Key stage 1

Mathematics

Administering the modified large print (MLP) version of the key stage 1 mathematics Paper 2: reasoning

SAMPLE MODIFIED TEST

Published December 2015

These test administration instructions reflect guidance for the live test in 2016.

As this document supports the sample test materials, any guidance on security and maladministration procedures is not applicable.

Some of the documents or procedures mentioned in these instructions, such as when the test must be administered, the opening instructions and the completion of the attendance register, will be applicable to a live test scenario only.

Further information is available on GOV.UK at www.gov.uk/sta.

For test administration

2016 Key stage 1 mathematics sample test

The key stage 1 mathematics sample tests consist of 2 papers. The papers must be administered in order. Pupils can have a break between the papers. However, test packs for each test must not be opened until the pupils are in the test room ready to complete the test.

Paper 2: reasoning

The following information explains how to administer the MLP version of the sample Paper 2: reasoning. There is additional information on www.gov.uk about administering MLP tests to pupils. If you have any questions you should check with your headteacher or key stage 1 test co-ordinator before the test is administered.

Format	<ul style="list-style-type: none"> • This test consists of a single test paper. • It is expected that the reasoning paper will take approximately 35 minutes, plus up to 100% additional time allowance to complete (not strictly timed). • It is at your discretion to choose when or if pupil(s) require a break during the test or whether, if appropriate, to stop the test early. • The paper includes a practice question and 5 aural questions. • After the aural questions, the time for the remainder of the paper should be approximately 30 minutes. • You must not refer to the standard questions.
Equipment	<p>Pupils will need the equipment specified below:</p> <ul style="list-style-type: none"> • a blue / black pen or a dark pencil • a sharp dark pencil for mathematical drawing • a rubber (optional). If rubbers are not provided, you should tell pupils that they may cross out any answers they wish to change • ruler (showing centimetres). <p>Pupils may use the following equipment, if this is normal classroom practice, provided they only give word-for-word translations:</p> <ul style="list-style-type: none"> • bilingual dictionaries or electronic translators • bilingual word lists • monolingual English electronic spell checkers. <p>Pupils are not allowed the following equipment in the test:</p> <ul style="list-style-type: none"> • calculators • number apparatus e.g. ten base materials, number square, number lines etc.
Assistance	<p>You must ensure that nothing you say or do during a test could be interpreted as giving pupils an advantage.</p> <ul style="list-style-type: none"> • If a pupil requests it, a question may be read to the pupil on a one-to-one basis. However, you can only read numbers and not mathematical symbols. This is to ensure that pupils are not given an unfair advantage by having the function inadvertently explained by reading its name. <p>The examples below illustrate how to deal with some common situations.</p> <p>Q. What does 'fraction' mean? A. I can't tell you, but think hard and try to remember. We can talk about it after the test.</p> <p>Q. What does '>' or '<' mean? A. I can't tell you, but think hard and try to remember. We can talk about it after the test.</p> <p>If any everyday context or words related to a question are unfamiliar to a pupil, you may show them related objects or pictures, or describe the related context.</p>

<p>Guidance for specific questions</p>	<p>If you need to make further adaptation to question 11, do not change the length of the line that is to be measured (it must be exactly 11cm).</p> <p>There are two models provided for question 14.</p> <p>For question 21 pupils may indicate the lines of symmetry by any appropriate method, e.g. by pointing or using pins and bands.</p>
<p>Before the test begins</p>	<ul style="list-style-type: none"> • Review the list of pupils with any particular individual needs e.g. pupils who may need a scribe or a transcript made at the end of the test. Ensure that you know how to administer any access arrangements correctly. • Check that there are enough administrators to maintain supervision and support for the test. You should consider the possibility of at least 1 test administrator needing to leave the room with a pupil. • Ensure you understand how to deal with issues during the tests.
<p>How to deal with issues during the test</p>	<p>It is impossible to plan for every scenario. Whatever action you take, pupil safety must always be your first consideration.</p> <p>In the following circumstances you will need to stop the test either for an individual pupil or for the whole cohort:</p> <ul style="list-style-type: none"> • test papers are incorrectly collated or the print is illegible • an incorrect test has been administered • a fire alarm goes off • a pupil is unwell • a pupil needs to leave the test room during the tests • a pupil is caught cheating. <p>If you need to stop the test:</p> <ul style="list-style-type: none"> • make a note of the time • make sure pupils are kept under test conditions and that they are supervised • if they have to leave the room, ensure they don't talk about the test • speak to your test co-ordinator or a senior member of staff for advice on what to do next. <p>You should brief your headteacher on how the incident was dealt with, once the test is over.</p>
<p>What to do at the start of the test</p>	<ul style="list-style-type: none"> • Check that seating is appropriately spaced and that no pupil can see another pupil's test paper. • Ensure each pupil has a copy of the test paper for MLP mathematics Paper 2: reasoning.
<p>What to say at the start of the test</p>	<p>It is important to brief pupils fully at the start of each test. You should use these instructions to introduce mathematics Paper 2: reasoning.</p> <p>The wording of these instructions can be adapted, provided the meaning is retained.</p> <p>Explain to the pupils that this is the key stage 1 mathematics Paper 2: reasoning. Tell the pupils that they should have a test booklet in front of them.</p> <p>Tell the pupils to write their name on the front of their test booklet.</p> <p>Ask the pupils to open their test booklet at page 2. Explain that Amy and Abdul are two children who are in these questions. Explain that there are different children mentioned in other questions as well. Their names are Sam, Ben and Sita.</p> <p>Explain to the pupils that you will read aloud some questions for them to answer. Explain that you will read each question twice only, leaving a short gap in between. Tell the pupils that they must listen very carefully when you read the questions.</p> <p>Tell the pupils that you will explain how to write answers to each question and that they will have plenty of time to work out the answers.</p>

<p>What to say at the start of the test (continued)</p>	<p>Tell the pupils that they must work on their own and they must not call out the answers.</p> <p>Explain to the pupils that, if they make a mistake, they should cross it out or rub it out and write their new answer clearly. Additionally, where necessary, you can show the pupils how to change their answers if they think they have made a mistake.</p> <p>Explain that some questions will have boxes for them to write their answers in and they can do any working out in the white spaces around the boxes if they need to.</p> <p>Where necessary, you can show the pupils how to draw a tick, circle or cross to indicate the answer.</p> <p>Ask the pupils to turn to page 3 of the booklet. Explain that there is a practice question on page 3.</p> <p>When reading the question to the pupils, remember to repeat the question.</p> <p>Repeat the bold text only.</p> <p><i>This is a practice question for us to do together.</i></p> <p>Help the pupils to locate the question where necessary.</p> <p>Look at the circles. How many circles are there?</p> <p><i>Write your answer in the box.</i></p> <p>Before proceeding, ensure that the pupils know where they should have written their answer, the number they should have written down and then discuss methods the pupils used to work out their answer. Allow the pupils to change their answers to the correct one by crossing out or rubbing out, to make sure they know the way to correct errors.</p> <p>Explain to the pupils that you will now read out questions 1 to 5.</p> <p>Tell the pupils that they should try to answer all of the questions. If they can't answer a question, they should move onto the next one and come back to that one later.</p> <p>Remind the pupils that you can't help them answer these next questions. Tell the pupils that they should try to work them out on their own.</p> <p>Ask pupils if they have any questions they want to ask you before you start.</p> <p>Then read questions 1 to 5, allowing time for pupils to write their answers. When reading the question to the pupils, remember to repeat the question. Repeat the bold text only. At the end of each question, allow sufficient time for pupils to complete what they can.</p>
<p>Question 1</p>	<p><i>Question 1</i></p> <p>What number is one less than twenty-four?</p> <p><i>Write your answer.</i></p>
<p>Question 2</p>	<p><i>Turn over the page.</i></p> <p><i>Question 2</i></p> <p>How many tens are there in ninety-six?</p> <p><i>Write your answer.</i></p>
<p>Question 3</p>	<p><i>Question 3</i></p> <p><i>Look at the four units in question 3.</i></p> <p>Which unit is the capacity of a bottle: two centimetres, two kilograms, two degrees Celsius or two litres?</p> <p><i>Write the unit.</i></p>

<p>Question 4</p>	<p><i>Look at the next page.</i></p> <p><i>Question 4</i></p> <p><i>Amy has a sheet of paper.</i></p> <p><i>She cuts the sheet into halves.</i></p> <p><i>How many pieces of paper does she have now?</i></p> <p><i>Write your answer.</i></p>
<p>Question 5</p>	<p><i>Question 5</i></p> <p><i>Look at the lengths.</i></p> <p><i>Sam’s arm is fifty centimetres long.</i></p> <p><i>Ben’s arm is forty centimetres long.</i></p> <p><i>How much longer is Sam’s arm than Ben’s arm?</i></p> <p><i>Write your answer.</i></p>
<p>What to say at the start of the test (continued)</p>	<p>Explain to the pupils that is the last question you will read to them all.</p> <p>Tell the pupils, that when you tell them, they will need to read the questions in the booklet. Explain that in some places there will be an answer box. In other places, they may need to write their answer on a diagram or picture.</p> <p>Tell the pupils that they have approximately 30 minutes to complete the rest of the paper (allow additional time of up to 100%).</p> <p>Tell the pupils to turn to the next page and start working.</p>
<p>What to do at the end of the test</p>	<ul style="list-style-type: none"> • If any pupil needs a transcript, complete it with the pupil at the end of the test, under test conditions. Particular care should be taken to ensure accurate transcriptions are made and that pupil’s answers are not corrected or amended.
<p>Marking the test</p>	<ul style="list-style-type: none"> • Use the key stage 1 sample test mark schemes to mark Paper 2: reasoning, as well as the modified mark scheme amendments, following both the general guidance and any specific guidance for each question.
