

State of the Nation 2018

Progress towards the Gatsby Benchmarks
broken down to LEP level

The Careers & Enterprise Company

Introduction

The State of the Nation 2018 report describes career provision in England's schools and colleges at the end of the academic year 2017/18.

The report draws on data collected through the Compass self-assessment tool from over 3,000 schools and colleges which represents over two-thirds of all eligible institutions across England. This provides us with the most robust description of careers work in England's schools and colleges ever assembled, covering both those within and outside the Enterprise Adviser Network.

We are publishing the Compass results aggregated to LEP areas to provide the data needed to support schools and colleges at a local level through the Enterprise Adviser Network. This adds detail to the overarching scores reported in State of the Nation 2018 to help LEPs understand where the variation lies. In future years, the detailed LEP results will be published alongside the annual State of the Nation report.

The tables show the average number of Gatsby benchmarks achieved and the progress towards achieving the benchmarks in each LEP area.

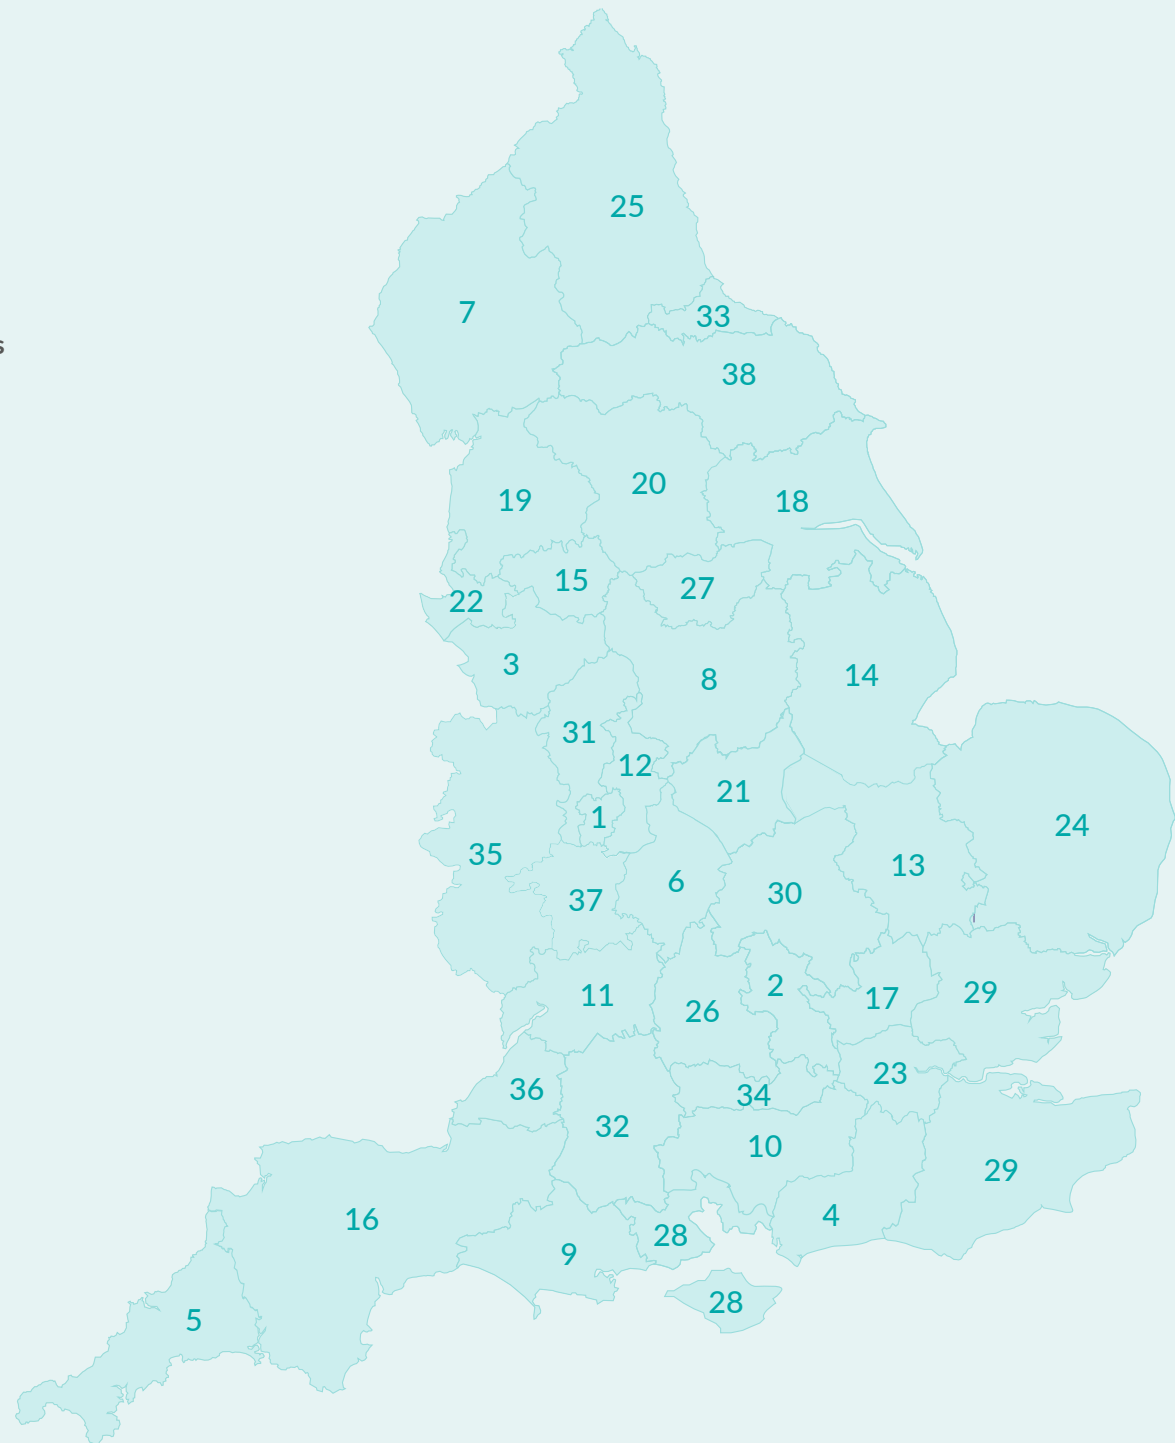

The results at LEP level are shaped by many factors including:

- The length of time schools and colleges have used Compass. Completing Compass more than once is associated with progress so areas with a higher proportion of schools and colleges new to Compass are likely to have lower results.
- The proportion of schools that have a sixth form. The State of the Nation 2018 found that schools with a sixth form were less likely to focus on exposing students to the full range of post-16 pathways.
- Local rates of unemployment. We found that schools and colleges in areas with higher rates of unemployment and lower skilled jobs performed better on Compass, suggesting that they understood the imperatives of good careers provision in the context of local challenges.
- Track record of careers provision and long-standing partnerships to support performance on the Gatsby Benchmarks.
