NEET Statistics - Quarterly Brief – Quarter 2 2012 August 2012

Introduction

This note sets out the available statistics on young people not in education, employment or training (NEET) and young people not in education or training (NET) from three data sources:

i) Statistical First Release (SFR)

These are the authoritative national estimates of NEET and NET rates. They are published annually in the 'Participation in Education, Training and Employment by 16-18 Year Olds in England' SFR. These data are only available annually and cannot be disaggregated to sub-national levels.

ii) Quarterly Labour Force Survey (LFS)¹

Analysis of the LFS allows in-year estimates to be made of NEET and NET trends as well as estimates for other age groups, including 16-24, 18-24 and 19-24. The quarterly LFS estimates cannot be directly compared with the headline SFR series which is based on more detailed but less timely data.

The most recent LFS based estimates for NEET are from Quarter 2 2012 which are shown in following table.

	Quarter	Quarter	Quarter 2	% point change from
	2 2010	2 2011	2012	Q2 2011 to Q2 2012 ₁
Age 16	5.0%	6.4%	5.6%	-0.7
Age 17	10.2%	8.8%	9.6%	+0.8
Age 18	15.0%	14.3%	15.5%	+1.2
Age 16-18	10.2%	9.8%	10.3%	+0.5
Age 19-24	16.4%	19.1%	18.5%	-0.6
Age 16-24	14.4%	16.2%	16.0%	-0.2
Source: Labour I	Earoa Survay	Outortor 2		

Table: NEET rates for different age cohorts

Source: Labour Force Survey Quarter 2

 iii) Local Authorities' Client Caseload Information System (CCIS).
 CCIS is the management information data that results from the duty for all Local Authorities to track the activity of young people aged 16-19 years old resident in their area. Data can be aggregated to provide estimates for regions within England.

The data from all three sources cover England.

Section 1- Trends. Focuses on the key trends in the NEET and NET data series for 16-18 year olds.

Section 2- Methodology and Notes. Explains the methodology used to derive the different series, and gives guidance on their usage.

Section 3- Tables. Contains four tables showing numbers and percentages for the key data series on NET and NEET.

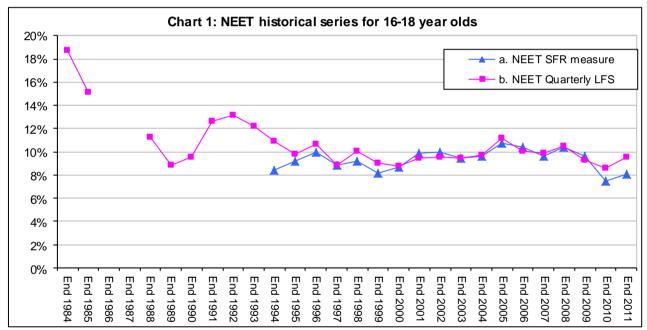

¹ LFS data from Quarter 3 2009 onwards has been reweighted to 2011 population estimates. Further reweighting in line with 2011 Census data is not expected until late 2013.

1. Trends

Historical Context

Understanding the historical trends in NEET rates is an important part of placing current performance in perspective. In order to do so, we have to use historical LFS data that is not directly comparable with any other series in this note, and so should be used as context only. Unfortunately, due to data issues, estimates for 1986 and 1987 are unavailable. The chart below also shows the NEET SFR measure for comparison.

The current proportion of young people aged 16-18 who are NEET is much lower than in the 1980s, and has declined since a recent peak in 2005.

Source: Statistical First Release (SFR) 'Participation in Education, Training and Employment by 16-18 Year Olds in England' and analysis of Labour Force Survey (LFS).

Note on LFS estimates:

Annual data sets are used for 1984 to 1991.

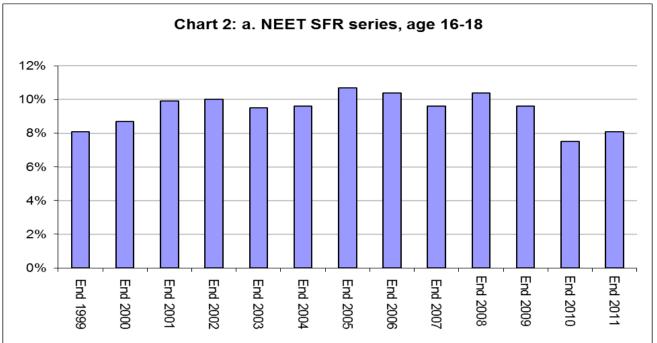

Quarter 4 data is used from 1992 onwards.

Between 1992 and 1994 the data does not exclude individuals answering yes to the qulnow variable, and between 1995 and 1999 individuals sampled in December were not asked the qulnow variable. This may mean that between 1992 and 1999 the proportion NEET is very slightly over-estimated.

a. NEET SFR series (last updated June 2012)

The Department's Statistical First Release (SFR) 'Participation in Education, Training and Employment by 16-18 Year Olds in England' is the primary source of national data on 16-18 year olds NEET.

The latest SFR NEET rate for 16-18 year olds, at end 2011, was 8.1%, a rise of 0.6 percentage points from 7.5% at end 2010. The rise was a result of the employment rate of 16-18 year olds NET falling, despite participation in education and training increasing. Participation in education and training has risen every year since end 2002, from 75.0% to 85.4% at end 2011. However, the impact of increasing participation on the proportion NEET is counter-balanced by a falling employment rate of those 16-18 year olds NET over same period 2002-2011 fell from 60% to 44%.

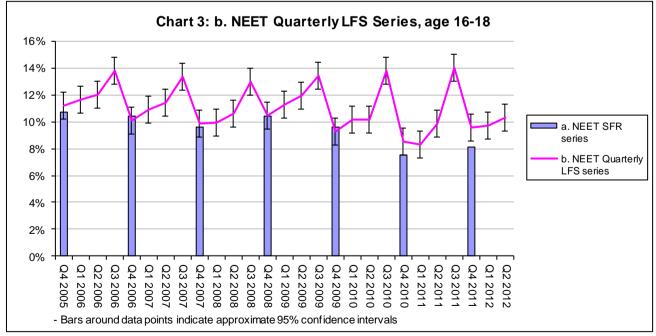

Source Statistical First Release (SFR) 'Participation in Education, Training and Employment by 16-18 Year Olds in England'

b. NEET quarterly LFS series (last updated August 2012)

We can monitor trends in NEET rates between the publications of the SFR series using quarterly LFS data.

The trend data for 16-18 year olds shows seasonal patterns that reflect the academic year: lower rates in autumn (Quarter 4, October to December) followed by a gradual rise in spring and early summer (Quarters 1 & 2, January to June) with a peak in late summer (Quarter 3, July to September).

Source: Quarterly Labour Force Survey and Participation SFR

The latest data show that the proportion of 16-18 year olds NEET increased by 0.5 percentage points, to 10.3% in the second quarter of 2012, compared to the second quarter of 2011. This increase is not statistically significant.

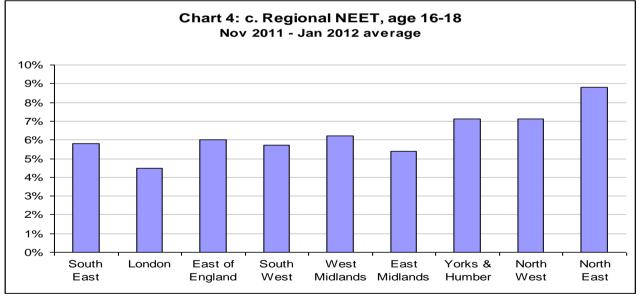

The proportion of 16-18 year olds NET decreased by 0.4 percentage points between Quarter 2 2011 and Quarter 2 2012 (see section 1.e.). As such we can explain the increase in the proportion of 16-18 year olds NEET by a falling employment rate for young people not in education and training over that period – it fell from 49% to 46%, a decrease that is not statistically significant.

There is some evidence for an increasing seasonality in the NEET data. Comparing Q4 troughs to the following Q3 peak (and so, roughly, the same cohort of young people), the difference averaged 3.0 percentage points from 2001 to 2009, with a range of 2.5-3.5 percentage points. From Q4 2009 to Q3 2010 the difference was 4.5 percentage points, increasing further from Q4 2010 to Q3 2011 to 5.4 percentage points.

c. Regional NEET (last updated April 2012)

The regional picture on 16-18 NEET is taken from Local Authorities' Client Caseload Information System (CCIS).

CCIS data indicates that the northern regions have higher NEET rates, i.e. Yorkshire and Humberside, North West and North East, within England. In comparison, London and East Midlands have the lowest NEET rates.

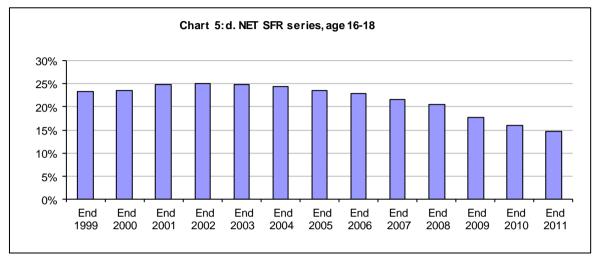

Note that CCIS data tend to show a lower percentage NEET than either the SFR or LFS data sources.

Source: Client Caseload Information System

Note: Local Authority CCIS data are published annually on the DfE website: <u>Link Here</u>; regional NEET estimates for 16-24 year olds based on the LFS are now published as supplementary tables alongside this Quarterly Brief: <u>Link Here</u>.

d. NET SFR series (last updated June 2012)

When looking at NEET data, it is also important to contextualise it with data on the proportion of young people not in education or training (NET). These data are also taken from the SFR 'Participation in Education, Training and Employment by 16-18 Year Olds in England'.

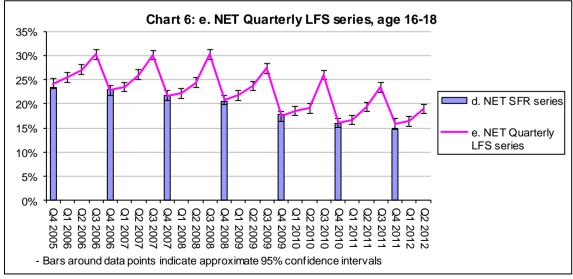

Source: Statistical First Release (SFR) 'Participation in Education, Training and Employment by 16-18 Year Olds in England'

The latest SFR NET rate, for end 2011, was 14.6%. This is the lowest SFR NET rate for 16-18 year olds since consistent records began in 1994, and the ninth successive annual fall since 2002. The proportion of young people not in education and training (NET) has fallen for 16, 17 and 18 year olds every year since 2004.

e. NET quarterly LFS series (last updated August 2012)

As with the NEET data, we can look at the in-year NET trend data using the quarterly LFS. The same seasonal pattern to the NET figures exists as in the NEET series.

The proportion of 16-18 year olds NET decreased (0.4 percentage points) to 19.0% in the second quarter of 2012, compared to 19.4% in the second quarter of 2011. This is not statistically significant.

2. Methodology and Notes

Description	These data give the definitive measures for 16-18 NEET and NET rates in England.
Uses	These series should be used as the national time series for
0303	16-18 year olds NEET and NET in England. The NET series
	should be used as context for any NEET data.
O a surra this at O as surray as	
Geographical Coverage	England
Age coverage	Academic age 16 to 18
Published source	Statistical First Release (SFR) 'Participation in Education,
	Training and Employment by 16-18 Year Olds in England'
Primary sources	The Schools' Census
	Pupil Level Annual Schools' Census
	The Individualised Learner Record (ILR)
	Higher Education Statistics Agency (HESA).
	Higher Education Students Early Statistics (HESES)
	Labour Force Survey
	Mid-year estimates and projections of population from the
	Office for National Statistics (ONS) and the Government
	Actuary's Department (GAD).
Last period covered	End 2011
Last published	June 2012
Next published	June 2013

a. NEET and NET SFR series

b. NEET and NET quarterly LFS series

Description	These series are quarterly estimates of NEET and NET
Description	These series are quarterly estimates of NEET and NET
	amongst young people from the LFS. It is not directly
	comparable with the SFR measure.
Uses	These series provide more timely data on the recent trends in
	NEET and NET since the last SFR. Trends should be assessed
	by comparing the current quarter with the same quarter in the
	previous year to account for seasonal effects. Quarter on
	quarter changes, i.e. Quarter 4 to Quarter 1, should not be
	quoted. The NET series should be used as context for any
	NEET data.
Geographical coverage	England
Age coverage	Academic age 16 to 24
Published source	Quarterly Labour Force Survey
Primary sources	Quarterly Labour Force Survey
Last Period Covered	Quarter 2 2012
Last published	August 2012
Next published	November 2012

c. Regional NEET

Description	This series is a 3 month average snapshot estimate of the regional NEET rate taken from the Local Authority Client Caseload Information System (CCIS) data. It is neither directly comparable with the LFS nor the SFR series due to the use of 'currency' rules. The activity status of young people in education or employment is not actively checked every month, but has a shelf life depending on the type of educational course or the nature of the employment. For young people whose currency is lapsed a historical assumption is made on the proportion NEET, taking into account their previously reported activity. Full details are published in a technical specification available here: NCCIS management information requirement The combination of both factors leads to estimates of NEET in the CCIS data that tend to be lower than those estimated from the LFS
	or those reported in the annual Statistical First Release (SFR).
Uses	This series shows the data, aggregated in regions, used by Local Authorities to inform local activity and target setting.
Geographical Coverage	England
Age coverage	Academic age 16 to 18 (previously calendar age)
Published source	Management information published on the DfE website as policy data: <u>16- to 18-year-olds NEET</u>
Primary sources	Client Caseload Information System (CCIS)
Last Period Covered	November 2011 – January 2012 average.
Last published	April 2012
Next published	ТВА

d. Scheduled revisions to previously published statistics

Labour Force Survey (LFS) datasets are routinely reweighted in line with population estimates. The most recent update introduced a new weighting variable, pwt11, to LFS datasets from Quarter 3 2009 onwards.

The pwt11 weights do not reflect the most recent population estimates for England and Wales, announced by the Office for National Statistics (ONS) on 16th July 2012, and the first population data to be influenced by the 2011 Census. ONS plan to release LFS data (from 2001 onwards) reweighted in line with the 2011 Census in late 2013.

This Statistical Release also reproduces statistics from the DfE '<u>Participation in Education, Training and</u> <u>Employment by 16-18 Year Olds in England' SFR</u> which rely on mid-year population estimates. Although ONS have updated current population estimates, the mid-year population estimates for 2001 to 2011 are still to be updated. Following their release the SFR estimates will also be revised accordingly. See SFR Technical Notes for more information about planned revisions to estimates.

e. National Statistics Publication

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods, and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

	Welsh Assembly Government (WG)	Scottish Government (SG)	Office for National Statistics (ONS)
Description	1. Annual SFR statistics produced in a method analogous to the DfE annual SFR.	1. Statistics based on the Annual Population Survey (APS).	Monthly Labour Force Survey (LFS) statistics for young
	2. Statistics based on the Annual Population Survey (APS). Definition of NEET corresponds to that used in the DfE NEET Quarterly Brief	2. Annual school leaver statistics	people not in full-time education and not in employment -Table 14 from the Labour Market Statistics bulletin.
	3. Pupil destinations based on Careers Wales Survey.	3. Combination of DWP benefits data and school leaver destinations	
Uses	1. Regarded as the definitive measure of headline NEET estimates in Wales.	1. National estimates of NEET.	Part of wider labour market statistics; rolling 3-month
	2. Timely data; regional or single-age estimates based on averaging 3 years of data.	2. Proportion of young people in 'positive destinations'. The complement is roughly equivalent to NEET, but will include some young people in part-time education.	average both seasonally- adjusted and not seasonally- adjusted; roughly equivalent to NEET but will include some young people in part-time education.
	3. Local area estimates of NEET.	3. Local area estimates of NEET.
