## Key Points

- 162,600 school meals ${ }^{1}$, both free and paid, were taken by pupils on school meals census day ${ }^{2}$, which equates to a school meals uptake level of $52.3 \%$ by pupils present for lunch ${ }^{3}$ on the day.
- The school meals uptake level for $2020 / 21$ is 7.2 percentage points lower than the previous year.
- 97,631 pupils in grant-aided schools are entitled to free school meals; this represents $28.4 \%$ of pupils, which is the same as the previous year.
- The uptake level for free school meals by entitled pupils is $74.9 \%$; this is 5.6 percentage points lower than the previous year.

## Introduction

The purpose of this statistical bulletin is to provide results of the latest annual data collection relating to the uptake of school meals in Northern Ireland schools, commonly known as the school meals census.

Data collected through the school meals census are used by policy teams within the Department of Education and by other users across the education service, most notably by the Education Authority. The data are also used to inform a number of Assembly questions. The Department is responsible for formulating and developing policy and the associated financial arrangements in relation to school meals.

The information was collected with a reference point of 6 November 2020 and relates to all grant-aided schools in Northern Ireland. The school meals census had originally been scheduled for 9 October 2020. However, due to circumstances relating to the COVID-19 crisis, free school meal entitlement numbers recorded by schools in October were significantly lower than expected. The Education Authority and the Department agreed there would be an extension to the closing date for free school meal entitlement applications to be counted on the main school census until the 6 November. As a result the reference date for the school meals uptake census was also moved to 6 November so that free school meal uptake and entitlement data would be better aligned.

The COVID-19 crisis has had an impact on the uptake of school meals, both paid and free in 2020/21. Further detail on the impact can be found in the Notes to readers (paragraphs 21-26).

## 1. Uptake of school meals (free and paid)

- 162,600 school meals ${ }^{4}$, both free and paid, were taken by pupils on school meals census day ${ }^{5}$. Pupils not taking a school meal are making alternative arrangements for lunch, which can include bringing their own food into school, or having lunch at home. Almost $48 \%$ of meals fall into this category (Tables 1 and 2). This is more than 7 percentage points higher than the previous year and is most likely a direct result of the COVID-19 crisis in that many pupils are not able to access, or are choosing not to access, the school meals service.
- The school meals uptake level by pupils present for lunch ${ }^{6}$ on census day is $52.3 \%$. The 2020/21 school meals uptake level is 7.2 percentage points lower than the previous year (Table 3). The proportion of pupils paying for a school meal fell almost 6 percentage points (from 34.8\% in 2019/20 to 29\% in 2020/21), while the proportion of pupils having a free school meal fell by 1.3 percentage points (from $24.6 \%$ in 2019/20 to 23.3\% in 2020/21). During the COVID-19 crisis some schools may have been unable to provide a full school meals service which has led to an increase in the proportion of pupils making other arrangements for lunch. Also any pupils who were engaging in distance learning from home as a result of COVID-19 would be counted as making alternative arrangements for lunch, unless they were in receipt of a free food parcel.
- There is variation in the level of uptake across school types with nursery schools having the highest uptake at $91.0 \%$. This is followed by special schools with $66.0 \%$ and secondary schools with $57.2 \%$. Grammar schools and primary/preparatory schools have lower levels of uptake with $50.8 \%$ and $49.5 \%$ respectively (Table 3).

[^1]Figure 1: Uptake of school meals (free and paid), by school type: 2017/18-2020/21

${ }^{1}$ Nursery only includes pupils in nursery schools
${ }^{2}$ Primary includes pupils in reception and nursery classes
${ }^{3}$ In 2020/21 the school meal numbers include food provision to pupils who were unable to attend school due to COVID-19 but who were engaging in distance learning. The uptake figure is based on the number of pupils present for lunch on census day, including pupils who were engaging in distance learning.
${ }^{4}$ Data taken from Table 3

Pupils from the least affluent schools (as measured by free school meal entitlement (FSME) were more likely to take a school meal, rather than make other lunch arrangements. For both primary and post-primary schools the uptake of school meals was lowest in schools where 10\% or less of the pupils enrolled were entitled to free school meals (FSME). Uptake increased as the level of free school meal entitlement increased. For example, $64.3 \%$ of pupils in primary schools with $40 \%$ or more FSME pupils took a school meal compared to $39.9 \%$ in primary schools with $10 \%$ or less FSME pupils.

Figure 2: Uptake of school meals in primary schools, according to relative FSME 2020/21

${ }^{1}$ Includes preparatory departments, pupils in reception and nursery classes of primary schools. Excludes schools where no meal service is available.
${ }^{2}$ Data taken from Table 5
Figure 3: Uptake of school meals in post-primary schools, according to relative FSME 2020/21

[^2]- Across all school types, including special schools, 97,631 pupils were entitled to free school meals ${ }^{7}$, which is an increase of 945 pupils on the previous year (Table 6). The overall percentage of children entitled to free school meals has remained the same as last year at $28.4 \%$.
- There are slight decreases in the proportion of pupils that are free school meal entitled in non-grammar (37.1\% compared to $37.8 \%$ ) and special schools ( $50.9 \%$ compared to $51.7 \%$ ) compared to last year. On the other hand, there are slight increases in the proportion of pupils that are free school meal entitled in nursery schools (35.4\% compared to $34.0 \%$ ) and primary and preparatory departments ( $28.5 \%$ compared to $28.3 \%$ ) compared to last year. Grammar schools remained constant at 13.7\%.
- Due to circumstances relating to the COVID-19 crisis, free school meal entitlement numbers recorded by schools in October were significantly lower than expected. The Education Authority and the Department agreed there would be an extension to the closing date for free school meal applications to be counted on the census until the 6 November. This extension to the closing date has resulted in free school meal entitlement figures now presenting at expected levels.

[^3]Figure 4: Percentage of pupils entitled to free school meals, by schooltype: 2017/18-2020/21

${ }^{1}$ Nursery only includes pupils in nursery schools
${ }^{2}$ Primary includes pupils in reception and nursery classes
${ }^{3}$ Data taken from Table 7

## 3. Uptake of free school meals

- There were 72,343 free school meals ${ }^{8}$ taken by pupils across all school types, this is a decrease of 4,867 on the previous year (Table 9). This represents $44.5 \%$ of all meals provided by schools, which is 3.2 percentage points higher than the previous year.
- When considering the number of free school meals provided as a proportion of the number of pupils with actual entitlement to free school meals ${ }^{9}$, uptake of free school meals was $74.9 \%$ (Table 9). In this regards, the 2020/21 free school meals uptake level is 5.6 percentage points lower than the previous year. While there is likely a direct impact of the COVID-19 crisis, resulting in fewer pupils wanting to take a free school meal, there is also potentially an impact caused by the arrangements agreed for the retrospective recording of free school meal entitlement numbers (see paragraphs 2126 of Notes to readers).
- There is variation in the level of uptake of free school meals by those entitled across school types. The chart below shows that uptake is highest in nursery schools (82.5\%). This is followed by primary and preparatory departments and special schools, with $77.1 \%$ and $74.7 \%$ uptake respectively. Uptake in non-grammar schools is $72.2 \%$ and is lowest in grammar schools with $70.3 \%$ (Table 9).

[^4]Figure 5: Uptake of free schoolmeals, by schooltype 2020/21

## Notes to readers

## Official Statistics

1. This is an Official Statistics publication. Official statistics are produced to high professional standards set out in the Code of Practice for Statistics. They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.
2. For general enquiries about the Code of Practice for Statistics, contact the National Statistics Public Enquiry Service on
Tel: 08456013034
Minicom: 01633812399
E-mail: info@ons.gov.uk
Fax: 01633652747
Letters: Customer Contact Centre, Office for National Statistics, Room D265, Government Buildings, Cardiff Road, Newport, South Wales, NP10 8XG
3. You can also find Official Statistics on the Internet: ONS website (opens in new window; http://www.ons.gov.uk)

## School meal provision

4. The Education Authority is responsible for the day to day operation of the school meals service in all grant-aided schools, with the exception of voluntary grammar schools and grant-maintained integrated schools, where the responsibility lies with the Trustees/Boards of Governors.
5. The service is provided in line with the Approved Arrangements forthe Provision of Milk, Meals and Related Facilities made under Articles 58 and 59 of the Education and Libraries (NI) Order 1986 drawn up by the Department of Education (DE), which will be referred to as 'the Arrangements' in the remainder of this document.
(DE website (opens in new window; https://www.education-ni.gov.uk/articles/school milk-and-meals-background))
6. Two main types of school meal service exist:

- A traditional meal comprising a main course and dessert; and
- A cash cafeteria service, where items are priced separately.

## Free school meal provision

7. With regard to free school meal provision the following terms are used:

- Eligibility: When a pupil within a family meets one of the criteria contained in paragraph 6 of the Arrangements for the provision of milk, meals and related facilities.
- Entitlement: When an application for free school meals is made on behalf of a pupil and the application is successful.
- Uptake: When a pupil who is entitled to free school meals makes use of the free school meal provision by taking a free school meal.

8. Certain categories of pupils are entitled to free school meals. Details of the qualifying criteria are contained in paragraph 6 of the Arrangements. The Education Authority is responsible for administering the award of free school meals. Entitlement to free school meals is widely used as an indicator of deprivation.
9. An additional eligibility criterion was added to the Arrangements with effect from 27 September 2017 to reflect the roll-out of Universal Credit as part of Welfare Reform.

## School Meals Census

10.The main statistics in this statistical bulletin have been derived from the annual school meals data collection, commonly known as the school meals census. The data collection for the 2020/21 school meals census was undertaken by the Department, with data collected directly from each grant-aided school. Prior to 2012/13 the former ELBs were responsible for the collection of data in relation to schools in the controlled and maintained sectors and provided a collated return for their area to the Department.
11.The 2020/21 school meals census figures in this statistical bulletin are based on information as at 6 November 202010. This data collection was originally scheduled for 9 October 2020 but the reference date was subsequently changed to align with a later cut-off date forfree school meals entitlement in the main school census (see paragraph 23 for further information). Some tables in this statistical bulletin include data on school enrolments and the number of pupils entitled to free school meals. Data on school enrolments and free school meal entitlement (FSME) were collected as part of the annual school enrolments data collection exercise. Enrolments data is based on a reference date of 9 October 2020 while the cut-off date for numbers entitled to free school meals was 6 November 2020.
12.In nursery and primary schools, new pupils often have a phased introduction to school with some pupils not starting school until late October. Also new pupils may have a shorter day initially, without a lunch break. The school meals census date is usually the Friday of the first full week in October. This means that not all pupils will have started school, or be staying for lunch break. While pupils due to start later in the month will be counted in school enrolment, and free school meal entitlement figures, they will not be present to takea meal and will not therefore be counted in the school meals census figures, resulting in an artificially low uptake rate. Due to the later reference date for the school meals census in 2020/21 the impact of a phased introduction to school should be less, if occurring at all.
13.In schools with a cash cafeteria system, school meal numbers are calculated from lunchtime income. Schools also include income from sales at morning break but income from breakfast clubs is not included (from the 2012/13 data collection onwards) ${ }^{11}$. The cost of a fixed price meal is used to convert income from lunch and break-time sales to equated meal numbers. Equated meal numbers will not exactly match pupils present for meals.
14.There were 6,625 pupils who were recorded as being present on school meals census day (6 November 2020) but schools indicated they were not availing of a school lunch break. These pupils were mainly in nursery and primary schools. This will include parttime nursery pupils and primary pupils whose school day, by census date, did not yet include a lunch break. From the 2012/13 school meals census data onwards these pupils have been excluded from the count of pupils present for meals for the purposes of calculating uptake of school meals.
15.From 2016/17 onwards the figures presented for uptake of free school meals by pupils entitled in nursery schools and primary schools with nursery units has changed. The

[^5]denominator used in the calculation of the percentages is now based on full-time pupils only and excludes pupils counted under the proxy measure of free school meal entitlement (receipt of Income Support or Income Based Job Seeker's Allowance). Data was not available to enable the revision of figures for previous years. For this reason caution should be used in drawing any comparison between data from 2016/17 onwards and data from previous years. This change affects Table 8 and Table 9.
16. There were 12 schools indicating that they do not provide a school meals service. Nine are nursery schools where none of the pupils have a lunch break included as part of their hours of attendance. A total of 26 pupils at the remaining 3 schools do receive a lunch break. These 26 pupils are recorded as 'making other lunch arrangements' and are included in the count of pupils present for lunch when calculating percentage uptake of school meals (Tables 3 and 8).
17.Some figures have been estimated for a school that did not make a return for the 2020/21 school meals census.
18.From the 2013/14 data collection onwards the previous categories of 'other lunch arrangements' and 'taking own food' have been merged together to create a 'pupils making other lunch arrangements' category, which includes pupils taking their own food. This was due to difficulties, expressed by some schools, in capturing accurate data for the categories previously used.
19.Free school meal entitlement (FSME) data for special schools was not validated prior to 2014/15.
20.Figures for primary schools may include nursery and/or reception pupils attending primary schools and preparatory departments.

## Impact of the COVID-19 crisis on data for uptake of school meals

21. As a result of the COVID-19 crisis, on the date for the school meals census (6 November 2020) many schools were not experiencing typical numbers of pupils present on site in school or accessing the school meals service. Using data collected by DE on school attendance during the COVID-19 outbreak it is estimated that around 9000 pupils (excluding Nursery schools) may have been present but engaged in distance learning on the reference date. The instructions for the school meals data collection informed schools that they should include in their count of pupils present those pupils who are not in school but who are engaged in distance learning. As these pupils could not access the school meals service they were to be recorded as making other lunch arrangements, unless they were in receipt of a free food parcel (see paragraph 22 below). This will have contributed to a reduced uptake figure for school meals and free school meals.
22. The Department's Food in Schools Team wrote to School Principals on 2 November 2020 regarding making food provision (food parcels) to pupils entitled to free school meals who are unable to attend school due to COVID-19 and who wish such provision (Notice 15). In order to capture this provision schools were asked to include it in their free school meals uptake figures where a pupil was not present in school but engaged in distance learning and in receipt of the provision on the reference date. Schools reported that 231 pupils engaged in distance learning were in receipt of food parcels on the reference date.
23. The school meals census had originally been scheduled for 9 October 2020. However, due to circumstances relating to the COVID-19 crisis, free school meal entitlement numbers recorded by schools in October were significantly lower than expected. The Education Authority and the Department agreed there would be an extension to the closing date for free school meal entitlement applications to be counted on the main
school census until the 6th November. As a result the reference date for the school meals uptake census was also moved to 6th November so that free school meal uptake and entitlement data would be better aligned.
24. On 6 November it was possible for an application to have already been made for free school meal entitlement for a pupil but the application had not yet been processed due to COVID-related issues. The pupil therefore did not have entitlement to a free school meal on that date. While arrangements were in place that would result in that pupil being retrospectively counted in the free school meal entitlement count once the application had been processed and was successful, on 6 November when the uptake of meals was counted the pupil would not have had entitlement to a free school meal and may not have been able to receive a free meal. This would translate as a reduced uptake level of free school meals. Information provided by the Education Authority suggests that 1610 pupils had applications for FSM submitted on their behalf by the cut-off date of 6 November which were processed later and included in the count at 6 November. However, information gained through validation checkssuggests that some schools may have provided a free meal to pupils in need, without established entitlement at that point. It is not possible to quantify the exact impact on the free school meal uptake rate.
25. Some schools commented as part of their return that they were only providing a meals service to pupils entitled to free school meals. It was also reported by some that they were not yet providing a hot meals service and there was some reported anecdotal evidence that pupils entitled to free schools meals were declining the meal on offer in favour of bringing their own lunch. These factors are also likely to have impacted on the uptake rate of school meals, both paid and free.
26. A small number of schools did not respond to follow up data validation checks despite multiple contacts. The risk of the data for these schools being incorrect is thought to be low.

## Other useful information

27.Information presenting uptake of school meals in Northern Ireland, England and Scotland was discontinued as policy differences between the regions and availability of up-to-date information for other regions make comparisons difficult.
28. The figures in this statistical bulletin may be subject to minor revision and these will be notified in accordance with our revisions policy. This can be accessed at DE website (opens in a new window; https://www.education-ni.gov.uk/publications/statistical-policies)
29. More detail about the collection of data on school meals can be found on the DE website. This can be accessed at DE website (opens in a new window; https://www.education-ni.gov.uk/publications/school-meals-data-collection-andvalidation)
30.The Statistics and Research section of the DE website (DE website (opens in a new window; https://www.education-ni.gov.uk/topics/statistics-and-research-1)) also presents data from the school meals census. Statistics on school enrolments, school performance, pupil attendance, teacher numbers, pupil:teacher ratios, school leaver destinations and qualifications may also be accessed via the website.

## General

31.The following symbols may be used in the tables in this statistical bulletin: * $=$ Relates to fewer than 5 cases

```
# = Number (5 or more) suppressed to prevent disclosure of small numbers
elsewhere
- = Indicates no schools in this category
```

Source: NI school meals census 2020/21
${ }^{1}$ Includes food provision by the Education Authority (EA) and individual Voluntary Grammar and Grant-Maintained Integrated Schools for pupils entitled to free school meals (FSM) who were unable to attend school due to COVID-19 restrictions but who were engaging in distance learning (see background note 22).
${ }^{2}$ Excludes pupils present on school meals census day whose school day did not include a lunch break, including part-time nursery pupils and some P1 pupils (see background note 14). Includes pupils who were engaging in distance learning from home (see background note 21).
${ }^{3}$ Paid meal figures presented are equated meals: Where schools have a cash cafeteria system for lunch the meal numbers are calculated based on lunchtime income. Income from morning break provision is also included in the calculation of meal numbers (see background note 13).
${ }^{4}$ Only includes pupils at nursery schools.
${ }^{5}$ Includes pupils in reception and nursery classes of primary schools.

Source: NI school meals census 2020/21

Figures may not add due to rounding.
${ }^{1}$ Includes food provision by the Education Authority (EA) and individual Voluntary Grammar and Grant-Maintained Integrated Schools for pupils entitled to free school meals (FSM) who were unable to attend school due to COVID-19 restrictions but who were engaging in distance learning (see background note 22).
${ }^{2}$ Excludes pupils present on school meals census day whose school day did not include a lunch break, including part-time nursery pupils and some P1 pupils (see background note 14). Includes pupils who were engaging in distance learning from home (see background note 21).
${ }^{3}$ Paid meal figures presented are equated meals: Where schools have a cash cafeteria system for lunch the meal numbers are calculated based on lunchtime income. Income from morning break provision is also included in the calculation of meal numbers (see background note 13).
${ }^{4}$ Only includes pupils at nursery schools.
${ }^{5}$ Includes pupils in reception and nursery classes of primary schools.

${ }^{1}$ Cash cafeteria meal figures presented are equated meals: Where schools have a cash cafeteria system for lunch the meal numbers are calculated based on lunchtime income. Income from morning break provision is also included in the calculation of meal numbers (see background note 13).
${ }^{2}$ Only includes pupils at nursery schools.
${ }^{3}$ Includes pupils in reception and nursery classes of primary schools
${ }^{4}$ Due to COVID-19 schools may not have provided their usual type of meal but for the purposes of this Census they still recorded the meals as per their usual type of provision (Traditional or Cash cafeteria).

${ }^{1}$ Income Support, income-based Jobseeker's Allowance, Employment Support Allowance where an award of income-based job-seekers allowance has been converted and the amount of the award remains unchanged; and Universal Credit are some of the benefits which determine eligibility for free school meals. As school meals are not universally available to children in pre-school education, parental receipt of these benefits is a better indicator of social disadvantage for the pre-school sector.
${ }^{2}$ Percentages express the number of pupils entitled to free school meals in a particular category (e.g. those at primary school) as a proportion of the total pupil enrolment in the same category.
${ }^{3}$ Only includes pupils at nursery schools.
${ }^{4}$ Includes pupils in reception and nursery classes of primary schools.
${ }^{5}$ Does not include pupils attending EOTAS centres.

${ }^{1}$ Income Support, income-based Jobseeker's Allowance, Employment Support Allowance where an award of income-based job-seekers allowance has been converted and the amount of the award remains unchanged; and Universal Credit are some of the benefits which determine eligibility for free school meals. As school meals are not universally available to children in pre-school education, parental receipt of these benefits is a better indicator of social disadvantage for the pre-school sector.
${ }^{2}$ Percentages express the number of pupils entitled to free school meals in a particular category (e.g. those at primary school) as a proportion of the total pupil enrolment in the same category.
${ }^{3}$ Only includes pupils at nursery schools.
${ }^{4}$ Includes pupils in reception and nursery classes of primary schools.
${ }^{5}$ Does not include pupils attending EOTAS centres.

## Notes

## School Management Types

Controlled schools are owned and managed by the Education Authority through Boards of Governors. Primary and secondary school Boards of Governors consist of representatives of transferors (mainly the Protestant Churches) along with representatives of parents, teachers and the Education Authority. Controlled nursery, grammar and special school boards of governors consist only of representatives of the latter 3 categories. Within the controlled school sector there are a number of integrated schools and a small but growing number of Irish-medium schools.

Catholic maintained schools are voluntary schools owned by trustees (appointed by the Roman Catholic Church) and managed by CCMS through boards of governors. Board of Governors consist of members nominated by the trustees along with representatives of parents, teachers and the Education Authority. Within the Catholic maintained sector there are a small number of Irish-medium schools.

Other maintained schools are voluntary schools owned by trustees and managed by Boards of Governors which consist of members nominated by trustees along with representatives of parents, teachers and the Education Authority. This sector includes a number of Irish Medium schools.

Voluntary grammar schools are owned by trustees and managed by Boards of Governors which consist of members nominated by trustees along with representatives of parents, teachers, the Department and, in most cases, the Education Authority. (Voluntary grammar schools vary in the rates of capital grant to which they are entitled depending on the management structure they have adopted, with the vast majority entitled to capital grants of $100 \%$.)

Grant-maintained integrated schools are owned and managed by their Boards of Governors, which consist of foundation governors along with representatives of parents, teachers and the Department.

All of the above are types of grant-aided school. Independent Schools do not receive any funding from the Education Authority or the Department of Education.

Further background notes can be found within the School Meals Statistical Bulletin at:

Statistics and Research - School meals statistical bulletins (opens in a new window)

[^0]:    ${ }^{1}$ Includes food provision by the Education Authority (EA) and individual Voluntary Grammar and Grant-Maintained Integrated Schools for pupils entitled to free school meals (FSM) who were unable to attend school due to C OVID-19 restrictions but who were engaging in distance learning (see background note 22).
    ${ }^{2}$ In 2020/21 school meals census day was 6 November 2020.
    ${ }^{3}$ Includes pupils who were engaging in distance learning from home (see background note 21 ).

[^1]:    ${ }^{4}$ Includes food provision by the Education Authority (EA) and individual Voluntary Grammar and Grant -Maintained Integrated Schools for pupils entitled to free school meals (FSM) who were unable to attend school due to COVID-19 restrictions but who were engaging in distance learning (see background note 22).
    5 In 2020/21 school meals census day was 6 November 2020.
    ${ }^{6}$ Includes pupils who were engaging in distance learning from home (see background note 21 ).

[^2]:    ${ }^{1}$ Excludes schools where no meal service is available
    ${ }^{2}$ Data taken from Table 5

[^3]:    7 Parental receipt of certain social security benefits is used as a proxy for free school meal entitlement for pupils in nursery schools and nursery classes in primary schools. Does not include pupils in EOTAS centres.

[^4]:    8 Includes food provision by the Education Authority (EA) and individual Voluntary Grammar and Grant -Maintained Integrated Schools for pupils entitled to free school meals (FSM) who were unable to attend school due to COVID-19 restrictions but who were engaging in distance learning (see background note 22 ).
    ${ }^{9}$ For the purposes of calculating uptake the actual entitlement figure for nursery schools and primary schools with nursery pupils is based on full-time pupils only and excludes pupils counted under the proxy measure of free school meal entitlement (parental receipt of certain social security benefits). This change was introduced in 2016/17 so figures for previous years are not directly comparable. See background note 15.

[^5]:    10 If school meals were not being provided by the school on census day or are not typical of a normal day, the school could choose to conduct the census on the nearest day on which meals are provided. This may mean that dual registered pupils could be included in both their main and subsidiary schools' figures.
    ${ }^{11}$ During the 2016/17 data validation process it emerged that some schools may have erroneously included breakfast income in 2016/17 data returned to the Department. While some breakfast income may be have been included in the data it is not considered to have a big impact on the final estimates of school meal uptake.

[^6]:    ${ }^{1}$ Meal figures presented are equated meals: Where schools have a cash cafeteria system for lunch the meal numbers are calculated based on lunchtime income. Income from morning break provision is also included in the calculation of meal numbers (see background note 13).
    ${ }^{2}$ Uptake is expressed as the number of school meals provided (free and paid) as a percentage of the number of pupils present for lunch on census day. Pupils present for lunch excludes pupils present on school meals census day whose school day did not include a lunch break, including part-time nursery pupils and some P1 pupils (see background note 14).
    ${ }^{3}$ Only includes pupils at nursery schools.
    ${ }^{4}$ Includes pupils in reception and nursery classes of primary schools
    ${ }^{5}$ In 2020/21 the school meal numbers include food provision to pupils who were unable to attend school due to COVID-19 but who were engaging in distance learning. The uptake figure is based on the number of pupils present for lunch on census day, including pupils who were engaging in distance learning (see background notes 21-22).

[^7]:    ${ }^{1}$ Meal figures presented are equated meals: Where schools have a cash cafeteria system for lunch the meal numbers are calcula ted based on lunchtime income. Income from morning break provision is also included in the calculation of meal numbers (see background note 13).
    ${ }^{2}$ Uptake is expressed as the number of school meals provided (free and paid) as a percentage of the number of pupils present for lunch on census day. Pupils present for lunch excludes pupils present on school meals census day whose school day did not include a lunch break, including part-time nursery pupils and some P1 pupils (see background note 14) but includes pupils who were engaging in distance learning from home (see background note 21).
    ${ }^{3}$ Includes food provision by the Education Authority (EA) and individual Voluntary Grammar and Grant-Maintained Integrated Schools for pupils entitled to free school meals (FSM) who were unable to attend school due to COVID-19 restrictions but who were engaging in distance learning (see background note 22).
    ${ }^{4}$ Only includes pupils at nursery schools.
    ${ }^{5}$ Includes pupils in reception and nursery classes of primary schools
    ${ }^{6}$ Does not include pupils attending EOTAS centres.

[^8]:    ${ }^{1}$ Nursery only includes pupils in nursery schools

[^9]:    ${ }^{1}$ Excludes schools where no meal service is available
    ${ }^{2}$ Data taken from Table 5

[^10]:    ${ }^{1}$ Nursery only includes pupils in nursery schools
    ${ }^{2}$ Primary includes pupils in reception and nursery classes
    ${ }^{3}$ Data taken from Table 9
