# **Children looked after return 2013 to 2014**

**List of the SSDA 903 validation checks which will be applied to all records covering the period from 1 April 2013 onwards**

**October 2013**

This document lists the validation checks that will be performed on SSDA 903 records from 01/04/2013 onwards. This is a revision from previous years and should be studied with care. All validation checks that will be performed on records that have been loaded into the system are contained in this document; there are no supplementary lists.

The validation checks in this schedule will be performed in six stages. Only if a record passes all the validation checks, in any one particular stage, will the validation suite proceed to the next one. Failure to pass all the checks in any stage will bring the validation suite to a halt.

This is version 0.1 and is the first version of the document this year. Although no further versions of this document are planned, it has been allocated a version number in case any late changes have to be made, in which case a further version will be issued.

For queries on this validation please raise a [service request](#).

## Summary

This schedule contains all the validation checks that will be performed on each SSDA903 record. For each check we have provided further comments and, in some cases, background information in italics. These are designed to give the user more information about the context of the validation failure and suggestions on how to correct it.

The validation suite will initially perform all the validation checks listed below under Stage 1. If a record passes all of these checks, the validation will move on to those checks listed under Stage 2; if all those are passed, the system will perform the checks under Stage 3 and so on. Failure to pass all the tests at any stage will halt the validation process. Any errors detected at Stage 1, or Stage 2 will need to be addressed and amended, before the validation of that record can proceed. The rationale behind performing validation checks in batches is to prevent errors in certain primary data fields, such as date of birth, triggering numerous validation check failures, all of which are rooted in the incorrect date of birth field. This is particularly a problem in the operation of some Cross Return Validation checks.

Several SSDA903 checks involve time limits. The duration will be calculated in a standardised manner by taking the start date away from the end date. Examples have been given to show how the duration is calculated. In some cases checks are based on statutory time limits; however the validation check applied to the SSDA903 record may allow a longer time than is stated on the face of the legislation. This is because the purpose of the SSDA903 validation checks is to identify records which are most likely to be incorrect. They are not designed as checks on court or Social Services practice. If a child really was kept under a legal status for a longer period than the law allows, we would prefer that the statistics reflected reality, rather than insisting that a record be 'doctored' so that it passes a strict validation check but no longer reflected what really happened.

## **The table which follows consists of:**

The check number (please note that some numbers have been left unused, to accommodate new checks which might be required in the future).

- The error message (as it will be appear at the bottom of each SSDA903 record in error)
- Explanatory text consisting of a brief explanation of the coding rule that has been broken, followed by background information or advice to help with correcting the record.

New or Amended Rules for 2013-14 are shown in blue

Rules to be deleted in 2013-14 are shown in red

### Stage 1

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)
101	Gender code is not valid.	Gender data item must be either: 1 = boy, or 2 = girl. Although codes 0 and 9 were introduced in 2008-2009 to bring the collection in line with the Children in Need (CIN) collection, these codes should remain unused.
102	Date of birth is not a valid date.	Date should be entered in the format DD/MM/YYYY and should contain a valid date. <ul style="list-style-type: none"><li>• <i>Check you have entered a real date, in the right format (e.g. not '03/20/2001', '31/02/2001', or 31/01/01 etc.).</i></li></ul>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)
103	The Ethnicity code is either not valid, or has not been entered	<p>Ethnic origin field must not be blank, and code must be taken from the list supplied in DfE Guidance Notes.</p> <p>Valid ethnic origin codes are WBRI, WIRI, WOTH, WIRT, WROM, MWBC, MWBA, MWAS, MOTH, AIND, APKN, ABAN, AOTH, BCRB, BAFR, BOTH, CHNE, OOTH, REFU, NOBT.</p> <ul style="list-style-type: none"> <li>• Check that a valid ethnic origin code has been entered, taken from the list in DfE Guidance Notes to the SSDA 903;</li> <li>• The old ethnicity codes used in years prior to 2009 are no longer valid codes.</li> </ul>
104	Date for UASC status ceased is not a valid date.	<p>Date should be entered in the format DD/MM/YYYY and, if completed, should contain a valid date.</p> <ul style="list-style-type: none"> <li>• <i>Check you have entered a real date, in the right format (e.g. not '03/20/2001', 31/02/2001, or 31/01/01 etc.).</i></li> <li>• <i>If a child's UASC status ceased before the start of the current statistical year, the child should not be recorded as being a UASC on this return for this year.</i></li> </ul>

<b>New Error Code</b>	<b>Message to be Shown on Validation Report</b>	<b>Coding Rule (and comments which will be provided as guidance for LA staff)</b>
105	Data entry for UASC status of child is invalid, or has not been completed.	Code for this data item must be either:  0 = child was not a UASC at any time during the year;  1 = child was a UASC at some time during the year.
112	Date should be placed for adoption is not a valid date.	If the child has been adopted during the year the date should be entered in the format DD/MM/YYYY and should contain a valid date.  <ul style="list-style-type: none"> <li>• Check you have entered a real date, in the right format (e.g. not '03/20/2001', '31/02/2001', or 31/01/01 etc.).</li> </ul>
113	Date matching child and adopters is not a valid date.	If the child has been adopted during the year, date should be entered in the format DD/MM/YYYY and should contain a valid date.  <ul style="list-style-type: none"> <li>• Check you have entered a real date, in the right format (e.g. not '03/20/2001', '31/02/2001', or 31/01/01 etc.).</li> </ul>
114	Data entry to record the status of former carer(s) of an adopted child is invalid.	If the child has been adopted during the year the code must be either :  0 = not adopted by former foster carer(s);  1 = adopted by former foster carer(s).

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)
115	Date of LA's decision that a child should be placed for adoption is not a valid date.	<p>If it has been decided that the child should be placed for adoption, this date should be entered in the format DD/MM/YYYY and should contain a valid date.</p> <ul style="list-style-type: none"> <li>• <i>Check you have entered a real date, in the right format (e.g. not '03/20/2001', '31/02/2001', or 31/01/01 etc.);</i></li> <li>• <i>Check that the date that a child should be placed for adoption is not prior to the date that the child started to be looked after.</i></li> </ul>
116	Date of LA's decision that a child should no longer be placed for adoption is not a valid date.	<p>If it has been decided (during the year) that the child should no longer be placed for adoption, this date should be entered in the format DD/MM/YYYY, and should contain a valid date.</p> <ul style="list-style-type: none"> <li>• <i>Check you have entered a real date, in the right format (e.g. not '03/20/2001', '31/02/2001', or 31/01/01 etc.).</i></li> </ul>
117	Date of decision that a child should/should no longer be placed for adoption are beyond the current collection year or after the child ceased to be looked after.	<p>If the decision is that a child should/should no longer be placed for adoption, then the date of these decisions cannot be beyond the end of the current collection year or the date they ceased to be looked after.</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)
118	Date of decision that a child should no longer be placed for adoption is before the current collection year or before the date the child started to be looked after.	If the decision is that a child should no longer be placed for adoption, then the date of this decision cannot be before the start of the current collection year or date they started to be looked after.
119	If the decision is made that a child should no longer be placed for adoption, then the date of this decision and the reason why this decision was made must be completed.	If a child should no longer be placed for adoption, both the date of this decision and the reason why this decision was reached must be recorded.
120	The reason for the reversal of the decision that the child should be placed for adoption code is not valid.	If completed, the reason why the decision to place the child for adoption has been reversed must contain a code from RD1-RD4.
121	Data entry for number of GCSEs A* to G is invalid.	<p>If the child left care during the year aged 16 or over, data entry must be a valid numeric in the range 0 to 13 and cannot be left blank.</p> <ul style="list-style-type: none"> <li>• Check number of qualifications obtained. More than 13 seems unlikely, but if more than 13 GCSEs were obtained, contact DfE.</li> </ul> <p>Validation should only apply for years 2011 and earlier – should not apply to later years</p>

186	Children aged 4 or over at the start of the year and children aged under 17 at the end of the year and who have been looked after for at least 12 months continuously should have an SDQ score completed.	<p>If a child has been looked after for 12 months continuously at 31 March and they were aged between 4 and 16 years old on the date of their last assessment then the SDQ score should be completed.</p> <p><i>The SDQ score should be completed for children looked after continuously for 12 months at 31 March and who were aged between 4 and 16 years old on the date of their last assessment.</i></p> <p><i>The SDQ score should not be completed for children who have been looked after under an agreed series of short term breaks at any time in the 12 months to 31 March.</i></p> <p><i>If no SDQ is score available, then the 'Reason For No SDQ Score' field should be completed in the range SDQ1 to SDQ5.</i></p>
187	Child cannot be looked after continuously for 12 months at 31 March (OC2) and have any of adoption or care leavers returns completed.	If the child has been looked after continuously for 12 months at 31 March, they cannot have adoption information completed, as this relates to children who have ceased to be looked after during the year. Care leaver information should only be completed for children who were looked after, but who have since left care, therefore these children will not be looked after for 12 months continuously in the latest year.

## Bypassing Errors

The following errors can be by-passed. Errors which can be by-passed are those where the data is unusual but could be correct as it reflects the actual situation. It would not be expected that data which triggers errors outside of this list would be correct and only those errors listed below can be by-passed. All requests to bypass an error must be directed to the DfE helpdesk.

Error numbers of by-passable errors are given in the table below:
