Introduction

The Department for Work and Pensions (DWP) is responsible for the child maintenance system in Great Britain. It funds information and support for separating parents and runs the three statutory child maintenance schemes, which calculate how much maintenance should be paid and assist with collection arrangements.

This publication contains the most up-to-date tables and breakdowns on the **1993 and 2003 schemes operated through the Child Support Agency (CSA) only**. The publication does not cover statistics on the 2012 Scheme operated by the Child Maintenance Service which are <u>published separately</u>, in line with our <u>strategy for publication</u> of 2012 Scheme information because of the differing intents of the two services.

The aim of the publication is to give an overview of the child maintenance activity operated by the Child Support Agency.

Uses and Users

The Child Support Agency Quarterly Summary of Statistics is used by a wide range of stakeholders both internally and externally, for example by charitable organisations, to:

- Review and monitor performance against key areas including the number of children benefiting from maintenance, total value of money collected and arranged and the number of cases contributing towards liability
- Understand the split of cases and performance across the 1993 and 2003 statutory child maintenance schemes
- Provide a full view of child maintenance activity from application to enforcement for cases administered by the Child Support Agency.

Click for further information <u>Uses and users of the Child Support Agency Quarterly</u> Summary of Statistics

Other useful information

- For a summarised version of the key statistics covered please read the <u>Child Support</u> <u>Agency Quarterly Summary Statistics first release.</u>
- The <u>Regional Tables</u> have been published alongside this release to show a breakdown of key measures by Local Authority and Region.
- Previous versions of the Summary of Statistics can be found on the <u>DWP pages of the Gov.uk</u> website.
- Experimental Statistics on the 2012 Scheme covering the period of August 2013 November 2014 were published 17 December 2014.

Help Us Improve Our Publication

We are constantly aiming to improve this release and its associated commentary. We would welcome any feedback you might have.

Statistician: Gemma Kirk Telephone: 0191 2162098 Email: csa.qss@dwp.gsi.gov.uk

Overview

The diagram below provides an overview of the child maintenance system currently operated by the Child Support Agency.

Application

With the introduction of the new 2012 Scheme administered by the Child Maintenance Service (CMS), cases are no longer registered on the CSA administered 2003 scheme.

- Starting on 10 December 2012 all new applications with four or more children relating to the same parent with care and non-resident parent were accepted onto the 2012 scheme.
- From 29 July 2013 the 2012 Scheme was opened up to cases with two or more children, where at least two of the children related to the same non-resident parent.
- From 25 November 2013 all applications are being accepted onto the 2012 Scheme meaning, bar a small number of cases with residual handling issues, there is no new intake to the CSA 2003 Scheme.

Intake figures on the 2012 Scheme are available in the Experimental Statistics on the 2012 scheme publication.

Calculation

Following application, cases are assessed and a maintenance amount calculated. Historical information on clearance times is available in Annex B (page 69), with more detailed breakdowns of Intake/Clearance and Uncleared work available in Annex B (page 66).

At this stage the method of collection is agreed, with payments made either via the CSA Collection Service or via a Maintenance Direct payment, which is where the maintenance calculation has been derived by the CSA and the paying parent pays child maintenance directly to the receiving parent.

Assessment

Once the payment schedule is in place the case moves into regular maintenance, *all cases on 1993 and 2003 scheme currently fall into this or the following stages.* From the 30th June the process to close 1993 and 2003 scheme cases began. Parents will be invited to consider their options for child maintenance – they can come to their own family-based arrangement or choose to make an application to the 2012 Scheme, the case closure process is expected to take around 3 years.

Changes of circumstance can occur to cases once in this phase which can lead to changes to status or method of payment, such as moving from Collection Service to Maintenance Direct.

Information on the current caseload is available from pages 13 to 17. Information on the compliance rate of cases, whether the liability amount is being paid is available on pages 22 and 23, with full breakdowns included in Annex A.

Arrears

If a case is non compliant or does not pay the full amount of liability owed then maintenance arrears will begin to build.

Information on maintenance arrears can be found on pages 33 to 42.

Information on the Government's strategy for improving compliance rates and collecting arrears can be found here:

 $\underline{https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/214338/cm-arrears-and-compliance-strategy-2012-2017.pdf}$

Enforcement

Continued non-compliance and a build up of arrears will lead to enforcement action being taken; this can range from a Deduction from Earnings Order to a Custodial Sentence. Information on the enforcement actions carried out by the Department can be found on page 43.

The impact of the introduction of the 2012 Scheme is explained in the Executive Summary.

Terminology

Total Caseload

The total number of cases on the CSA 2003 and 1993 Schemes.

Live Caseload

The total caseload minus cases with no current or ongoing liability, no arrears and no payments are being made.

Current Liability

A case is classed as having a 'Current Liability' if it is open, has children of a qualifying age and has a positive liability (i.e. assessment to pay maintenance).

No Current Liability

A case is classed as having 'No Current Liability' if it is open and currently has a nil liability but has at least one child of qualifying age, and therefore could have a positive liability in the future.

No Ongoing Liability

A case is classed as having 'No Ongoing Liability' if there is no longer a child maintenance interest on the case i.e. the case has been cancelled/withdrawn, or there are no longer any children of a qualifying age remaining on the case.

Paying Towards Liability

A case is classed as paying towards their liability if a payment has been received in the previous quarter, or the case is classed as Maintenance Direct at the end of the quarter.

Paying Towards Arrears

To be classed as paying towards arrears a case must have made payments in the previous quarter that were above the liability due in that quarter.

Collection Service

A case is classed as 'Collection Service' when the maintenance calculation has been derived by the CSA (after assessment of the case) and the non-resident parent pays child maintenance to the CSA. The CSA then sends this money to the parent with care.

Maintenance Direct

A case is classed as 'Maintenance Direct' when the maintenance calculation has been derived by the CSA (after assessment of the case) and the non-resident parent pays child maintenance directly to the parent with care. These cases are assumed to be fully meeting their current liability (since clients can come back to the CSA if there is a default on their payment or to request a revised calculation).

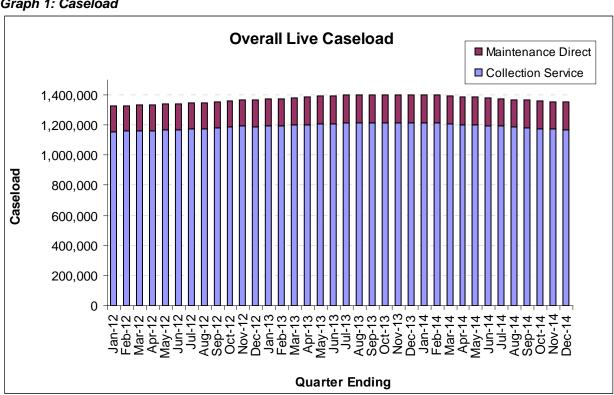

This option allows the non resident parent to make agreed child maintenance direct to parent with care instead of formal collection through the CSA. In the year to December 2014, around £413.6m (34.2%) of maintenance received was due to be paid this way.

A full list of definitions can be found in the <u>Child Support Agency (CSA) Quarterly Summary of Statistics (QSS) Metadata</u>

Executive Summary

From 25 November 2013, all new applications for child maintenance are made to the 2012 Scheme (see Introduction for further details). Proactive Case Closure of 1993 and 2003 Scheme cases began on 30 June 2014, primarily notifying nil assessed cases that their child maintenance arrangement will be ending. This is in line with the Government's aim to have all statutory scheme clients assessed under one scheme using one IT system by the end of December 2017. Consequently, the 1993 and 2003 Scheme caseloads will steadily reduce as no new intake is received and cases close. We expect that the initial impacts of case closure will begin to show in the next release containing data up to March 2015.

The volume of cases within the 1993/2003 Scheme live caseload continues on a downward trend, decreasing a further 14,900 in the guarter to December 2014. Despite the ongoing decrease in cases with a current liability, in collections and in children benefiting, which are in line with the reduction in caseload, the percentage of cases contributing towards their current liability has continued to improve and currently stands at 86.9%.

Graph 1: Caseload

Intake figures on the 2012 scheme are available in the Experimental Statistics on the 2012 scheme publication, covering the period between August 2013 and November 2014.

Service Levels

There is no evidence of an impact on service levels for the 1993/2003 Schemes as a result of the introduction of the 2012 Scheme. The reduction in the number of complaints and telephone calls has continued in the quarter to December 2014, which is as a result of ongoing operational improvement activity.

Complaints received as a percentage of the live caseload was 0.2% in the quarter to December 2014. **100%** of complaints received in December 2014 were resolved or had a resolution plan in place within 15 days, which is up on the position in December 2013.

When compared to a year earlier, there has been a reduction in the number of telephone calls received and the average time taken to answer calls in the 9 months to December 2014. The number of telephone calls received in this period has reduced by approximately 37%, and the average time taken to answer calls has reduced by a similar rate.

The rolling 12 month accuracy measures have changed slightly in the quarter to December 2014; cash value accuracy has increased while the percentage of new assessments that were accurate to within £1 or 2% has slightly decreased. The department continues to monitor and take ongoing performance improvement action to improve accuracy levels. The percentage of new assessments that were accurate to within £1 or 2% of the maintenance calculation dropped to 93.9%¹, a reduction of 1.6 percentage points when compared December 2013.

When compared to a year earlier, the cash value accuracy measure has decreased dropping to 97.6% from 98.1%. The cash value accuracy is calculated on the total cash value of errors against the total cash value of correct calculations; expressed as a percentage. This measure considers whether the maintenance calculation is correct to the nearest penny and the effective date has been applied from the correct date.

On average, it took **7.7** weeks to clear appeals through the first stage of the appeals process and **3.7** days to revise maintenance calculations following a decision from The Tribunal Service. This is in line with the previous year's performance.

In the quarter to December 2014, 7,600 full time equivalent staff were employed to support the Child Maintenance system, across the Child Support Agency and the Child Maintenance Service.

Notes:

 Accuracy figures are derived by checking a sample of cases on which new assessments have been carried out to ensure that the calculation was correct.

Summary of Key Measures

The table below reflects the performance of cases managed on the core systems and cases managed off system.

Key Measures						
	March 2012	March 2013	March 2014	December 2014	14/15 Indicator	
% of cases making a contribution towards current liability in the quarter ^(1,2)	84.0%	83.7%	85.6%	86.9%	83.0%	
Number of Cases Contributing towards Current Liability ^(1,2)	619,300	646,400	631,900	575,300	٠	
Number of Cases with a Current Liability ^(1,2)	737,000	772,600	738,500	662,100		
Percentage of Cases paying Full Liability (90% or more) ^(1,3)	61.1%	59.4%	64.0%	64.9%	60.0%	
Number of Children Benefiting at quarter end ^(1,2)	871,100	905,400	871,800	787,000	776,000	
Maintenance Collected and arranged ^(1,2,4) (12 month rolling figure)	£1186.5m ⁵	£1,229.9m	£1,270.5m	£1,209.2m	£1,055m	
Outstanding Arrears ⁽¹⁾	£3,822.6m	£3,814.6m	£3,857.6m	£3,857.2m		

- 1) Measures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- 2) Maintenance Direct is where, following a maintenance calculation by CSA, the non resident parent pays child maintenance directly to the parent with care. Cases which are recorded as Maintenance Direct, approximately 14% of the live caseload, are assumed to be fully meeting their current liability since clients can come back to the CSA if there is a default on their payment or to request a new calculation.
- 3) Following internal analysis of child maintenance systems and external consultation it was agreed to move to report cases paying full liability as those cases paying 90% of their liability, as it provides a more accurate and meaningful measure. Maintenance direct cases are not included in the full liability columns as it is assumed money is flowing between parents.
- 4) Maintenance Collected and Arranged is sourced from internal management information, so may differ from those reported in CSA's Annual Report and Accounts.
- March 2012 Maintenance Collected and Arranged figure is based on old methodologies. The latest <u>QSS based on old methodologies</u> was published containing data up to September 2013.
- 6) Throughput data has now been removed from the Key Measures table. This is due to the 2003 Scheme receiving no new applications so the measure does not accurately reflect performance. Details on the 2012 scheme intake are available for the period between August 2013 and November 2014.

Closures

This shows the total number of 2003 Scheme cases that are closed or cancelled/withdrawn within the quarter. For example, family reconciliation or the child reaches an age where they no longer qualify for maintenance.

The number of 2003 Scheme case closures has remained moderately stable over the past few years. The number of applications not eligible or no longer valid and those not pursued by the applicant has decreased slightly following an increase in the previous quarter.

• The number of 2003 Scheme case closures decreased from 15,000 in the quarter to September 2014 to **14,500** in the quarter to December 2014. In the quarter to December 2014, **4,300** applications were not pursued by the applicant and in **7,400** cases the application was not eligible or no longer valid.

This covers closures both prior to and following a calculation. A more detailed breakdown of closures *following* calculation is included in Annex A, table 20 on page 52.

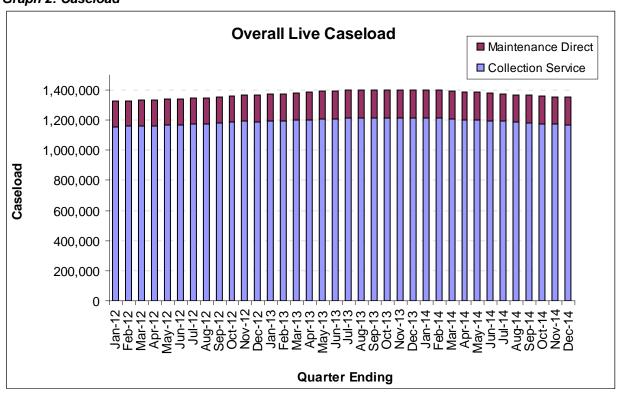

Caseload

This shows the number of cases currently being handled by the Agency and the division of these between the 1993 and 2003 Scheme.

Prior to December 2013, the overall live caseload had been on an upward trend since January 2012, with both the Collection Service and Maintenance Direct caseloads following the same pattern. The decrease in the live caseload following this date has been expected due to the fact that new cases aren't being processed on the 2003 Scheme, after the introduction of the 2012 Scheme. The proportion of male to female non-resident parents is in line with previous quarters, with a male non-resident parent in 92.0%¹ of live cases.

- In the quarter to December 2014, there was a decrease in the live caseload of 14,900 to 1,350,800 when compared to September 2014. The Collection Service caseload saw a higher reduction than the Maintenance Direct caseload.
- When compared to the previous quarter, both 1993 Scheme and 2003 Scheme cases have decreased from 404,900 to **399,600** and 960,500 to **951,000** respectively.

Graph 2: Caseload

The percentage of cases where the non resident parent is male excludes cases managed off-system, which accounts for approximately 7% of the live caseload. The calculation is based on the live cases on 1993 and 2003 schemes, excluding cases managed off system.

Table 1: Caseload by Scheme

rable 1.	Table 1: Caseload by Scheme

Dec-14	1,167,600	183,200	786,500	164,400	380,800	18,800	137,500	1,488,300

- 1) Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system. Figures may not sum to the Caseload Status Scheme breakdowns (Tables 24 and 25) due to rounding.
- 2) Figures include 1993 Scheme cases with a full or interim maintenance assessment as well as 2003 Scheme cases with a full maintenance calculation or default maintenance decision, including cases managed off system.
- 3) Maintenance Direct is where, following a maintenance calculation by CSA, the non resident parent pays child maintenance directly to the parent with care. Cases which are recorded as Maintenance Direct, approximately 13% of the live caseload, are assumed to be fully meeting their current liability since clients can come back to the CSA if there is a default on their payment or to request a new calculation.
- 4) The total caseload covers all cases managed on the 2003 and 1993 statutory schemes.
- 5) The live caseload includes the total caseload minus cases with no current or ongoing liability, no arrears and no payments are being made.
- 6) 2003 Scheme and 1993 Scheme figures may not sum to the live caseload due to it not being possible to allocate some cases to specific schemes.
- 7) The methodology to calculate the total caseload has changed; cases that are cancelled/withdrawn, closed or no longer have a qualifying child on the case, have been removed.

Clerical Case Database

This shows the number of cases being managed off system.

A number of Agency cases are being maintained on the Clerical Case Database and managed off system. These are defined as cases which, due to technical issues, cannot be processed on the core computer systems. Such technical issues arise from cases where either a calculation cannot be accurately maintained on the 2003 scheme, or where a calculation can be maintained on CS2 but problems have prevented other activities from being carried out on the system. The majority of these have been on the CS2 computer system at some point. Work has been completed to include these cases in various tables throughout this publication where possible capturing the latest status of those cases managed off system. These tables have been footnoted accordingly.

 There has been a continuous decrease in the number of cases being managed off system since March 2014, which is in line with the decreasing caseload. As at December 2014 there were 104,600 cases being managed off system.

Initially there had been a continued increase in the number of cases on the Clerical Case Database since March 2005 due to the issues surrounding the CS2 computer system. The rate of increase slowed down significantly from 2011/2012 as a result of system fixes and process improvements; however, there are issues within the system that still remain.

¹⁾ Figures include both live and suspended cases that are administered on the Agency's Clerical Case Database.

From March 2005 to December 2006 figures are sourced clerically. From March 2007 onwards the source information is provided from the Agency's internal management information.

Caseload Status

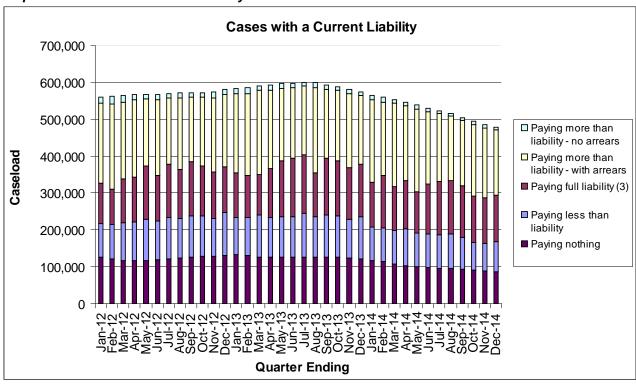

This shows the status of all cases with an assessment or calculation.

The live caseload had gradually been increasing up until September 2013, but has since been on a downward trend. This is due to the impact of all new applications being processed on the 2012 Scheme. The number of cases paying full liability³ and those cases paying more than their current liability with arrears has fluctuated from month to month, while the other categories have remained fairly consistent.

 The overall live caseload now stands at 1,350,800. This is a decrease of 14,900 from September 2014 and 50,000 from December 2013. A breakdown by scheme is included in Annex A.

Despite the decreases in the recent quarters, the overall live caseload remains at a higher position than in January 2012 when it was 1,326,800. Of the cases with a current liability due via the Collection Service, 38.5% are paying more than their current liability.

A full breakdown of the Caseload Status is available in Annex A (table 21) on page 54.

Graph 3: Cases with a Current Liability

- a. Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- b. Figures include 1993 Scheme cases with a full or interim maintenance assessment as well as 2003 Scheme cases with a full maintenance calculation or default maintenance decision.
- 2) Current Liability: A case is classed as having a 'Current Liability' if it is open, has children of a qualifying age and has a positive liability (i.e. assessment to pay maintenance).
- 3) 'Full Liability' includes those cases that have paid 90% or more of the accrued liability via the collection service within the quarter.

Live Caseload by Weekly Liability Value - December 2014

This shows the % and volume of cases split by specified weekly liability values.

The number of cases with a Nil Liability is on an upward trend; however the general split of the Live Caseload by Weekly Liability is comparable to previous quarters. The split between Collection Service and Maintenance Direct is consistent with the general split of approximately 13:2 respectively.

• The average weekly maintenance liability (including nil liability-cases that have been assessed and their assessment value is 0) stands at £16.70⁶, excluding nil liability the average is £34.10. 21.3% of cases managed via the Collection Service have an assessment between £20.01 and £100 compared to 74.2% of those which are Maintenance Direct. 75.7% of the live caseload has an assessment of £30.00 or less, or a nil liability.

Notes:

a. Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.

b. Figures have been rounded to the nearest 100, percentages to the nearest 0.1%.

Collection Service weekly liability has been derived by converting quarterly liability value to a weekly amount.

³⁾ Maintenance Direct weekly liability has been derived by using the weekly assessment amount.

⁴⁾ The Live Caseload is the total caseload minus cases with no current or ongoing liability, and no arrears and no payments are being made.

⁵⁾ Weekly liability values have been set to 0 for all cases with no liability.

⁶⁾ The average weekly maintenance liability (including nil liability) amount provides an average amount of the overall live caseload, including cases that have been assessed and their assessment value is 0.

Live Caseload by Number of Qualifying Children – December 2014

This shows the average weekly liability by the number of qualifying children by collection method.

Compared to the latest quarters, the breakdowns of average liabilities have remained fairly consistent. There has been a gradual increase in the number of cases with zero Qualifying Children and a corresponding decrease in those cases with either one or two Qualifying Children. There has been no major change for those cases with three or more Qualifying Children.

97.0% of cases have 2 or less qualifying children.

Table 4: Caseload by Number of Qualifying Children

	Collectio	n Service ^(1,2)	Maintenance Direct ^(1,3)		Total ^(1,4)	
Number of		Average				Average
Qualifying	Number	weekly	Number of	Average weekly	Number	weekly
Children ⁽⁶⁾	of cases	liability ⁽⁵⁾	cases	liability ⁽⁵⁾	of cases	liability ⁽⁵⁾
0 ⁽⁷⁾	519,700	-	-	-	519,700	-
1	484,200	£20.17	128,800	£37.51	613,000	£23.81
2	132,700	£29.76	45,100	£53.72	177,700	£35.83
3	25,600	£33.68	8,100	£66.57	33,800	£41.61
4	4,400	£29.35	1,100	£62.30	5,500	£36.02
5	700	£26.59	100	£61.49	900	£32.10
6	200	£25.98	-	£55.08	200	£29.82
7	-	£40.38	-	£50.04	-	£42.36
8+	-	£16.53	-	£64.00	-	£21.28

Notes:

- a. Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- b. Figures have been rounded to the nearest 100 and therefore may not sum to the live caseload figures on page 14 (table 1). Percentages are rounded to the nearest 0.1%.
- c. Figures are for the 'Live Caseload' The total caseload minus cases with no current or ongoing liability, no arrears and no payments are being made.
- 2) Collection Service weekly liability has been derived by converting quarterly liability value to a weekly amount.
- 3) Maintenance Direct weekly liability has been derived by using the weekly assessment amount.
- 4) Total average weekly liability has been derived by summing the total Collection Service weekly amount and the total Maintenance Direct weekly amount then dividing it by the total number of cases.
- 5) Weekly liability values have been set to 0 for all cases with no liability.
- 6) Qualifying Children under the age of 20 are counted in this table. The qualifying age has been set to 20 in line with Child Benefit and social security benefits so that child maintenance can carry on up to a child's 20th birthday if they're staying in full-time, 'non-advanced' education at school or college, or starting an 'approved' training course. Where the number of children is missing on off system cases, an average of 1.39 is applied. These cases will appear in this table in the 1 children category and account for 3.3% of the cases in this category.
- 7) The table includes cases where there are 0 qualifying children. This is due to cases where the child reaches 20 years old by the end of the quarter.

Children Benefiting from Maintenance

This shows the number of children benefiting, calculated from cases in which a payment was received or had a maintenance direct arrangement in place.

The number of Children Benefiting has been on a downward trend since September 2013, and is now at its lowest since January 2012. The change in trend can be attributed to the fact that all new applications are now being processed on the 2012 scheme.

• The number of Children Benefiting has decreased from 816,500 in September 2014 to 787,000 in December 2014.

Table 5: Children Benefiting from Maintenance

Quarter Ending:	Children Benefiting From Maintenance ⁽¹⁾	1993 Scheme Collection Service (2)	1993 Scheme Maintenance Direct (2)	2003 Scheme Collection Service ⁽²⁾	2003 Scheme Maintenance Direct ⁽²⁾

Nov-14	795,700	53,300	22,600	492,300	227,400
Dec-14		51,400	22,200	486,200	227,200

Notes:

- a. Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- b. 'Children benefiting' includes all children of a qualifying age on cases that have paid in the previous quarter. This includes all children on Maintenance Direct cases.
- c. Before December 2012 children under the age of 19 are counted as a qualifying child, after this date the qualifying age was increased to 20. Qualifying children are counted as receiving maintenance or with a maintenance direct agreement in place if the relevant case has received a payment via the collection service in the last three months or has a maintenance direct agreement in place. An average of 1.39 children per case has been used for positive outcome cases progressed off system, where the number of children is not available. This is based on checking a sample of off system case papers, and is used in approximately 16% of paying off system cases with a current liability.
- d. Cases are classed as having maintenance due if an ongoing liability to pay maintenance exists or arrears of maintenance have been requested.
- 2) There are approximately 300 cases where the scheme in which the case is held cannot be identified, therefore scheme breakdowns may not sum to overall Agency figures.

Cases Contributing towards Current Liability

This shows the number of cases contributing towards current liability.

Both the number of cases with a current liability and the number of cases with a contribution towards current liability have been on a downward trend since July 2013. Despite this, the percentage of cases contributing towards a current liability has increased each quarter from September 2013. The percentage of cases contributing towards a current liability currently stands at its highest position of 86.9%.

 In the quarter to December 2014 575,300 (or 86.9%) cases were paying towards their maintenance out of 662,100 cases with a child maintenance liability.

The accompanying table can be found in Annex A on page 60 (Table 24).

Cases Contributing Towards Current Liability 800,000 100.0% 90.0% 700,000 80.0% 600,000 **Number of Cases** 70.0% 500,000 60.0% 400,000 50.0% 40.0% 300,000 Cases Contributing Towards 30.0% 200,000 Current Liability(1,2) 20.0% Percentage Contributing 100,000 10.0% **Towards Current Liability** 0.0% **Quarter Ending**

Graph 4: Cases Contributing Towards Current Liability

- 1) Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- 2) A case is classed as having a 'Current Liability' if it is open, has children of a qualifying age and has a positive liability (i.e. assessment to pay maintenance). This includes cases due to pay via Maintenance Direct.
- 3) A case is classed as paying towards their liability if a payment has been received in the previous quarter, or the case is classed as Maintenance Direct at the end of the quarter.
- 4) Maintenance direct cases are excluded in the full liability as it is assumed that money is flowing between parents.
- 5) 'Full Liability' satisfied within quarter includes those cases who have paid 90% or more of the accrued liability via the collection service within the quarter. Maintenance direct cases are not included in this category.

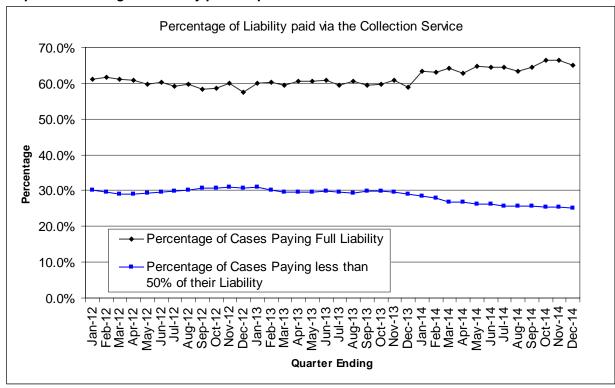

Percentage of Liability Paid in Quarter

This shows the percentage of liability being paid each quarter, for cases due to pay via the collection service.

The percentage of cases paying their full liability has gradually increased since December 13, with the latest quarter standing close to its highest position. Both the number of cases with a 0% contribution towards their liability and those paying less than 50% has been on a downward trend from September 2013.

- 64.9% of cases due to pay via the collection service paid their full liability in the quarter to December 2014, which is an increase from 64.4% in September 2014.
- The number of cases paying less than 50% of their liability via the Collection Service has decreased from 25.5% in September 2014 to 25.0% in the quarter to December 2014; its lowest position to date.

For a full breakdown of the Percentage of Liability paid in Quarter please see Annex A, table 25 page 62.

Graph 5: Percentage of Liability paid in quarter

- Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- b. Figures exclude Maintenance Direct Cases, as receipts are not held on the CSA computer systems to show how much money is flowing between parents. This is to show a more realistic performance overview of the collection service.
- 2) Percentages are based on the amount of money received in each quarter compared to the accrued liability in each quarter.
- 3) 'Full Liability' satisfied within quarter includes those cases who have paid 90% or more of the accrued liability via the collection service within the quarter. Maintenance direct cases are not included in this category.

Maintenance Direct Cases

This table shows the number of cases transferring to and from Maintenance Direct each quarter.

Overall the number of cases joining Maintenance Direct has followed a downward trend while the number of cases leaving Maintenance Direct has remained fairly consistent throughout.

- In the latest quarters the proportion of cases moving from the Collection Service to Maintenance Direct compared to cases moving from Maintenance Direct to the Collection Service has been increasing. There is ongoing work being carried out to promote Maintenance Direct, where appropriate, to clients who are in routine contact with us.
- In the quarter to December 2014, 1,700 cases transferred from Maintenance Direct to the Collection Service, while 5,300 cases transferred from the Collection Service to Maintenance Direct.

¹⁾ The 'Other' category includes cases with no liability or the status prior to joining/leaving Maintenance Direct is unknown.

Liability and Credits

This shows the total amount of money due and of this, how much was received or adjusted. The closing balance is the difference between the two at the end of the period.

The percentage of Credits to Liabilities at the end of each quarter has followed a fluctuating pattern, with values differing between the quarters by 4 percentage points at most.

• The difference between the liability accrued and the total credits in the quarter to December 2014 stands at £20.9m. This is an increase compared to the previous quarter where the difference stood at £18.3m, and £4.1m higher than the January 2012 position.

Table 7: Liability and Credits

Notes:

- Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- Figures exclude Maintenance Direct cases.
- The Liabilities and Credits are the quarterly amount of money charged including any technical adjustments e.g. voluntary payments 2) where payment of child maintenance has been received by the parent with care before the non resident parent has been notified of the maintenance calculation.
- Total Liabilities are the quarterly amount of money charged excluding any technical adjustments.
- Total credits are the quarterly amounts of money paid, including technical adjustments, via the collection service.

 The methodology change to calculate the total caseload has had a slight impact on liability accrued and credits due to a small number of cases still having liabilities or collections which are obsolete. This has been implemented back to January 2012.

Collections verses Liability

This shows the amount of liability accrued and the amount collected within the quarter via the Collection Service.

The percentage of Liability collected in the quarter has generally increased since January 2012, with a slight decrease in the latest quarter.

• 74.1% of money due to be paid in the quarter to December 2014 had been paid.

Dec-14	£207.5	£153.7	74.1%

Notes:

- Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system. Contributions towards arrears are not included within this table.
- b.
- Maintenance Direct cases are not included within this table. A Maintenance Direct case would not accrue liability on the CSA computer Systems, due to money being paid directly between parents.

 Total Liabilities is the amount of money charged as regular maintenance (excluding any technical adjustments).

 Regular maintenance collected is the amount of money paid via the collection service excluding technical adjustments.

- The methodology change to calculate the total caseload has had a slight impact on the liability accrued and regular maintenance collected due to a small number of cases having liabilities or collections which are obsolete. This has been implemented back to January 2012.

Maintenance Collected and Arranged

This shows the total amount of maintenance collected by the Agency and the estimated value of Maintenance Direct arrangements.

The total amount Collected and Arranged on a 12 month basis to December had previously increased each year, however the latest year has shown a reduction. Regular maintenance and the amount of arrears collected have both fluctuated each year, while yearly Maintenance Direct arrangements have increased throughout.

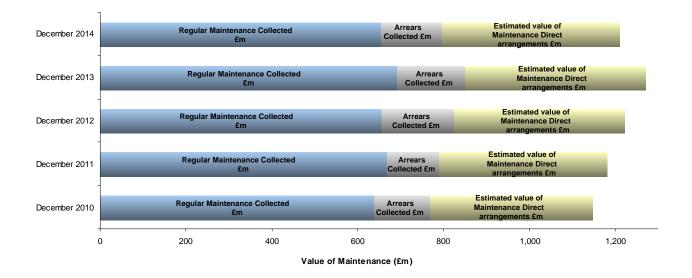

- As at December 2014, the Overall Maintenance Collected and Arranged and the amount of arrears collected on a rolling 12 month basis both fell to £1209.2m and £142.0m respectively. This is compared to a September 2014 figure of £1,235.1m, of which £147.9m was arrears and a December 2013 figure of £1,270.0m, of which £159.1m was arrears. The decrease in child maintenance collected or arranged is due to the reduction in caseload as a result of all applications going onto the 2012 Scheme.
- In the quarter to December 2014, £288.9m was collected and arranged, of which £32.3m was contribution towards arrears. When compared to September 2014, the amount collected or arranged and the amount of arrears have decreased by £14.4m and £3.4m respectively.

Headline collection figures are:

Rolling 12 Months: £1,209.2m of which £142.0m was arrears
 Rolling Quarter: £288.9m of which £32.3m was arrears

Graph 6: Maintenance Collected and Arranged

Total Amount Collected and Arranged - Rolling 12 Months to December 14

- Quarterly amounts of maintenance collected will not sum to the financial year figures published in the Annual Accounts as they do not include end of year adjustments.
 - a. Figures reported after January 2012 are calculated on a New Measures basis, including cases managed off system.
 - March 2012 Maintenance Collected and Arranged figure is based on old methodologies. The latest QSS based on old methodologies was published containing data up to September 2013.
- 3) Figures include 1993 Scheme cases held on the CSCS computer system. CSCS data included in this graph prior to January 2012 is based on a 5% sample. After this date, a 100% CSCS data source has been used.

- 4) Maintenance "Arranged" rather than "Collected" relates to Maintenance Direct cases. Maintenance Direct is where, following a maintenance calculation by CSA, the non resident parent pays child maintenance directly to the Parent with care. The assessment on the case is used to derive the amount arranged. These cases are assumed to be fully meeting their current liability since clients can come back to the CSA if there is a default on their payment or to request a new calculation.
- 5) The Child Support Agency's operational priority since 2006 has been to collect money for children who will benefit from regular ongoing maintenance payments today. Historic arrears (where, for example the children has grown up) are treated with less priority, however they remain outstanding, will not be written off and we will seek to collect them wherever possible. This chapter analyses the outstanding arrears balance, and then explains how we intend to tackle it. For further information, please see the Child Maintenance Arrears Strategy.

200 14	700.0	02.0	102.0	200.0			

Notes:

a. The amount of maintenance collected is that collected via the CSA Collection Service and therefore includes cases managed off system.

Quarterly amounts of maintenance collected will not sum to the financial year figures published in the Annual Accounts as they do not include end of year adjustments.

- The value of Maintenance Direct arrangements in place shows the value of the assessments that the Agency has made i.e. the recommended amount to be paid to the parent/person with care by the non-resident parent. This value is an estimate because it is not possible to calculate, for every day of the year, the value of Maintenance Direct arrangements in place at that point in time. However, it is possible to calculate the value of weekly Maintenance Direct arrangements in place at the end of each month and derive a full monthly estimate from that.
- The estimated value of Maintenance Direct arrangements includes Maintenance Direct cases processed off system from April 2008.

3)

- Arrears collected figures include arrears of maintenance that have been linked to an arrears collection schedule. Investigations show that a proportion of arrears of maintenance collected have been incorrectly linked to a regular collection schedule and therefore classified as regular maintenance in the above table. Work is underway to correctly classify arrears collections in future publications.
- In addition, collections on all cases managed off system are presumed to be regular collections rather than collections of arrears resulting in the potential under counting of arrears.
- The issue raised in note 3a & 3b has been rectified from January 2012 due to a change in methodology and source data.

- Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system. Figures include 1993 Scheme cases held on the CSCS computer system. CSCS data included in this table for arrears collected and for maintenance direct arrangements in place is based on a 5% sample up to March 2012. After this date, a 100% CSCS data source has been used.
- From January 2012 the source of this data has changed to allow for consistency throughout the publication. For further details please see Information on Child Maintenance Administrative Data Sources.
- The methodology change to calculate the total caseload has had a slight impact on the regular maintenance collected due to a small number of cases still having liabilities or collections which are obsolete. This has been implemented back to January 2012.

Cases Contributing Towards Arrears

This shows the number of cases with an arrears liability the start of the current quarter, and the number and percentage of those cases that made a contribution towards the arrears within the period.

The number of cases with an arrears liability gradually increased since January 2012 but has been on a downward trend since March 2014. The number of cases paying towards arrears has varied each month; however the percentage of cases paying towards arrears has remained fairly steady in comparison.

• There were 229,800 cases paying towards arrears as December 2014, which is a decrease on the September 2014 figure of 234,600.

Table 10: Cases Contributing Towards Arrears

Dec-14	1,244,200	229,800	£32.3	18.5%	£3,857		

- 1) Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- 2) The number of cases with an arrears liability is determined as the number of cases with arrears at the start of the current quarter.
- 3) The amount of arrears owed is the amount of arrears owed as at the end of the month.
- 4) A case is counted as paying towards arrears if they had an outstanding arrears balance at the end of the previous quarter and no liability to pay regular maintenance over current the quarter but money is being received via the collection service or, if the full regular liability has been satisfied in the quarter and additional payments have been received. Only payments over the existing liability amounts are counted towards the amount of arrears being paid. Therefore these figures will differ to that on page 36 (table 11) which looks at the number of cases with arrears at the end of the current quarter.
- 5) Maintenance direct cases are included within this table. These cases and associated money are only classed as contributing towards arrears if money is received via the collection service.

Outstanding Maintenance Arrears

This shows the live caseload and those cases which have been cancelled/withdrawn or closed where the non resident parent has arrears, the annual outstanding maintenance arrears position from January 2012, split out by system.

The value of Outstanding Maintenance Arrears saw a dip in December 2012 due to methodological changes, but has since increased.

- Outstanding Child Maintenance Arrears have increased to £3,857 million in December 2014 when compared to September 2014, but is slightly lower than the position a year earlier.
- The number of cases with arrears at the end of the quarter has continued to decrease since December 2013, and now stands at 1,234,600 in December 2014.
- A graph of Outstanding Maintenance Arrears sourced from the Agency's General Ledger is included in Annex B to provide further historical data.

Graph 7: Outstanding Maintenance Arrears

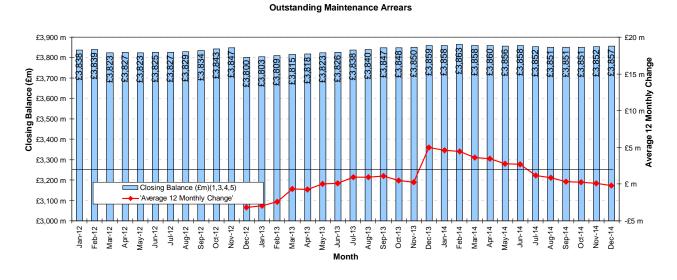

Table 11: Outstanding Maintenance Arrears

This shows the number of cases with outstanding arrears at the end of the quarter.

- 1) Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- 2) This table is cases with arrears at the end of the quarter and include cases that did not make a contribution towards the arrears within the quarter. Figures will therefore differ to the number of cases with an arrears liability on page 33 (table 10).
- 3) Figures show the gross arrears position at the end of each quarter sourced from the Agency's internal MI.
- 4) Due to the different sources, figures may differ slightly from CSA's Annual Report and Accounts.
- 5) There are approximately 300 cases where the scheme in which the case is held cannot be identified, therefore scheme breakdowns may not sum to overall Agency figures.

Outstanding Arrears by Weekly Liability

This shows the number of cases with outstanding arrears at the end of the quarter split by value of arrears.

There has been a gradual increase in the percentage of total cases with arrears that have no assessment; these make up the majority of cases with arrears. There has also been slight decreases in the percentage of cases with a weekly liability of £5 and under, however the remaining breakdowns are fairly consistent with previous quarters.

• 69.3% of the total outstanding arrears are owed by Non Resident Parents who currently have either an assessment value of Nil or under £5.

Notes:

Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.

b. Includes all cases with a positive outstanding arrears value.

c. Maintenance Direct cases with arrears are included in this table. Maintenance Direct cases are only classed as contributing towards these arrears if a receipt is received via the collection service.

a. Figures for weekly assessment are derived by converting quarterly liability value to a weekly amount.

b. Weekly assessment values have been set to 0 for all cases with no current assessment or no ongoing assessment.

c. Cases which have been recorded as maintenance direct have had the weekly assessment set to the value of the weekly assessment amount.

³⁾ This table is cases with arrears at the end of the guarter and therefore will match page 36 (table 11) but will differ to the number of cases with an arrears liability on page 33 (table 10).

Similarly, the majority of the amount of arrears owed is on cases with no assessment, i.e. cases assessed as having a nil liability or no liability at all (Arrears only cases). In line with our Arrears Strategy: Preparing for the future, tackling the past: Child Maintenance – Arrears and Compliance Strategy 2012 – 2017, our operational priority of the statutory service is to collect money for children who will benefit from regular on-going maintenance payments today, rather than prioritising the pursuit of historic arrears in cases where the children have now grown up.

• 58.7% of cases with arrears owe less than £1,000, this makes up 5.5% of the total value of arrears owed.

Table 13: Amount of Arrears owed by Weekly Liability - December 2014

Notes:

a. Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.

b. Includes all cases with a positive outstanding arrears value.

c. Maintenance Direct cases with arrears are included in this table. Maintenance Direct cases are only classed as contributing towards these arrears if a receipt is received via the collection service.

a. Figures for weekly assessment are derived by converting quarterly liability value to a weekly amount.

b. Weekly assessment values have been set to 0 for all cases with no current assessment or no ongoing assessment.

c. Cases which have been recorded as maintenance direct have had the weekly assessment set to the value of the weekly assessment amount.

Outstanding Arrears by Date of Last Payment

This shows the number of cases that last made a payment towards arrears in each quarter.

The proportion of cases paying in the quarter to December 2014 is broadly in line with previous quarters. There has been a continuous reduction in cases that have never paid⁽²⁾.

- 17.4% of cases with arrears made a contribution in the quarter to December 2014.
- 55.4% of cases have not made a payment towards outstanding arrears since January 2012.

Notes:

a. Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.

b. Figures in the total column may differ to the breakdown totals due to rounding.

c. This table looks at the number of cases with arrears at the end of the quarter and when a payment towards arrears has been received and will therefore differ from the number of cases paying towards arrears on page 33 (table 10) which looks at the number of cases with arrears at the end of the previous quarter.

d. Maintenance direct cases with arrears are include within these tables, these cases are only classed as paying towards arrears if a receipt has been received via the collection service.

²⁾ Data only available from January 2012, if no payments have been made after this date the case will be classed as 'Never Paid'.

Arrears Distribution

This shows the proportion of cases with arrears and value of arrears by size of arrears outstanding on each case.

The arrears banding by caseload and value has remained consistent with the latest quarters.

- 58.7% of the arrears caseload owe less than £1,000
- Arrears of over £10,000 make up 58.3% of the total value of outstanding arrears.

Table 15: Arrears Distribution

Arrooro Bond	Arrears Caseload (%):	Value of Arrears (%):
Arrears Band	December 14 (1,2)	December 14 (1)
Under £100	18.1%	0.3%
£100 to £499.99	27.6%	2.3%
£500 to £999.99	13.0%	3.0%
£1,000 to £4,999.99	25.6%	19.3%
£5,000 to £9,999.99	7.5%	16.9%
£10,000 to £19,999.99	4.9%	22.0%
£20,000 to £49,999.99	2.9%	27.5%
£50,000 and over	0.4%	8.8%

Notes:

A case is counted in the arrears caseload if they have outstanding arrears at the end of the quarter.

¹⁾ Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.

Arrears Segmentation

This table 'segments' the total outstanding arrears into various categories linked to the Agency's Arrears Strategy.

The level of arrears on priority cases where a child could still benefit has decreased in the latest quarter from £1,233m to £1,214m. The arrears on cases where money is flowing has also decreased by £9m in the same period.

Arrears owed to the Secretary of State is on a continued downward trend as very few arrears of this type can now accrue due to the removal of the compulsion on parents with care who are claiming benefits to use the CSA to collect maintenance payments.

1)

- Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- Arrears allocated to groups on a hierarchical basis into priority segments for collection.
- 2) Total arrears are less than the arrears figure shown elsewhere in this publication as some cases with arrears are uncategorised and do not fall into any of the above classifications.
- Uncollectable arrears defined as arrears on cases where the non-resident parent or parent with care is deceased, where the arrears are deferred or where the arrears are classed as Interim Maintenance Assessment Gap (money that cannot be collected due to it not being covered by legislation).
- Secretary of State arrears are Child Maintenance arrears which are owed to the Government. Arrears owed to the Secretary of 4) State cannot be identified for cases managed off system.
 - Parent with care arrears are owed by the non-resident parent to the parent with care.
 - Arrears only cases are those where no ongoing child maintenance liability exists. b.
 - Live Parent with care cases are defined as a live case which is open and has qualifying children on the case.
 - Money flowing is where maintenance has been received in the quarter and includes those cases where any child maintenance is being paid by the non-resident parent, either ongoing maintenance and / or arrears of maintenance.
- Priority cases are where money is either flowing or where a child could benefit.
- For further information, please see the Child Maintenance Arrears Strategy.

Enforcement

This shows the total volume of enforcement actions undertaken by the Agency.

There has been a reduction across enforcement activities in the last year, with the exception of Lump Sum and Regular Deduction Orders, as the focus has been taking the right action on cases to secure compliance. In line with our Arrears Strategy: Preparing for the future, tackling the past: Child Maintenance — Arrears and Compliance Strategy 2012 — 2017, our operational priority of the statutory service is to collect money for children who will benefit from regular on-going maintenance payments today, rather than prioritising the pursuit of historic arrears in cases where the children have now grown up.

From March 2015 (subject to Parliamentary approval), the Child Maintenance Service and Child Support Agency (CSA) will begin sharing certain information about the payment records of their clients with credit reference agencies. Principally, information will be shared about an individual when a liability order is made against them – a measure used as a last resort after other efforts to encourage payment have been exhausted.

- The number of Deduction from Earnings Orders/Requests issued between April 2013 and March 2014 was 67,240 compared to 78,770 between April 2012 and March 2013.
- The number of Lump Sum and Regular Deduction Orders authorised has continued to increase each year; 1,715 authorised during the period April 13 to March 14 which is up from 1,385 in the period April 12 to March 13.

Section 14(A)3 - Failure to provide evidence	-	1,390	1,610	750	415	40	15	-

- a. Deductions from Earnings Orders/Requests (DEO/R's) are where the Agency makes a request to an employer to deduct maintenance directly from the earnings of a non resident parent. The stock of DEO/R's and number of new DEO/R's set up only include those administered on the CS2 and CSCS computer systems and exclude those administered off system. The value of maintenance collected from DEO/R's is calculated by summing receipts of maintenance in a month on all cases with a DEO/R in place at the end of the month. Due to timing in setting up a DEO/R, this may include some receipts that were collected by other methods. The monthly amounts are then summed to give annual figures.
- b. DEO/R figures for April 2012 onwards have been calculated based on a new methodology.
- c. Total number of DEO/R's issued is the live caseload in which a new DEO/R has been applied. A new DEO/R has been identified by comparing the current quarter to the previous quarter, if a DEO/R did not exist on the previous quarter but does on the current quarter then this has been classed as a new DEO/R being issued.
- d. Number of active DEO/Rs is the live caseload where a DEO/R in place.
- e. Total value received from a DEO/R is the sum of the receipts on the live caseload where a DEO/R is in place.
- f. Percentage Compliance is calculated on the number of cases contributing towards a current liability and has a DEO/R in place.
- 2) Deduction Orders are where the Agency applies to deduct maintenance directly from a non resident parent's bank/building society account, following non payment of maintenance. There are two types of deduction order, a regular deduction order which deducts a regular fixed amount in respect of either regular maintenance and/or arrears and a lump sum deduction order which initially freezes, and later deducts a lump sum amount solely in respect of arrears. A deduction order is made through an administrative process, which means an application to court is not required before the order can be made. Disclosure requests are sent to banks and building societies to obtain financial information. A disclosure request is sent to every bank/building society which holds an account attached to a case, therefore there can be multiple disclosure requests issued for each case.
- Authorised This stage of the process is where the deduction order has been approved by a senior colleague and sent to the bank/building society.
 - Secured This stage, in respect of lump sum deduction orders only, is where the interim lump sum deduction order has been sent to the bank/building society and the monies have been secured, but they have not yet been sent to the Commission. Deduction orders were introduced in August 2009.

- 4) A liability order is a document obtained from the court showing that they legally recognise that the debt is owed. This is the same in England, Wales and Scotland. This is required before the Agency can use litigation powers (Diligence in Scotland). A liability order is counted as applied for when a court date is assigned for the application to be made. Some cases which have had liability orders applied for are still going through the liability order process, and awaiting an outcome.
- 5) Distress actions refer to bailiff actions in England & Wales. This is where, once the debt has been legally recognised, the Agency has passed the debt to a bailiff company for collection (or equivalent). Number of Bailiff Referrals is sourced directly from external providers. Attachments refer to actions taken by Sheriff Officers in Scotland on the Agency's instruction to attach certain goods and remove for auction if the debt is not settled. An attachment notice is served directly to the non resident parent by a Sheriff's Officer.
- 6) A charge for payment is a Scottish action only. This is where, once the debt has been legally recognised via a Liability Order, the Agency refers the case to Sheriff Officers to serve, in person, the charge for payment to the non resident parent.
- 7) Charging orders in England & Wales are where a County Court Order for the legally recognised debt is attached to the equity of a non-resident parent's property. A charging order is counted as applied for at the point the application is lodged at the County Court. Some cases which have a charging order applied for are still going through the charging order process and awaiting an outcome.
- 8) Order for sale action can be taken once a final charging order has been granted against a property owned or jointly owned by the NRP. Through the Agency's external supplier action will be taken to secure payment, if full payment is not made and there is evidence of equity an application may be made to the court for an order for sale. The Agency may seek to take possession of a property if there is evidence of equity and it this action is deemed to be the most appropriate to secure the child support arrears owed. The Order for Sale process is complex and, as a result, the time taken between a referral and achieving an outcome can be significant. Information on Orders for Sale is only available from July 2008.
- 9) Bills of Inhibition in Scotland do not attach directly to the non-resident parent's property, but are personal prohibitions preventing heritable property being transferred, alienated or disposed of by the non-resident parent. A bill of inhibition is counted as applied for when an instruction for Inhibition is sent to the Solicitors. Some cases which have had a bill of inhibition sent for are still going through the bill of inhibition process.
- 10) An order to pay is where the Magistrate grants a custodial prison sentence, suspended on condition that the non resident parent makes payment. Committal information includes both actual and suspended committal sentences and driving licence disqualifications following non payment of child maintenance.
- 11) Recovery from Deceased Estates is where the Agency and parent with care seek to recover arrears of child maintenance from the estate of a non resident parent. The difference between the number of cases referred to DWP and cases with debt recovered reflects the duration and complexity of the Recovery from Estates process. This process can take two years or more to complete for probate to be granted and the estate to be distributed. Recovery from Deceased Estates powers came into effect in January 2010.
- 12) Prosecutions involve the threat and/or the use of criminal fines where an individual or organisation commits a criminal offence under child support law. Example offences include failure to provide information requisition, misrepresentation of information, and/or failure to comply with a deduction from earnings order. Information on prosecutions is only available from April 2008.

Appeals

This shows the number of appeals, where a client challenges the maintenance decision, and time taken to deal with appeals.

From October 2013 Mandatory Reconsiderations have been introduced into the appeals process. This is where the Child Maintenance Service will look again at the entire decision before a client can appeal against it. More details on the change to the Appeals process can be found on page 47. The number of Appeals received for decisions made prior to 28/10/13 is on the gradual decline as we start to see an increase in the number of Appeals received for decisions post 28/10/13.

The average end to end process time taken to clear an appeal⁽⁶⁾ has seen a gradual increase from April 2007. This is due to increased workload from DWP and the knock on effect of the increased time taken for a hearing to be arranged and decision to be made by the Jurisdiction, which is outside Agency control.

- The number of Appeals received during 2013-2014 was 3,525, a decrease of 2,080 on the number received during 2012-2013 and the lowest figure since 2007-2008.
- The number of appeals being submitted to the Tribunal Service has reduced by 30% from March 2008 where it was 4,400 to March 2014 where it stands at 3,060.

								-

Notes:

- 1) Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system. Figures may not sum to totals due to rounding.
- 2) Revised Where an original decision has been found to be incorrect during the appeals process and is revised. If the new decision is to the financial advantage of the appellant then the appeal lapses and all appeals action is complete.
- 3) Withdrawn The appellant may decide at any point during the appeal process that they no longer wish to proceed with the appeal and request it to be withdrawn.
- 4) Submitted to Tribunal Service When an application decision is disputed and is reconsidered, but the applicant is still not satisfied with the outcome.
- 5) Appeals data for decisions made post 28/10/13 is unable to be broken down by scheme and departure appeals.
- 6) Clearance times are based only on Appeals decisions pre 28/10/13.
- 7) Outcomes of Appeals are published within Table 1.2d of the Tribunal Services Quarterly Summary of Statistics tables. Details can be obtained by following: http://www.justice.gov.uk/downloads/statistics/tribs-stats/tribs-states/tribs-states/as.ks.

Complaints

This shows how many complaints the Agency receives and manages each month.

There has been a gradual reduction in the number of Complaints received on a quarterly basis.

2,190 complaints were received in the quarter to December 2014, a decrease of 390 when compared to September 2014.

Table 19: Complaints

Notes:

1) The number of complaints received includes complaints at the resolution and review stage, and complaints handled off system.

Telephony Performance

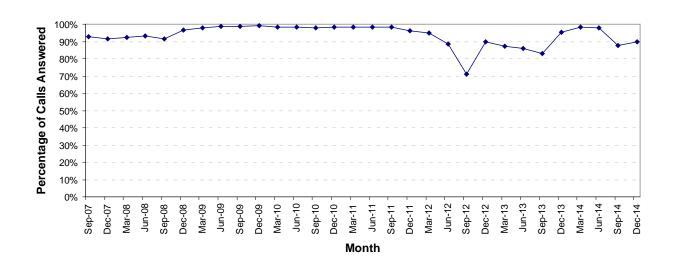

This shows how quickly calls to the Agency were answered each month.

The performance of telephone calls answered in 60 seconds has generally remained consistent since September 2007. The dip in telephony performance in September 2012 is attributable to the increase in connection companies targeting lines meaning a greater number of calls were being received on lines that were not resourced to cope with the customer demand, resulting in a reduction in both calls answered and time to answer. A technical solution was implemented October 2012. The latest performance decrease in percentage of calls answered can be attributed to increased call demand to National Helpline - who take calls across the 1993/2003 schemes.

- 1,468,200 telephone calls were answered in the 9 months to December 2014, with the
 calls answered from the queue in an average of 22 seconds. This compares to the 9
 months to December 2013 where 2,289,400 telephone calls were answered, with the
 average waiting time of 36 seconds.
- The in month percentage of calls answered within 60 seconds was 89.8% for December 2014. This is compared to a September 2014 figure of 87.9% and the December 2013 figure of 95.2%.
- The year to date position of calls answered within 60 seconds as at December 2014 was 93.9%. This was down on the year to date position as at September 2014 of 95.3% but up on the December 2013 position 86.8%.

Graph 9: Telephony Performance

% of calls answered in 60 seconds

Notes:

1) Computer system enhancements were implemented in October 2008, with a higher proportion of calls now being routed direct to the caseworker dealing with that particular case.

General Notes

Table Conventions

- . = "not applicable"
- .. = "not available"
- = less than the rounding threshold. In tables rounded to the nearest 100, this represents a figure of less than 50. In tables rounded to the nearest 5, this represents a figure of less than 5.

Caseload figures are rounded to the nearest 100.
Enforcement figures are rounded to the nearest 5.
Appeals figures are rounded to the nearest 5.
Complaints figures are rounded to the nearest 10.
Collections figures are rounded to the nearest £0.1m
Outstanding arrears figures are rounded to the nearest £1m.

Data

CSCS data is a 100% download of all cases administered on the CSCS computer system. Updates are received at each month end.

CS2 data is a 100% download of all cases administered on the CS2 computer system. Updates are received on a daily basis and processed at each month end.

Cases operating under 2003 Scheme rules are recorded on the CS2 computer system. Those cases operating under 1993 Scheme rules are mainly recorded on CSCS with a proportion of transitional cases, recorded on the CS2 computer systems. Transitional cases are cases that still fall under CSCS rules but are processed on CS2 by Transitional Caseworkers.

Clerical Case Database is a 100% download of all cases administered off system. These cases are defined as cases which, due to technical issues, cannot be processed on the computer system or are cases with a manual payment. Cases with a manual payment are those that are processed on the computer system but payments to the parent with care have to be made manually.

Some of the measures from the above sources are subject to revision caused by late notifications on the system with intake, clearances and uncleared work the most affected. In most months retrospection has minimal impact, with measures being impacted typically by less than 50 cases in previous months. Tables affected by retrospective changes are footnoted throughout the publication.

Accuracy figures are based on checking a sample of cases that have had a new assessment carried out to ensure that specific elements of the case, such as the maintenance calculation, are is correct. The accuracy information in this publication relates to the CS2 system only. In 2011/12 for cases administered on the CS2 system, this represented a sample of approximately 1.66% of the total population.

For further information please see the <u>Child Support Agency Quarterly Summary of Statistics Metadata</u> or <u>Information on Child Maintenance Administrative Data Sources</u>. Information on the quality of these statistics can be found in the <u>Child Support Agency Quarterly Summary of Statistics Background Quality Report</u>.

Detailed policy and methodology relating to the Child Support Agency Quarterly Summary of Statistics is available for reports <u>published prior to December 2013</u> and reports <u>published post December 2013</u>.

More details on DWP policy statements including quality guidelines can be found online.

A National Statistics Publication

The UK Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods; and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

2012 Scheme

The Government is reforming the child maintenance system so that it provides support to enable parents to work together after a separation, not only on child maintenance arrangements, but on the whole range of issues faced following separation. Incentives are being introduced to encourage parents to think twice about whether they could set up a family-based child maintenance arrangement without automatically turning to the statutory child maintenance scheme.

For those parents who are not able to make their own family-based arrangement, the 2012 statutory maintenance scheme will be available.

The 2012 child maintenance scheme was introduced on 10 December 2012, using a pathfinder approach to new applicants with at least four qualifying children with the same two parents named in the application. On 29 July 2013 the 2012 Scheme opened to new applicants with at least two qualifying children with the same two parents named in the application. On 25 November 2013, the Scheme opened up to all new applicants.

The 1993 and 2003 statutory schemes will continue to be delivered by the Child Support Agency (CSA). From the 30th June the process to close 1993 and 2003 scheme cases began. This process is expected to take around 3 years.

Performance relating to the 2012 Scheme is not included in this publication.

Experimental Statistics on the <u>2012 Scheme</u> covering the period of August 2013 – November 2014 were published on 17 December 2014, and the next release covering the data up to February 2014 will be released in March 2015.

Changes in this QSS

The table containing data on Initial Clearance Types can now be found in Annex B (Table 26) and will no longer be updated. This is due to all applications being processed on the 2012 Scheme and consequently the 2003 Scheme clearance figures are no longer suitable for reporting.

Changes to future publications

For presentational reasons, data included in all tables where each individual month is reported will be changed to exclude intervening months and only report quarterly outputs. Similarly, associated graphs will only show data for the financial quarters. We also propose to remove Annex B as these tables are for historical reference only. Please contact us if this will cause any issues.

Development has taken place to align the overall debt balance within Table 16: Arrears Segmentation with the closing balance figures quoted elsewhere in the publication. This will be implemented from June 2012 onwards

Appeals Process

A DWP wide change to the way in which clients can appeal against decisions was introduced under Section 102 of the Welfare Reform Act, these changes became effective from 28 October 2013.

The main Appeal Reform changes that impact child maintenance are:

- Mandatory Reconsideration from 28 October where all decisions will be looked at before a client can appeal against it
- Direct Lodgement from 28 October 2013 where it is appropriate for clients to appeal, they must appeal direct to HM Courts & Tribunals Service.

Changes will be reflected in future statistics, once Management Information on Mandatory Reconsiderations has been fully assured.

Upcoming Releases

The next QSS containing data on 1993/2003 Schemes up to March 2015 is due to be released in April/May 2015. The exact date will be announced at least four weeks in advance on the Statistical Release Calendar.

Help Us Improve Our Publication

We are constantly aiming to improve this release and its associated commentary. We would welcome any feedback you might have.

Statistician: Gemma Kirk Telephone: 0191 2162098 Email: csa.qss@dwp.gsi.gov.uk

Annex A

Table 20: Reasons for Case Closure Following Calculation

This shows a breakdown by reason for closure for all 2003 Scheme closures (including cancelled/withdrawn cases) following calculation.

The increase in the number of closures in the 'Other' category since December 2013 is mainly due to a large number of cases that previously had a cancelled/withdrawn status now ending their liabilities.

	Total Closures		Application Not

- 1) Figures are against 2003 statutory maintenance service only, including cases managed off system.
- 2)
- a. A closure is defined under the following circumstances; an application has been cancelled or withdrawn, a parent with care has been identified as claiming Good Cause or is subject to a Reduced Benefit Decision; or the application has been closed or terminated.
- b. Closures as above, though completed by case worker, can be initiated by either the system or the user themselves. Where case workers initiate closures, the closure reason is selected from a pre-defined list. As this is subjective, in some instances the selected reason may not reflect the actual reason for closure.
- c. Figures do not include performance of cases processed off system.
- d. Figures only include cases closed after a maintenance calculation has taken place.
- e. The figures in this table are subject to revision in future publications. Future revisions will reflect any new information which is received after the production of this table.
- f. A change in legislation in October 2008 removed the compulsion for parents with care on income based benefit (Income Support or Jobseeker's Allowance (Income Based)) to pursue a claim for child support through the Agency. After this date, it is expected that some parents with care will opt to end their child support claim with CSA..
- 3) Closures included in the 'Other' category include all case closures where the reason differs from those specified in the table above.

Table 21: Caseload Status

This shows the status of all cases with an assessment or calculation.

1)

- a. Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- b. Figures include 1993 Scheme cases with a full or interim maintenance assessment as well as 2003 Scheme cases with a full maintenance calculation or default maintenance decision.
- Total Caseload: The total number of cases on the CSA 2003 and 1993 Schemes, including cases managed off system.
- 3) Live Caseload: The total caseload minus cases with no current or ongoing liability, and no arrears and no payments are being made.
- 4) Current Liability: A case is classed as having a 'Current Liability' if it is open, has children of a qualifying age and has a positive liability (i.e. assessment to pay maintenance).
- 5) 'Full Liability' includes those cases that have paid 90% or more of the accrued liability via the collection service within the quarter.
- Maintenance Direct Cases are cases in which the maintenance calculation has been derived by the CSA (after assessment of the case) and the non-resident parent pays child maintenance directly to the parent with care. These cases are assumed to be fully meeting their current liability (since clients can come back to the CSA if there is a default on their payment or to request a revised calculation).

- a. No Current Liability: A case is classed as having 'No Current Liability' if it is open and currently has a nil liability but has at least one child of qualifying age, and therefore could have a positive liability in the future.
- b. No Ongoing Liability: A case is classed as having 'No Ongoing Liability' if there is no longer a child maintenance interest on the case i.e. the case has been cancelled/withdrawn, or there are no longer any children of a qualifying age remaining on the case.
- 8) A methodology change has been implemented to align the Collection Service Paying Full Liability figures to the Cases Contributing towards Current Liability table on page 61.
- 9) The methodology to calculate the total caseload has changed; cases that are cancelled/withdrawn, closed or no longer have a qualifying child on the case, have been removed. This has been implemented back to January 2012.

Table 22: 2003 Scheme Caseload Status

This shows the status of all 2003 Scheme cases with an assessment or calculation.

1)

- a. Figures are against the 2003 statutory maintenance service only, including cases managed off system. Figures exclude cases where the scheme in which the case is held cannot be identified (approximately 300 cases), therefore scheme breakdowns may not sum to overall Agency figures.
- b. Figures include 2003 Scheme cases with a full maintenance calculation or default maintenance decision.
- 2) Total Caseload: The total number of cases on the CSA 2003 Scheme.
- 3) Live Caseload: The total caseload minus cases with no current or ongoing liability, no arrears and no payments are being made.
- 4) Current Liability: A case is classed as having a 'Current Liability' if it is open, has children of a qualifying age and has a positive liability (i.e. assessment to pay maintenance).
- 5) 'Full Liability' includes those cases who have paid 90% or more of the accrued liability via the collection service or maintenance direct within the quarter.
- 6) Maintenance Direct Cases are cases in which the maintenance calculation has been derived by the CSA (after assessment of the case) and the non-resident parent pays child maintenance directly to the parent with care. These cases are assumed to be fully meeting their current liability (since clients can come back to the CSA if there is a default on their payment or to request a revised calculation).

- a. No Current Liability: A case is classed as having 'No Current Liability' if it is open and currently has a nil liability but has at least one child of qualifying age, and therefore could have a positive liability in the future.
- b. No Ongoing Liability: A case is classed as having 'No Ongoing Liability' if there is no longer a child maintenance interest on the case i.e. the case has been cancelled/withdrawn, or there are no longer any children of a qualifying age remaining on the case.
- 8) A methodology change has been implemented to align the Collection Service Paying Full Liability figures to the Cases Contributing towards Current Liability table on page 61.
- 9) The methodology to calculate the total caseload has changed; cases that are cancelled/withdrawn, closed or no longer have a qualifying child on the case, have been removed. This has been implemented back to January 2012.

Table 23: 1993 Scheme Caseload Status

This shows the status of all 1993 Scheme cases with an assessment or calculation.

			Current Liability ^(1,4)					Maintenance Direct ⁽⁶⁾				llity/with ars ^(1,7)	No liability/no arrears ^(1,7)

1)

- a. Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- b. A case is classed as having a 'Current Liability' if it is open, has children of a qualifying age and has a positive liability (i.e. assessment to pay maintenance). This includes cases due to pay via Maintenance Direct.
- 2) A case is classed as paying towards their liability if a payment has been received in the previous quarter, or the case is classed as Maintenance Direct at the end of the quarter.

- a. 'Full Liability' satisfied within quarter includes those cases who have paid 90% or more of the accrued liability via the collection service within the quarter. Maintenance direct cases are not included in this category, as it is assumed that money is flowing between parents.
- b. A methodology change has been implemented to include further cases for calculating the amount of liability satisfied via the collection service. This has been implemented back to January 2012 and consequently figures in the Full Liability column may differ to previous releases.

Table 25: Percentage of Liability Paid in Quarter
This shows the percentage of liability being paid each quarter, for cases due to pay via the collection service.

- a. Figures are against the 1993 and 2003 statutory maintenance services only, including cases managed off system.
- b. Maintenance Direct Cases are not included within this table, as receipts are not held on the CSA computer systems to show how much money is flowing between parents. This is to show a more realistic performance overview of the collection service.
- 2) Percentages are based on the amount of money received in each quarter compared to the accrued liability in each quarter.
- 3) 'Full Liability' satisfied within quarter includes those cases who have paid 90% or more of the accrued liability via the collection service within the quarter. Maintenance direct cases are not included in this category.
- 4) A methodology change has been implemented to include further cases for calculating the amount of liability satisfied via the collection service. This has been implemented back to January 2012 and consequently the percentage breakdowns and Full Liability figures may differ to previous releases.

Annex B - Historical Tables

The following tables are historical tables from previous publications. These will not be updated with new information.

Table 26: Initial Clearance Types

This shows a breakdown by type of clearance for all 2003 Scheme clearances.

2003 Scheme clearance figures are no longer suitable for reporting due to all applications being processed on the 2012 Scheme.

ocheme.				ı	Payment Sched	ule Set Up ^(1,6)

- a. Figures are against 2003 statutory maintenance service only, including cases managed off system.
- b. These figures are subject to revision in future publications. Payment(s) made / not made figures are subject to greater degrees of revision to reflect when a first payment is received. Future revisions will reflect any new information which is received after the production of this table.
- 2) Cases where no payment has yet been made will always be artificially high for the latest month of intake. These are cases where a collection schedule has been set up but the first payment may not yet be due.
- 3) Closed category includes applications closed prior to a calculation being carried out, applications where the parent with care is identified as claiming good cause or subject to a reduced benefit decision, the application is actually a change of circumstance on an existing case or where the case is closed after a calculation but prior to a first payment being made.
- 4) Nil liability includes cases where a nil liability calculation is the first calculation carried out or where a nil liability calculation is carried out prior to receipt of first payment.
- 5) Maintenance direct includes cases where the first calculation is a maintenance direct arrangement or where a maintenance direct arrangement is made prior to receipt of first payment.
- 6) Figures may not sum to clearance figures on page 67 (table 27) due to rounding.

Intake, Clearances and Uncleared work

This shows the total intake of 2003 Scheme applications, total clearances and total remaining uncleared applications up until March 2014.

Following fluctuations in both 2003 Scheme Intake and Clearance figures prior to December 2008, the volumes began to even out at approximately 30,000. In the quarters prior to March 2014 the figures reduced significantly due to the pathfinder approach into launching the new 2012 Scheme. Starting on 10 December 2012 all new applications with four or more children relating to the same parent with care and non resident parent were accepted onto the 2012 Scheme. From 29 July 2013 the 2012 Scheme was opened up to cases with two or more children, where at least two of the children relate to the same non resident parent. As of 25 November 2013 all applications are being accepted onto the 2012 Scheme, hence intake figures onto the 2003 Scheme are no longer suitable for reporting and will remain as at March 2014.

Intake figures on the 2012 scheme are available in the <u>Experimental Statistics on the 2012 scheme</u> for the period between August 2013 and May 2014.

Graph 10: 2003 Scheme Intake/Clearances

66

Table 27: Intake/Clearances and Uncleared work

This shows the total intake of 2003 Scheme applications, total clearances and total remaining uncleared applications.

Notes:

¹⁾ Intake and clearances figures include 2003 statutory scheme cases, excluding the performance of cases managed off system.

a. A 2003 Scheme clearance is defined under the following circumstances; If a maintenance calculation has been carried out and a payment arrangement between the parent with care and the non resident parent is in place; an application has

- been cancelled or withdrawn; a maintenance calculation has been carried out and nil liability established; or the application has been closed.
- b. Intake figures count applications for Child Support. Not all applications become live cases. Similarly, clearances count all applications cleared and not just live cases.
- c. A change in legislation in October 2008 removed the compulsion for parents with care on income based benefits (Income Support or Jobseeker's Allowance (Income Based)) to pursue a claim for child support through the Agency. After this date, it was expected that some parents with care would opt to end their child support claim with CSA.
- d. In the run up to the change, a further legislative repeal in July 2008 meant that single parents making a new claim for income based benefit would no longer be referred to CSA. Some will have made direct arrangements with the Agency, but they are not compelled to do so.
- a. In January and February 2007 CSA implemented a computer system change to free-up applications that could not be progressed due to system issues. The change involved the deletion of around 11,750 2003 Scheme applications and the subsequent re-entry of the vast majority back onto the system. This has had the impact of artificially increasing the clearance and intake figures for January and February by 1,500 and 10,250 respectively.
- b. A small sample of cases indicates that most uncleared applications reported as 1993 Scheme were in fact 2003 Scheme
- 4) Uncleared application figures include the performance of cases managed off system from October 2006.
- 5) 1993 Scheme uncleared applications relate to cases that have not been assessed.

- 6) Intake figures in this table may differ from intake figures on page 70 (table 28). Intake figures in the table above are based on the date the case was first entered on the CS2 computer system. Intake figures on page 70 (table 28) are based on the date when a customer first made contact with the Agency.
- 7) The Agency is still receiving a small number of new applications on the 2003 scheme. These relate to applications which cannot be made to the 2012 scheme because either an existing scheme case is open or their liability ended less than 13 weeks before the non resident parent or parent with care contacted the Agency. We also expect there to be some residual handling issues, which require a small number of cases to be processed on the 2003 scheme rather than the 2012 scheme.

Time to Clear Applications

This shows the length of time taken to clear applications received by the Agency each month.

From 25 November 2013, all intake of new applications are progressed on the 2012 Scheme. The focus on the remaining applications on 2003 scheme was to clear as many as possible by March 2014 regardless of the receipt date, which has resulted in the decrease in the clearance measure. Due to the impact of all applications now being processed on the 2012 Scheme, the clearance data has only been updated up to December 2013.

• As can be seen in Graph 11, there was a fall in percentage of applications cleared within 12 and 18 weeks for the intake received in September 2013. Prior to this the percentage of applications cleared has remained fairly consistent since December 2008 for the 12, 18 and 26 week clearance timeframes. 97.1% of September 2013 intake was cleared within 26 weeks, which is in line with the previous trend, and an increase when compared to the June 2013 figure of 96.4%.

Graph 11: Time to Clear Applications

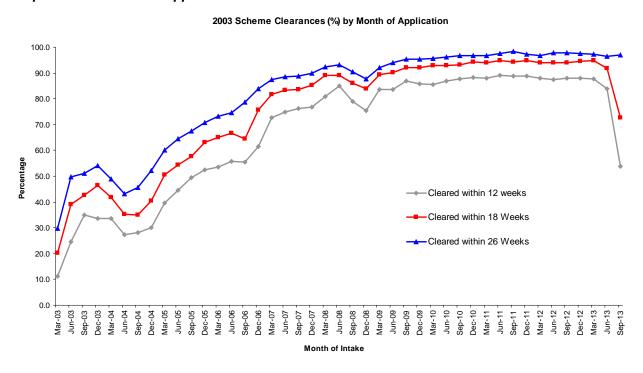

Table 28: Time to Clear Applications

This shows the length of time taken to clear applications received by the Agency each month.

Month of	(1)	Within 12		Within 18		Within 26		Total		Not

Notes:

¹⁾ Intake figures in this table may differ from intake figures on page 67 (table 27). Intake figures in the above table are based on the date when a customer first made contact with the Agency. Intake figures on page 67 (table 27) are based on the date the case was first entered on the CS2 computer system. The Agency is still receiving a small number of new applications on the 2003 scheme. These relate to applications which cannot be made to the 2012 scheme because either an existing scheme case is open or their liability ended less than 13 weeks before the non resident parent or parent with care contacted the Agency. We also expect

there to be some residual handling issues, which require a small number of cases to be processed on the 2003 scheme rather than the 2012 scheme.

- A clearance above is defined under the following circumstances; If a maintenance calculation has been carried out and recorded as Maintenance Direct; (Maintenance Direct is a payment arrangement between the parent with care and the non resident parent is in place); an application has been cancelled or withdrawn; a maintenance calculation has been carried out and nil liability established; a parent with care has been identified as claiming Good Cause or is subject to a Reduced Benefit Decision; or the application has been closed.
- Figures are calculated by counting applications for Child Support. Not all applications become live cases.

- Time to clearance is calculated as the time from first contact with the non resident parent or parent with care until
- clearance of the application.

 ** indicates that the time band is incomplete. This means that whilst some cases will have been cleared within the time d. band, since the period had not yet fully elapsed, complete data is not available to allow meaningful comparison with earlier periods.
- The number of applications cleared, applications uncleared and the percentages from the December 2013 intake are not included in this table due to rounding. This is denoted by "-".

Old Methodologies

In December 2013 some of the methodologies, included in the CSA QSS, changed following an external consultation. The following tables are based on old methodologies and are for information purposes only. The <u>last publication using the old methodologies</u> covers data up to September 2013.

Notes:

a. Figures from April 2008 reflect the performance of cases managed off system.

b. Figures include 1993 Scheme cases with a full or interim maintenance assessment as well as 2003 Scheme cases with a full maintenance calculation or default maintenance decision.

- Cases which are recorded as Maintenance Direct are included in the live and assessed caseload measure due to the fact that the Maintenance Calculation is worked out by the CSA and maintained on the agency system. Clients can come back to the CSA if there is a default on their payment or to request a new calculation.

 Live and assessed caseload includes open cases with an ongoing child maintenance liability, cases which have been
- d. assessed as nil liability and cases where arrears of maintenance have been requested.

- A drop in the caseload can be seen from January 2010 which can be attributed to the removal of suspended cases on the CSCS computer system. a.
- b. 1993 Scheme figures include cases held on the CSCS computer system. CSCS data included in this table is based on a 5% sample.

Figures from October 2006 reflect the performance of cases managed off system as well as cases on the CS2 and CSCS computer systems.

b. Figures include 1993 Scheme cases held on the CSCS computer system. CSCS data included in this table is based on a 5% sample.

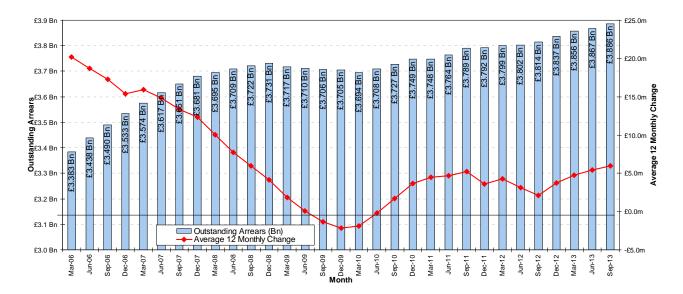

²⁾ Cases are classed as having maintenance due if an ongoing liability to pay maintenance exists or arrears of maintenance have been requested. This group of cases consists of assessed not charging, compliant, nil compliant, maintenance direct and others with receipts. Definitions based on old methodologies can be found on page 9 of the <u>September 2013 QSS</u>.

³⁾ Cases are counted as having a positive maintenance outcome if they have received a payment via the collection service in the quarter or have a maintenance direct agreement in place. Maintenance Direct cases account for approximately 27% of the positive

- outcomes reported in the quarter to September 2013. Cases are classed as maintenance direct if this is their status at the end of the quarter.
- 4) Qualifying children are counted as receiving maintenance or with a maintenance direct agreement in place if the relevant case has received a payment via the collection service in the last three months or has a maintenance direct agreement in place. An average of 1.35 children per case has been used for positive outcome cases progressed off system. This is based on checking a sample of off system case papers.

Graph 12: Outstanding Maintenance Arrears

To provide further historical data the graph below is included with data up to September 2013. The data is sourced from the Agency's General Ledger and shows the gross arrears position of non-resident parents at the end of each quarter.

Notes:

- 1) Figures show the gross arrears position at the end of each quarter sourced from the Agency's General Ledger.
- 2) Figures for 12/13 onwards have yet to be audited and finalised. Following publication of the 2008/09, 2009/10 and 2011/12 Client Fund Accounts, outstanding arrears figures have been adjusted. See accounts publications for further detail on changes: https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/221407/cmec-client-funds-account-2011-12.pdf
- 3) Adjustments have also been made from 2012/13 onwards which are yet to be agreed with National Audit Office.
