Background

This document provides local authorities, maintained schools and academies with the minimum notepad entries expected for validation queries that may occur on their return. The Department will not be able to authorise a return if there has been insufficient information supplied within the return level note.

Further guidance can be found in the [collect guides](#).

Validation queries

Validation rules are used in COLLECT and in many school software systems to improve data quality. These are explained in section 5.4 in the [collection guide for school employed staff](#) and section 5.3 of [collection guide for centrally employed staff](#).

A query is reported in COLLECT where the data is unusual or unexpected, reflecting a potential inaccuracy or omission in the underlying data. For example, where a destination code has been provided for a member of staff but no end date for their contract, or no head teacher post is returned. All outstanding queries should have an explanatory note.

Notes deemed to be acceptable in order for some queries to be cleared are published in this document. For any other query, free text should be entered to explain the reason for the query.

By entering a note, you are agreeing that the queries have been checked and that the information provided is correct or there is a valid reason why it is not available.

You should read the [COLLECT guide](#) to find out how to identify any queries and write a notepad entry.

You must clear all queries or we will not be able to authorise your return.
