

Higher Education 2018

The UK higher education sector is a global success story. The international diversity we see in our institutions and our academic community, and the experiences, teaching and research they offer, are renowned the world over. The quality and reputation of our sector is, in no small part, down to the scale, scope and quality of our universities' global engagement. We are truly an international sector with global reach and influence.

International Facts and Figures 2018 presents a snapshot of the international dimensions of UK higher education. It provides an overview of:

- The international students choosing the UK, where these students come from, what level they study at and which subjects;
- The international students who study for UK degree programmes

outside the UK through transnational education;

- The UK sector's provision for students who want to study outside the UK on outward student mobility schemes;
- The international staff choosing to live and work in the UK: where our staff, both academic and non-academic come from and what they do;
- The collaborations, funding and partnerships from across the world that benefit our research.

The final section of International Facts and Figures 2018 includes a new regional breakdown of UK higher education engagement across the world.

As the analysis in this booklet shows, the UK's universities continue to become more international, year on year. International campuses, staff and research collaboration continue to bring great benefits to the UK sector. While leaving the European Union will have an impact on the UK higher education sector, the extent of this remains to be seen – and the extensive, invaluable international networks of our universities will be fundamental to ensuring the UK remains open to the world.

# 

The UK remains an extremely popular destination for international students, attracting more students from abroad than any other country except the much larger USA.

The range of countries from which international students in the UK come from continues to grow – and is changing rapidly.

However, the UK's closest competitors – such as USA, Australia, France and Germany – all continue to grow at a faster rate than the UK with growth rates of 9.4%, 10.7%, 1.8% and 8.7%. Over the same period, the UK's international enrolments grew by just 0.5%.

International students don't just study for UK degrees in the UK. Over 700,000 students now study for UK higher education qualifications outside of the UK. Transnational Education (TNE) is an increasingly significant and successful characteristic of UK universities' international activity and this trend looks set to continue.

### WHERE DO INTERNATIONAL STUDENTS STUDY AROUND THE WORLD?

# **2**<sup>nd</sup>

The UK is the second most popular destination in the world for international students.

Figure 1: Share of international student enrolments (OECD countries only), 2015

Figure 2: Number of international student enrolments, 2015 (2014)

# THE ECONOMIC IMPACT OF INTERNATIONAL STUDENTS

# £25.8bn

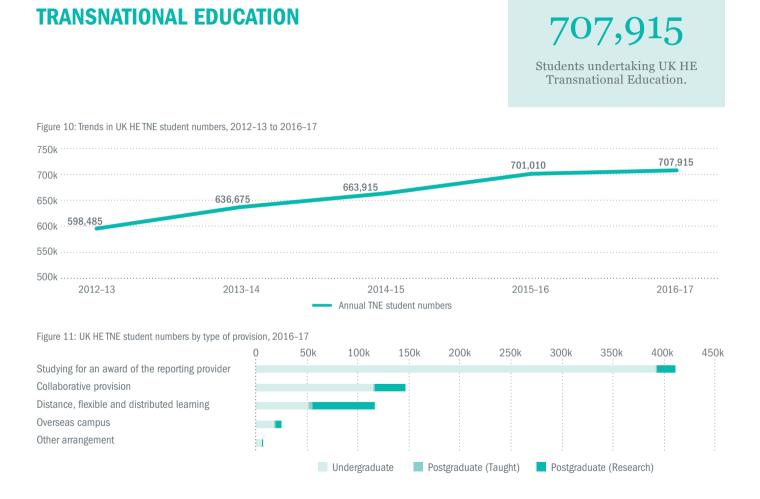

Economic output generated for the UK economy through on and offcampus spending by international students and their visitors.

Sources: Universities UK (2017) The Economic Impact of International students; Universities Scotland (2013) Grow, Export, attract support; Universities Wales (2015) The Economic Impact of higher education in Wales; Universities UK (2017) The Economic Impact of Queen's University Belfast and Ulster University on the Northern Ireland Economy; Department for Education (2018), UK revenue from education related exports and transnational education activity in 2015.

Note: The figures for Scotland, Wales and Northern Ireland represent total export earnings and therefore include international income earned by HEIs from overseas businesses, charities, governments.

Figure 9: Export earnings generated by international students by UK region, 2014-15

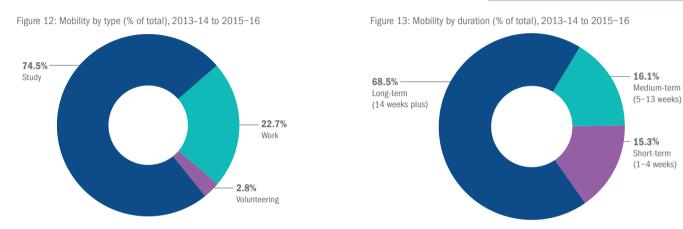

Internationalisation is not just about students coming to the UK. The UK higher education sector encourages students to study, work and volunteer abroad as part of their degree. UUKi research has found a correlation between outward mobility and improved academic and employment outcomes.

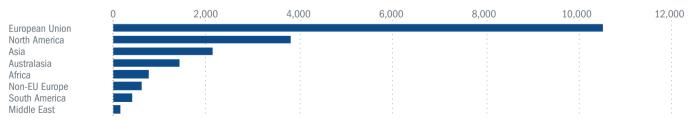

In recognition of the demand for global graduates and the growing skills deficit, UUKi launched a campaign to support delivery of the national 2020 target for mobility. The Go International: Stand Out campaign aims to double the percentage of students who study, work or volunteer abroad to 13% by 2020. So far, over 80 partner institutions<sup>\*</sup> and organisations across the sector have pledged to take action towards delivering on this target – and this number keeps rising. Any institution or organisation that would like to play a part in delivering this ambitious target can sign the campaign charter and submit a pledge to help boost and broaden outward student mobility.\*\*

### WHAT KIND OF INTERNATIONAL EXPERIENCES DO UK STUDENTS HAVE AND WHERE DO THEY GO?

**7.2%** The percentage of the 2015–16 graduating cohort who undertook a period of mobility between 2013–14 and 2015–16.

### Figure 14: Mobility by region of destination (mobility instances), 2013–14 to 2015–16

# HOW DO UK STUDENTS USE THE ERASMUS+ PROGRAMME?

Figure 16: Mobility by type (% of total), for the 2015–16 graduating cohort for a period abroad undertaken, 2014–15

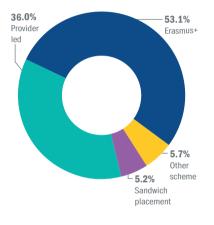

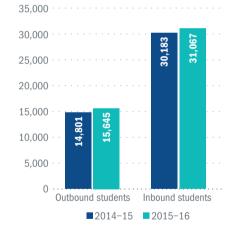

Figure 17: The number of inbound and outbound students at UK universities undertaking mobility on the Erasmus+ programme, 2014–15 and 2015–16\*

# 53.1%

The percentage of students undertaking a period abroad through Erasmus+.

Figure 18: The UK's top sending and receiving countries for the Erasmus+ programme, 2015–16

Biggest to UK	senders	Biggest from UK	receivers
1	France <b>7,697</b>	1	France <b>4,195</b>
2	Germany <b>5,145</b>	2	Spain <b>3,524</b>
3	Spain <b>4,794</b>	3	Germany <b>2,251</b>
4	Italy <b>3,114</b>	4	Italy 1,045
5	Netherlands 2,154	5	Netherlands 986

Source: UUKi (2018) Gone International: Expanding Opportunities; European Commission Erasmus+ Annual Report 2016, Statistical Annex http://ec.europa.eu/programmes/erasmus-plus/ sites/erasmusplus2/files/annual-report-2016-annex\_en.pdf; National Agency for Erasmus+ in the UK www.erasmusplus.org.uk/statistics

Notes: At time of printing... The UK will be part of Erasmus+ until the programme ends in 2020. Students in the UK will be able to study/work/volunteer abroad through Erasmus+ until the end of the programme. UUK is asking for access to the Erasmus+ successor programme and further support from the UK government for global student mobility.

\*The two full academic years the Erasmus+ programme has been in operation. European students are more likely to come to the UK on shorter Erasmus placements while UK Erasmus students are more likely to stay for a year. Because of this there are much higher numbers of inbound students to the UK than outbound. However, if mobility periods rather than numbers of visits are compared, this imbalance is far smaller.

# ONA **K**NA

The international make-up of our academic faculty is an integral part of the success of teaching and research in the UK. Staff from the EU make up over 15,000 of academic faculty on teaching and research contracts, with an additional 11,000 being from outside the EU. For research-only contracts, nearly half of all staff are from outside of the UK. The top three countries of nationality for academic, non-academic and total international staff in the UK are all EU countries.

# WHAT DO INTERNATIONAL STAFF IN THE UK DO?

# 30%

The percentage of international academic staff working in UK universities.

Figure 19: Staff by nationality and employment function, 2011–12 and 2016–17

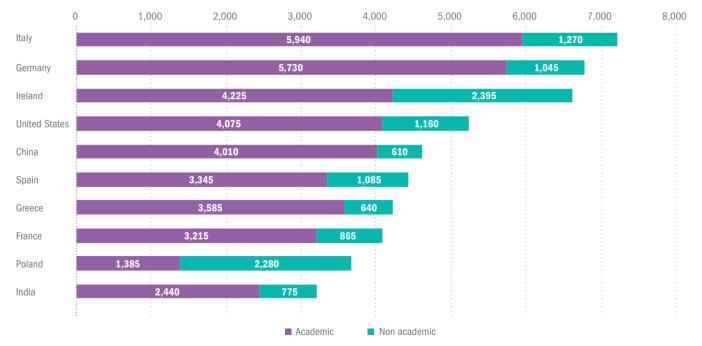

Figure 20: Academic staff by nationality and employment function, 2016-17

Figure 21: Top 10 staff nationalities by employment function, 2016–17

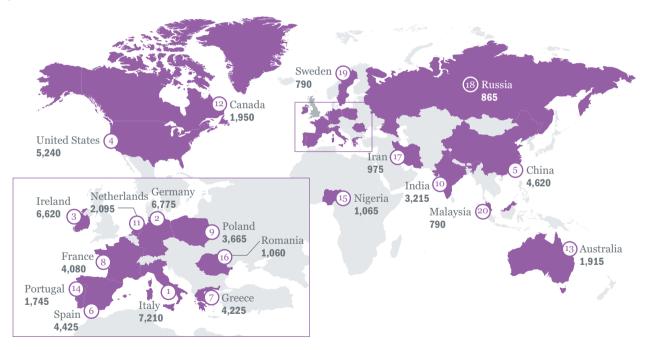

### WHERE DO INTERNATIONAL STAFF IN THE UK COME FROM?

## **2**X

The number of EU academics in the UK has more than doubled in the last decade.

Figure 22: Nationalities of international staff in UK, 2016–17, top 20

International collaboration in research is synonymous with excellence and impact. Worldclass research produced by UK universities benefits from global partnerships and collaboration. The ability of UK universities to attract world-leading researchers and investment from around the world makes a vital contribution to the excellence of our research base.

Despite representing a small global share of research investment and only 4.1% of researchers, UK research accounted for 9.9% of global downloads, 10.7% of global citations and 15.2% of the world's most highly cited articles.\*

The UK is the third largest producer of internationally co-authored papers in the world, behind only the much larger USA and China, and almost 20% of our research funding comes from international and EU sources. Taken as a whole, EU member states are by far the largest source of academic collaboration for UK researchers.

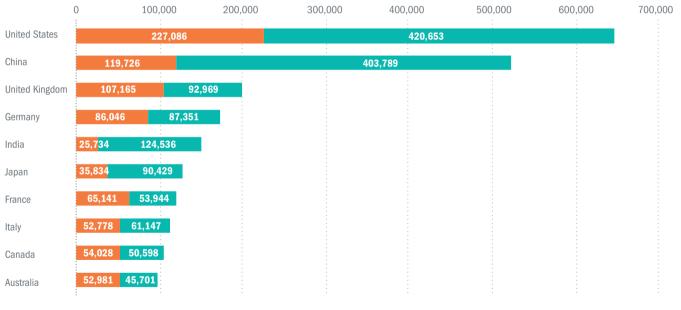

While the future of the UK's participation in the successor programme to Horizon 2020 remains uncertain, it is clear that our world-class research base has benefited greatly from – and adds huge value to – Horizon 2020. UUKi is committed to demonstrating the added value of remaining a key partner in the EU research programmes.

### HOW DOES THE PUBLICATION RATE OF THE UK COMPARE INTERNATIONALLY?

54%

The percentage of UK research publications with an international co-author.

Figure 23: Top ten countries by number of research publications, broken down by international and domestic co-authorship, 2017

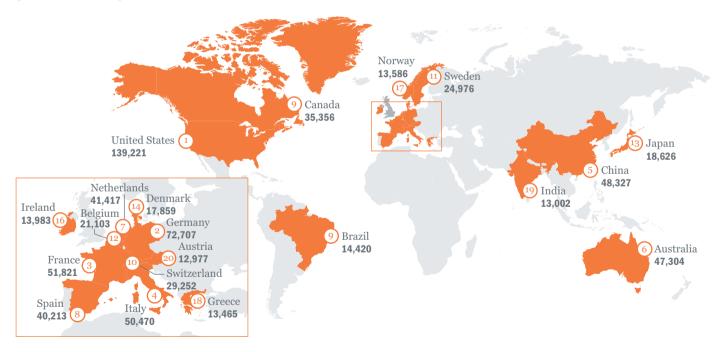

Internationally co-authored publications

# WHICH COUNTRIES ARE THE UK'S TOP COLLABORATIVE PARTNERS?

# 13

of the top twenty countries the UK collaborates with on co-authored publications are in Europe.

Figure 24: Countries with highest numbers of co-authored publications with the UK between 2013 and 2017, top 20

### HOW DOES THE UK COLLABORATE THROUGH EU PROGRAMMES?

# 2nd

The UK has the second highest share of total funding and participations in Horizon 2020.

Figure 25: The proportion of funding the UK receives from each pillar of Horizon 2020 programme

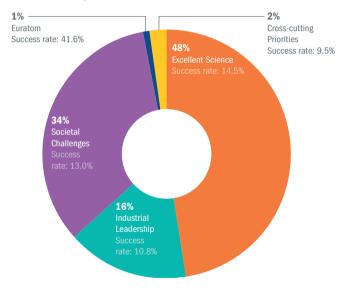

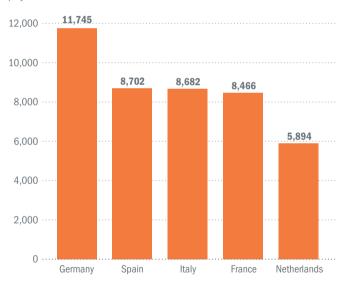

Figure 26: UK's most frequent collaborative partners in Horizon 2020 projects since 2014

Source: % proportion UK receives – Vinnova, accessed 15 May 2018. http://h2020viz.vinnova.se/#/country?countryNames=%5B%22United%20Kingdom%22%5D. % success rate of eligible proposals – European Commission Horizon 2020 proposal dashboard, accessed 18 June 2018. http://ec.europa.eu/research/index.cfm?pg=newsalert&year=2017&na=na-101117 European Commission, Horizon 2020 Country Profiles, updated 8 February 2018. http://ec.europa.eu/research/horizon2020/pdf/country-profiles/uk\_country\_profile\_and\_featured\_projects. pdf#zoom=125&pagemode=none

Note: At time of printing, researchers in the UK and across the EU should now be reassured of the UK's continued participation on Horizon 2020 until its end date. One caveat applies to the issues agreed to in the joint report, which is that "nothing is agreed until everything is agreed", referring to the fact that the second phase of exit negotiations – on the transition period and the future UK-EU relationship – has the potential to influence the UK's withdrawal agreement.

### HOW MUCH RESEARCH FUNDING COMES FROM OVERSEAS SOURCES?

# 17%

The percentage of overall UK research funding that comes from international sources.

Figure 27: Total research funding by source, 2016-17

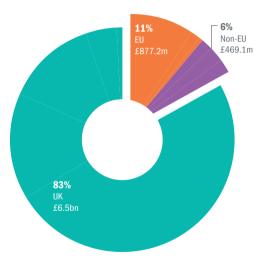

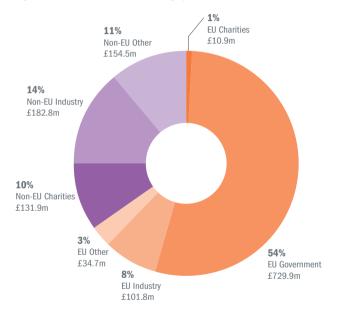

Figure 28: International research funding by source (EU and non-EU), 2016–17

The work of UUKi spans the entire globe. The following section presents a regional breakdown that helps provide a snapshot of priorities and impact within each region. The breakdown includes the numbers of international students studying for full degrees in the UK by domicile; the numbers of international staff working in the UK by nationality; the number of UK publications with an international co-author from the region; outward student mobility; and TNE.\* Whilst some regions of the world have more historic and established relationships with the UK, it is interesting to see some of the different partnerships with certain regions. For example, UK higher education TNE was delivered in 55 African countries and the number of internationally co-authored publications between the UK and Brazil has grown by over 68% since 2013.

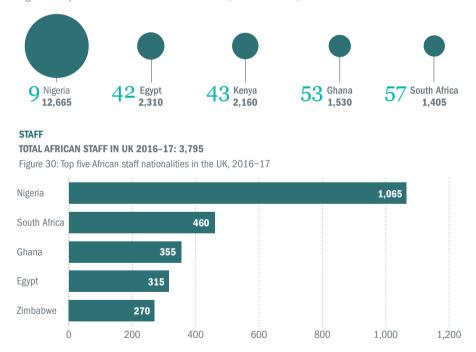

\*Together, students from Oxford Brookes University BSC in Applied Accounting, Open University and University of London International programmes make up more than half of all UK HE TNE students. Students from these universities have been excluded from the TNE data. Note: North America region includes Central America and the Caribbean.
