

**A revision to the registered childcare inspection outcomes report –
31 December 2009 publication**

An administrative error has been identified in one of the calculations in the registered childcare inspection outcomes report published last week.

For the judgement 'The effectiveness of leadership and management in embedding ambition and driving improvement', only providers judged as outstanding were included. The correct position is as follows:

% outstanding 11% (809)	% Good 53% (4005)	% Satisfactory 32% (2423)	% Inadequate 5% (376)	Total inspections 7613
----------------------------	----------------------	------------------------------	--------------------------	---------------------------

We have now revised these figures for national, local authority and government office region level and have updated the report on the website.
