This statistical bulletin has been produced by the Department for the Economy (DfE) and provides information on the number of Northern Ireland (NI) students enrolled at UK Higher Education Institutions (HEls) and the number of students enrolled at NI HEls.

- Over the past decade, the number of NI students enrolled at UK HEls increased initially, from 63,015 in 2006/07 to a peak of 65,590 in 2011/12, before declining to 63,600 in 2015/16 (Tables 1a and 1b).
- Of the 63,600 NI students enrolled at UK HEIs in 2015/16, 74.1\% were enrolled at NI HEIs (including $5.9 \%$ studying locally at the Open University) and $25.9 \%$ at HEls in GB (Table 1a).
- In 2015/16, 48.1\% of NI domiciled students at UK HEls were studying a Science, Technology, Engineering or Maths (Broad STEM) related subject and $26.5 \%$ a Narrow STEM related subject (Table 7a).
- Despite a $2.1 \%(1,200)$ decrease between $2014 / 15(56,445)$ and 2015/16 (55,245), student enrolments at NI HEls have increased by a net $5.0 \%(2,625)$ over the past decade (from 52,615 in 2006/07) (Tables $8 f$ and 8 g ).
- Between 2014/15 and 2015/16, the number of first year undergraduates enrolling at NI HEls decreased by 7.2\%, from 18,585 to 17,250 ; a $14.2 \%$ decrease in full-time enrolments (from 11,490 to 9,855 ) was partially offset by a $4.3 \%$ increase in part-time enrolments (from 7,095 to 7,395) (Table 9b).
- Of the 55,245 students enrolled at NI HEIs in 2015/16, $85.4 \%$ were from $\mathrm{NI}, 4.0 \%$ from the Republic of Ireland, $5.3 \%$ from GB, $0.7 \%$ from other EU countries and $4.7 \%$ from non-EU countries (Table 8a).

| Purpose | Monitor and report on 1) NI domiciled Enrolments in Higher Education Institutions in the United Kingdom, and 2) All Enrolments at NI Higher Education Institutions. |

Statistics and Research Branch (Tertiary Education) is responsible for the collection, quality assurance, analysis and publication of timely and accurate information derived from a wide range of statistical information returns supplied by the Higher Education Institutions (HEls) and Further Education (FE) colleges across Northern Ireland (NI) and the Higher Education Statistics Agency (HESA), focused on NI HEls and NI domiciled students in attendance at any UK HEI. Statistical information is collected routinely from a variety of electronic individual level administrative systems.

The Head of Branch is the Principal Statistician, Brian French. The Branch aims to present information in a meaningful way and provide advice on its uses to customers in the Economy Committee, FE colleges, universities, Professional Advisory Groups, policy branches within the DfE, other educational organisations, academia, private sector organisations, charity/voluntary organisations, as well as the general public.

The statistical information collected is used to contribute to major exercises such as reporting on the performance of the Higher Education (HE) and FE sectors, other comparative performance exercises, target setting and monitoring, departmental research projects, development of service frameworks, as well as policy formulation and evaluation. In addition, the information is used in response to a significantly high volume of Assembly questions and ad hoc queries each year.

Information is disseminated through a number of key statistical publications, including: HE enrolments; HE qualifications; Destinations of leavers from Higher Education (DLHE); FE activity; and Essential Skills enrolments and outcomes.

A detailed list of these publications is available from:
Website: $\quad \frac{\text { https://www.economy-ni.gov.uk/topics/statistics-and-economic- }}{\text { research/higher-and-further-education-and-training-statistics }}$

Over the past decade, NI student enrolments at UK HEls increased initially, before declining again...

Over the past decade, the number of NI students enrolled at UK HEls increased initially, from 63,015 in 2006/07 to a peak of 65,590 in 2011/12, before declining again to 63,600 in 2015/16; this included a $0.6 \%(365)$ decrease between $2014 / 15(63,965)$ and $2015 / 16(63,600)$.

Most NI students study full-time...

In 2015/16, 73.5\% of enrolments were full-time and 26.5\% were parttime. In comparison with 2014/15, full-time enrolments have increased by $0.6 \%$ (from 46,430 to 46,720 ) and part-time enrolments have decreased by $3.7 \%$ (from 17,535 to 16,885 ).

Most NI students study in Of the 63,600 NI students enrolled at UK HEls in 2015/16, 74.1\% were NI...
enrolled at NI HEls (including 5.9\% studying locally at the Open University) and $25.9 \%$ at HEls in GB.
...however, outside of Northern Ireland, the North West of England is the most popular region for NI students...

The most popular regions for NI students who studied in GB were the North West of England and Scotland with 4,510 and 4,150 NI students enrolled at HEls in each region respectively.

More NI female students are enrolling...

Females accounted for $56.6 \%$ of NI students enrolled at UK HEIs in $2015 / 16$. A higher proportion of males ( $75.0 \%$ ) were studying full-time than females (72.3\%).

Fewer NI students are enrolling on full-time undergraduate courses at UK HEls...

The number of NI students enrolled on full-time first year undergraduate courses at UK HEls decreased by 3.3\%, from 13,735 in 2014/15 to 13,280 in 2015/16.

A quarter of NI student enrolments are on Narrow STEM courses...

In 2015/16, 26.5\% of NI students at UK HEls were studying a Narrow STEM related subject and $48.1 \%$ a Broad STEM related subject.

Student enrolments at NI HEls have increased by a net 5.0\% over the past decade...

Despite a $2.1 \%(1,200)$ decrease between 2014/15 $(56,445)$ and 2015/16 $(55,245)$, student enrolments at NI HEls have increased by a net $5.0 \%$ $(2,625)$ over the past decade (from 52,615 in 2006/07).

Most students enrolled at NI HEls were studying full-time...

In 2015/16, 68.0\% of enrolments were full-time and $32.0 \%$ were part-time. In comparison with 2014/15, full-time enrolments have decreased by $1.9 \%$ (from 38,280 to 37,545 ) and part time enrolments have decreased by $2.6 \%$ (from 18,165 to 17,700).

Most students in NI HEls are from NI...

Of the 55,245 students enrolled at NI HEls in 2015/16, $85.4 \%$ were from $\mathrm{NI}, 4.0 \%$ from the Republic of Ireland (Rol), $5.3 \%$ from Great Britain (GB), $0.7 \%$ from other EU countries and $4.7 \%$ from non-EU countries.
...however, we have students from a wide range of countries...

In 2015/16, students from over 100 different countries throughout the world were enrolled at NI HEls. The non-EU countries with the highest number of students at NI HEls were China (785) and Malaysia (385).

More females are enrolling in NI HEls...

Females accounted for 56.8\% of students enrolled at NI HEls in 2015/16. A higher proportion of males (71.2\%) were studying full-time than females (65.5\%).

Fewer students are enrolling on full-time undergraduate courses at NI HEls...

Between 2014/15 and 2015/16, the number of first year undergraduates enrolling at NI HEls decreased by $7.2 \%$, from 18,585 to 17,250; a 14.2\% decrease in full-time enrolments (from 11,490 to 9,855) was partially offset by a $4.3 \%$ increase in part-time enrolments (from 7,095 to 7,395 ).

Almost a quarter of enrolments at NI HEls are on Narrow STEM courses...

In 2015/16, 25.7\% of NI HEls students were studying a Narrow STEM related subject and $47.8 \%$ a Broad STEM related subject.

## Coverage

This statistical bulletin has been produced by the Department for the Economy (DfE) and presents information on students enrolled at Higher Education Institutions (HEIs) in the UK in the 2015/16 academic year. The statistics presented in this bulletin cover a range of topics including changes over the last ten years, breakdown of the most recent enrolments, subject of study and where Northern Ireland (NI) students go to study.

## National Statistics

The United Kingdom Statistics Authority (the Authority) has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

National Statistics status means that Official Statistics meet the highest standards of trustworthiness, quality and public value.

All Official Statistics should comply with all aspects of the Code of Practice for Official Statistics. They are awarded National Statistics status following an assessment by the Authority's regulatory arm. The Authority considers whether the statistics meet the highest standards of Code compliance, including the value they add to public decisions and debate. Designation can be broadly interpreted to mean that the statistics: meet identified user needs; are well explained and readily accessible; are produced according to sound methods; and are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics, it is a statutory requirement that the Code of Practice shall continue to be observed. It is DfE's responsibility to maintain compliance with the standards expected of National Statistics. If we become concerned about whether these statistics are still meeting the appropriate standards, we will discuss any concerns with the Authority promptly. National Statistics status can be removed at any point when the highest standards are not maintained, and reinstated when standards are restored.

## Policy and Operational Context

The Minister for the Economy has responsibility within the NI Executive and to the NI Assembly for the NI Higher Education Institutions (HEls) and their students; and for student support for NI domiciled students in NI and the rest of the UK. The Assembly's Economy Committee has a scrutiny role in regard to these issues.

There continues to be a lot of media interest in the HE sector and HE statistics. With changes in fee regimes throughout the UK, the effect of the economic recession and the potential impact of Brexit, the demand for HE is often in the spotlight.

It is within this context that DfE is implementing Graduating to Success, its Higher Education strategy, which aims to promote and sustain the development of an internationally competitive sector, accessible to all who are able to benefit, and meeting the needs of the Northern Ireland economy and wider society. This bulletin forms part of the evidence base that shapes the future strategies and policies of DfE.

## Data Collection

The information presented in this statistical bulletin is based on data supplied by the Higher Education Statistics Agency (HESA). HESA is the official agency for the collection of information on publicly funded HEls in the UK. It was set up in 1993 following the White Paper Higher Education: a new framework, which called for more coherence in HE statistics. In this context, HEls include all publicly-funded universities. The HESA data presented in this bulletin relate to students at HEls in the UK and therefore do not include HE enrolments at FE colleges in NI or GB, or at institutions in the Republic of Ireland (Rol).

## Rounding Strategy

To prevent the identification of individuals, figures throughout the report are rounded to the nearest 5 , with 0,1 , and 2 rounded to 0 . Due to rounding, the sum of numbers in each row or column may not match the total shown. Percentages are based on unrounded figures. Percentages have also been rounded to one decimal place. More information on the rounding strategy can be found in the notes and definitions section.

## Data Quality

All information presented in this bulletin has been validated and quality assured by HEls prior to publication. HEls are given a set period of time to submit the information to the HESA. Following submission, both HESA and DfE perform a series of validation checks to ensure that information is consistent both within and across returns. Trend analyses are used to monitor annual variations and emerging trends. Queries arising from validation checks are presented to HEls for clarification and, if required, returns may be amended and/or re-submitted. Finally, prior to publication, the data are presented to HEls for a final sign-off. More detail is available via the link: Quality of Higher Education Statistics.

## Who will be interested in this bulletin?

The information presented in this statistical bulletin will be of interest to a wide variety of people. For example, the statistics within and those derived from this bulletin are currently used by DfE policy officials in their role of assisting and advising the Minister for the Economy to discharge his duties; by the NI Assembly and Economy committee to scrutinise the HE sector; by other government departments such as DoF as a key indicator in the education domain of the NI Multiple Deprivation Measure (MDM); by prospective students to inform their choices around HE; by local businesses to quantify the supply of graduates in their business area; and by researchers and academics to try and understand the underlying trends in HE. Further details about the uses made of HE statistics can be found in the notes and definitions section.

## Main Uses of HE statistics

The main uses of these data are to monitor HE enrolments and the characteristics of students enrolling both from NI and to NI HEls. This helps assess HEI performance, corporate monitoring, informing and monitoring related policy, and responding to parliamentary/assembly questions and ad hoc queries from the public.

DfE is responsible for the policy, strategic development and financing of the statutory HE sector. Analysis of data trends against key strategic priorities remains a crucial component of data development within DfE.

## HE Activity Elsewhere

Summary figures for the four UK administrations were published by HESA in their Statistical First Release on 12th January 2017.

This statistical first release can be viewed at the following page -https://www.hesa.ac.uk/news/12-01-2017/sfr242-student-enrolments-andqualifications

More in depth reports for England, Scotland and Wales can be downloaded from the following pages:

England - http://www.bis.gov.uk/policies/higher-education/research-analysis
Scotland - http://www.scotland.gov.uk/Topics/Statistics/Browse/Lifelong-learning Wales - http://wales.gov.uk/topics/statistics/theme/post16ed/higher-educa

The bulletin is divided into two sections. Section 1 focuses on NI domiciled students enrolled at HEIs in NI, England, Scotland or Wales. Section 2 concentrates on all students enrolled at NI HEls. This division into two sections reflects the two distinct policy and operational responsibilities of the Minister and the Department. Furthermore, it is clear from customer feedback, the nature of questions on HE asked in the NI Assembly, and coverage of HE issues in the local media, that these two aspects are of key interest to readers.

It is worth noting that there is a large overlap between Section 1 and Section 2, namely NI students enrolled at NI HEls are included in both sections. See the diagram below for details:

Diagram summarising the structure of the bulletin: Enrolments 2015/16

Section 1 - NI domiciled students enrolled at UK HEls - 2015/16 $(63,600)$
Section 2 - Enrolments at NI HEls - 2015/16 $(55,245)$

### 1.1 Change over the last 10 years - 2006/07 to 2015/16 (Tables 1 and 2, Figure 1)

Although the number of NI students enrolled at UK HEls in 2015/16 was $0.9 \%$ higher than in 2006/07, over the past decade, enrolments increased initially, from 63,015 in 2006/07 to a peak of 65,590 in 2011/12, before declining again to 63,600 in 2015/16; this included a $0.6 \%(365)$ decrease between $2014 / 15(63,965)$ and $2015 / 16(63,600)$ (Tables 1a, 1b and 1d, Figure 1).

Figure 1 - NI domiciled students enrolled at UK HEls - 2006/07 to 2015/16

Although the proportion of NI domiciled students studying in GB in 2015/16 (25.9\%) was similar to that of a decade ago ( $25.8 \%$ in 2006/07) during this period, it rose to $26.7 \%$ in 2011/12, before dipping to $24.8 \%$ in 2014/15 and increasing again to $25.9 \%$ in $2015 / 16$. When we examine the full-time first year undergraduate cohort, this proportion has increased from $30.7 \%$ to $36.0 \%$ over the ten year period. Again this increase has not been constant, peaking in 2011/12 and again in 2015/16 (Tables 1a and 2a).

Over the 10 year period, the number of NI students going to GB to study increased by $1.2 \%$, from 16,260 in $2006 / 07$ to 16,450 in 2015/16; those studying through the Open University decreased by $0.5 \%$, from 3,760 to 3,740 over the same period; while NI enrolments at NI HEls (excluding the OU) increased by 1.0\%, from 43,000 in 2006/07 to 43,415 in 2015/16 (Tables 1a and 1b).

In terms of level of study, 'first degree' courses have experienced the largest percentage increase of NI domiciled students, rising by $7.6 \%$ over the last ten years, from 44,545 in 2006/07 to 47,915 in 2015/16. While 'postgraduate' enrolments have increased by $5.5 \%$ over the same period, from 8,980 to 9,475 , the number of students enrolled on 'other undergraduate' courses (such as foundation degrees, diplomas, HNDs and HNCs) has fallen by $34.5 \%$, from 9,490 in 2006/07 to 6,215 in 2015/16 (Table 1c).

Full-time enrolments rose by $6.0 \%$ over the decade, compared with a $10.8 \%$ decrease in part-time enrolments. The drop in part-time enrolments is mainly related to the drop in the number doing part-time 'other undergraduate' courses (Table 1c).

### 1.2 Breakdown of enrolments - 2015/16 (Tables 1 to 4, Flgure 2)

In 2015/16, 63,600 NI students were enrolled at UK HEls, showing a decrease of 0.6\% from 63,965 in 2014/15 (Table 1d).

Mode of study - In 2015/16, 73.5\% of enrolments were full-time and $26.5 \%$ were parttime. In comparison with 2014/15, full-time enrolments have increased by $0.6 \%$, from 46,430 in $2014 / 15$ to 46,720 in 2015/16; and part-time enrolments have decreased by $3.7 \%$, from 17,535 in 2014/15 to 16,885 in 2015/16 (Table 1e).

Level of study - Just over three quarters (75.3\%) of NI students were enrolled on a 'first degree' course, $9.8 \%$ on 'other undergraduate' courses and $14.9 \%$ on a 'postgraduate' course in 2015/16. 'First degree' enrolments increased by $0.8 \%$, from 47,525 in 2014/15 to 47,915 in 2015/16, while 'other undergraduates' decreased by $4.1 \%$, from 6,480 to 6,215 , and 'postgraduates' decreased by $4.9 \%$, from 9,955 to 9,475 over the same period (Tables 1f).

The number of NI domiciled full-time first year undergraduate enrolments at UK HEls decreased by $3.3 \%$, from 13,735 in 2014/15 to 13,280 in 2015/16 (Table 2c).

Gender - In recent history, more females have been progressing into higher education than males. This gender gap does not begin at the point of entry to HE, but can be observed early on in the educational system. In NI , females are more likely to stay on in full-time education at age 16. They are more likely to be entered for A levels, more likely to pass them, and also more likely to do better (achieve an A grade, including A*) than males. (Source: DENI Statistical Press Release: Year 12 and Year 14 Examination Performance at Post Primary Schools in 2014/151).

Over the past ten years, the female share of the NI domiciled student population enrolled at UK HEls has declined, from $58.9 \%$ in 2006/07 to $56.6 \%$ in 2015/16. A higher proportion of males (75.0\%) than females (72.3\%) were studying full-time in 2015/16 (Table 3a and 3b).

A higher proportion of males than females were enrolled on 'first degree' courses in 2015/16-77.5\% compared with 73.7\%, whereas females (10.8\%) were more likely than males ( $8.4 \%$ ) to be undertaking an 'other undergraduate' course. Females (15.5\%) were also more likely than males (14.1\%) to be enrolled on 'postgraduate' courses (Table 3c).

Age -In 2015/16, 41.9\% of NI domiciled students enrolled at UK HEls were aged 'under 21 ', $29.0 \%$ were aged ' 21 to 24 ' and $29.1 \%$ were aged ' 25 and over' (Table 4a).

[^0]Figure 2 : NI domiciled students enrolled at UK HEls by age group, mode and level of study - 2015/16

The majority of younger students (those aged under 21) tend to enter HE straight from school and continue to study on a full-time basis. Older students (aged 25 and over) are more likely to study part-time. Many older students are combining work with part-time study and see HE as a way to develop their career, or to enable them to change to a different career. The majority ( $95.7 \%$ ) of NI students aged 'under 21' were enrolled on a full-time course, as were $88.2 \%$ of those aged ' 21 to 24 '. In comparison, the majority (73.2\%) of those aged '25+' were enrolled on part-time courses (Table 4c, Figure 2).

### 1.3 Location of Study (Tables 1 to 3 \& 5)

There are various reasons why students leave NI to study, including their choice of subject, for example, some courses such as veterinary science are not supplied in Northern Ireland. However, available research ${ }^{2}$ would suggest that the majority of those who plan to leave NI to study do so out of choice. Indeed, figures from the latest Destinations of Leavers from Higher Education survey ${ }^{3}$ show that around $68.5 \%$ of fulltime students who left NI to study in GB did not return to NI to work six months after qualifying.

[^1]

Of the 63,600 NI students enrolled at UK HEls in 2015/16, $74.1 \%$ were enrolled at NI HEls (including $5.9 \%$ studying locally at the Open University) and $25.9 \%$ at HEls in GB (Table 1a).

There were 16,450 NI students studying at HEls in GB in 2015/16. The map above illustrates how many NI students were studying in each region of GB. The darker the shade of blue, the higher the number of NI students enrolled at HEls in that region.

The most popular regions for NI students who studied in GB were the North West of England and Scotland, with 4,510 and $4,150 \mathrm{NI}$ students enrolled at HEls in each region respectively. Other popular regions were the North East of England, with 1,555 NI students, and London, with 1,190 (Table 5a).

In Scotland, the HEls with the most NI students in 2015/16 were the University of Glasgow (705), the University of Dundee (690) and the University of Edinburgh (475). In the North West, Liverpool John Moore's University alone had 1,570 NI student enrolments, making it the most popular HEl in GB for NI students. In the North East, the University of Northumbria at Newcastle had 700 students from NI. In fact, it is worth noting that NI students were enrolled at 161 of the 163 publicly funded HEls in the UK (Table 5b).

Similar proportions of males and females study in GB, with around $26 \%$ of both NI domiciled males and females enrolled at GB HEls in 2015/16 (25.8\% of males and $25.9 \%$ of females) (Table 3d).

Of the 13,280 Nl domiciled full-time first year undergraduate enrolments at UK HEIs in 2015/16, 64.0\% were enrolled at NI HEls (a drop of 5 percentage points from 2014/15) and $36.0 \%$ were enrolled at HEls in GB (an increase of 5 percentage points from 2014/15) (Table 2a).

### 1.4 Multiple Deprivation Measure quintiles (Table 6, Figure 3)

Of the $63,460 \mathrm{NI}$ domiciled students enrolled at UK HEIs in 2015/16 whose postcodes were known, the highest proportion (25.8\%) were from the least deprived multiple deprivation area in NI (quintile 5), around double the proportion (13.1\%) from the most deprived multiple deprivation area (quintile 1).

Figure 3: NI domiciled students enrolled at UK HEls by mode of study and multiple deprivation measure quintile - 2015/16

### 1.5 Subject of Study (Table 7, Figure 4)

In 2015/16, the most popular subject areas for NI students studying at UK HEls were: 'subjects allied to medicine' (which includes subjects such as nursing, pharmacy, occupational Therapy and physiotherapy), with 8,490 (13.4\%) enrolments; 'business and administrative studies' (which includes subjects such as business studies, management studies, accounting, marketing and finance), with 7,425 (11.7\%) enrolments; and 'education'(which includes subjects such as training teachers, research study skills in education and academic studies in education), with 7,370 (11.6\%) (Table 7c).

Females accounted for 81.9\% of 2015/16 enrolments in ‘subjects allied to medicine’, $71.8 \%$ of those studying ‘education’ and $70.4 \%$ of those studying ‘languages'. In contrast, males accounted for $82.2 \%$ of those studying 'engineering and technology', $76.6 \%$ of 'computer science' enrolments and $73.1 \%$ of 'architecture, building and planning' enrolments (Table 7c, Figure 4).

Figure 4 : NI domiciled students enrolled at UK HEls by gender and subject area-2015/16

The key priority identified within the Programme for Government (2011-15) by the NI Executive is to grow a sustainable economy and invest in the future. To help achieve this, a target has been set to increase the uptake in economically relevant STEM ${ }^{4}$ places in education.

In 2015/16, 48.1\% of NI students at UK HEls were studying a Broad STEM related subject. A higher proportion of males (54.4\%) than females (43.4\%) were studying Broad STEM subjects. Full-time students (53.2\%) were more likely to be studying Broad STEM subjects than part-time students (34.1\%) (Tables 7a and 7b).

In 2015/16, 26.5\% of NI students at UK HEls were studying a Narrow STEM related subject. A higher proportion of males (39.3\%) than females (16.6\%) were studying Narrow STEM subjects. Full-time students (30.1\%) were more likely to be studying Narrow STEM subjects than part-time students (16.4\%) (Tables 7 a and 7 b ).

[^2]
### 2.1 Change over the last 10 years - 2006/07 to 2015/16 (Tables 8 \& 9, Figure 5)

Despite a 2.1\% (1,200) decrease between 2014/15 (56,445) and 2015/16 $(55,245)$, student enrolments at NI HEls have increased by a net $5.0 \%(2,625)$ over the past decade (from 52,615 in 2006/07) (Tables $8 f$ and 8 g , Figure 5).

Figure 5 - Enrolments at NI HEls - 2006/07 to 2015/16

Students from NI now account for a smaller proportion of the total population of students at NI HEIs than they did 10 years ago. In 2006/07, students from NI accounted for 87.1\% $(45,805)$ of the total population of students at NI HEls. However, by $2015 / 16$ this proportion has decreased to $85.4 \%(47,150)$, despite numbers increasing by $2.9 \%$ over the ten year period (from 45,805 to 47,150 ). Over this period, NI HEls have seen an increase in students from outside NI: The number of students from GB or non-EU countries increased by $57.2 \% ~(1,865$ to 2,930 ) and $87.6 \%(1,380$ to 2,585 ) respectively. In contrast, the number of students from Rol or other EU countries decreased by $30.6 \%$ (from 3,165 to 2,195) and 6.5\% (from 400 to 375 ) respectively (Tables 8a and 8f).

In 2011/12, Ulster University returned to HESA students enrolled through a new partnership with QA Higher Education, which includes significant numbers of non-EU students. The increase in non-EU students at NI HEls over the past ten years is partly due to there being 370 non-EU domiciled students enrolled on courses that have been jointly developed by Ulster University and QA Higher Education in Birmingham (50) and London (320) in 2015/16. Although these students are based in Birmingham and London, they are registered as Ulster University students (Table 8e).

In terms of level of study, 'first degree' enrolments have experienced an increase of 9.7\% (from 34,720 to 38,095) over the ten year period. Enrolments on 'postgraduate courses have also shown an increase of $15.6 \%$ (from 9,235 to 10,675), while those for 'other undergraduate' courses (such as foundation degrees, diplomas, HNDs and HNCs) have fallen by $25.2 \%$ (from 8,660 to 6,475) over the same time period (Table 8h).

The number of full-time enrolments increased by 10.1\%, from 34,110 in 2006/07 to 37,545 in 2015/16, whereas there was a 4.4\% decrease in part-time enrolments over the same period, from 18,505 to 17,700 (Table 8i).

### 2.2 Breakdown of enrolments - 2015/16 (Tables 8 to 11, Flgure 6)

In 2015/16, 55,245 students were enrolled at NI HEls, showing a decrease of 2.1\% from 56,445 in 2014/15 (Table 8g).

Mode of study - In 2015/16, 68.0\% of enrolments were full-time and $32.0 \%$ were parttime. In comparison with 2014/15, full-time enrolments have decreased by $1.9 \%$ (from 38,280 to 37,545 ) and part-time enrolments have decreased by $2.6 \%$ (from 18,165 to 17,700 ) (Tables 8j and 8k).

Level of study - In 2015/16, 69.0\% of students were enrolled on a 'first degree' course, $11.7 \%$ on 'other undergraduate' courses and $19.3 \%$ on a 'postgraduate' course. Between 2014/15 and 2015/16, 'first degree' enrolments decreased by $0.9 \%$ (from 38,450 to 38,095), while 'other undergraduates' decreased by $3.3 \%$ (from 6,695 to 6,475) and 'postgraduates' decreased by $5.5 \%$ (from 11,295 to 10,675) (Tables 81 and 8m).

Between 2014/15 and 2015/16, the number of first year undergraduates enrolling at NI HEls decreased by $7.2 \%$, from 18,585 to 17,250; a $14.2 \%$ decrease in full-time enrolments (from 11,490 to 9,855 ) was partially offset by a $4.3 \%$ increase in part-time enrolments (from 7,095 to 7,395) (Table 9b).

Gender - In recent history, more females have been progressing into higher education than males. This gender gap does not begin at the point of entry to HE, but can be observed early on in the educational system. In NI, girls are more likely to stay on in fulltime education at age 16. They are more likely to be entered for A levels, more likely to pass them, and also more likely to do better (achieve an A grade, including A*) than boys (Source: DENI Statistical Press Release: Year 12 and Year 14 Examination Performance at Post Primary Schools in 2014/155).

Of the 55,245 students enrolled at NI HEIs in 2015/16, 56.8\% were female and 43.2\% were male (Table 10a).

A higher proportion of males (71.2\%) than females (65.5\%) were studying full-time. Over the past ten years, the female share of the student population at NI HEls has declined from $59.8 \%$ to $56.8 \%$ (Table 10b).

In 2015/16, males (72.5\%) were more likely to be undertaking a 'first degree' course than females (66.2\%), while a higher proportion of females (13.1\%) were enrolled on an 'other undergraduate' course than males (9.8\%) and on 'postgraduate' courses ( $20.6 \%$ of females and $17.6 \%$ of males) (Table 10d).

Age - In 2015/16, 35.9\% of students enrolled at NI HEls were aged 'under 21', 27.5\% were aged ' 21 to 24 ' and $36.7 \%$ were ' 25 and over' (Table 11a).

[^3]Figure 6: Enrolments at NI HEIs by age group, mode and level of study 2015/16

The majority of younger students (those aged under 21) tend to enter HE straight from school and continue to study on a full-time basis. Older students (aged 25 and over) are more likely to study part-time. Many older students are combining work with part-time study and see HE as a way to develop their career, or to enable them to change to a different career.

In 2015/16, the majority ( $94.5 \%$ ) of students at NI HEls aged 'under 21' were enrolled on a full-time course, as were $85.4 \%$ of those aged ' 21 to 24 '. In contrast, the majority ( $71.1 \%$ ) of those aged '25+' were enrolled on part-time courses (Table 11d, Figure 6).

### 2.3 Country of Domicile (Tables 8 to 10, Figure 7)

Over the last 10 years, NI HEls have experienced an increase in the number of enrolments of students from outside NI.

Of the 55,245 students enrolled at NI HEls in 2015/16, $85.4 \%$ were from NI, $5.3 \%$ from Great Britain (GB), 4.7\% from non-EU countries, $4.0 \%$ from the Republic of Ireland (Rol) and $0.7 \%$ from other EU countries (Table 8a, Map 2).

In 2015/16, students from over 100 different countries throughout the world were enrolled at NI HEls. The countries from outside NI, GB and the Rol with the most students enrolled at NI campuses (not including those registered to Ulster University but based in Birmingham and London) were China (740), Malaysia (385), United States (195), Hong Kong (Special Administrative Region of China) (125) and India (85) (Table 8d).

The 370 non-EU students registered to Ulster University but based in Birmingham and London were made up of students from around 40 different countries, including Bangladesh (85 students), China (45), India (30), Colombia (30) and Nepal (30) (Table 8 e ).

Figure 7 below illustrates the contrast in level of study for NI students and those from other countries. The majority of students at NI HEls from outside NI are enrolled on 'postgraduate' or 'other undergraduate' courses, whereas the majority of students from NI are enrolled on 'first degree' courses (Table 8).

Figure 7 : Enrolments at NI HEls by domicile and level of study - 2015/16

### 2.4 Subject of Study (Table 12, Flgure 8)

In 2015/16, the most popular subject areas students were studying at NI HEls were: 'subjects allied to medicine' (which includes subjects such as nursing, pharmacy, occupational therapy and physiotherapy), with 7,960 (14.4\%) enrolments; 'business and administrative studies' (which includes subjects such as business studies, management studies, accounting, marketing and finance), with 7,690 (13.9\%) enrolments; and 'education' (which includes subjects such as training teachers, research study skills in education and academic studies in education), with 6,415 (11.6\%) enrolments (Table 12c).

Females accounted for 82.2\% of 2015/16 enrolments in ‘subjects allied to medicine’, $71.5 \%$ of those studying ‘languages’ and $70.9 \%$ of those studying ‘education’. In contrast, males accounted for $82.6 \%$ of those studying 'engineering and technology', $76.2 \%$ of 'computer science' enrolments and 71.8\% of 'architecture, building and planning' enrolments (Table 12c, Figure 8).

Figure 8 : Enrolments at NI HEls by gender and subject area - 2015/16

The key priority identified within the Programme for Government (2011-15) by the NI Executive is to grow a sustainable economy and invest in the future. To help achieve this, a target has been set to increase the uptake in economically relevant STEM ${ }^{6}$ places in education.

In 2015/16, 47.8\% of students at NI HEls were studying a Broad STEM related subject. A higher proportion of males (53.4\%) were studying Broad STEM subjects compared to females (43.5\%). Full-time students (53.7\%) were more likely to be studying Broad STEM subjects than part-time students (35.1\%) (Tables 12a and 12b).

In 2015/16, $25.7 \%$ of students at NI HEls were studying a Narrow STEM related subject. A higher proportion of males (38.4\%) were studying Narrow STEM subjects compared to females (16.0\%). Full-time students (30.6\%) were more likely to be studying Narrow STEM subjects than part-time students (15.3\%) (Tables 12a and 12b).

### 2.5 Instltutional breakdown (Table 13, Flgure 9)

Of all students enrolled at NI HEls in 2015/16, 45.5\% were enrolled at Ulster University, $43.2 \%$ at Queen's University Belfast, 2.6\% at Stranmillis University College, 1.9\% at St Mary's University College and 6.8\% at the Open University (Table 13b).

[^4]
## Ulster University

Ulster University enrolments decreased by 3.6\% between 2014/15 and 2015/16 (from 26,085 to 25,155 ). Full-time enrolments decreased by $5.4 \%$ (from 18,720 to 17,700) while part-time enrolments increased by 1.2\% (from 7,365 to 7,455) (Table 13a).

The number of full-time students enrolled on courses jointly developed by Ulster University and QA Higher Education, and based in Birmingham and London, decreased by $40.0 \%$, from 1,330 in 2014/15 to 795 in 2015/16 (Table 13c).

The number of full-time enrolments at Ulster University campuses based in NI (therefore not including UU Birmingham or London) decreased by $2.8 \%$, from 17,390 in 2014/15 to 16,905 in 2015/16, whereas part-time enrolments based in NI increased by $1.2 \%$, from 7,365 in 2014/15 to 7,455 in 2015/16 (Table 13d).

Between 2014/15 and 2015/16, 'first degree' enrolments at Ulster University showed a decrease of $2.0 \%$ (from 18,350 to 17,975), while 'other undergraduate' enrolments decreased by $14.9 \%$ (from 2,220 to 1,890 ) and 'postgraduate' enrolments decreased by 4.0\% (from 5,510 to 5,290) (Table 13e).

## Queen's University Belfast

Enrolments at Queen's University Belfast increased by $0.1 \%$ between 2014/15 and $2015 / 16$, from 23,855 to 23,870 . Full-time enrolments increased by $1.3 \%$ (from 17,730 to 17,965 ), while part-time enrolments decreased by $3.5 \%$ (from 6,120 to 5,905 ) (Table 13d).
'First degree’ enrolments increased by $0.2 \%$ (from 15,155 to 15,190) between 2014/15 and 2015/16, while all 'other undergraduates' increased by $1.9 \%$ (from 3,700 to 3,770) and 'postgraduate' enrolments decreased by $1.7 \%$ (from 4,995 to 4,910) (Table 13e).

## Open University

Enrolments at the Open University (where the national centre is located in NI ) decreased by $1.6 \%$ between $2014 / 15$ and $2015 / 16$, from 3,795 to 3,735 . There were no full-time enrolments, so this decrease is reflective of part-time enrolments (Table 13d).
'First degree' enrolments decreased by $2.1 \%$ (from 3,065 to 3,000) between 2014/15 and 2015/16, while 'other undergraduate' enrolments increased by $5.5 \%$ (from 560 to 590) and 'postgraduate' enrolments decreased by $14.9 \%$ (from 175 to 150) (Table 13e).

## Stranmillis University College

Enrolments at Stranmillis University College decreased by 7.4\% from 1,555 in 2014/15 to 1,440 in 2015/16. This decrease can be attributed to part-time enrolments, where there was a decrease of $26.1 \%$ (from 600 to 440), while full-time enrolments increased by $4.3 \%$ (from 955 to 1,000) (Table 13d).
‘First degree’ enrolments increased by $3.1 \%$ (from 1,025 to 1,055) over this period and 'other undergraduate’ enrolments increased by $4.2 \%$ (from 215 to 220), while 'postgraduate' enrolments decreased by $49.2 \%$ (from 315 to 160) (Table 13e).

## St Mary's University College

The number of students enrolled at St Mary's University College decreased by 10.1\%, from 1,155 in 2014/15 to 1,040 in 2015/16. This decrease can be attributed to parttime enrolments, which fell by $44.4 \%$ (from 285 to 160), while full-time enrolments increased by $1.1 \%$ (from 870 to 880) (Table 13d).
'First degree' enrolments increased by $1.7 \%$ (from 860 to 875 ) over this period, while 'postgraduate' enrolments decreased by $44.4 \%$ (from 295 to 165). There were no 'other undergraduates' at this institution (Table 13e).

Figure 9 : Enrolments at NI HEls by Institution and level of study - 2015/16

### 2.6 UK Comparison (Table 14, Chart 10)

In 2015/16, 2,280,830 students were enrolled at HEls throughout the UK. In comparison with $2014 / 15$, student numbers have increased by $0.7 \%$ (from 2,266,075) (Table 14a).

Over the same period, enrolments at English HEls rose by $0.9 \%$ (from 1,844,095 to $1,861,345$ ) and Scottish HEls showed an increase of $1.3 \%$ (from 232,570 to 235,565). However, Welsh HEls showed a decrease of 3.2\% (from 132,965 to 128,675), while enrolments at NI HEls decreased by 2.1\% (from 56,445 to 55,245) (Table 14a).

Between 2014/15 and 2015/16, the number of 'first degree' enrolments increased at English HEls (2.8\%), Scottish HEls (2.7\%) and Welsh HEls (0.8\%), but decreased at NI HEls (0.9\%); the number of 'other undergraduate' enrolments fell in all locations. 'Postgraduate' enrolments fell in all locations except Scotland, where there was an increase of $0.9 \%$ (Table 14b, Figure 10).

Figure 10 : Percentage change in Enrolments at UK HEls by level of study and location of institution - 2014/15 to 2015/16

Between 2014/15 and 2015/16, full-time enrolments at English and Scottish HEls increased by $2.9 \%$ (from 1,391,975 to 1,431,735) and 2.6\% (from 174,840 to 179,460) respectively, whereas those in NI and Welsh HEls fell by $1.9 \%$ (from 38,280 to 37,545) and $0.3 \%$ (from 92,050 to 91,800 ) respectively (Table 14a).

Over the same period, the number of part-time enrolments fell in all locations; decreasing by $5.0 \%$ in England (from 452,120 to 429,610), 2.8\% in Scotland (from 57,730 to 56,105 ), $9.9 \%$ in Wales (from 40,915 to 36,875), and $2.6 \%$ in NI (from 18,165 to 17,700) (Table 14a).

## NOTES:

1. The United Kingdom Statistics Authority (the Authority) has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

National Statistics status means that Official Statistics meet the highest standards of trustworthiness, quality and public value.

All Official Statistics should comply with all aspects of the Code of Practice for Official Statistic. They are awarded National Statistics status following an assessment by the Authority's regulatory arm. The Authority considers whether the statistics meet the highest standards of Code compliance, including the value they add to public decisions and debate. Designation can be broadly interpreted to mean that the statistics: meet identified user needs; are well explained and readily accessible; are produced according to sound methods, and are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed. It is the Department for the Economy's (DfE's) responsibility to maintain compliance with the standards expected of National Statistics. If we become concerned about whether these statistics are still meeting the appropriate standards, we will discuss any concerns with the Authority promptly. National Statistics status can be removed at any point when the highest standards are not maintained, and reinstated when standards are restored.
2. The data presented in this bulletin are based on data supplied by the Higher Education Statistics Agency (HESA). HESA is the official agency for the collection of information on publicly funded Higher Education (HE) institutions in the UK. It was set up in 1993 following the White Paper 'Higher Education: a new framework', which called for more coherence in HE statistics. HE institutions include all publicly-funded universities. The HESA data presented in this bulletin relate to students at HE institutions in the UK and therefore do not include HE enrolments at FE colleges in NI or GB, or at institutions in the Republic of Ireland.
3. HESA releases separate publications providing information on HE Student Enrolments and Qualifications obtained at HEls for the whole of the UK. A notable difference in the HESA publications and those released by DfE is that from 2014/15 HESA uses revised data returns for the time series figures, whereas DfE does not. Consequently, historical figures for the number of enrolments and qualifications at UK HEls published by DfE may differ from those in HESA's publications. Further information on this can be found in the 'Notes and frequently asked questions' of HESA's Statistical First Release (SFR) 2015/16: https://www.hesa.ac.uk/news/12-01-2017/sfr242-student-enrolments-andqualifications
4. Change to HESA Methodology - From 2013/14, HESA has changed the allocation of Open University (OU) students to England, Wales, Scotland and Northern Ireland.

Previously, all OU enrolments and qualifications were counted as being within England, where the OU has its administrative centre. HESA has decided from their 2013/14 release onwards that enrolments and qualifications registered at one of the OU's national centres in Wales, Scotland and Northern Ireland will contribute to the totals of those countries where statistics are shown by country of provider.

A full public consultation of NI users of Higher Education Statistics was undertaken by DfE (formerly DEL) in 2015 on this change to the method for allocating OU students, which showed full support for the change. Therefore, this publication and future NI Higher Education publications will use the new method for OU allocation.
5. Change to NI government departments - The number of Northern Ireland government departments has been reduced from twelve to nine. The functions and services delivered by the twelve former departments have been restructured and transferred to the relevant new departments. The nine new departments are:

- Agriculture, Environment and Rural Affairs
- Infrastructure
- Economy
- Education
- Finance
- Health
- Justice
- The Executive Office
- Communities

More information can be found at:
https://www.nidirect.gov.uk/articles/changes-government-departments
6. The bulletin contains HESA data only (that is, data on enrolments at UK HEls only). Information on enrolments on HE courses at NI and GB FE colleges, Rol institutions and the College of Agriculture, Food and Rural Enterprise (CAFRE) is available via a separate statistical fact sheet, which is published on the Department's website (https://www.economy-ni.gov.uk/publications/ni-domiciled-students-enrolled-he-courses-uk-and-roi-201011-201415).
7. Further statistics on the Northern Ireland HE sector, including qualification gained, graduate destinations and various higher education fact sheets can be downloaded from the Department's website: https://www.economy-ni.gov.uk/topics/statistics-and-economic-research/higher-education-statistics
8. Guidance on the production of HE statistics - Information on methods for collecting and analysing HE data, the quality of HE statistics, and links to the quality guidance used in managing the production of HE statistics can be accessed on our statistics guidance page: https://www.economy-ni.gov.uk/articles/quality-higher-educationstatistics
9. Uses made of HE statistics - This bulletin is disseminated direct to approximately 100 users. In addition, it is published on the Department's website and can be accessed through a link on the UK National Statistics GOV.UK publication hub (https://www.gov.uk/government/statistics) using a filter of 'higher education' as
the policy area and 'Department for the Economy' as the department. Users include policy colleagues in DfE, academics, researchers, members of the public, the NI Assembly, other government departments and other interested parties and individuals.

The bulletin and further analysis of the data provide an evidence base that is used in a number of DfE policies, strategies and reviews. Some of the most recent examples are:

- DfE's Higher Education Strategy
- DfE's Widening Participation Strategy
- DfE's STEM Strategy

Further details on these strategies are available from the DfE website:
https://www.economy-ni.gov.uk/articles/higher-education-strategies-northern-ireland
In addition, HE data are used within other NI departments and their agencies. Some of the most recent examples are:

- DoF - as a key indicator in the Education Domain of the Northern Ireland Multiple Deprivation Measure (NI MDM).
- DE - teacher demand model
- Invest NI - to quantify the supply of graduates for potential inward investment to NI

Around 200 HE statistical enquiries per year are received by the Department from various sources. These include requests for further breakdowns of enrolments, qualifications and destinations data.

In addition, approximately 20 assembly questions (either written or oral), relating to HE data, are received by the Department each year.

## 10.Government Targets

Data from this bulletin are used in the measurement of the following key commitment as set in the Northern Ireland Executive's Programme for Government (2011-15):
https://www.northernireland.gov.uk/publications/programme-government-2011$\underline{2015}$
"Increase uptake in economically relevant Science, Technology, Engineering and Mathematics (STEM) places (DfE)."
11. Rounding Strategy - DfE conforms to the HESA rounding strategy. Due to the provisions of the Data Protection Act (1998) and the Human Rights Act (1998), HESA (and therefore DfE) implements a strategy, in published and released tabulations, designed to prevent the disclosure of personal information about any individual. This strategy involves rounding all numbers to the nearest 5 , and suppressing percentages and averages based on small populations.

The HESA rounding strategy changed for the 2013/14 release onwards. Percentages are now suppressed if based on a population of fewer than 22.5 individuals; this is a
change from the previous threshold of 52 individuals, used in earlier publications. This change will enable more percentage calculations to be published. A full list of the rounding strategy includes:

- 0, 1 and 2 are rounded to 0;
- all other numbers are rounded to the nearest multiple of 5 ;
- percentages based on fewer than 22.5 individuals are suppressed;
- averages based on fewer individuals are also suppressed;
- percentages and averages are based on unrounded figures;
- percentages are rounded to one decimal place;
- full-time equivalent (FTE) data are not rounded; and
- financial data are not rounded

Total figures are also subject to this rounding methodology; so the sum of numbers in each row or column may not match the total shown.

## DEFINITIONS:

## Higher Education

12. Higher education students for the purpose of HESA's data collection are those students on courses for which the level of instruction is above that of level 3 of the Qualifications and Curriculum Authority (QCA) National Qualifications Framework (NQF) (e.g. courses at the level of Certificate of HE and above).

## Count of Students

13.The HESA Student Record contains information about individual enrolments which, because a student can be enrolled on more than one programme of study, will exceed the number of students.
14. HESA data are a count of enrolments across the entire academic year.

## Academic year

15. The academic year runs from $1^{\text {st }}$ August to $31^{\text {st }}$ July.

## First year students

16. First year students are based on the HESA standard registration population who commenced their instance in the reporting period relevant to the data collection year. The term 'instance' is used to describe a student's engagement with the institution aiming towards the award of a qualification(s) or credit.

## Domicile

17. Domicile refers to a student's permanent place of residence prior to enrolment on a HE course.
18. Student enrolments recorded with domicile UK region unknown, Channel Islands and Isle of Man are included in the GB category for the purposes of this statistical bulletin.

## Level of course

19.Level of study
I. Postgraduate programmes of study are those leading to higher degrees, diplomas and certificates (including Postgraduate Certificate of Education (PGCE) and professional qualifications) and usually require that entrants are already qualified to degree level (that is, already qualified at level 6 of the QCA National Qualifications Framework).
II. First degrees include: first degrees with or without eligibility to register to practice with a health or social care or veterinary statutory regulatory body; first degrees with Qualified Teacher Status (QTS)/registration with a General Teaching Council (GTC); enhanced first degrees; first degrees obtained concurrently with a diploma; and intercalated first degrees.
III. Foundation degrees were first introduced in September 2001. They are vocational higher education qualifications and are at level 5 of the QCA National Qualifications Framework.
IV. Other undergraduate includes qualification aims equivalent to and below first degree level, such as Professional Graduate Certificate in Education (PGCE), foundation degrees, diplomas in HE with eligibility to register to practice with a Health or Social Care or veterinary statutory regulatory body, Higher National Diploma (HND), Higher National Certificate (HNC), Diploma of Higher Education (DipHE), Certificate of Higher Education (CertHE), foundation courses at HE level, NVQ/SVQ levels 4 and 5, post-degree diplomas and certificates at undergraduate level, professional qualifications at undergraduate level, other undergraduate diplomas and certificates including post registration health and social care courses, other formal HE qualifications of less than degree standard, institutional undergraduate credit and no formal undergraduate qualifications.

## Mode of attendance

20.Mode of attendance distinguishes students studying full-time or part-time:
I. Full-time students are those normally required to attend an Institution for periods amounting to at least 24 weeks within the year of study, on thick or thin sandwich courses, and those on a study-related year out of their institution. During that time students are normally expected to undertake periods of study, tuition or work experience which amount to an average of at least 21 hours per week.
II. Part-time students are those recorded as studying part-time, or studying fulltime on courses lasting less than 24 weeks, on block release, or studying during the evenings only.

## Age

21.Age is as at $31^{\text {st }}$ August within the relevant academic year.

## Gender

22.From 2007/08, the field 'gender' changed to be consistent with the Aligned Data Definitions adopted by the Information Standards Board for education, skills, and children's services. Students of 'indeterminate gender' are included in total figures but not in separate breakdowns.

## STEM - Science, Technology, Engineering and Maths Enrolments

23. Broad STEM includes the following subject areas: Medicine and Dentistry; Subjects allied to Medicine; Biological Sciences; Veterinary Sciences; Agriculture and related subjects; Physical Sciences; Mathematical Sciences; Computer Science; Engineering and Technology; and Architecture, Building and Planning.

Narrow STEM is a subset of Broad STEM and includes the following subject areas: Biological Sciences; Physical Sciences; Mathematical Sciences; Computer Science; and Engineering and Technology.

## The Open University (OU)

24.The Open University was previously defined as an English Institution (where it has its administrative centre). However, from the 2014/15 bulletin forward, where enrolments are broken down by country of institution, OU enrolments will be split between Northern Ireland, England, Scotland and Wales, depending on the location of the national centre.

## Multiple Deprivation Measure (MDM)

25.The analysis presented in section 1.4 utilises five groups (quintiles) of Super Output Areas (SOAs) across Northern Ireland. These five groups are determined based on level of deprivation using the Northern Ireland Multiple Deprivation Measure (NIMDM).

SOAs ranked 1 to 178 are the most deprived quintile relative to all other SOAs. Those ranked 713 to 890 are the most affluent relative to all other SOAs. SOA is determined using the postcode provided on the enrolment record.

The NIMDM (2010) is a weighted combination of the seven domains of deprivation. The Income and Employment Deprivation domains account for nearly 50\% of the multiple deprivation measure. The Health Deprivation and Disability Domain, and Education, Skills and Training Deprivation Domain account for a further 30\%, and the remainder is made up of the Proximity to Services, Living Environment and Crime and Disorder Domains.

For further details on deprivation measurement in Northern Ireland, please follow this link: http://www.nisra.gov.uk/deprivation/nimdm 2010.htm

In 2016, there was a consultation proposing changes to the methodology of MDM measurement. Once the findings of this are analysed, a new version, MDM2017, may be introduced for use in NI.
Media enquiries should be made to the Department's Press Office in Netherleigh, Massey Avenue, Belfast, BT4 2JP, Tel: (028) 9052 9604, Email: pressoffice@economyni.gov.uk

## ANNEX A: TABLES

Table 1: Northern Ireland domiciled students enrolled at UK HEls by level of study, mode of study and location of institution - 2006/07 to 2015/16

## Notes

${ }^{(1)}$ Open University. May include a few NI students who are registered with the OU in GB rather than NI .
To prevent the identification of individuals, figures in the attached table are rounded to the nearest 5 , with $0,1,2$ rounded to 0 . Due to rounding, the sum of numbers in each row or column may not match the total shown.

Table 1a: Northern Ireland domiciled students enrolled at UK HEls by mode of study and location of institution - 2006/07 to 2015/16 (with \%)
