Somerset, Devon, Cornwall and the Isles of Scilly Area Review

Data Annex

August 2017

Introduction	3
Public domain data used to inform review	4

Introduction

This annex illustrates the data which was used to inform the Somerset, Devon, Cornwall and the Isles of Scilly area review steering group. Where those data are in the public domain, links are provided to the websites on which the data are stored. Areas for reviews do not necessarily fit with the geography of data provided via the links, which can vary. Users are guided to extract 'best-fit' LA-based and LEP-based data to match with review areas.

Where data that was presented to the steering group is not in the public domain, it cannot be published in this annex. The reasons for this include: commercial sensitivity; the risk that publication would allow individuals to be identified and that the release of data would breach the code of practice for the publication of National Statistics. For non-published data, users are provided with a blank version of the data packs provided to steering groups under data sharing protocols, to provide them with an understanding of the nature of the data considered by each steering group.

Please note that for all published sources, the data included relates to the point at which the report was written, irrespective of any subsequent updates.
