Statistical Bulletin<br>Number 03/2000

## National Curriculum Assessments of 7, 11 and 14 Year Olds in England - 1999

# NATIONAL CURRICULUM ASSESSMENTS <br> OF 7, 11 AND 14 YEAR OLDS IN ENGLAND - 1999 

## Introduction

## Background

1 This bulletin - the third in the series - provides the results of further analyses carried out on the attainments of pupils in England under the National Curriculum. It contains results of 1999 tasks/tests and teachers' assessments ${ }^{1}$ at each Key Stage. A Statistical First Release ${ }^{2}$ showing these results by Local Education Authority was published in October 1999. This Bulletin expands on that information, and looks at results by type of school ${ }^{3}$, (i.e. maintained, independent and special), size of school and percentage of pupils eligible for free school meals.

2 The Bulletin is also an opportunity to finalise the results published in the Key Stage 1, 2 and 3 Autumn Packages ${ }^{4}$. The data in the Autumn Package of Performance Information for Schools is complementary to this Bulletin and is used by schools for target setting and benchmarking.

3 TAs and tests provide complementary information about pupils' attainment. The tests are designed to show what pupils have achieved in selected parts of a subject at the end of each particular Key Stage. Teacher assessments are a judgement of performance in the whole subject over the academic year.

## Changes to the National Curriculum Assessment tests since 1998

4 There have been no changes to the National Curriculum testing arrangements between 1998 and 1999. The last significant change was between 1997 and 1998. After a pilot in 1997, a mental arithmetic test was introduced in 1998 as part of the Key Stage 2 and 3 mathematics assessments. The mental arithmetic test was a taped test consisting of 20 questions at Key Stage 2 and 30 at Key Stage 3, and it lasted for approximately 20 minutes. The tests were designed to assess the recall and mental agility of the children.

## How to interpret the results

5 The National Curriculum standards have been designed so that most pupils will progress approximately one level every two years. Level 2 is the level expected of most pupils at the end of Key Stage 1; by the end of Key Stage 2 pupils are expected to reach

Level 4; and Levels 5 and 6 are the levels expected of most pupils at the end of Key Stage 3. When presenting analyses that refer to 'expected level' at Key Stage 3, the Department's practice is to measure against those pupils achieving level 5 and above.

## LEVELS IN THE NATIONAL CURRICULUM

## National Targets in Literacy and Numeracy

6 In May 1997 the Government set national targets for 11 year olds in literacy and numeracy, these are shown below.

By 2002:

- $80 \%$ of 11 year olds will reach at least level 4 in the Key Stage 2 English test; and
- $75 \%$ of 11 year olds will reach at least level 4 in the Key Stage 2 mathematics test.

Each Local Education Authority has also been set an individual target for English and mathematics ${ }^{5}$.

## Key Points

7 The key points to emerge from this bulletin are:

- In Key Stage 1 reading task/test - and in TA - $82 \%$ of pupils achieved or exceeded the expected level; $29 \%$ achieved level 3 and above in the reading comprehension test.
- In all Key Stage 1 subjects - both test and TA - a higher percentage of girls than boys achieved or exceeded the expected level. The largest gap was in spelling where girls outperformed boys by eleven percentage points ( $77 \%$ of girls achieved the standard compared to $66 \%$ of boys). In the

1 Throughout the text in this Bulletin, teacher assessment will be referred to as TA.
2 Statistical First Release 29/1999 published in October 1999. This analysis covered all maintained schools, including maintained special schools. An electronic copy of the SFR can be found on www.dfee.gov.uk/statistics.
3 For this Bulletin, maintained schools cover mainstream maintained schools and CTCs; independent schools do not include nonmaintained specials; special schools cover all maintained and non-maintained special schools, as well as all pupil referral units.
4 The Autumn Packages produced by the DfEE, QCA and OfSTED contain the 1999 National results, together with benchmarking and value added information. There are four packages, one for each Key Stage and a GCSE / GNVQ package.
5 The local education authority targets are published in the DfEE Press Notice 5/98.
mathematics test and the science TA the gap was the smallest at three percentage points.

- $71 \%$ of pupils reached Level 4 or above in the Key Stage 2 English test; this represented a six percentage point increase over the 1998 figure of $65 \%$. The gender gap between girls' and boys' achievement closed from sixteen percentage points in 1998 to eleven points in 1999; in 1999, $76 \%$ of girls achieved at least Level 4 in English compared to 65\% of boys.
- $69 \%$ of pupils reached Level 4 or above in Key Stage 2 mathematics test; this represented a ten percentage point increase over the 1998 figure of $59 \%$. In 1999, $69 \%$ of both boys and girls achieved Level 4 and above, but at Level 5 and above boys ( $25 \%$ ) had a three percentage point lead over girls (22\%).
- $64 \%$ of pupils reached Level 5 or above in the Key Stage 3 English test; a fall of one percentage point since 1998. Girls (at $73 \%$ ) had an eighteen percentage point lead over boys (at $55 \%$ ) in English, but there was no difference between the genders at Level 5 and above - or Level 6 - in the mathematics and science tests.
- As seen in 1998, the proportion of pupils classified as lower achievers increased as pupils progressed through the three Key Stages - Key Stage 1 had the lowest and Key Stage 3 had the highest. Similarly the percentage of high achievers fell; Key Stage 3 had the lowest percentage of high achievers.
- Participating independent schools continued to show higher proportions of pupils reaching the expected level than the other types of schools. However, the participation rate of independent schools ranged from $24 \%$ to $50 \%$.
- As in 1998, as the percentage of pupils who were eligible for free school meals increased within a school, the percentage of pupils attaining the target level decreased in all three Key Stages.

## National Results

## Achievement in 1999

8 National results for Key Stages 1, 2 and 3 by level attained are shown in Table 1. In order to examine the school-level distribution of results Tables 5 and 6 show the quartiles ${ }^{6}$ of the percentage of pupils achieving the expected level or above for each of the three Key Stages. 9 In the Key Stage 1 reading task/test - and the TA -
$82 \%$ of pupils achieved or exceeded the standard; $29 \%$ of these pupils were classified as high achievers in the reading comprehension test (i.e. achieving Level 3 and above). Of the four Key Stage 1 subjects, mathematics, at $87 \%$, had the highest percentage of pupils achieving the expected Level 2 and above. The reading task/test, at $66 \%$, had the highest percentage of pupils achieving Level 2B and above. (Tables 1 and 2)

10 The lower quartile for Key Stage 1 reading task/test was $74 \%$, this meant that in at least three quarters of the Key Stage 1 schools $74 \%$ or more of their pupils were at or above Level 2. Similarly in at least three-quarters of Key Stage 1 schools, at least $80 \%$ of pupils achieved Level 2 and above in mathematics. At the higher end of the achievement range, in at least one quarter of Key Stage 1 schools, $96 \%$ or more of the pupils reached or exceeded the standard for mathematics. (Table 5)
$1171 \%$ of pupils achieved or exceeded the expected level in Key Stage 2 English test, which represented a six percentage point increase over the 1998 figure of $65 \%$. In the mathematics test - and in the TA - $69 \%$ of both boys and girls reached the standard. In the science test, overall $78 \%$ of pupils achieved at least a Level 4; girls had a one percentage point lead in the test, whereas boys had a one point lead in the TA. Less than one half of one per cent of pupils were disapplied ${ }^{7}$ from the National Curriculum and around $2 \%$ were absent for the 1999 Key Stage 2 tests. In each of the subjects less than $0.5 \%$ of pupils attained Level 6 or above in the tests or TA. (Table 1)

12 The interquartile range for all schools in the three Key Stage 2 subjects showed a greater spread of school performance than at Key Stage 1. At Key Stage 1 the difference between the upper and lower quartiles was about twenty percentage points; at Key Stage 2 the difference was about twenty-five points. In the English and mathematics tests, one quarter of Key Stage 2 schools had about $85 \%$ or more of their pupils at Level 4 or above. In one quarter of schools, at least $92 \%$ of their pupils achieved or exceeded the standard in Key Stage 2 science test. (Table 5)
$1364 \%$ of pupils gained Level 5 or above in the Key Stage 3 English test; a fall of one percentage point compared to 1998. Only $28 \%$ achieved Level 6 and above in the same test, which was a fall of seven percentage points compared to the 1998 figure of $35 \%$. The percentage of pupils achieving the standard in the 1999 science test also fell one point to $55 \%$, whereas achievement in the mathematics test rose by three percentage points to $62 \%$. The range of school-level results was much wider at Key Stage 3 than the other two Key Stages; the interquartile range was about 40

[^0]percentage points for each test and TA subject. (Tables 1 and 5)

## Lower Attainment

14 For the purpose of this Bulletin, lower achievement is defined as being at least two levels below the standard: Key Stage 1 pupils working towards level 1; pupils at or below level 2 for Key Stage 2; and those pupils at or below level 3 at Key Stage 3. Table 7 shows the percentage of pupils at or below these levels. Table 8 shows the percentage of schools in each band of lower achievement. For example, in $16 \%$ of schools, there were between $10 \%$ and $20 \%$ (10-20) of boys working towards Level 1 in Key Stage 1 writing. (Table 8)

15 In the Key Stage 1 writing task, $6 \%$ of pupils were working towards level 1 compared to $3 \%$ in the reading task/test and mathematics. In each of the subjects, both test and TA, all pupils were classified as working towards level 1 in around $2 \%$ of schools. The lowest proportions were in reading and mathematics, the highest at $3 \%$ was writing TA. (Tables 7 and 8)

16 The proportion of pupils classified as lower achievers is higher at Key Stage 2 than Key Stage 1. Around 7\% of pupils were at level 2 or below in English and mathematics, in test and TA. In all test subjects, $2 \%$ of schools had all their pupils classified as low achievers, while for the TA, the comparable figure was $3 \%$ of schools. (Tables 7 and 8)

17 Of the three Key Stages, Key Stage 3 had the highest proportion of low attainment. In test and TA for all subjects, $12 \%$ of the pupils were in the low achievement category. The percentage of schools in which all pupils were at Level 3 or below was higher in the Key Stage 3 TA than in the tests; for example, 10\% of schools contained pupils who all reached at most Level 3 in the mathematics TA, compared to $5 \%$ in the mathematics tests. (Tables 7 and 8)

18 For all Key Stages the independent schools who volunteered to return results had the lowest proportion of low achievement. Special schools had the highest rate of low achievement. (Table 9)

## Higher Attainment

19 Higher achievement for Key Stage 1 is classified as those achieving level 3 or above; for Key Stage 2 it is those pupils at level 5 or above; and at Key Stage 3 it is those pupils who reach level 7 or above. Table 11 shows the percentage of pupils achieving these levels. Table 12 shows the percentage of schools in each band of higher achieving pupils. For example, $26 \%$ of schools have between $10 \%$ and $20 \%$ (10-20) of their Key Stage 1 pupils at level 3 or above in the mathematics test. (Table 12)

20 In the Key Stage 1 reading test, $29 \%$ of pupils were at or above level 3 , compared to $8 \%$ in the writing test and $21 \%$ in the mathematics test. Similar levels of high achievement were gained in the Key Stage 1 TAs. In all subjects, less than $1 \%$ of schools had all their pupils achieving level 3 or above in the tests. (Tables 11 and 12)

## 21 The percentage of high achievers in Key Stage 2

 ranged from 20\% in English TA to 27\% in science test. A higher percentage of boys were high achievers in 1999 Key Stage 2 mathematics and science tests than girls. Compared to 1998, the percentage of high achievers has risen, notably in science where it rose from $16 \%$ in 1998 to $27 \%$ in 1999. Across the other subjects the percentage of high achievers was around six percentage points higher in 1999 than in 1998. In about 10\% of schools, at least half of the pupils achieved level 5 or above in the Key Stage 2 tests. (Tables 11 and 12)22 Key Stage 3 had the smallest proportion of high achieving pupils. In mathematics $14 \%$ of pupils were high achievers, compared to $6 \%$ and $7 \%$ in the science and English tests respectively. In the English and science tests, less than $1 \%$ of schools had more than half their pupils classified as high achievers, although the figure for mathematics was 4\%. (Tables 11 and 12)

Achievement in 1999 compared with 1997 and 1998 23 Between 1997 and 1998 the percentage of pupils who achieved Level 2 and above in Key Stage 1 reading and mathematics was static at $80 \%$ and $84 \%$ respectively. In 1999, reading rose by two percentage points to $82 \%$ of pupils at or above the expected level; and mathematics rose three percentage points to $87 \%$ of pupils reaching the standard. Writing at Key Stage 1 continued its steady increase: up one point from $80 \%$ in 1997 to $81 \%$ in 1998, then up a further two percentage points to $83 \%$ of pupils at Level 2 and above in 1999. This increase was mirrored in writing TA and writing test at Level 2B and above. Achievement at Level 2B and above in Key Stage 1 mathematics test fell between 1997 and 1998. Although in 1999 the percentage of pupils achieving Level 2 b and above subsequently rose three points from $61 \%$ in 1998 to $64 \%$, it remained below the 1997 level of 65\%. (Table 4)

24 In the 1999 Key Stage 2 tests, compared to 1998, the percentage of pupils achieving the expected level rose in mathematics by ten percentage points (from $59 \%$ to $69 \%$ ), by nine points in science (from $69 \%$ to $78 \%$ ) and by six points in English (from $65 \%$ in 1998 to $71 \%$ in 1999). Compared to 1997, the 1999 Key Stage 2 reading tests improved by eleven percentage points from $67 \%$ at or above the standard to $78 \%$ in 1999. By comparison, the percentage of pupils achieving Level 4 and above in the writing test only increased by one point from $53 \%$ in both 1997 and 1998 to $54 \%$ in 1999. (Table 4)

25 In 1999 the proportion of Key Stage 3 pupils achieving level 5 or above decreased by one percentage point in both English and science tests, down to $64 \%$ and $55 \%$ respectively. In 1999, following the one percentage point fall in mathematics test between 1997 and 1998, the percentage of pupils who reached the standard in the Key Stage 3 mathematics test rose three percentage points from $59 \%$ in 1998 to $62 \%$. The percentage of pupils at Level 6 and above in the English test fell by seven point to $28 \%$ in comparison to the 1998 figure of $35 \%$; in mathematics the percentage of pupils at Level 6 and above rose two percentage points to $38 \%$. (Table 4)

## Results by Gender

26 In all Key Stage 1 subjects the percentage of girls who achieved the expected level or above was higher than the percentage of boys. This was true for both test and TA; it was also true at Level 2B and above. The largest gap was ten percentage points in writing; $88 \%$ of girls achieved the standard compared to $78 \%$ boys. In the mathematics test, mathematics TA and science TA, the gender gap was much smaller at between three and four percentage points. In 1999, in all three test subjects and four TA subjects, at least a quarter of schools had $100 \%$ of their girls at Level 2 or above (although it was not necessarily the same schools within each subject). Boys only achieved this feat in mathematics test and science TA. (Tables 2 and 6)

27 In all aspects of Key Stage 1 fewer girls were working towards Level 1 than boys. The widest difference in the proportion of boys and that of girls in the low achievement category was in writing TA - $3 \%$ of girls fell into this category compared to 7\% of boys. At the high achieving end of the spectrum, girls outperform
boys in reading and writing, for example, in the reading test/task $35 \%$ of girls compared with $24 \%$ of boys were high achievers. However the performance of boys was higher than girls in both the mathematics test and TA plus science TA. (Table 7 and 11)

28 In the Key Stage 1 tests and TA for all of the subjects, girls and boys showed similar improvement since 1997. Girls also outperformed boys in all types of schools, except special schools where boys were generally better, they had a three percentage point lead over girls in reading task/test. (Tables 2 and 4)

29 At Key Stage 2, girls outperformed boys in the English tests, 76\% of girls attained a Level 4 or above compared to $65 \%$ of boys. At both test and TA for mathematics and science boys and girls had a very similar percentage distribution at each level. Boys equalled or exceeded the performance of girls in the mathematics and science tests plus a slightly higher proportion of boys were classed as high achievers in both subjects. (Tables 1, 4 and 11)

30 At Key Stage 3, the achievement of boys and girls was equal in the mathematics and science tests. Girls outperformed boys by 18 percentage points in the English test and TA. In the English test 17\% of boys, compared to $7 \%$ of girls were working at level 3 or below. (Tables 4 and 7)

31 The 1999 English and mathematics results for both boys and girls at Key Stage 3 showed an improvement since 1997. The science test results continued to decline for both boys and girls, by around 5 percentage points since 1997. (Table 4)

CHART I:
Percentage of pupils achieving level 2 or above in the Key Stage 1 tests

32 The analyses of attainment in the Key Stage 3 noncore subjects showed that a higher percentage of girls achieved the expected level in all subject except physical education. In PE boys ( $75 \%$ ) had a two percentage point lead over girls ( $73 \%$ ). This compares with a sixteen point lead that girls had over boys in art and music. Please note that unlike the other non-core subjects, the expected level in modern foreign languages at Key Stage 3 is Level 4. (Table 1)

## Results by School Type

33 At Key Stage 1, the participating independent schools had the highest percentage of pupils reaching the expected level in all subjects. The difference between attainment at Level 2 in maintained schools and participating independent schools was in the range of ten to sixteen percentage points across test and TA. At Level 2B, the gap was wider at about twenty-five percentage points. For maintained schools, the percentage of pupils achieving at least the expected level at Key Stage 1 test and TA, has improved since 1997 for all subjects. By comparison, achievement in participating independent schools remained broadly unchanged. (Table 3)

34 Special schools had the least number of pupils reaching the expected level, with between $2 \%$ (writing TA ) and $5 \%$ (reading task/test) reaching level 2 . In special schools, when compared to the 1998 results, the percentage of pupils achieving the standard in all subjects - both test and TA - had either risen or remained constant. (Table 3)

35 In all Key Stage 1 subjects, at test and TA, fewer than one in twenty pupils were working towards level 1 in maintained schools, compared to over 3 in 5 pupils in special schools. In participating independent schools only one per cent of Key Stage 1 pupils were graded as working towards level 1 and this was only in the writing TA and task. In comparison, about 3 in 5 pupils were classed as high achievers in independent schools in the reading test compared to 3 in 10 pupils in maintained schools. (Tables 9 and 13)

36 A similar picture is shown at Key Stage 2, participating independent schools showed higher proportions of pupils reaching the expected level than other types of institution. The difference between independent schools and maintained schools was in the range thirteen (science test) to twenty-five (writing test) percentage points. As with Key Stage 1, the percentage of pupils achieving the expected level in special schools since 1998 has either increased or remained constant; the largest year-on-year increase was in science test which moved up from $7 \%$ in 1998 to $10 \%$ in 1999. (Table 3)

37 In maintained schools, less than 7\% of Key Stage 2 pupils were working at Level 2 or below, compared with over $70 \%$ in special schools. Just under $50 \%$ of pupils in participating independent schools were classified as higher achievers, compared to around $25 \%$ in maintained schools. (Tables 9 and 13)

38 As at Key Stage 1, the percentage of pupils achieving the expected level in Key Stage 2 for maintained schools increased for all subjects, test and

CHART 2:
Percentage of pupils at level 5 or above in the Key Stage 3 tests by school type

TA. The largest increase from 1997 to 1999 was in the reading test that increased by 11 percentage points from $67 \%$ in 1997 to $78 \%$ in 1999. The results for participating independent schools have mostly remained unchanged, except for the writing test which fell for the second year running. (Table 3)

39 At Key Stage 3, participating independent schools' results were higher, but the difference between them and the results of maintained schools was narrower than at Key Stage 2. In the English test the difference was 15 percentage points (compared to 21 at Key Stage 2). Unlike maintained schools where the achievement of the expected level in mathematics and science was broadly the same between boys and girls, in independent schools girls had a four and six percentage point lead over boys. This pattern was repeated at Level 6 and above. (Tables 2 and 3)

40 The proportion of pupils at Key Stage 3 who are classified as lower achievers is greater than at Key Stages 1 and 2 across all school types. The percentage of low achievers at Key Stage 3 in independent schools was comparatively much larger than at Key Stage 2. This is true across all subjects both test and TA. In special schools there were fewer pupils in the low achievement category for Key Stage 3 mathematics than at Key Stage 2 mathematics. In terms of high achievement, the participating independent schools had a higher proportion of pupils than other school types. Although, in the science test $1 \%$ of maintained schools had half of their pupils at Level 7 and above, whereas less than half of one percent of independent schools achieved this.
(Tables 9, 13 and 14)

## School Characteristics

## Size of cohort

41 Table 15 sets out the achievement of the expected level across the three Key Stages by size of cohort. Please note that this does not reflect achievement by class size, it simply reflects the size of the eligible cohort for each Key Stage within the school regardless of how many classes each school had.

42 For schools with a Key Stage 1 cohort of 10 or more pupils, the school size appears to have little effect on the proportion achieving Level 2 or above - the difference is only one or two percentage points. Schools with the a pupil cohort size in the ranges 10-20 and over 100 consistently had a higher than average percentage of pupils achieving or exceeding the standard. The percentage of pupils who reached at least Level 2 in schools with fewer than 10 pupils was around 20 percentage points lower than the average. This may be due to the higher proportion of special schools in this group. (Table 15)

43 Key Stage 2 showed a similar pattern to that of Key Stage 1, but the range of results for schools with a cohort of 10 or more was slightly larger at two to four percentage points. The greatest difference was five percentage points in mathematics test between schools of $20-40$ pupils and those with between $40-80$ pupils. As with Key Stage 1 the percentage of pupils who achieved at least Level 4 was lowest in schools with fewer than ten pupils in the cohort. In these schools achievement of the standard was around ten percentage points below the average. (Table 15)

CHART 3:
Quartiles of achievement by size of school, Key Stage 2 mathematics test - 1999

44 At Key Stage 3 the percentage of pupils achieving the standard peaked at two percentage points above average in schools with between 200 and 300 pupils. Schools with larger or smaller cohorts had a smaller percentage of pupils achieving the standard. Schools with the smallest cohorts (less than 50 pupils) had the lowest percentage of pupils at Level 5 and above, at around 35 percentage points below average; achievement in the next higher range was around five percentage points below the average. (Table 15)

## Free School Meals

45 At Key Stage 1 schools with fewer than $5 \%$ of pupils eligible for free school meals have over $90 \%$ of their pupils reaching the expected level in all subjects. Schools with over $40 \%$ (the highest band) free school meals eligibility had between $67 \%$ (reading task/test) and 75\% (mathematics) of their pupils at this level. Schools in the lowest free school meals band were approximately ten percentage points above average, whereas schools in the highest band were 15 points below average. This shows that as the eligibility for free school meals increased, the percentage of pupils attaining the expected level fell. The band that contained schools with $15 \%$ to $20 \%$ free school meal eligibility corresponded to average
performance in Key Stage 1 test and TA for all subjects. In the highest eligibility band, three quarters of schools have at least $50 \%$ of pupils at Level 2; one quarter has at least $77 \%$ of their pupils at Level 2 or above. (Tables 16 and 17)

46 A similar pattern emerged at Key Stage 2, although the difference in results between the high and low eligibility bands was greater than Key Stage 1. The lowest free school eligibility band was 14 percentage points above average, whereas the highest was twenty points below average. In the lowest eligibility band (which accounts for a quarter of all Key Stage 2 schools) well over $80 \%$ of pupils reached Level 4 and above in all subjects. Chart 4 illustrates the range of achievement by free school meals band for Key Stage 2 mathematics; eight schools in the highest free school meal band had $100 \%$ of their pupils at Level 4 or above in Key Stage 2 mathematics test. (Table 16)

47 At Key Stage 3, the same was true and again a much larger difference was apparent. In the English test the range of achievement is between $83 \%$ and $38 \%$, with an average of $64 \%$ of pupils at or above the expected level. Generally, achievement in the lowest band was 20 points above averaged compared to thirty percentage points below average in the highest band. One quarter of schools in the two highest bands ( $30 \%$ to $40 \%$ and over

CHART 4:
School achievement of Level 4 and above in the Key Stage 2 mathematics test ${ }^{8}$

[^1]$40 \%$ free school meals eligibility) have no pupils at Level 5 and above. (Tables 16 and 17)

## School Performance Differentials by Gender

48 At Key Stage 1, in all subjects, the majority of schools have girls out performing boys. In a high proportion of these schools girls had at least ten percentage point lead over boys. Both the Key Stage 2 and Key Stage 3 English tests followed the same pattern as Key Stage 1. The most notable change since 1998 was in Key Stage 2 English where the number of schools where girls outperformed boys had dropped from $78 \%$ in 1998 to $69 \%$ in 1999, a fall of nine percentage points. A year-on-year comparison of the other Key Stage 2 and 3 tests, mathematics and science, showed that the results stayed broadly unchanged with boys still outperforming girls. (Table 18)

## Local Education Authority level analysis

49 Results by local education authority were published in Statistical First Release 29/1999, and also available on the website: http://www.dfee.gov.uk/statistics

## Technical Definitions

## How the national results were derived

50 This year a new method for calculating the percentage of pupils who achieved Level 2 or above in Key Stage 1 reading has been introduced - adopting QCA's preferred approach. In this Bulletin the old
method is referred to as "reading test", whereas the results of the new methodology are called "reading task/test". The old "reading test" calculation included those pupils who achieved Level 2 and above in the reading comprehension test plus those who did not reach Level 2 in the test but did reach Level 2 in the task. By comparison, the new "reading task/test" method takes those pupils who achieved Level 2 in the reading task (i.e. Levels 2C, 2B and 2A) and those at Level 3 and above in the reading comprehension tests (at Levels 3 and 4). Please note that Table 1 separately identifies achievement in the reading task and reading comprehension test; the other tables show the composite "reading task/test".

51 The figures in this Bulletin are based on the final National Curriculum data. They supersede the National Curriculum assessment test results published in the Departmental Press Notice on Wednesday 15 September 1999 and those in the 1999 Autumn Package. The amendments to the data were as a result of:

- requests from schools through the primary performance tables checking exercise to change Key Stage 2 data for English, mathematics and science;
- an error that wrongly excluded 30,000 pupils from the analysis of Key Stage 2 reading and writing; and
- late reviews and additional Key Stage 3 data supplied to the National Data Collection Agency

52 The error in the calculation of the percentage of pupils reaching level 4 and above in the Key Stage 2

CHART 5:
Proportion of pupils achieving expected level and above by eligibility for free school meals - 1999

reading and writing tests does not affect the overall equivalent English figures. The data for all eligible pupils was included in the calculation of the English figure, but not for the subsidiary reading and writing figures. In reading and writing 30,000 records for pupils who were absent, working at a Level below the test, disapplied or had left the school were omitted. As a consequence the percentages of pupils who achieved Level 4 and above in Key Stage 2 reading and writing tests were inflated. The percentage of pupils achieving level 4 or above in the reading test and writing test was $78 \%$ and $54 \%$ respectively.

53 This Bulletin presents all figures as whole numbers. The rounding convention is as follows: any fractions of 0.5 and above will be rounded up, anything less than 0.5 will be rounded down, e.g. 85.4586 will be rounded to $85 ; 85.5$ and 85.5283 will be rounded to 86 .

54 All children who are moving onto the next Key Stage programme of study in the next school year are regarded as being in the final year of that Key Stage. All children in their final year of a Key Stage must be assessed. Most of the children will be in the year group with similarly aged pupils. For example, most 11 year olds will be in year group 6 and at the end of Key Stage 2. Some children, however, may be older or younger because they are not being taught with their chronological year group.

55 Key Stage 1 results are collected by the Department for Education and Employment from LEAs, and approved Agencies acting on behalf of participating independent schools. All schools are provided with individual optical mark reader (OMR) pupil record sheets on which to enter individual pupil's Key Stage 1 teacher assessment and task/test results. The completed sheets are processed through OMR machines that validate the results for completeness and consistency. Before 1999, the LEA/Agency aggregated the individual pupil results to a school-level before submission to the Department. In 1999 the Department received pupil-level results. The statistics for Key Stage 1 in this Bulletin are consistent with the National Curriculum assessment results published in September 1999.

56 The Key Stage 2 statistics are produced from data provided to the Department by the National Data Collection Agency (NDCA) at the end of August 1999.
The data was subsequently updated with changes that resulted from the checking exercise for the 1999 comparative tables of primary school performance. The Key Stage 3 statistics are produced from the August 1999 NDCA data, but updated to reflect late returns and reviews. The denominator for national results include
pupils who were working below the level of the test, were disapplied from the National Curriculum or were absent.

57 Participation by independent schools was voluntary; so the national analyses only include results from those independent schools who chose to make a return. The participation rates for maintained schools can be seen in Table A. By comparison, in 1999, $24 \%$ of independent school submitted Key Stage 1 results, $50 \%$ submitted Key Stage 2 results and $27 \%$ submitted Key Stage 3 results.

## How the assessments were made

58 Pupils' attainment was assessed in relation to the National Curriculum programmes of study, and pupils were awarded levels on the National Curriculum scale to reflect their attainment. A small number of pupils were assessed as 'working towards level 1' ('W').
Measures are taken to ensure that standards in the tests remain consistent from year-to-year. When the tests are marked there are no quotas set for each of the National Curriculum levels, or underlying assumptions about the proportion of pupils who should be at any particular level. Proportions are decided entirely by how pupils' attainments measure up to the standards of the National Curriculum.

59 The Key Stage 2 and 3 tests were marked externally by agencies contracted by the Qualifications and Curriculum Authority (QCA). A review procedure was available for schools who had concerns over the marking of scripts.

60 In art, music and physical education, teachers were required to make an assessment of the extent to which pupils had met the end of Key Stage 3 descriptions. In order to monitor national standards in these subjects, schools were asked to provide school-level data for national data collection purposes on an optional basis using the following categories:

- A - pupils who are working towards the expectation for the end of Key Stage 3;
- $\quad$ - pupils who are achieving the expectation for the end of key stage;
- C - pupils who are working beyond the expectation for the key stage; and
- D - pupils demonstrating exceptional performance.

61 The A-D categories were solely for National Data Collection purposes and for the purposes of this Bulletin; the A-D categories were not reported to parents.

## TABLE A:

PARTICIPATION BY MAINTAINED SCHOOLS IN THE NATIONAL CURRICULUM ASSESSMENTS

|  | 1991 | 1992 | 1993 | 1994 | 1995 | 1996 | 1997 | 1998 | 1999 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 7 year olds <br> maintained schools | Pilot |  |  |  |  |  |  |  |  |
| 11 year olds | $90 \%$ | $100 \%$ | $17 \%$ | $52 \%$ | $97 \%$ | $99 \%$ | $99 \%$ | $99 \%$ | $100 \%$ |
| maintained schools |  |  |  |  |  | $91 \%$ | $99 \%$ | $98 \%$ | $99 \%$ |

TABLE 1
Test and teacher assessment levels of attainment, by subject

## Key Stage 1

## Test results

Percentage of boys at each level

|  | X | A | D | W | L | 1 | 2C | 2B | 2A | 3 | 4+ | TOTAL | \% at level 2 or above | \% at level 2B or above |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Reading Task ${ }^{1}$ | 24 | 0 | 0 | 4 | - | 18 | 17 | 21 | 15 | - | - | 100 | 53 | 36 |
| Reading Comprehension Test ${ }^{1}$ | 22 | 0 | 0 | - | 3 | - | 17 | 18 | 16 | 24 | 0 | 100 | 77 | 57 |
| Writing Task | - | 0 | 1 | 7 | - | 13 | 32 | 27 | 13 | 6 | 0 | 100 | 78 | 46 |
| Spelling | 19 | 0 | 0 | - | 14 | - | - | 45 | - | 21 | - | 100 | 66 | - |
| Mathematics | - | 0 | 0 | 3 | - | 11 | 23 | 21 | 19 | 22 | 0 | 100 | 85 | 62 |

Percentage of girls at each level

|  | X | A | D | W | L | 1 | 2C | 2B | 2A | 3 | 4+ | TOTAL | $\%$ at level 2 or above | \% at level 2B or above |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Reading Task ${ }^{1}$ | 35 | 0 | 0 | 2 | - | 11 | 15 | 21 | 16 | - | - | 100 | 52 | 37 |
| Reading Comprehension Test ${ }^{1}$ | 13 | 0 | 0 | - | 2 | - | 15 | 18 | 16 | 35 | 0 | 100 | 86 | 68 |
| Writing Task | - | 0 | 0 | 4 | - | 8 | 27 | 30 | 20 | 10 | 0 | 100 | 88 | 61 |
| Spelling | 11 | 0 | 0 | - | 12 | - | - | 48 | - | 28 | - | 100 | 77 | - |
| Mathematics | - | 0 | 0 | 2 | - | 9 | 23 | 23 | 21 | 21 | 0 | 100 | 88 | 65 |

## Percentage of all pupils at each level

|  | X | A | D | W | L | 1 | 2C | 2B | 2A | 3 | 4+ | TOTAL | \% at level 2 or above | \% at level 2B or above |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Reading Task ${ }^{1}$ | 29 | 0 | 0 | 3 | - | 14 | 16 | 21 | 16 | - | - | 100 | 52 | 36 |
| Reading Comprehension Test ${ }^{1}$ | 18 | 0 | 0 | - | 3 | - | 16 | 18 | 16 | 29 | 0 | 100 | 82 | 63 |
| Writing Task | - | 0 | 0 | 6 | - | 11 | 29 | 29 | 17 | 8 | 0 | 100 | 83 | 53 |
| Spelling | 15 | 0 | 0 | - | 13 | - | - | 47 | - | 24 | - | 100 | 71 | - |
| Mathematics | - | 0 | 0 | 3 | - | 10 | 23 | 22 | 20 | 21 | 0 | 100 | 87 | 64 |

Figures have been rounded and may not total $100 \%$.
There was no fine grading for spelling, hence the figures have been shown under $2 B$.
Schools were only required to administer the spelling test to pupils working at levels 2 and 3.

- represents no pupils
$0 \%$ represents some pupils but less than $0.5 \%$
$\mathbf{X}$ represents pupils who were not required to be entered for the reading comprehension tests and/or the spelling test and pupils not awarded a level from the reading task because they achieved a level from the reading comprehension tests at level 3.
A represents pupils who were absent.
D represents pupils who have disapplied under section $364 / 365$ of the 1996 Education Act.
W represents pupils who are "working towards" level 1 , but have not yet achieved the standards needed for level 1 .
L represents pupils who were statutorily entered for the reading comprehension test and/or the spelling test but who did not achieve at least level 2 in these tests.

1 Please see paragraph 50 within the text for explaination on the calculation of the percentage of pupils at Level 2 or above and Level $2 B$ or above in this table.

Figures have been rounded and may not total $100 \%$

- represents no pupils
$0 \%$ represents some pupils but less than 0.5\%
D represents pupils who have been disapplied under section $364 / 365$ of the Education Act
A represents pupils who were absent
B represents pupils who were assessed by teacher assessment only
$\mathbf{N}$ represents pupils who have failed to register a level for reasons other than absence
W represents pupils who are "working towards" level 1 , that is, they have not yet achieved the standards required for level 1

[^0]:    6 Quartiles are used to show the spread of school level achievement. The median is the result obtained by the school at the mid-point of the ordered distribution, i.e. the result at which half the schools have results above that level and half have results below. The upper quartile is the achievement level at which a quarter of schools have results at or exceeding this level and 75\% below the level. The lower quartile is the achievement level at which $25 \%$ of schools have results below this level and $75 \%$ exceeding this level.
    7 Pupils disapplied under section 364/365 of the 1996 Education Act.

[^1]:    8 The length of the boxes represents the interquartile range (the middle 50\%) of performance amongst schools. The top and bottom 2.5 per cent of schools lie beyond the whiskers on both sides of the box.

[^2]:    Pupils were awarded a compensatory level 3 in the English test and level 2 in the mathematics and science tests when they narrowly failed to achieve a level $4 / 3$.

[^3]:    * Percentage of 14 year olds achieving level 4 and above

[^4]:    U represents the Upper Quarilie level of achievement
    L represents the Lower Quartile level of achievement
