated. Subject CVA and VA calculations are not affected. For further information about the new methodology please see the RAISEonline website or www.dcsf.gov.uk/performancetables.

The calculation of the national average points score and threshold values used in this Full Report have been revised for 2009 to include, for the first time, the results obtained by pupils working within national curriculum levels in maintained and non-maintained special schools, where those results have been submitted. The change means that all national comparators are slightly lower than they would have been had the methodology not altered. This may slightly improve the significance states of some schools on each APS and threshold measure. Year on year comparisons for a particular school are still valid however, as the change in methodology only affects the national comparator calculations. For further information about the new methodology and its impact please email Ofsted at RAISEonlinehelpdesk@ofsted.gov.uk

## Context

## Table 1.1.1: Basic Characteristics of your school

This section shows some key indicators for your school, together with national averages for Secondary schools. The information is based on the January School Census return, and shows three years' data. This allows you to compare your school's key indicators against the national picture for maintained mainstream schools.

For the current year 'quintile graphs' are also displayed for these indicators. These graphs are divided into five intervals, each containing approximately $20 \%$ of schools. The interval boundaries are shown below the line, and your school's position in the distribution is indicated by a shaded box.

## Table 1.1.2: Basic Characteristics by National Curriculum year group

The table below shows some key indicators for your school broken down by National Curriculum year group. This table includes all pupils listed in the School Census, and therefore values presented below may differ from published figures. "Looked after children" shows the number of children who have been in care for any period during the time they have been at the school, broken down by National Curriculum year group.

## Context

## Table 1.1.4: Census Information

The table below shows some key indicators for up to 10 wards that contribute the greatest proportion of the school's pupils for whom we have been able to match pupil data with their home postcodes.
In the 2001 Census of Population, the school was located in the Hounslow Central ward.
The coverage shows the proportion of pupils within your school for whom it has been possible to match ward information to their home postcode. Coverage may be lower in areas where new postcodes have recently been introduced and in some cases this may mean that this analysis does not reflect the wards from which the school draws its pupils. The analysis should be treated with caution where coverage is below $80 \%$.

## Table 1.1.5: The Prior Attainment of Pupils at Key Stage 3

The graphs below show the prior attainment in terms of Key Stage 2 average points score, of pupils studying at Key Stage 3 in your school in 2008/09. This has been broken down by year group. The graphs also show the national picture for maintained mainstream schools (the national average displayed beside each graph is based on matched pupil records from the 2009 National Pupil Database, and is not the same as the average score of all pupils who took the tests). When interpreting the charts the level of coverage should be taken into account.

Absence

## School Level Absence - 3 Year Trend

## Table 1.2.1

This analysis provides the proportion of enrolments in the school who are classed as Persistent Absentees and the proportion of sessions missed due to Overall Absence. The analysis also provides a comparison with the national average levels of persistent absenteeism and sessions missed, as well as the median trendline level for schools of the same type with the same level of Free School Meal eligibility. The graphs for Persistent and Overall Absence both apply to 2009. Analysis is based on the combined autumn and spring term data.

## Progress Measures Key Stage 2 to 4

## Table 2.1.1: Contextual Value Added Key Stage 2 to 4 : Overall and Subjects

This section provides the overall and subject contextual value added scores for the school relative to the national mean of 1000 . Significance tests have been performed on the data using a $95 \%$ confidence interval, and where the school value differs significantly from the corresponding national value, sig+ or sig- is shown. Where a school figure is significantly above or below that of the previous year an up or down arrow is displayed to the right of the figure. Note that students for whom prior attainment could not be matched are excluded from all value added analyses.

* The outcome measure used in the KS2-4 2009 Overall CVA and VA models has changed to reflect an increased emphasis on English and Mathematics outcomes. The outcome measure for the overall CVA/VA score is now capped at the 8 best GCSE or equivalent qualifications plus a separate bonus for English and Mathematics performance. Significance state changes from 2008 to 2009 have not been tested because of the change in methodology.

## Progress Measures Key Stage 2 to 4

## Contextual Value Added Key Stage 2 to 4 against Relative Attainment at Key Stage 4: Overall

This analysis shows the school's attainment (Average Points Score) relative to the national average (mean) plotted against the school's overall contextual value added. A 95\% confidence interval is shown. Where the confidence interval does not cross the national average line the school value differs significantly from that national average.

A $95 \%$ confidence interval is shown. Where the confidence interval does not cross the national average line the school value differs significantly from that national average.

## Groups - 2009

## Overall contextual value added

This analysis shows the school's CVA score and its attainment relative to the national average. This report provides the overall contextual value added measure for particular groups within the school relative to the national mean of 1000. Significance tests have been performed on the data using a 95\% confidence interval, and where the school value differs significantly from the corresponding national value, sig+ or sig- is shown. This can also be seen on the graph where confidence intervals do not cross the national average line.

* The outcome measure used in the KS2-4 2009 Overall CVA and VA models has changed to reflect an increased emphasis on English and Mathematics outcomes. The outcome measure for the overall CVA/VA score is now capped at the 8 best GCSE or equivalent qualifications plus a separate bonus for English and Mathematics performance. Significance state changes from 2008 to 2009 have not been tested because of the change in methodology.

## Table 2.1.13: Contextual Value Added Key Stage 2 to 4 : Pupils Achieving 5 or more A* to C (including English and mathematics) at GCSE and Equivalent

This analysis provides the number of pupils who achieved $5 A^{*}-\mathrm{C}$ including English and Mathematics in 2009*, grouped by their estimated probability of achieving the threshold. The probability for each pupil is worked out by taking into account their contextual characteristics and their prior attainment at Key Stage 2. Significance tests have been performed on the data using a 95\% confidence interval, and where the school value differs significantly from the schools corresponding predicted success rate, it is highlighted in green (sig+) or blue (sig-).

## Attainment at Key Stage 4

## Chart 3.1.25 and Table 3.1.26: Attainment, Average Capped (Best 8) Points Score at Key Stage 4 by Pupil Groups - 2009

This report provides analysis of pupils average point scores at GCSE and equivalent grouped according to pupil characteristic. Significance tests have been performed on the data using a $95 \%$ confidence interval, and where the school value differs significantly from the corresponding national value, sig+ or sig- is shown.

## School Forward Estimates

This section gives school forward estimates for 2011 based on pupils that were on the roll at the time of the January 2009 School Census.

## Table 4.1: School Forward Estimates for Key Stage 42011

This is based on the Key Stage 2 prior attainment of pupils that were on the roll and in year 9 at the time of $=$ the January 2009 School Census, therefore pupils who were in a different school at the time of the census= will not be included here. This means that for some schools no analysis is possible. $=$

School estimates based on historic transition probabilities. Similar schools are those with similar prior= attainment. The average prior attainment for the school is: 25 <= school prior attainment < 26=

|  | Historic results |  |  |  | 2011 Proportions based on probabilities |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2007 | 2008 | 2009 | 2011 based on current school progression rates | Top 75\% of similar schools | Top 50\% of similar schools | $\left\lvert\, \begin{gathered} \text { Top } 25 \% \text { of } \\ \text { similar } \\ \text { schools } \end{gathered}\right.$ | $\begin{array}{\|l} \text { Top } 10 \% \text { of } \\ \text { similar } \\ \text { schools } \end{array}$ |
| Based on Key Stage 2 |  |  |  |  |  |  |  |  |
| \% 5+ A* - C including English and maths | 26\% | 30\% | 42\% | 38 \% | 37 \% | 39 \% | 41 \% | 44 \% |
| English expected progress | - | 64\% | 71\% | 52 \% | 50 \% | 52 \% | 55 \% | 60 \% |
| Maths expected progress | - | 41\% | 57\% | 45 \% | 43 \% | 45 \% | 47 \% | 51 \% |

Cohort: 111

The calculation of expected progress is a new measure for 2009. It refers to a pupil making the expected= level of progress from Key Stage 2 to Key Stage 4.=

Probabilities based on similar schools are derived from the average attainment and progress of those schools.= Therefore these estimates approximately represent the predicted outcomes of the school at the midpoint of $=$ each group. $=$

For example, achieving the estimates based on the top $75 \%$ of similar schools would place a school= approximately in the 37.5 th percentile for each measure. $=$

Please refer to the Help article for more information. $=$
