1. Introduction

This specification is for the 2016 **summer** school summary report and is designed to provide key school level information from the pupil and school level modules in the return in an easy to read format.

Please note: all references to schools in this document are to be regarded as referring to pupil referral units (PRUs) as well.

The school summary report is generated automatically by MIS software. It fulfils a number of purposes:

- to allow school staff preparing the return to check its accuracy and completeness before passing it to the head teacher
- to allow the head teacher authorising the return to check its accuracy and completeness before submitting the return to the local authority or the department as appropriate
- where the summary is forwarded to the local authority, it enables them to check the return from the school
- provides the department with assurance that the return has been subject to plausibility checking by the school and, where appropriate, the local authority
- to allow the head teacher to keep track of absence figures - particularly persistent absentees.

2. Presentation

Section 3 of this document specifies the format and content for the school summary report for the 2016 summer school census together with the business rules for calculating the numbers in the cells of each table. The school summary report must use the school census extract file. The data is presented as a series of tables eg Table 1: school characteristics.

XML tags and CBDS numbers have been used in the business rules to identify the data items. Square bracketed numbers eg [A5] have been included in the tables in Section 3 to provide a cross-reference to the business rules. The bracketed numbers should not appear in the summary report itself.

The 'collection (school phase) marker; is used to show the applicability of each table to each school phase ie where:

Table 6: Pupils on roll by their language – aged 5 years and over at 31/08/2015

The 'collection (school phase) marker' would indicate:

[Not for: Nursery school]

indicating that this table is not applicable for nursery schools (phase NS).

The business rules state the phase codes to which the rule applies, so, in this example

Applies to schools with <Phase> (200638) = PS, MP, MS, SS, AT, SP or PR

thereby listing all applicable phase codes and omitting NS (nursery school).

Some of the rows within tables apply only to a sub-set of schools. Notes against the business rules indicate if there are particular phases of school for which these rows are or are not generated within a table. For example, within Table 1: 'school characteristics'; the 'provision for child mothers'; 'number of teen mother places' and 'provision for childcare' elements only apply to schools with a phase of PR. This is stated in the business rules for Table 1 and the three rows within the table that correspond to these data items are only generated for schools with a phase of PR.

The business rules have not been given for every cell in the tables to keep the number down to a minimum. Where there are cells containing the same information for different categories, the rule has been given in the first cell for the first category and will need to be adapted for the other categories. For example in Table 2, rule [B1] has been given for the number of full-time male pupils aged 19 and over and

this will need to be adapted to give the rules for the total of full-time male pupils for each age shown.

All references to pupils' age are as at 31 August 2015 unless otherwise stated.

There is a summary line at the top of the school summary report that shows the number of errors and queries present in the data. This is equivalent to running the validation rules as shown in the 2015 to 2016 school census business and technical specification and displaying the totals. Those suppliers using the XSLT components supplied by the department will be able to use the validation modules to generate this total and display it at the beginning of the summary report. The two variables [error count] and [query count] refer to these totals and are not defined in the business rules.

Attendance information is not collected for boarding pupils. Information in Table 19 includes those pupils on roll on census day and those who are no longer at the school but who attended at least one session during the term covered.

Pupils aged 4 are of non-compulsory school age and so the concept of “unauthorised” absence does not apply to them. No distinction is therefore made between unauthorised and authorised absence in Table 19. Schools are not obliged to use individual attendance codes for these pupils. If they do not wish to use the codes they should provide the total number of absences by recording them as authorised. Absences reported this way will be recorded as overall absence. Although it is not anticipated that individual attendance codes for authorised absence will be used for these pupils, the codes (G, U, O and N) have been included in the business rules for completeness.

Post 16 learning aims

If learners have dual registration it is important that their learning aims are assigned to the school which holds their main registration. Schools should not submit learning aims in respect of subsidiary registrations. In the following tables figures relating to the previous academic year and / or to learning aims for learners no longer on roll may include learners who were dually registered with the school. Checks may need to be made with relevant staff in the school as to the registration status of such pupils as this information may not be available from the MIS.
