Foreword

Welcome to the Area Profile for the district of Colchester. This is one of a series of fourteen Area Profiles produced by the LSC, Essex Research & Data Team for the twelve local authority districts and two unitary authorities within our LSC area. This series of Area Profiles is the first updated version since their original release, while the format has remained the same you will find most of the information within has been updated using existing and new datasets, such as the Census 2001 and the National Employer Skills Survey 2003.

This Area Profile brings together key learning and skills data about the Colchester area from a host of sources. Some of these sources may be familiar to you, while some are from our own resources, most notably the survey. Please see the glossary for more details on all content.

The aim of this Area Profile is to provide a foundation for the development of our understanding of the learning and skill needs of the people and employers within in the district of Colchester. In sharing this digest of data with our partners and providers, we hope to develop, in partnership, a common understanding of the learning needs and characteristics of this area.

The Area Profile is divided into four sections – People, Provision, Employers and Supporting Data. The ‘People’ section focuses on Colchester residents, looking at their socio-economic characteristics, their skill and qualification levels, learning needs, and learning behaviour and patterns. The ‘Provision’ section focuses on the post-16 learning providers based in Colchester; namely Further Education (FE) providers, Adult Community Learning (ACL) providers, Work Based Learning (WBL) providers and the school sector. The ‘Employers’ section focuses on the workforce development issues of Colchester employers – looking at their profile, drivers of change, and their workforce development behaviour and patterns.

Please take time to read the short section entitled ‘Understanding the data’ before you look at the rest of the document. It provides useful information on how you can make the most of the data provided throughout the document. You will also find some further helpful information in the glossary at the end of the document - any terminology that is not familiar to you is likely to be explained in more detail in the glossary.

I would welcome any comments you may have with regard to the contents of this Area Profile. Please forward your comments to our Assistant Director of Research & Data, Liam Sammon whose contact details can be found on page vi.

I hope that you will find the Area Profiles to be both interesting and useful and I look forward to receiving your comments.

Kind regards,

Alison Webster

Learning & Skills Council, Essex

Understanding the data

Terms used throughout the document

Throughout the document, we make use of the term 'Essex'. Unless otherwise stated, this refers to the geographical area covered by LSC, Essex - that is, the county of Essex and the two unitary authorities of Southend and Thurrock. Likewise, where we use the term 'Basildon' or 'Thurrock' for example, unless stated otherwise, we are referring to the district of Basildon or the unitary authority of Thurrock.

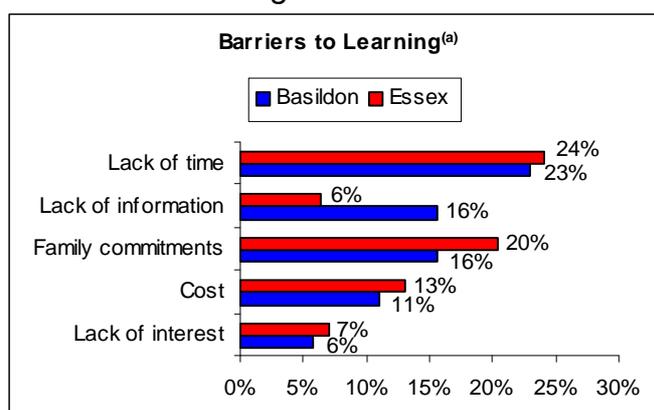

Understanding the 'notes' information on tables, charts and maps

Most of the data reported in this document is presented as a table, chart or map. Additional information in the form of sample bases and population bases are included so as to assist readers in their understanding and interpretation of the table, graph or map, and facilitate further calculations.

A sample base will be listed when the data reported is taken from a survey. The figures reported represent the number of people who responded to the question reported. In addition to the number of people in the sample, the description of the sample group will also be listed. In the example below, you will see that the sample base is 191 for Basildon and 2,662 for Essex, and that this relates to all 16-69 year olds.

A population base relates to the actual group of people that the sample refers to. In the example below, the sample of 191 is a sample of the 16-69 year old population. The population base is therefore the actual number of 16-69 year olds in Basildon or Essex. The population will vary from chart to chart according to the question that is being reported. The population base can be used to estimate the actual number of people in the population that the survey results represent. For example, 11% of Basildon residents say cost is a barrier to learning. By taking the population base of 101,000 and multiplying by 11% it is possible to say that approximately 11,110 Basildon residents regard cost as a barrier to learning.

'Barriers to Learning' ^(a)

Source: LSC, Essex; Post 16 Learning Survey

Sample bases (16-69 year olds): Basildon, 191; Essex, 2,662

Notes:

(a) Includes factors that are either a 'fairly significant' or a 'significant' barrier

Key Statistics

	Colchester		Essex
		% share of Essex	
Population (2001)	155,873	10%	1,614,378
Economically active population (2004)	81,000	10%	827,000
VAT registered firms (2002)	4,620	10%	45,885
Unemployment rate (August 2004)	1.6%	-	1.9%
Deprivation ranking	6th	-	-
% of 16-69 year olds with no qualifications	25%	-	29%
% of 16-69 year olds with NVQ 3+ equivalence ^(b)	29%	-	22%
Colchester resident School VI Form pupils ^(c)	483	4%	11,013
Colchester resident FE students	9,694	13%	74,405
Colchester resident ACC students ^(d)	1,982	8%	24,427
Colchester resident WBL students	853	11%	7,704

Notes:

(a) See glossary for definitions of key statistics

(b) Based on 16-69 population, whilst the LSC, Essex target for the percentage of adults with NVQ3 level qualifications or above is based on the 16-65 economically active population.

(c) Based on Pupil level annual school census (PLASC) 2002/2003

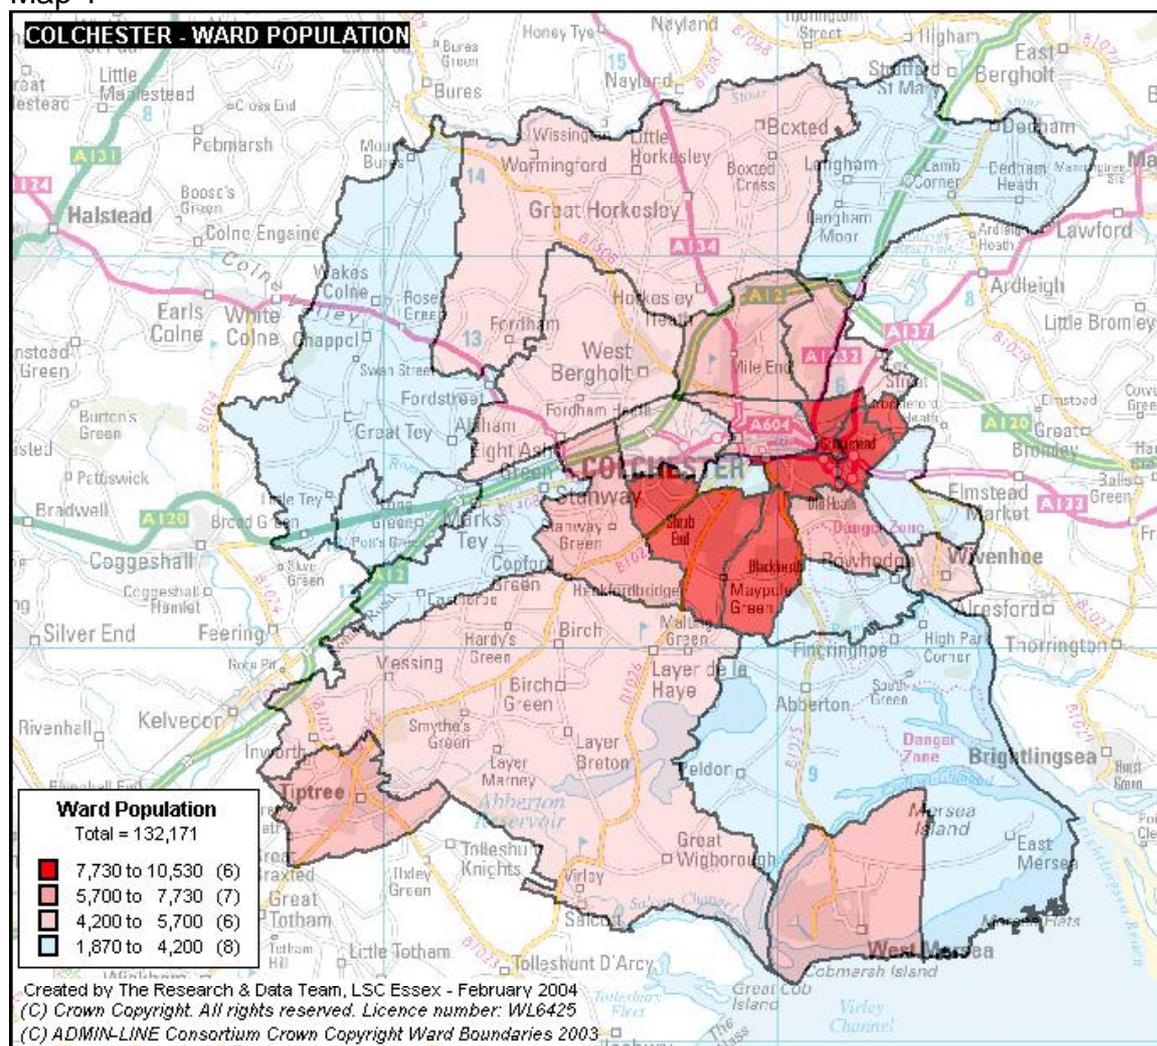

(d) Based on Individualised Learner Record, 2002/2003. For the ACL sector the ISR captures LSC funded FE provision only. FE provision covers everything in the former Schedule 2 category, which includes some non-accredited courses, but covers predominantly accredited courses. The LSC does fund former non-schedule 2 provision in the ACL sector, but this is not recorded by the ILR. See the Adult Community Learning section for details on non-ISR provision.

PEOPLE

1. Population

Map 1 shows the spread of the population in the district of Colchester according to the ward residents live in. Figures are based on 2001 Census.

1.1 Age

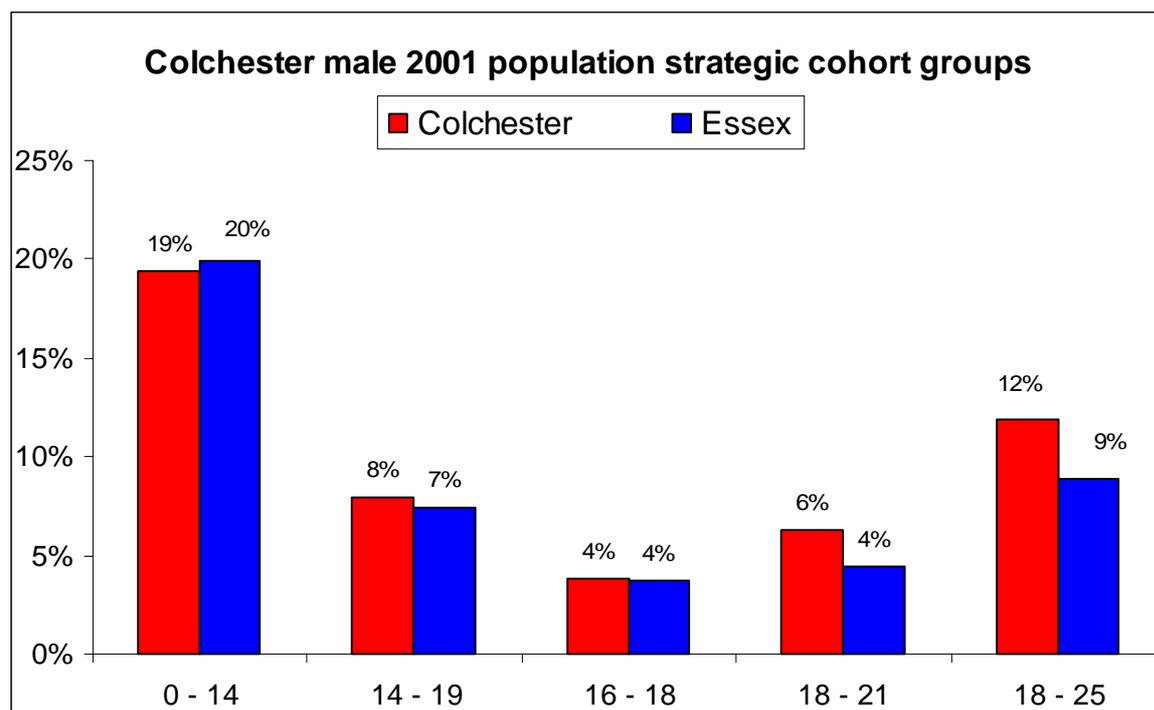

According to the 2001 Census of Population, the population of Colchester is 155,873. This comprises 9,787 15 – 19 year olds and 116,979 20+ year olds. Charts 1-4 give a detailed age breakdown of the population in a number of themes.

Chart 1

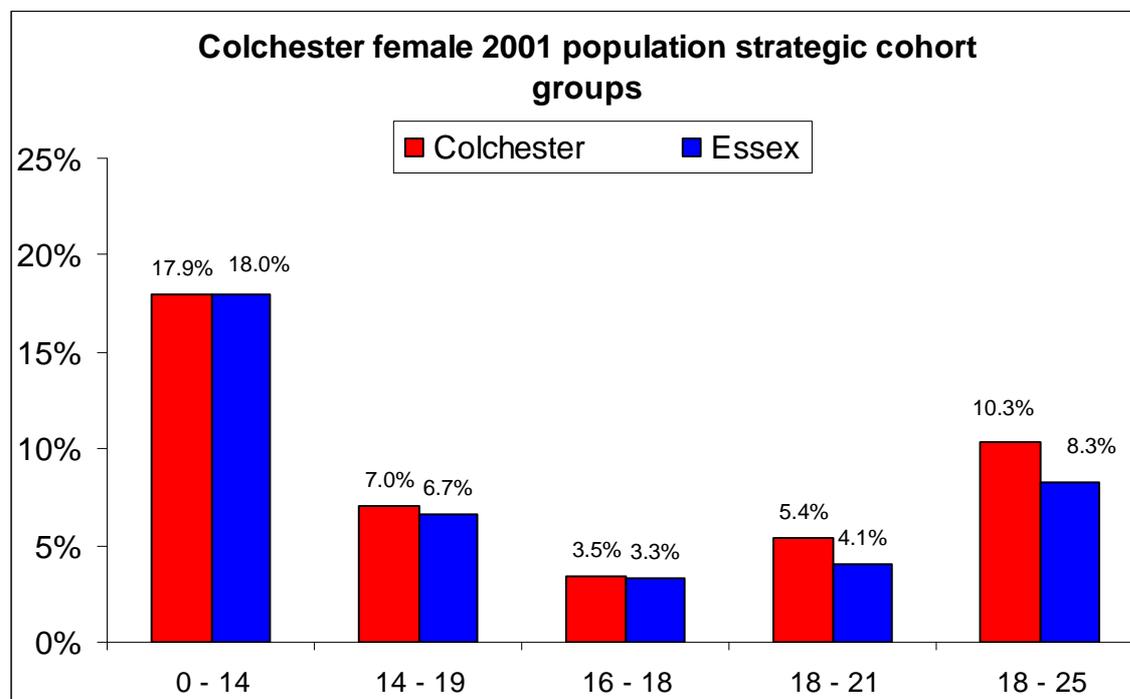

Source: 2001 Census of Population, Office for National Statistics
 Population base (total population): Colchester, 155,873; Essex, 1,614,378

Chart 2

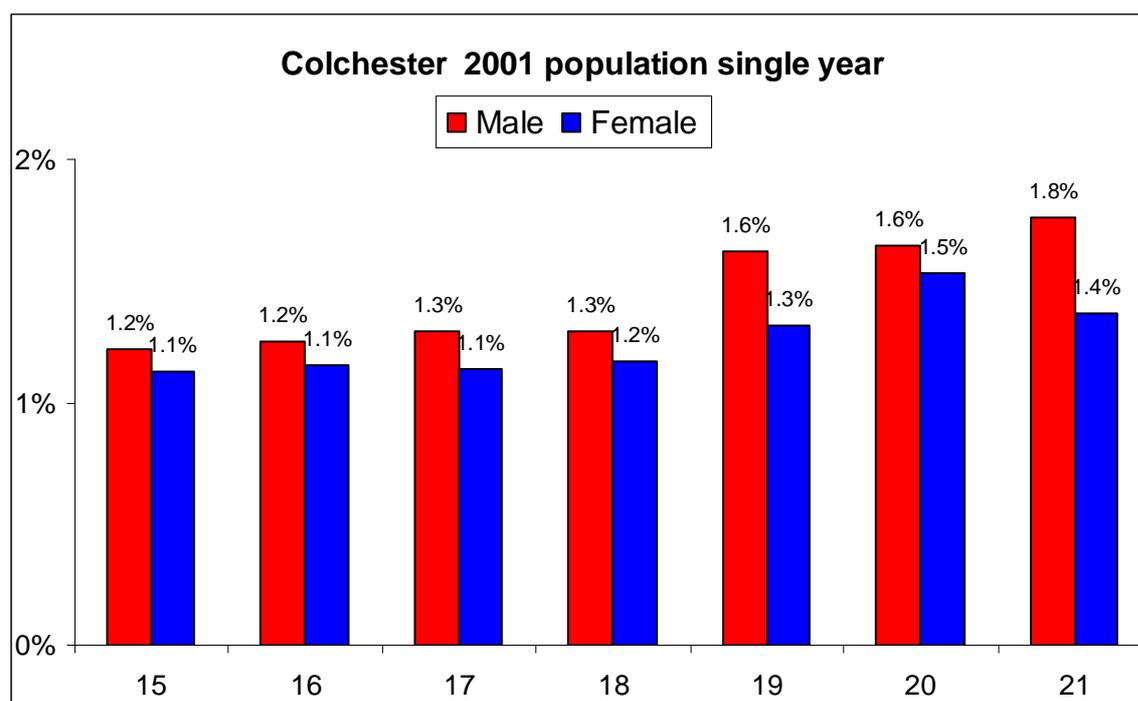

Source: 2001 Census of Population, Office for National Statistics
 Population base (total male population): Colchester, 77,171, Essex, 786,800

Chart 3

1.2 Gender

The total population of Colchester is made up of 77,171 males and 78,702 females. This represents a gender split of 50% male to 50% female.

1.3 Ethnicity

According to the 2001 Census of Population, just over 93% of Colchester's population class themselves as White British, a similar percentage to Essex.

Table 1 shows the ethnic group of the population in Colchester and Essex.

Table 1

Ethnic group	Colchester		Essex	
	As a % of total male population	As a % of total female population	As a % of total male population	As a % of total female population
White: British	93.1%	92.6%	94.3%	94.0%

Source: 2001 Census of Population, Office for National Statistics
Population base (total population): Colchester, 155,873; Essex, 1,614,378

1.4 Disability

The 2001 Census of Population provides data on the number of households with at least one person with a limiting long-term illness for Essex in table 2. Colchester is in line with Essex in that roughly one in three households has at least one person with a limiting long-term illness.

Table 2

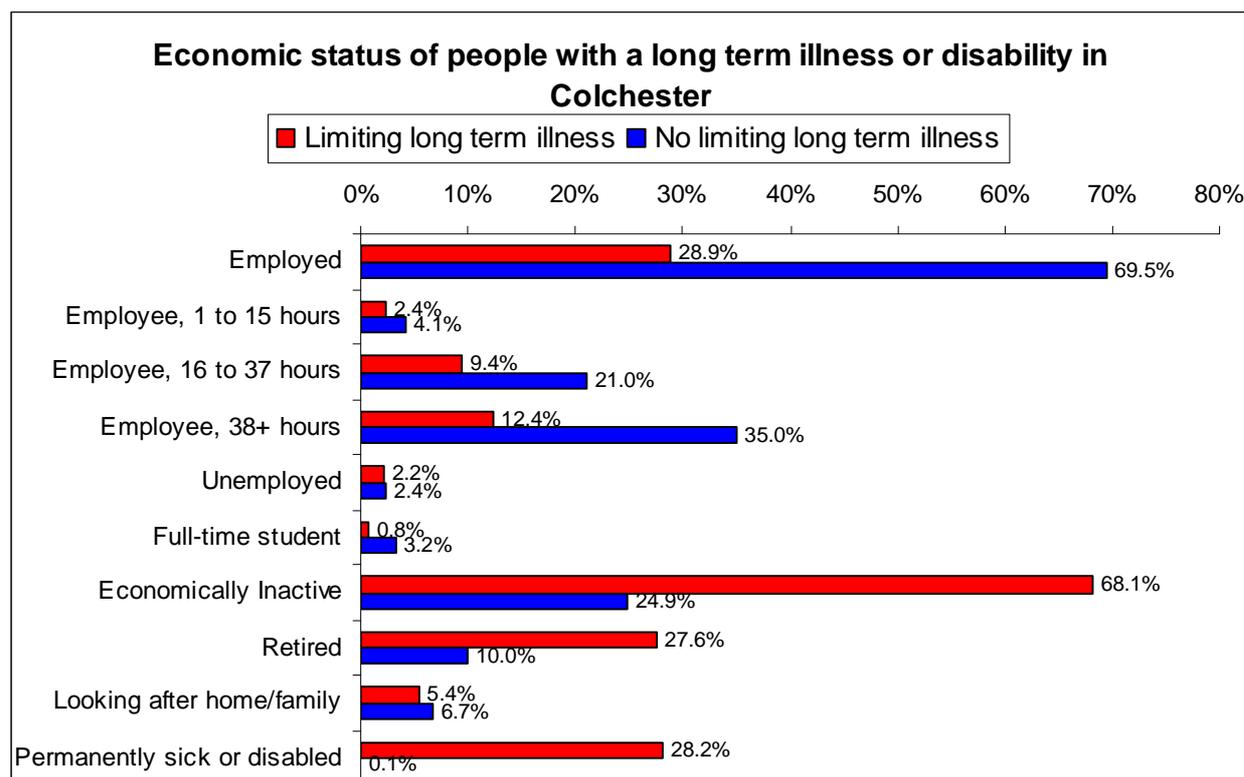

Households with one or more person with a limiting long-term illness		
	As a % of all households	All households
Basildon	33%	69,207
Braintree	29%	54,332
Brentwood	28%	28,767
Castle Point	33%	35,279
Chelmsford	27%	64,564
Colchester	31%	63,706
Epping Forest	30%	50,590
Harlow	31%	33,185
Maldon	30%	24,189
Rochford	31%	31,952
Southend	34%	70,978
Tendring	41%	61,411
Thurrock	32%	58,485
Uttlesford	27%	27,519
Essex	32%	674,164

Source: 2001 Census of Population, Office for National Statistics

The Census 2001 asked respondents whether or not they had a long-term illness or disability. Chart 7 uses this data to show the economic status of the Colchester population comparing those who have a long-term illness or disability with those who do not.

As chart 7 shows, Colchester residents who have a long-term illness or disability are much more likely to be economically inactive and less likely to be in any form of employment.

Chart 7

Source: 2001 Census of Population, Office for National Statistics

Population base Colchester: Limiting long-term illness, 16,805; No limiting long-term illness, 96,945

Official data relating to disability benefits is another indicator of the number of people with a disability. However, it is likely to underestimate the total number of people affected by a long-term illness or disability as it only relates to those people who are claiming one or more disability benefit. Nevertheless, this information is accurate at the district level and so is included in table 3.

Table 3

Disability benefit claimants, August 2003			
	DLA	IB	SDA
Colchester	4%	3%	1%
Essex	3%	3%	0%

Figures presented are those claiming as a percentage of the population
 Source: Office for National Statistics, August 2003
 DLA: Disability Living Allowance
 IB: Incapacity Benefit
 SDA: Severe Disablement Allowance
 Total population: Colchester, 155,796; Essex, 1,614,220

Further sub-group analysis of those Essex residents who have a long-term illness or disability with those who do not can be found in sections 3.1, 4.1 and 4.1.1 in the People section of this document.

2. The Labour Force

Table 4 provides a breakdown of different sub-groups of the total population – the working age population, the economically active population and all employees.

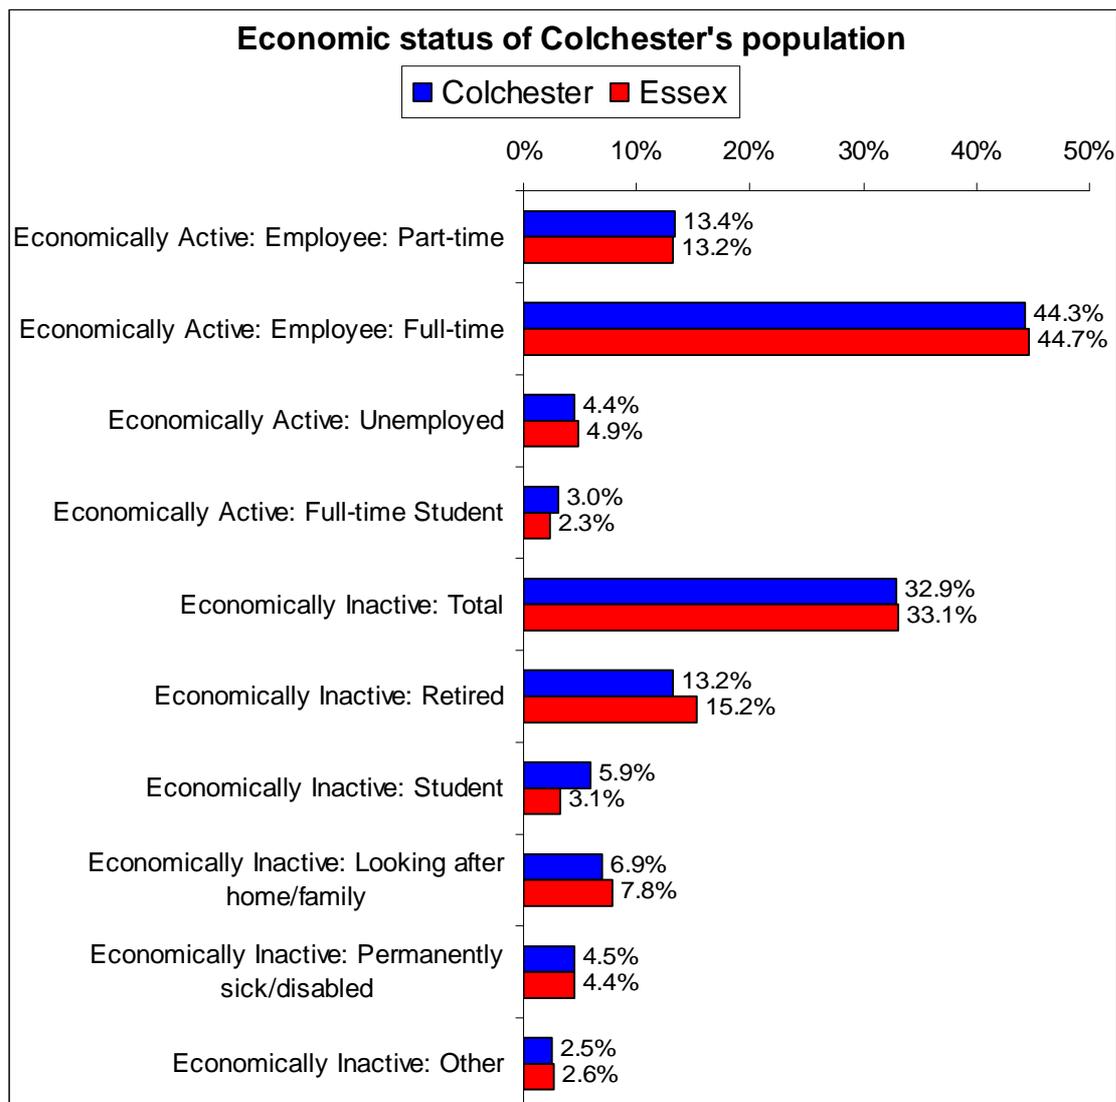

Table 4

Labour force information	Colchester	Essex
Working age population	94,000	981,000
Economically active population	81,000	827,000
All employees	78,000	795,000
Male working age population	48,000	507,000
Male economically active population	45,000	452,000
Male employees	44,000	433,000
Female working age population	46,000	474,000
Female economically active population	35,000	375,000
Female employees	34,000	362,000

Source: - Labour Force Survey, ONS, June 2003-May 2004

A breakdown of the economic status of the district's population is illustrated in chart 8. The data in this chart is taken from the Census 2001. The economic status of people in Colchester is almost identical to that of Essex with the exception that there are slightly more students in Colchester.

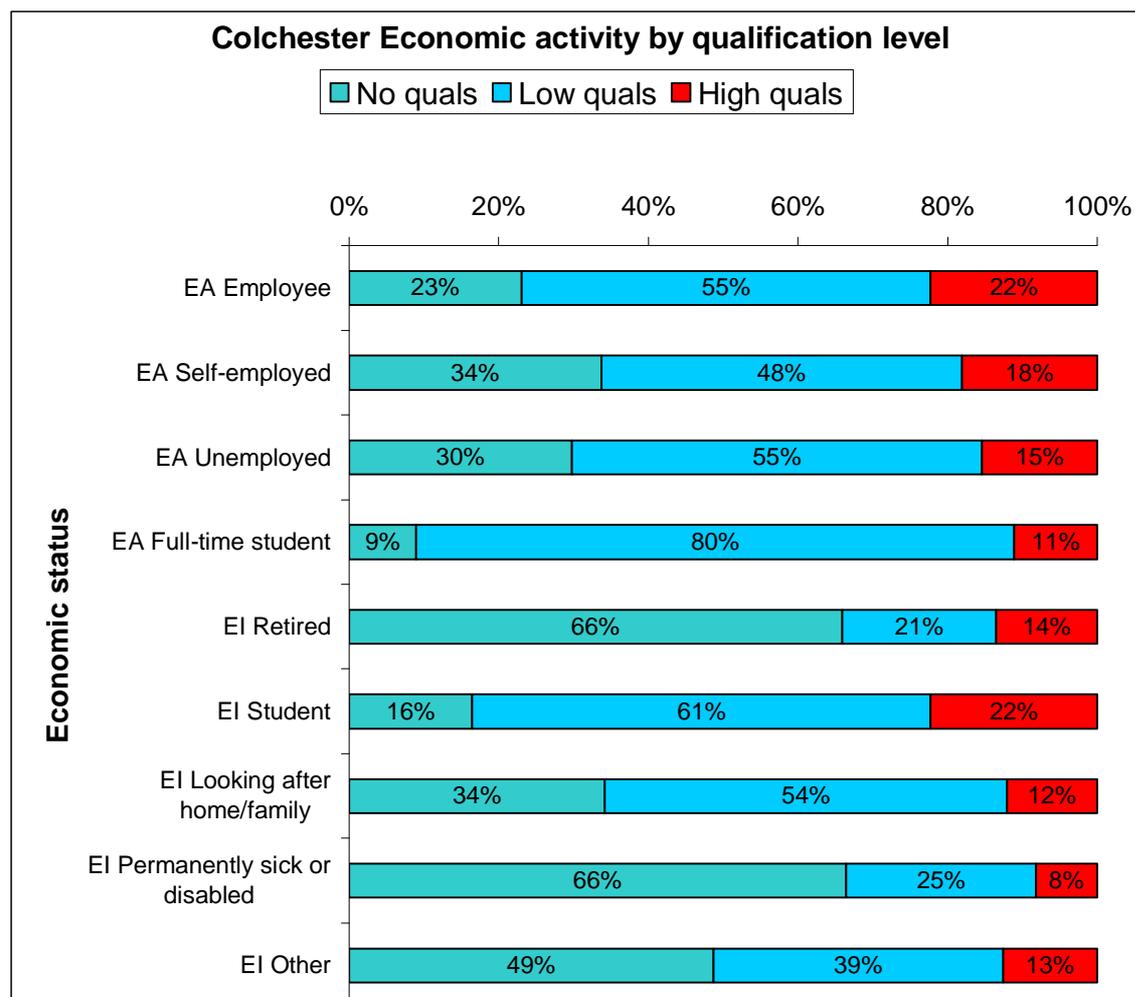

Chart 8

Source: 2001 Census of Population, Office for National Statistics
Population base (16-69 year olds): Colchester, 108,095; Essex, 1,093,406

Further analysis of the economic status of the population here shows activity by general qualification level in chart 9. One in five of those who are students and in employment have a high level qualification, with two thirds of those in retirement or being sick or disabled having no qualifications. Further analysis by qualification level can be found in section 3.1.

Chart 9

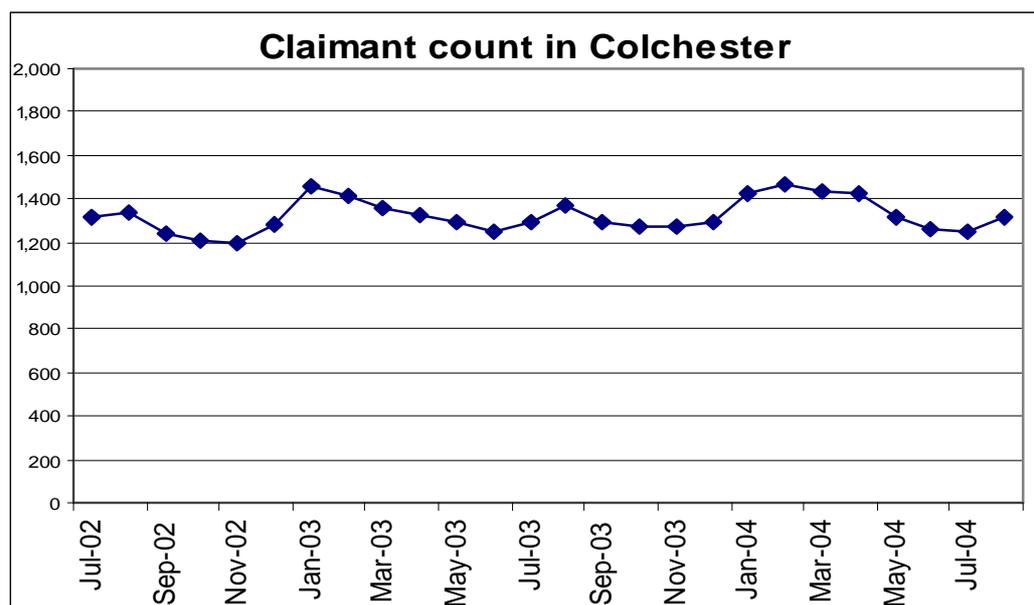

Source: 2001 Census of Population, Office for National Statistics; population base (16-74 year olds), Colchester, 113,771

Note: EI (Economically Inactive); EA (Economically Active)

2.1 Unemployment

There were 1,313 people claiming unemployment benefit in Colchester during December 2002. Chart 10 tracks the claimant count in Colchester from July 2002 until August 2004.

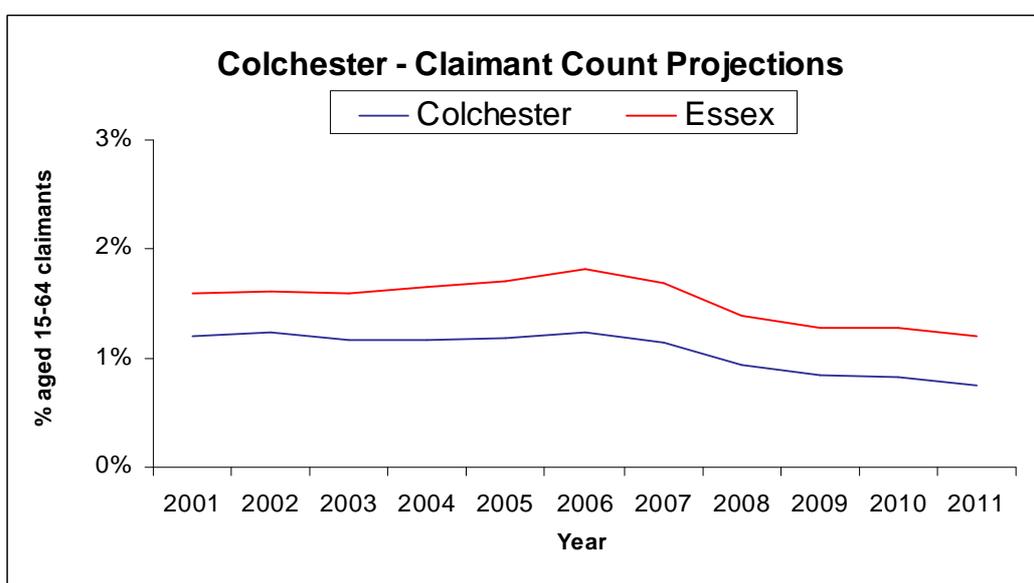

Chart 10

Source: Claimant Count, Office for National Statistics

Chart 11 shows the projections for claimant count in Colchester until 2011. The claimant count rate in Colchester, while decreasing, is also looking set to keep its margin from the Essex average.

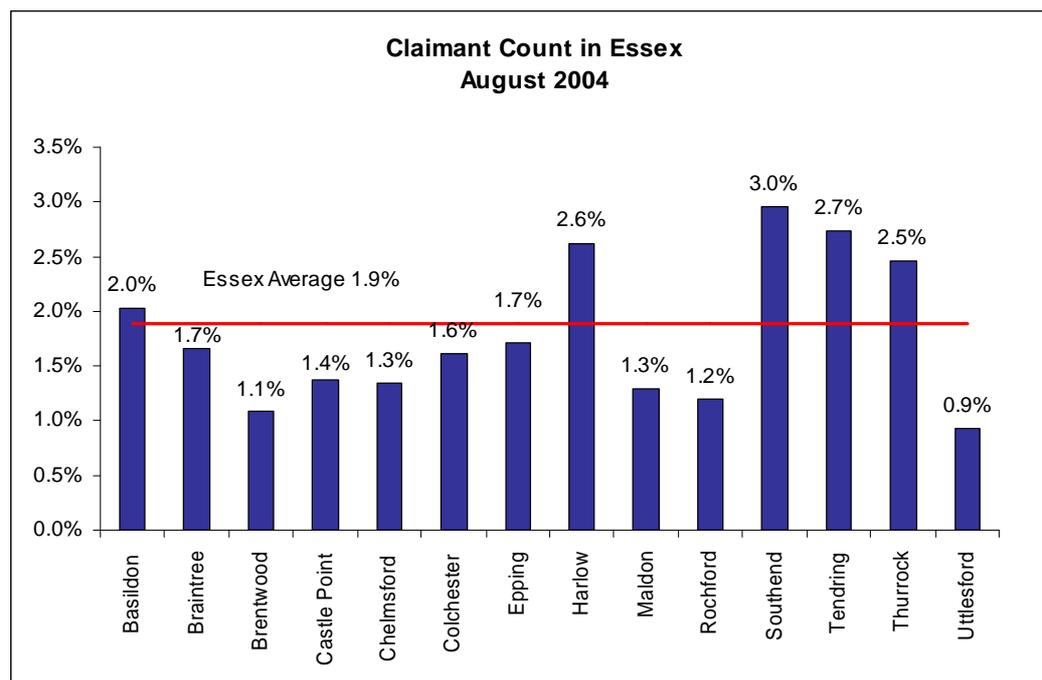

Chart 11

Source: Experian Business Strategies, February 2004

The claimant count can also be expressed as a rate – this is the claimant count expressed as a percentage of the economically active population. The claimant count rate in Colchester was estimated to be 1.6% in August 2004, slightly lower than the Essex rate of 1.9%. Chart 12 shows the claimant count rate in August 2004 for all the areas in Essex.

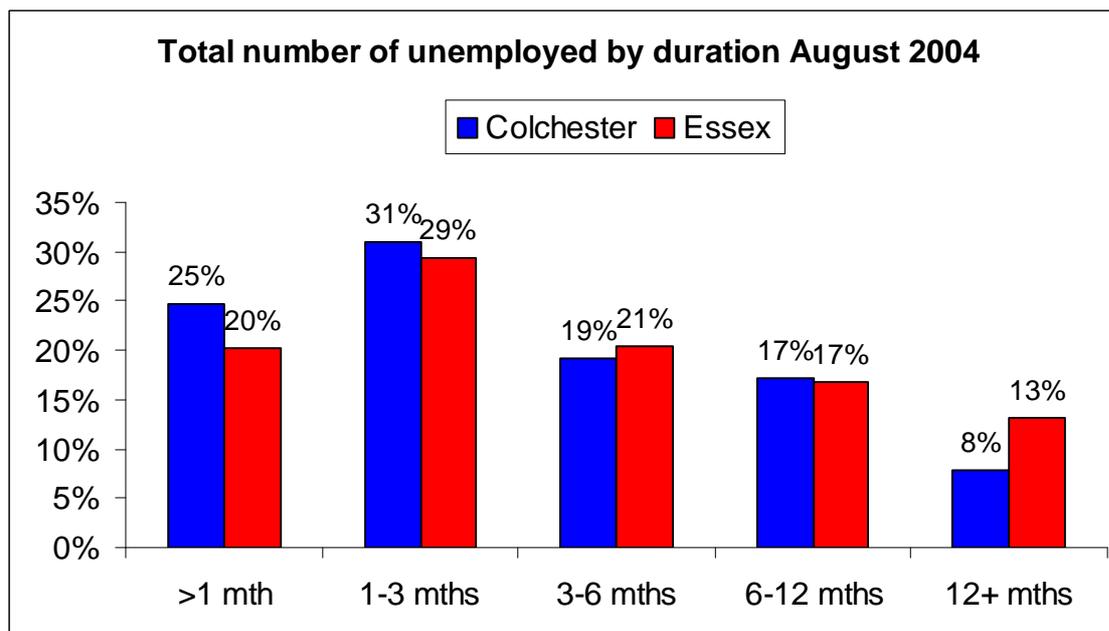

Chart 12

Source: Claimant Count, Office for National Statistics

Charts 13, 14 and 15 show unemployment by duration. The profile in Colchester shows us that over 50% of claimants are unemployed for less than three months, half of these for less than one month. Also just 8% are unemployed for over twelve months.

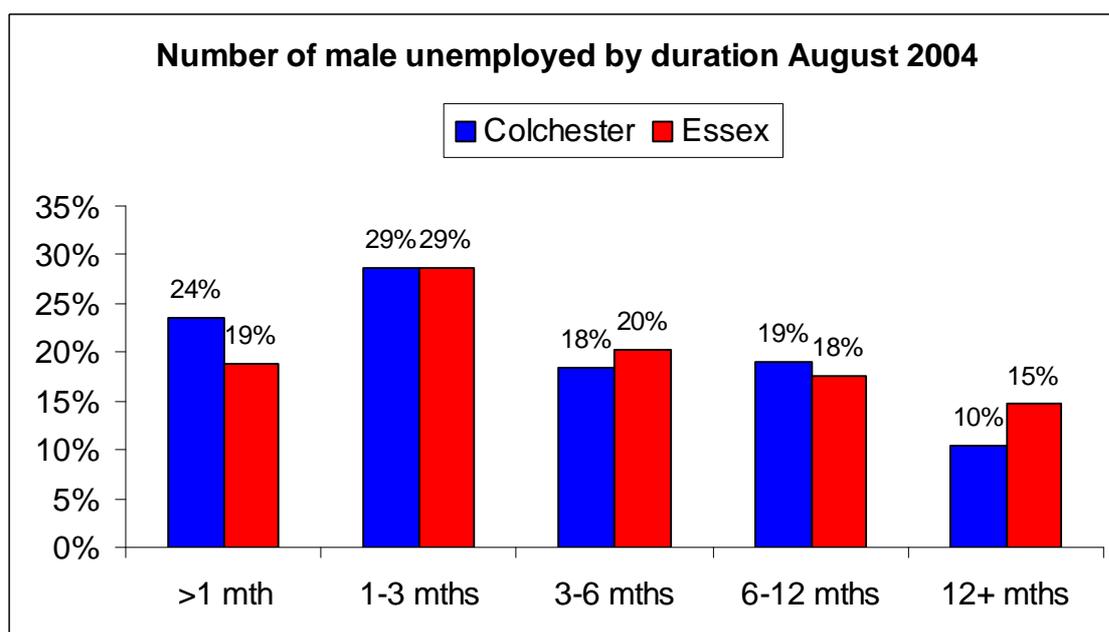

Chart 13

Source: Claimant Count, August 2004, Office for National Statistics
Total Base: Colchester, 1,275; Essex, 15,245

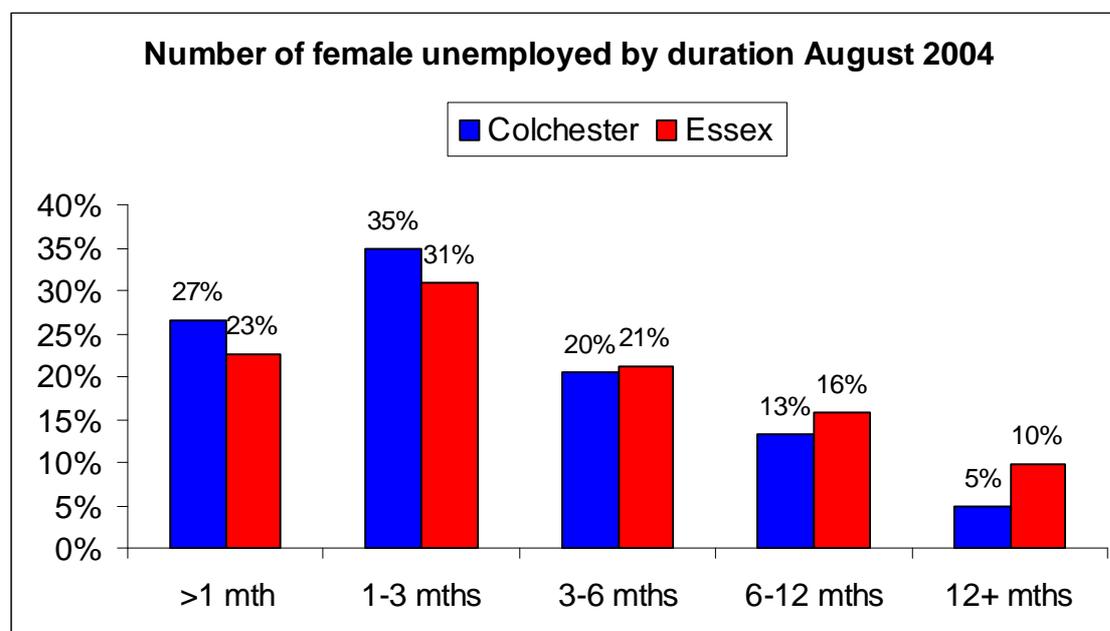

Charts 14 and 15 provide unemployment data by duration and gender.

Chart 14

Source: Claimant Count, August 2004, Office for National Statistics
Male Base: Colchester, 870; Essex, 10,420

Chart 15

Source: Claimant Count, August 2004, Office for National Statistics
 Female Base: Colchester, 415; Essex, 4,840

Further analysis of those Essex residents who are employed compared to those who are unemployed can be found in sections 3.1, 4.1 and 4.1.1 in the People section of this document.

2.2 Employment

There are two ways of looking at the workforce in a particular geographical area: the resident workforce, and the local workforce. The resident workforce includes all those who live in the area regardless of whether they work in that area, while the local workforce includes all those who work in the area regardless of whether they live in the area. It should be noted that there will be some people who are included in both the resident and local workforce if they live and work in the same area.

Due to the way the majority of employment related official statistics are collected, much of the information in the area profile relating to the employed will be based on the local workforce. It will be stated which workforce the data is based on at the start of each new employment related section.

2.2.1 The Colchester Based Workforce

The following section refers to the local workforce only.

There are approximately 68,600 workers in Colchester's local workforce according to the Annual Business Inquiry, 2002.

Tables 5, 6 and 7 provide breakdowns of the local workforce by sector compared to Essex. The most notable difference is the percentage of people working in the

public administration, education & health sector, 28% compared to 22% in Essex. The margin of 6% has remained the same since the original area profiles.

Table 5

Total employees by broad sector				
	Colchester		Essex	
	#	%	#	%
Utilities, agriculture and fishing	1,200	2%	9,500	2%
Manufacturing	7,600	11%	81,200	13%
Construction	3,000	4%	35,300	6%
Distribution, hotels and restaurants	18,400	27%	164,900	27%
Transport and communications	3,400	5%	41,700	7%
Banking, finance and insurance	12,400	18%	119,900	19%
Public administration, education & health	19,400	28%	138,000	22%
Other services	3,400	5%	28,700	5%

Source: Annual Business Inquiry, 2002

Tables 6 and 7 show the employee sector breakdown by gender. The most notable differences are that the manufacturing sector has a much greater proportion of male employee's than female, 17% to 5%. Also the public administration, education & health sector is dominated by female employee's, 39% compared to 16% male.

Table 6

Male employees by broad sector				
	Colchester		Essex	
	#	%	#	%

Source: Annual Business Inquiry 1999 - 2002, Annual Employment Survey 1998

Notes:

Figures in bold are sector totals. Only figures for primary sub sectors are shown - subsets do not equal total # These figures have been omitted due to ONS suppression

Chart 16 shows the future employment projections of Colchester district. As the chart shows the largest increases are in the public and financial service sectors, with the remainder staying fairly static.

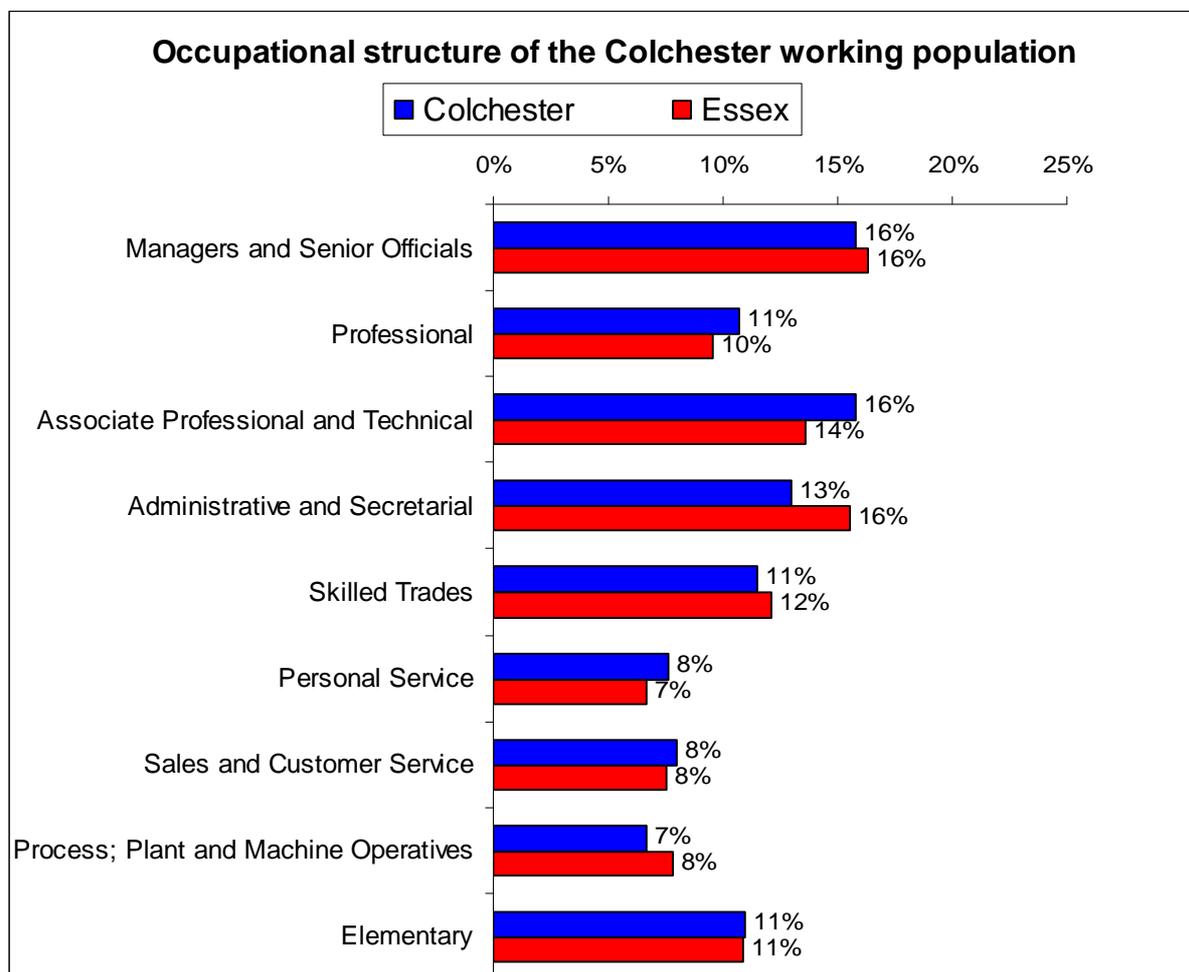

Chart 16

Source: Experian Business Strategies, February 2004

Chart 17 provides a breakdown of the Colchester resident workforce by occupation. While the differences between Colchester and Essex are small, there are a greater number of people working in professionally related occupations in Colchester and less in administrative roles when compared to Essex.

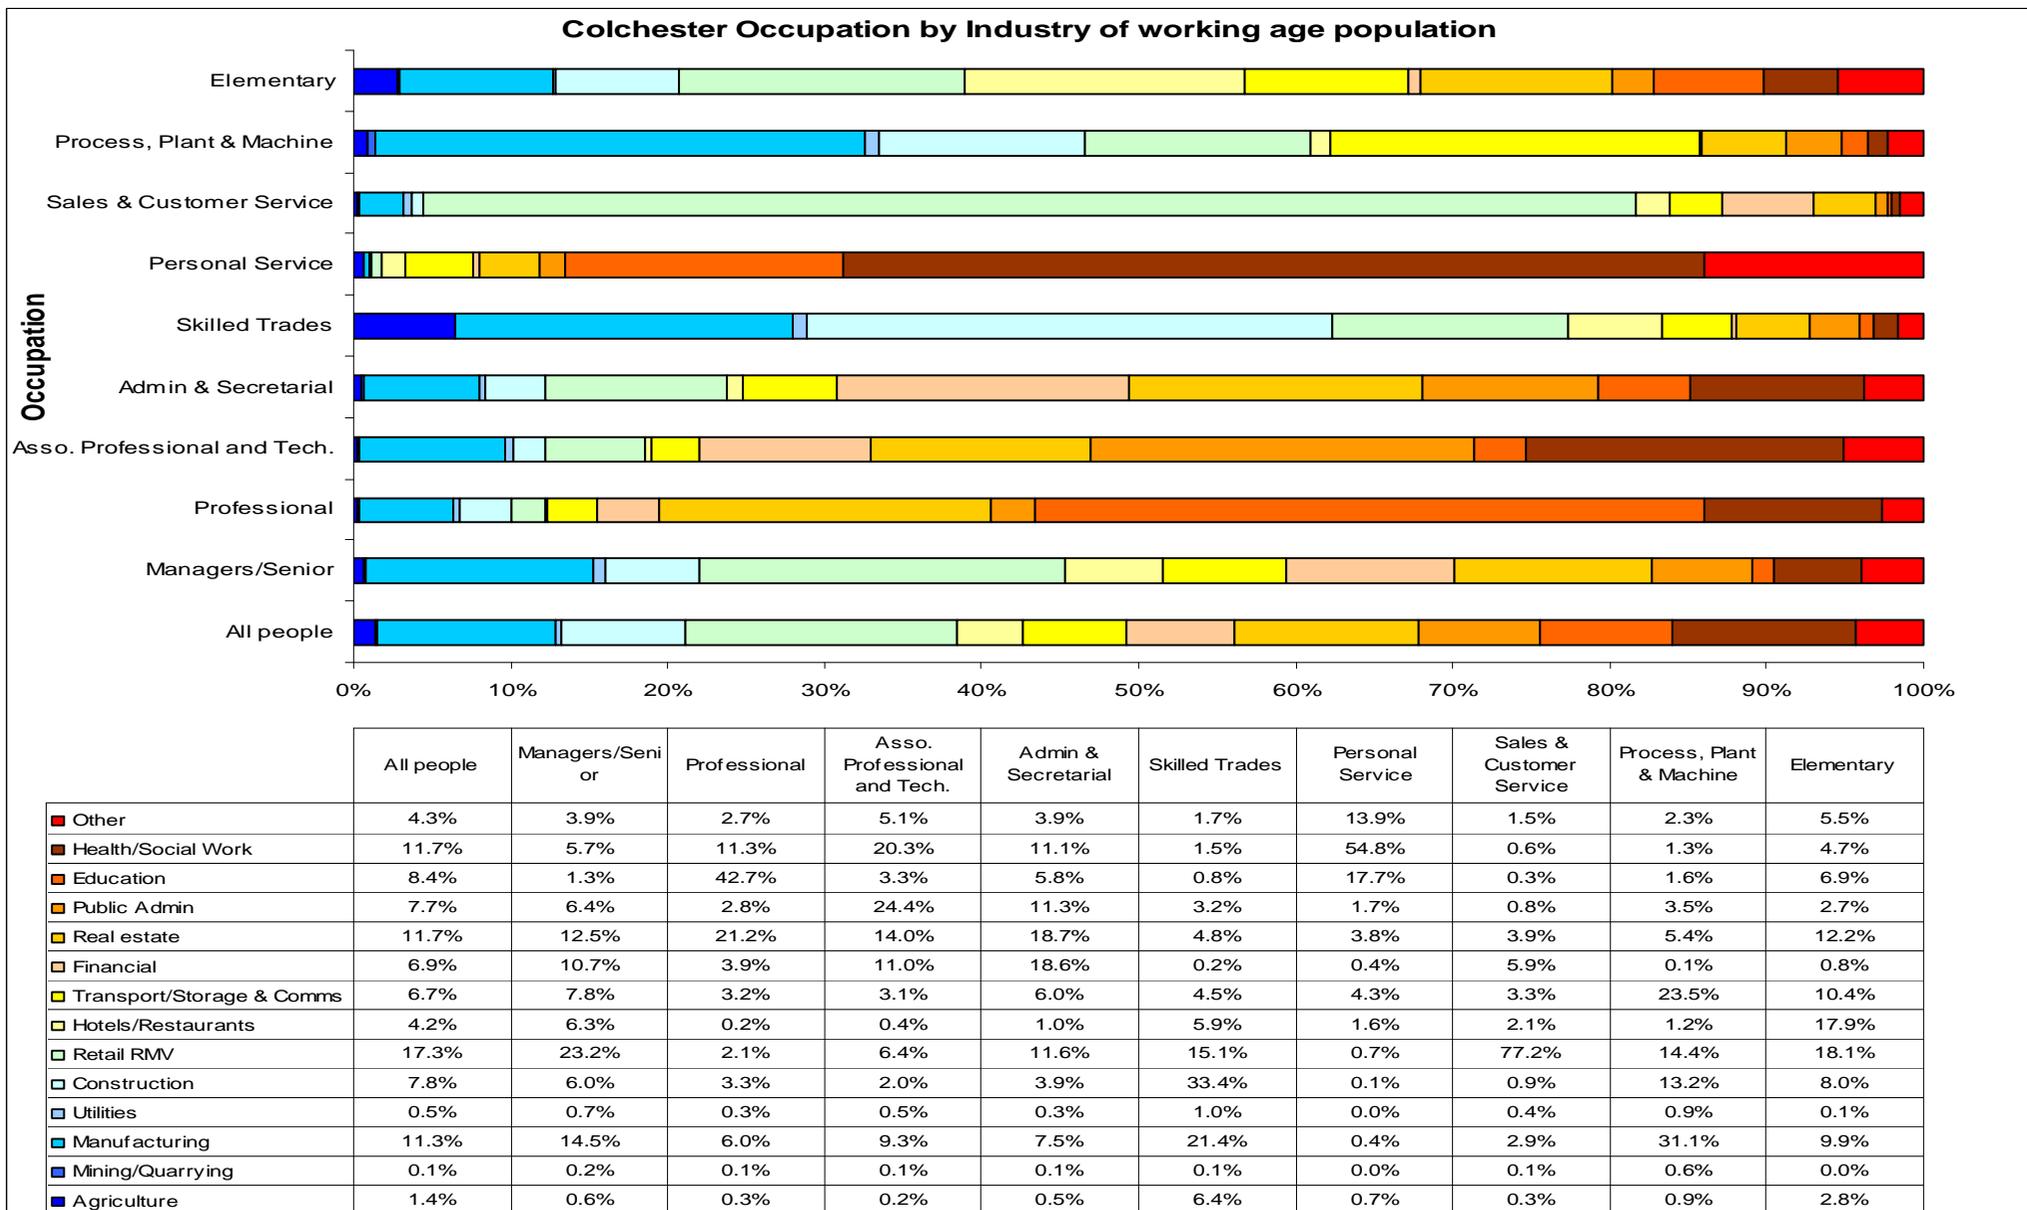

Chart 17

Source: 2001 Census of Population, Office for National Statistics
 Population base (16-74 years olds in employment): Colchester, 75,227; Essex, 765,116

Following on from this the next chart (18) gives us the picture of the type of occupation people in Colchester have by the type of industry in which they work. Over 75% of sales and customer service occupations are found in the retail sector and very few in other sector. Personal service occupations dominate the health sector with 54.8% and the skilled trades largest share is in construction with 33.4%. Overall retail is the largest sector for employment.

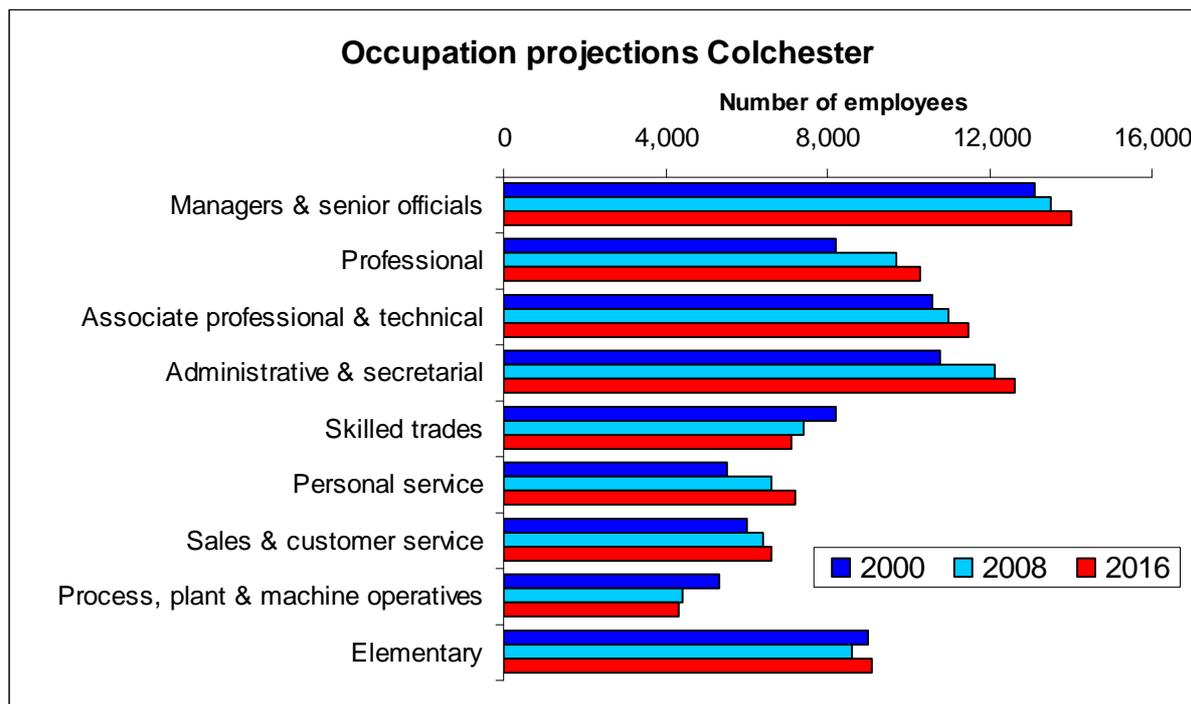

Chart 18

Source: 2001 Census of Population, Office for National Statistics; Population base (16-74 years olds in employment): Colchester, 75,103

Chart 19 shows us the future projections for occupations in Colchester. As the chart shows the greatest demand is for professional, administrative and personal service staff. Skilled trades and process, plant and machine operatives are the only occupations in decline.

Chart 19

Source: Experian Business Strategies, February 2004

2.2.2 Travel to Work Patterns

The LSC, Essex Post 16 Learning Survey allows us to analyse the travel to work patterns for all workers who reside in Essex.

Table 9 provides a broad picture of the travel to work outflow patterns, by grouping workers into those working in Essex, working outside of Essex, and those who work from their home. Maps 2 and 3 following this table give more detailed travel to work information.

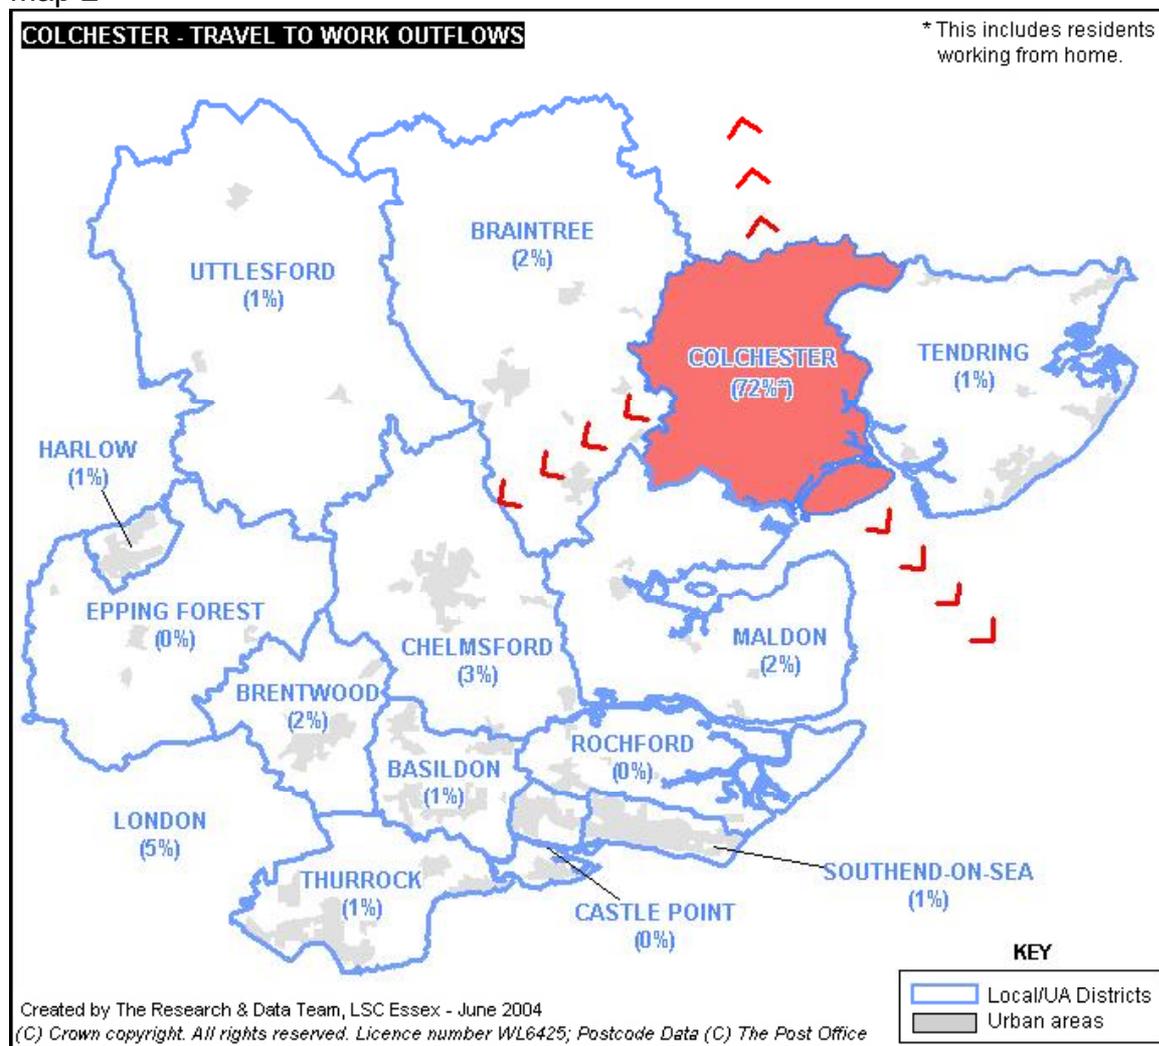

Table 9

Travel to work		
	Colchester	Essex
	% of workers	
In Essex	85%	70%
Out of Essex	14%	25%
Work from home	1%	6%
Refused	0%	1%
Total	100%	100%

Source: Post 16 Learning Survey, LSC, Essex, 2001
 Figures may not add due to rounding
 Sample bases: Colchester, 153; Essex, 1911
 Population bases (16-65 year old workers): Colchester, 82,800;
 Essex, 719,600

Map 2 shows the areas where Colchester residents travel to work. The figures in the map are expressed as a percentage of those who live in Colchester. Almost three-quarters (72%) of people in Colchester work in Colchester, while 5% travel to London. Very few Colchester residents travel to other parts of the county for work, the largest proportion being the 3% who work in Chelmsford.

Map 2

Source: Post 16 Learning Survey, LSC, Essex, 2001

Figures may not add due to rounding

Sample base (16-65 year old resident workers): Colchester, 153

Population base (16-65 year old resident workers): Colchester, 82,800

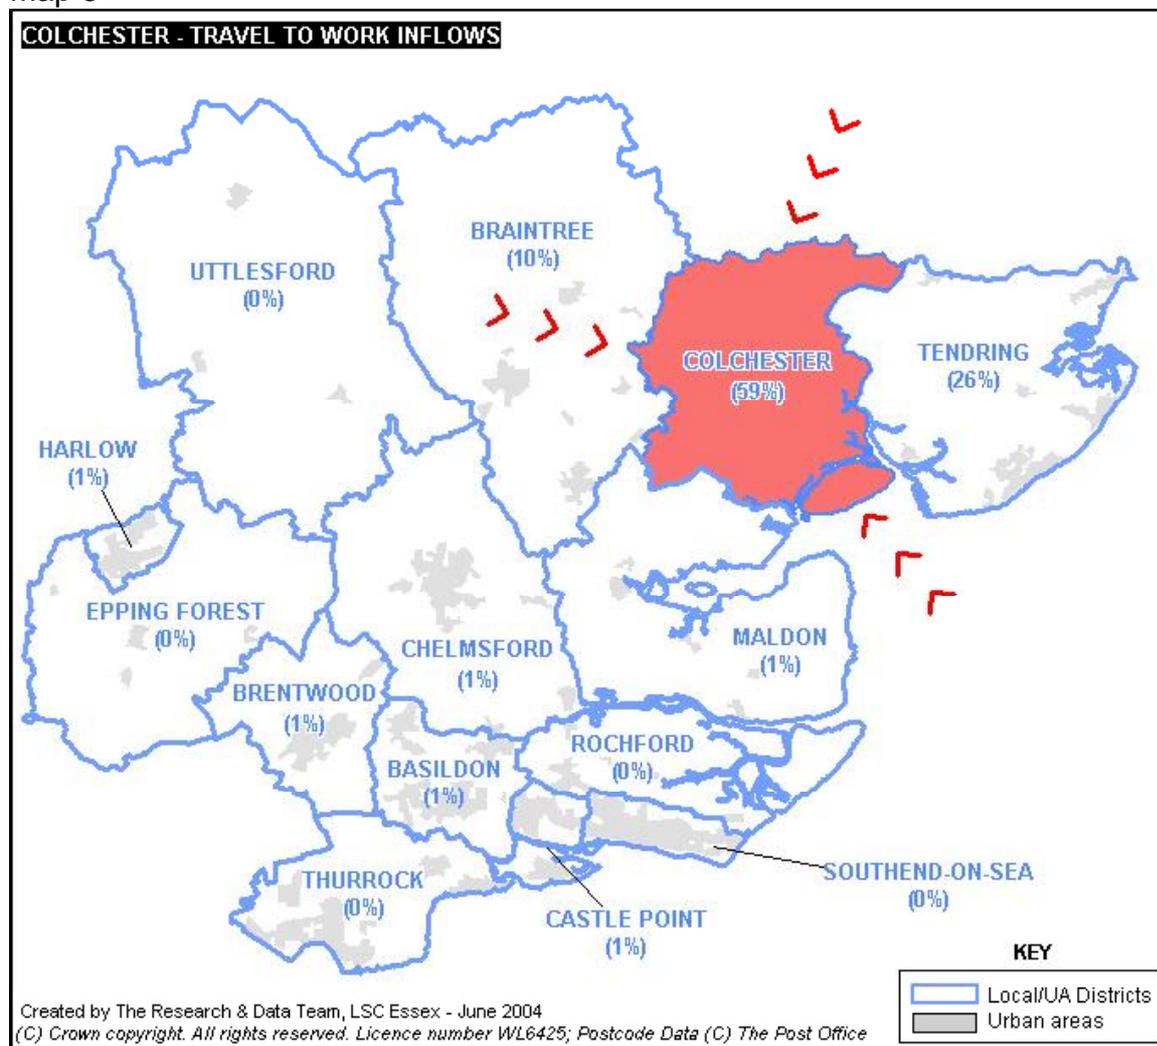

Based on 1991 boundaries

All percentages are rounded. 0% percentages indicate that a minimal number of workers travel between these districts.

Map 3 shows the areas that people who work in Colchester travel from. The figures in the map are expressed as a percentage of those who work in Colchester. As the Post 16 Learning Survey covered people living in Essex, workers who commute from outside of the county are not represented on this map.

The map shows that more than half (59%) of all workers in Colchester also live in the district. A substantial number travel in from Tendring (26%) and Braintree (10%), while very few come from the south of Essex.

Map 3

Source: Post 16 Learning Survey, LSC, Essex, 2001

Figures may not add due to rounding

Sample base (16 – 65 year old Essex residents who work in Colchester): 185

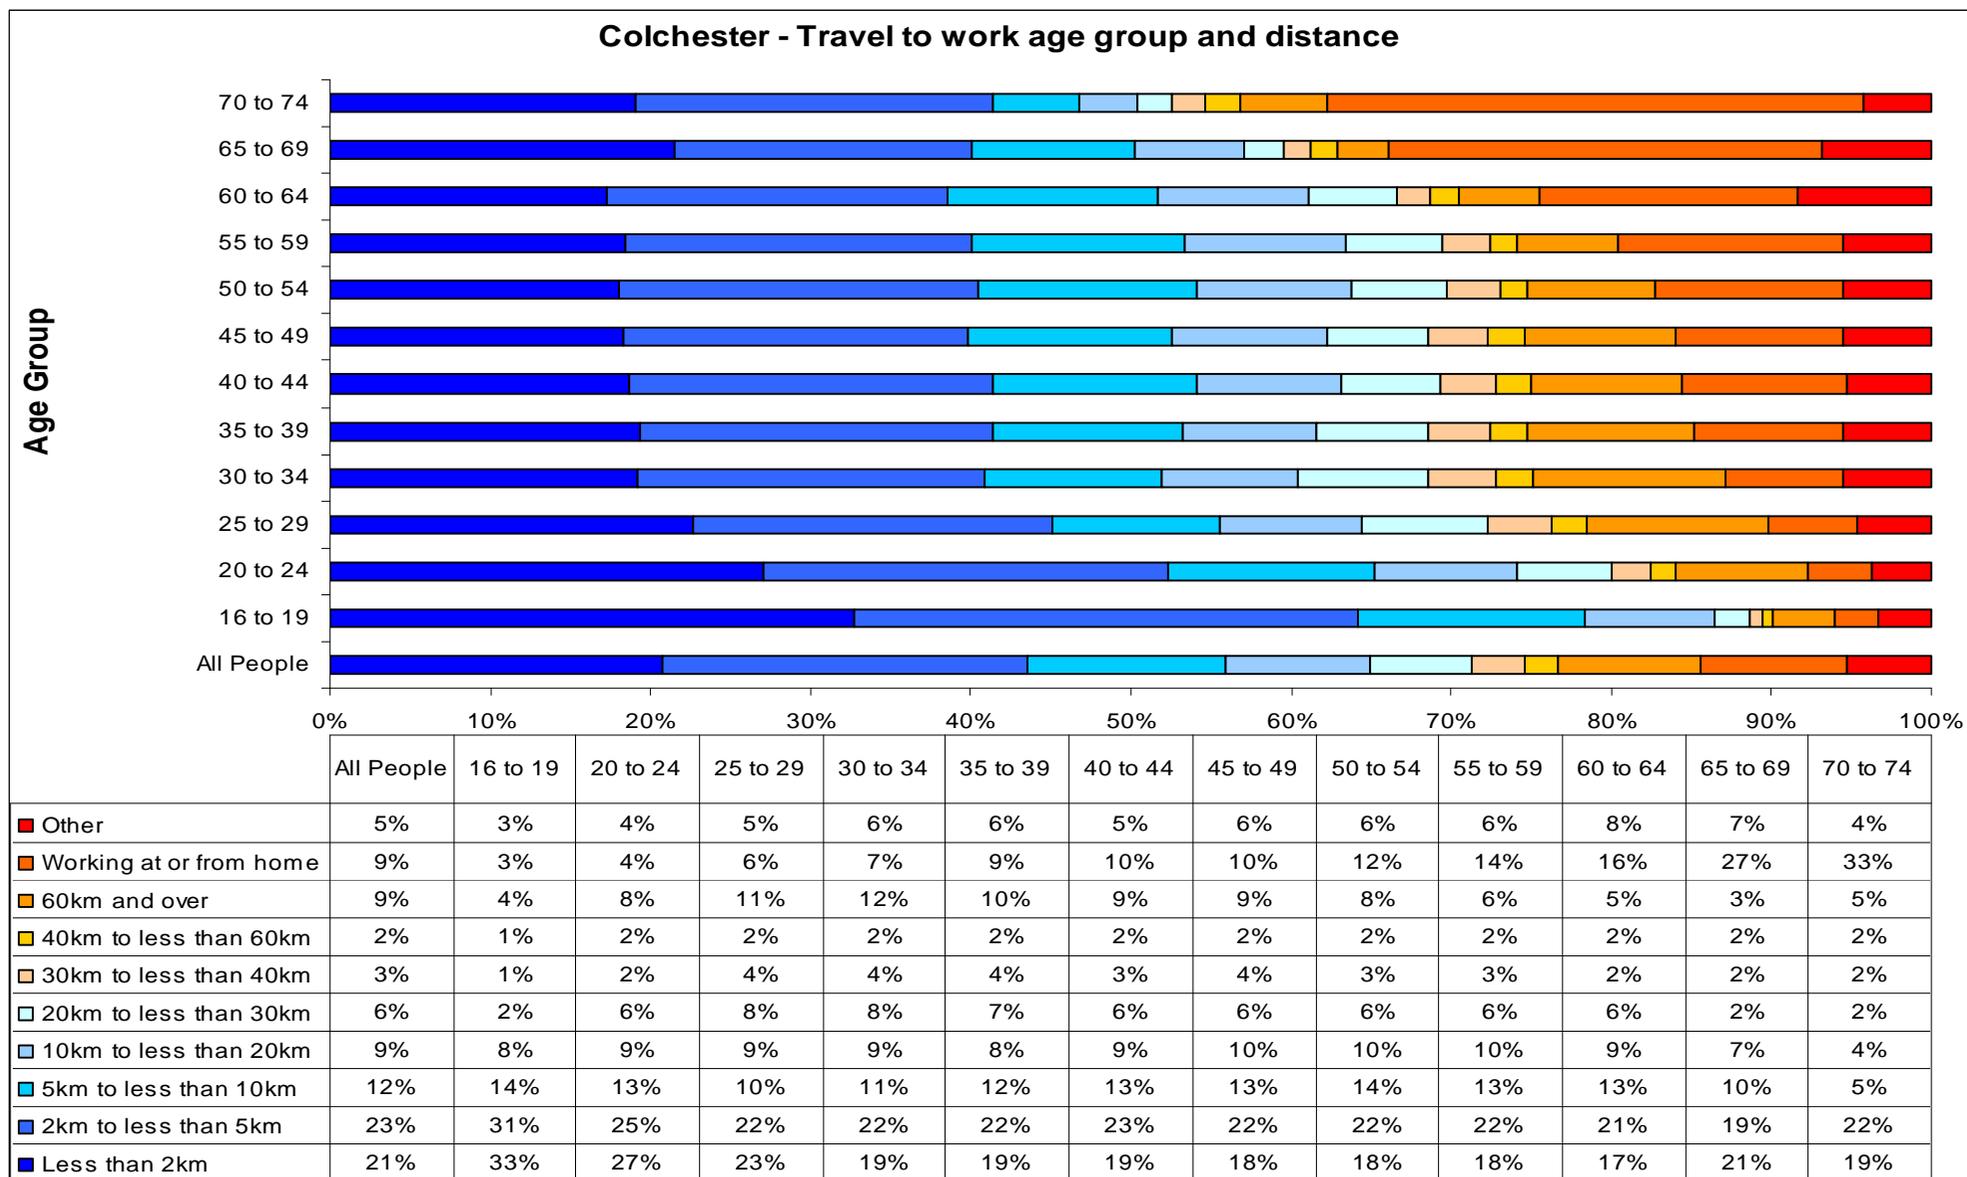

Population base (16 – 65 year old Essex residents who work in Colchester): 85,000

Based on 1991 boundaries

All percentages are rounded. 0% percentages indicate that a minimal number of workers travel between these districts.

Chart 20 show us how far a particular age group travels to their place of work on a regular basis in Colchester. From the age of 19 to 29 we see that the younger the age group is the less likely they are to travel long distances. From 30 onwards the travel to work distance for 5km or less is very similar. Overall almost two-thirds (65%) of those that travel to work in Colchester, travel 20km or less.

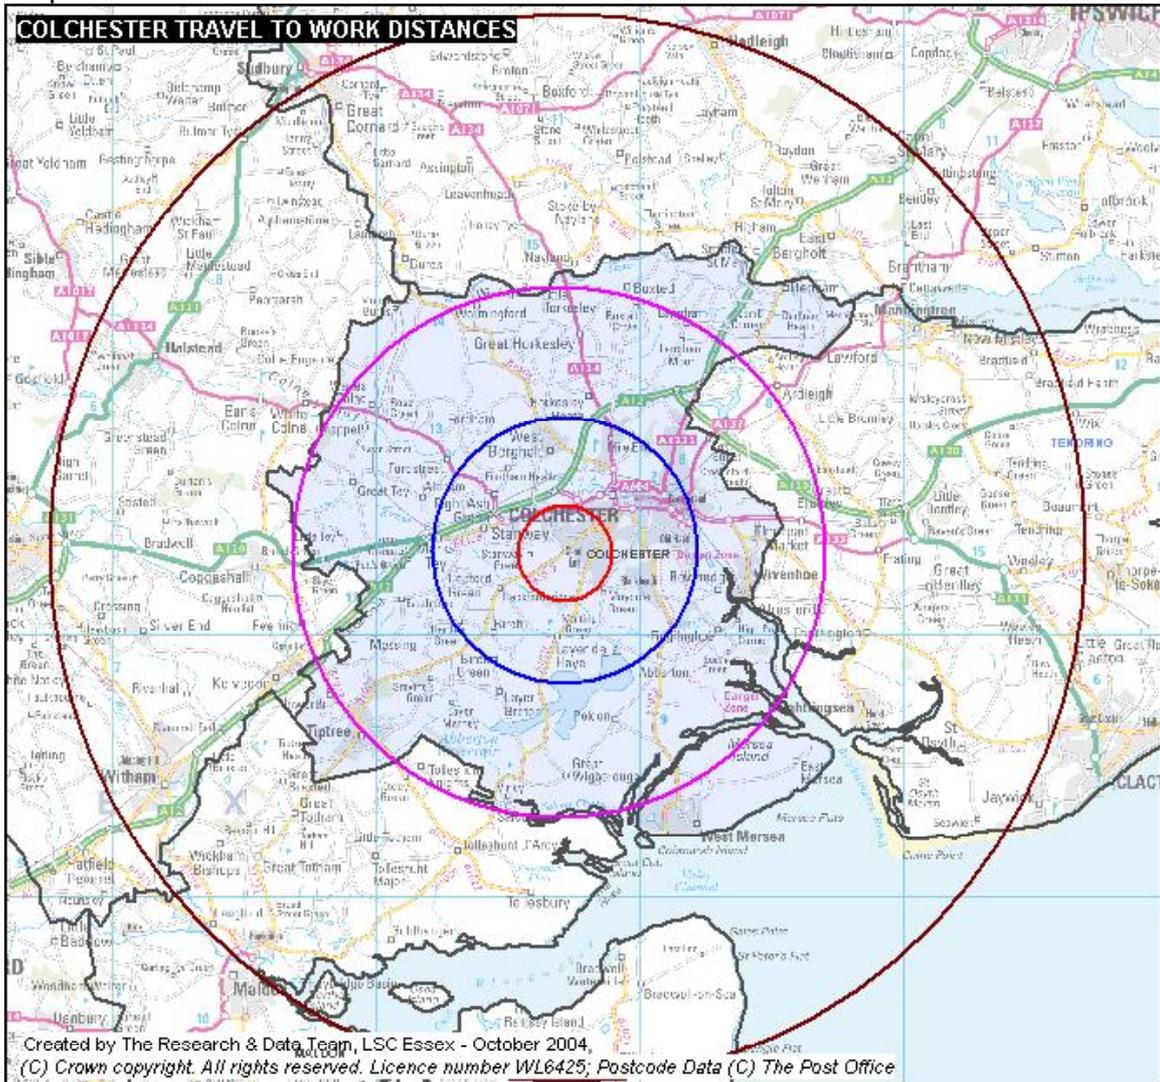

Chart 20

Source: 2001 Census of Population, Office for National Statistics; Population base (16-74 years olds in employment): Colchester, 75,083

The map below shows us a geographical representation of the distance travelled to work by Colchester residents.

Map 4

Source: 2001 Census of Population, Office for National Statistics

Colchester		
All people 75,083		
	Less than 2 km =	15,578
—	2 km to less than 5 km =	17,152
—	5 km to less than 10 km =	9,261
—	10 km to less than 20 km =	6,787
—	20 km to less than 30 km =	4,770

3. Qualification and Skill Levels

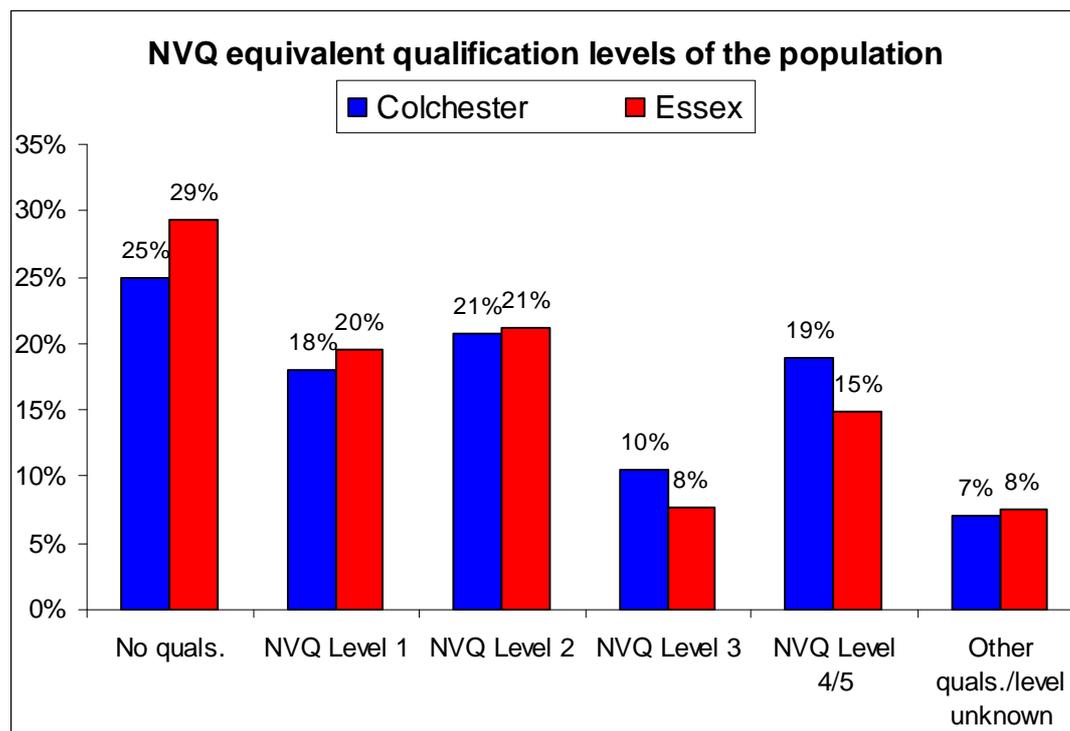

There are many different ways of measuring or assessing an individual's qualifications or skills. Qualifications tend to be easier to measure as each qualification is comprised of a set of criteria to be successfully completed. In addition, many qualifications have been assigned an equivalence level which means it is possible to compare very different qualifications, for example academic and vocational qualifications (for further explanation see NVQ equivalence entry in the glossary). Skills on the other hand, are difficult to measure. Unless gained through some form of qualification it is very difficult to measure via a survey or other written record, that an individual does or does not have a particular skill. Despite this difficulty of measurement, it is important to address the issue of skills as there are a wealth of skills that an individual will possess to a greater or lesser extent which are crucial within everyday life as well as at work.

The following sections will look separately at qualifications in the form of NVQ equivalence and skills by a series of different methodologies.

3.1 NVQ Equivalence

Chart 21 compares the NVQ equivalence of Colchester's population to that of the Essex population. Overall Colchester residents are better qualified than the Essex average, particularly in the higher level qualifications with 19% having an NVQ level 4/5 compared to 15% in Essex. One in four Colchester residents have no qualifications.

Chart 21

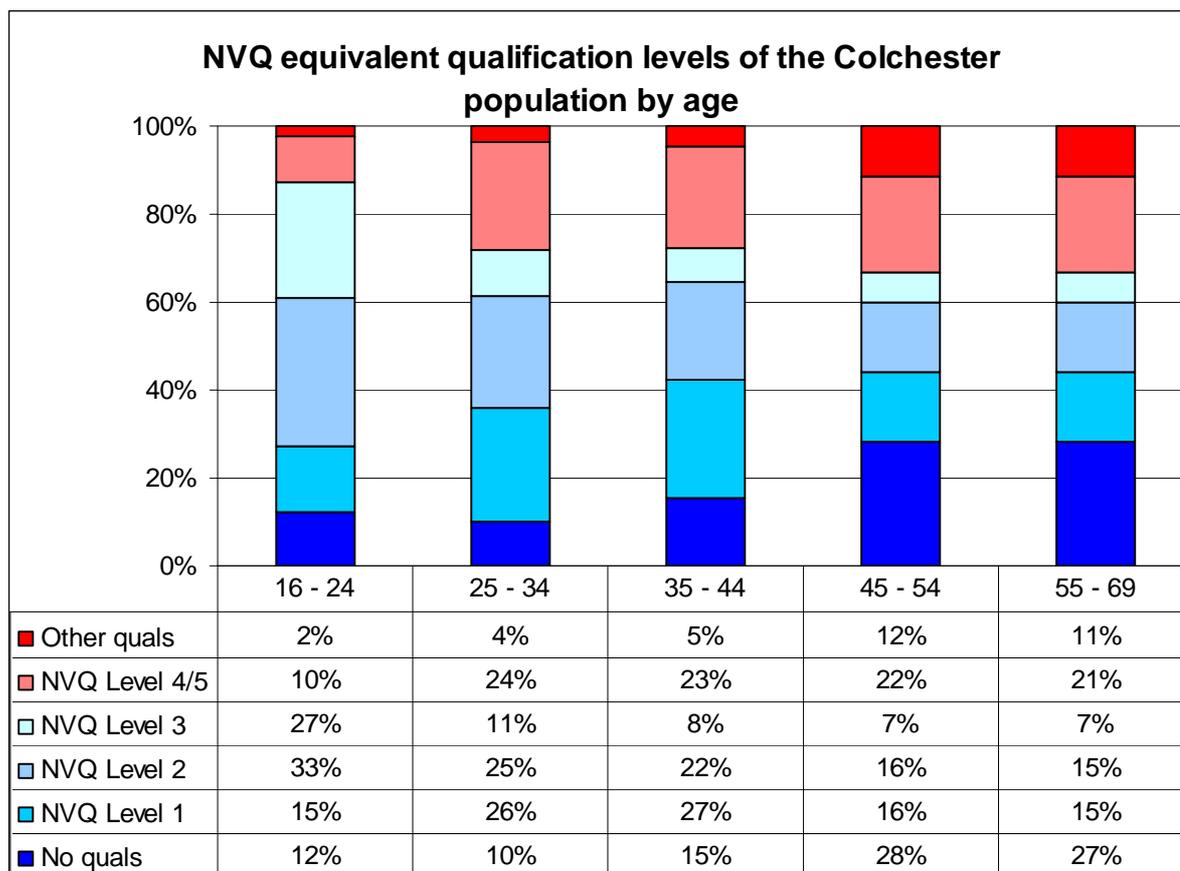

Source: 2001 Census of Population, Office for National Statistics
Population base (16 - 74 years olds): Colchester, 113,768; Essex, 1,160,342

Charts 22, 23 and 24 and table 10 look in more detail at the above data by comparing the NVQ equivalent qualifications by different sub-groups of the Colchester population.

Chart 22 compares the NVQ equivalent data by different age groups. The pattern for Colchester across the age groups shows us that achievement of NVQ level 4/5 is fairly static from 25 onwards, NVQ level 2 and 3 is much greater in the emerging age group and the older age groups are more likely to have no qualifications.

Chart 22

Source: 2001 Census of Population, Office for National Statistics
 Population base: 16 - 24 years, 19,011; 25 - 34 years, 23,333; 35 - 44 years, 22,276; 45 - 54 years, 21,218; 55 - 69 years, 22,249

Table 10 looks at the highest NVQ equivalent qualifications of workers by their occupation. Table 10 shows that those in process, plant & machine and elementary occupations are more likely to have no qualifications. While three quarters of those in professional occupations are likely to hold NVQ level 4/5 qualifications.

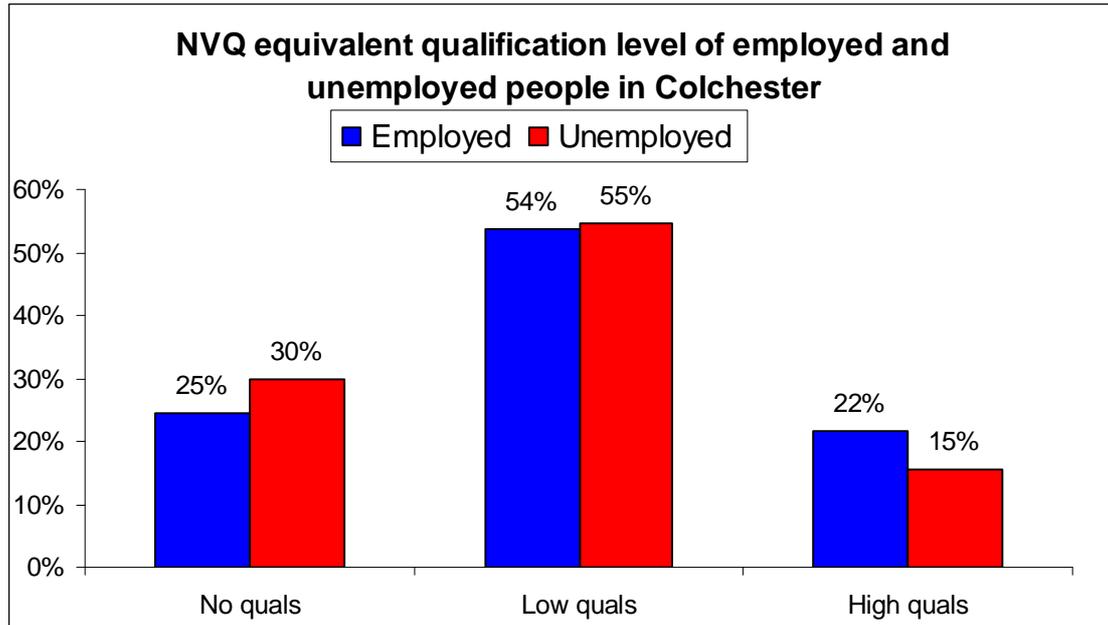

Table 10

Highest NVQ equivalent qualification levels of workers by occupation – Colchester						
% by standard occupational classification	No qual.	NVQ 1	NVQ 2	NVQ 3	NVQ 4/5	Other quals.
Managers & senior	11%	20%	26%	12%	25%	7%
Professional	2%	5%	9%	7%	75%	2%
Associate professional & technical	6%	18%	24%	13%	34%	5%
Administrative & secretarial	11%	23%	31%	16%	12%	6%
Skilled trades	25%	27%	19%	7%	5%	16%
Personal service	23%	23%	26%	12%	11%	6%
Sales & customer service	22%	22%	29%	16%	6%	4%
Process, plant & machine	38%	24%	16%	6%	4%	12%
Elementary	38%	22%	19%	10%	4%	6%

Source: 2001 Census of Population, Office for National Statistics
Population base (16 - 74 years olds): Colchester, 113,768; Essex, 1,160,342

Chart 23 compares the qualification levels of those who are employed with those who are unemployed. While those in Colchester who are employed are less likely to have no qualifications and more likely to have high qualifications, the margins between employed and unemployed are relatively small.

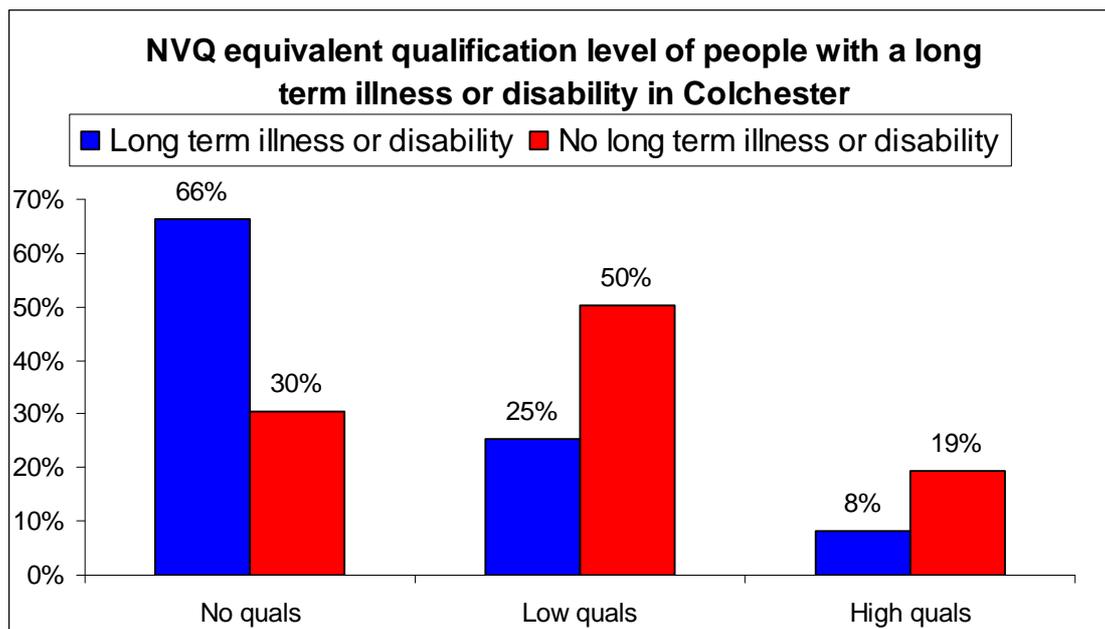

Chart 23

Source: 2001 Census of Population, Office for National Statistics
Population base (16 - 74 year olds): Employed, 72,269; Unemployed, 2,648

Chart 24 compares the qualifications of those people who have a long-term illness or disability with those who do not. Here we see that those with a long-term illness or disability are more than twice as likely to have no qualifications and less than half as likely to have any qualifications than those without a long-term illness or disability.

Chart 24

Source: 2001 Census of Population, Office for National Statistics
Population base (16 - 74 year olds): Long-term illness, 4,884; No illness 108,864

3.2 Assessment of Essential Skills

In this document we refer to skills such as literacy, numeracy and communication skills as essential skills, reflecting the fact that they are essential in everyday life. We use two sources of data relating to essential skills, the Basic Skills Agency (BSA) data and the LSC, Essex Post 16 Learning Survey data – both sources using a different method to measure essential skills. The BSA survey included questions that tested respondents' reading, spelling and numeracy, whereas the Post 16 Learning Survey asked respondents to assess their own level of skill. The differences in the data from the BSA and the Post 16 Learning Survey are likely to be explained by this difference in data collection method.

According to the BSA data, a significant proportion of people in Colchester are estimated to have limited literacy and numeracy skills. They estimate that around 20,400 people - or 21% of those aged between 16 and 60 years - have poor literacy skills, whilst 20,200 - or 21% of those aged between 16 and 60 years - have poor numeracy skills. As table 11 shows, the figures for Colchester are slightly lower than for Essex.

Table 11

Adult literacy and numeracy				
	Total poor literacy		Total poor numeracy	
	Number	%	Number	%
Colchester	20,404	20.8	20,223	20.6
Essex	210,883	22.1	207,062	21.7

Source: Basic Skills Agency, 2001

The LSC, Essex Post 16 Learning Survey offers another measure of the essential skills of Colchester residents. It asked respondents to state whether they feel the need to improve their reading, writing and mathematical skills and also to assess the extent of their ability in certain essential skills.

As table 12 shows, the population of Colchester are considerably more likely than their Essex counterparts to say they need to improve their skills.

Table 12

Self assessment of need to improve essential skills						
	Reading		Writing		Maths	
	Colchester	Essex	Colchester	Essex	Colchester	Essex
Need to improve	17%	8%	16%	9%	20%	14%
No need to improve	79%	87%	80%	86%	76%	81%
Don't know	4%	5%	4%	5%	4%	6%
Total	100%	100%	100%	100%	100%	100%

Source: Post 16 Learning Survey, LSC, Essex, 2001
 Figures may not add due to rounding
 Sample base: Colchester, 194; Essex, 2,662

Tables 13 and 14 show how Colchester residents rate themselves in terms of their level of ability in certain essential skills. Both tables suggest that, Colchester residents consider themselves more likely to have a certain skill at an advanced level than Essex residents.

Table 13

Self assessment of level of ability of essential skills								
	Numeracy skills		Reading skills		Spoken ability		Writing skills	
	Colchester	Essex	Colchester	Essex	Colchester	Essex	Colchester	Essex
Advanced level	39%	32%	61%	49%	64%	51%	62%	49%

 Figures may not add due to rounding
 Sample base (16 – 69 year olds): Colchester, 194; Essex, 2,662

4. Participation in Learning

Table 15 shows the number of Colchester residents who are participating in LSC funded learning, by age and sector – please see footnote ^(a) in the table.

Table 15

Number of learners in LSC funded provision					
Colchester	Further Education	School VI form	Work Based Learning	Adult Community Learning ^(a)	All sectors
16-18	2,363	483	512	25	3,383
19+	9,837	n/a	341	2,420	12,598

Source:

FE – Individualised Learner Record, 2002/2003

School VI form – Pupil Level Annual School Census (PLASC), 2002/2003

WBL – Individualised Learner Record, 2003/2004

ACL - Individualised Learner Record, 2003/2004 (non-accredited)

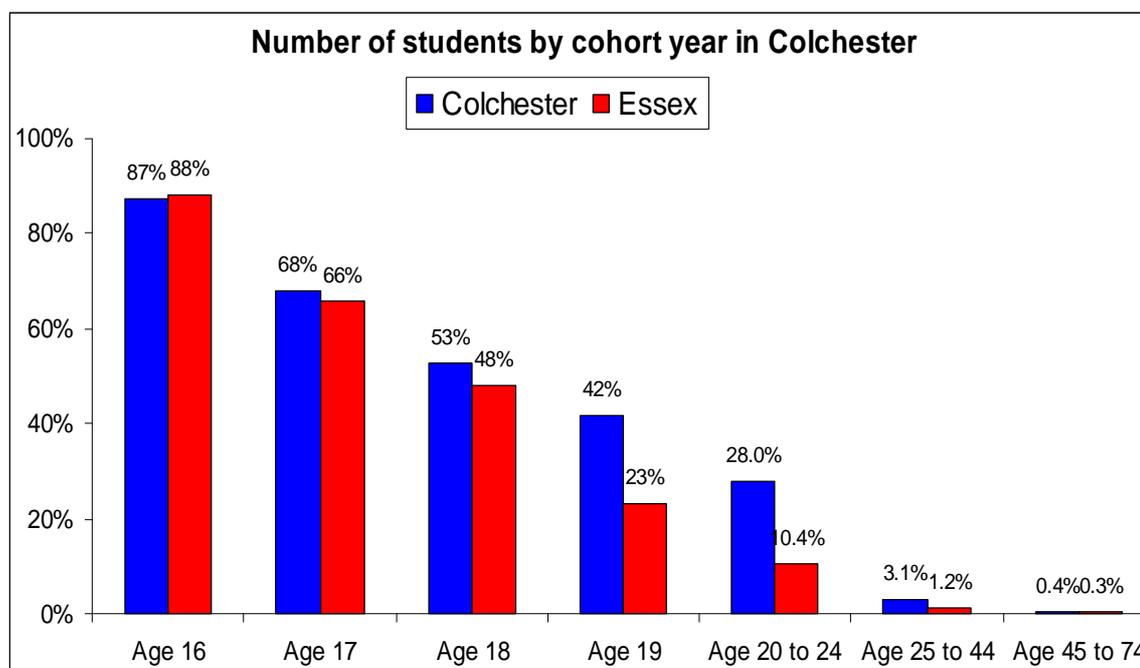

Notes:

Includes learners whose age is not recorded in 19+

(a) For the ACL sector the ILR captures LSC funded FE provision only. FE provision covers everything in the former Schedule 2 category, which includes some non-accredited courses, but covers predominantly accredited courses. The LSC does fund former non-schedule 2 provision in the ACL sector, but this is not recorded by the ILR. See the Adult Community Learning section for further information.

Chart 25 indicates the number of students there are in Colchester by a particular year or age group as compared to Essex. As can be seen there are a greater number of students in every cohort year except those aged 16 when compared to the Essex average. The 19+ percentage is almost double that of the Essex average.

Chart 25

Source: 2001 Census of Population, Office for National Statistics

Population base:

Colchester, Age 16, 1,871; Age 17, 1,889; Age 18, 1,915; Age 19, 2,287; Age 20-24, 11,050;
Age 25-44, 45,603; Age 45-74, 49,156

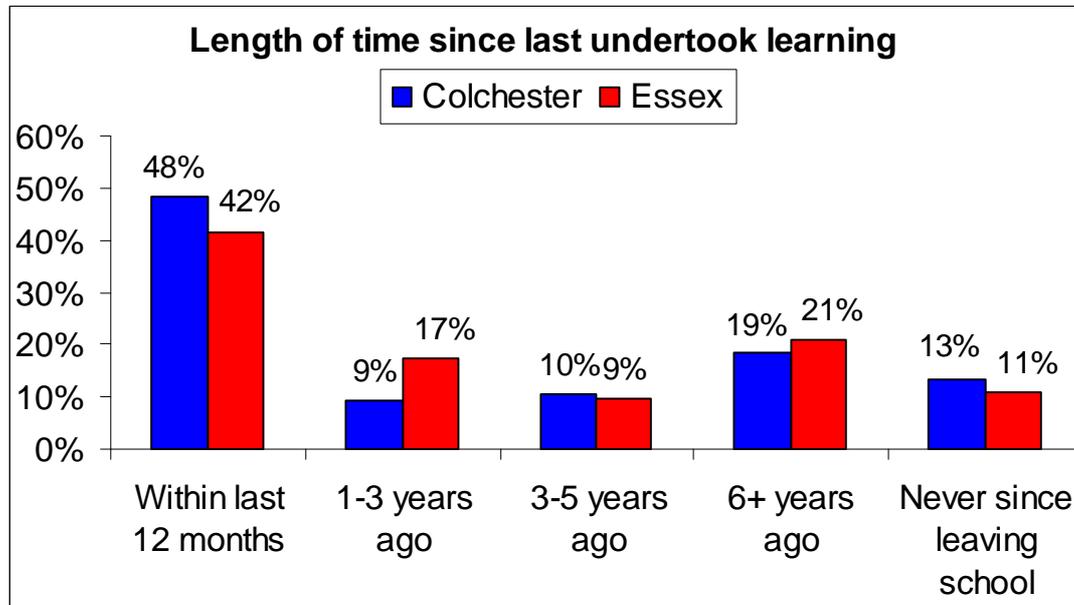

Essex, Age 16, 19,966; Age 17, 19,289; Age 18, 17,614; Age 19, 16,499; Age 20-24, 86,703;
Age 25-44, 459,027; Age 45-74, 541,244

The next two sections will address the learning patterns and behaviours of adults and then specifically of young people. Both sections will follow a similar format, covering areas such as the job related and other benefits of learning, barriers to learning, sources of learning related advice and the likelihood of future learning. The adult section will also look at other issues such as the length of time since learning. The young people section also looks at the intended first destination of the 2000/2001 cohort of Year 11 pupils after finishing their compulsory education. The adult section reports data from the LSC, Essex Post 16 Learning Survey, while the young people section reports data from the LSC, Essex 16-18 Learning Survey and the Connexions Year 11 Activity Survey.

4.1 Learning Patterns of Adults

Chart 26 shows how long ago Colchester adult residents last undertook any form of learning (see glossary for definition of learning used). Almost half (48%) undertook learning in the last 12 months, while just over one in ten (13%) residents have not undertaken learning since leaving school. Overall, the pattern for Colchester residents is similar to that for Essex residents.

Chart 26

Source: Post 16 Learning Survey, LSC, Essex, 2001

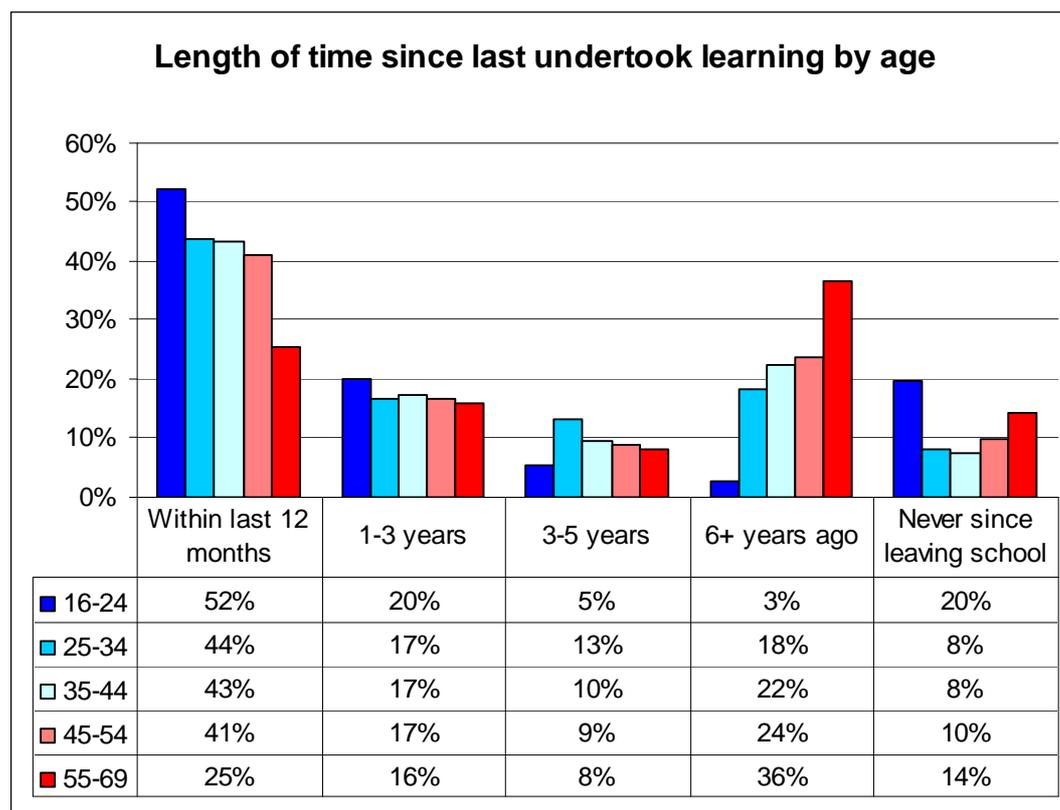

Sample bases: Colchester, 194; Essex, 2,662

Population bases (16-65 year olds): Colchester, 105,000; Essex, 1,013,000

Charts 27, 28 and 29 further explore the above data by looking at the length of time since learning for various sub groups of the Essex population (due to the limited survey sample size at the district level it is not possible to use district level data).

Chart 27 looks at the length of time since last undertaking learning by age group. As the chart shows, there is a strong relationship between participation in learning and age - only 25% of those aged between 55 and 69 took part in learning in the last year compared to 52% of those aged between 16 and 24.

Chart 27

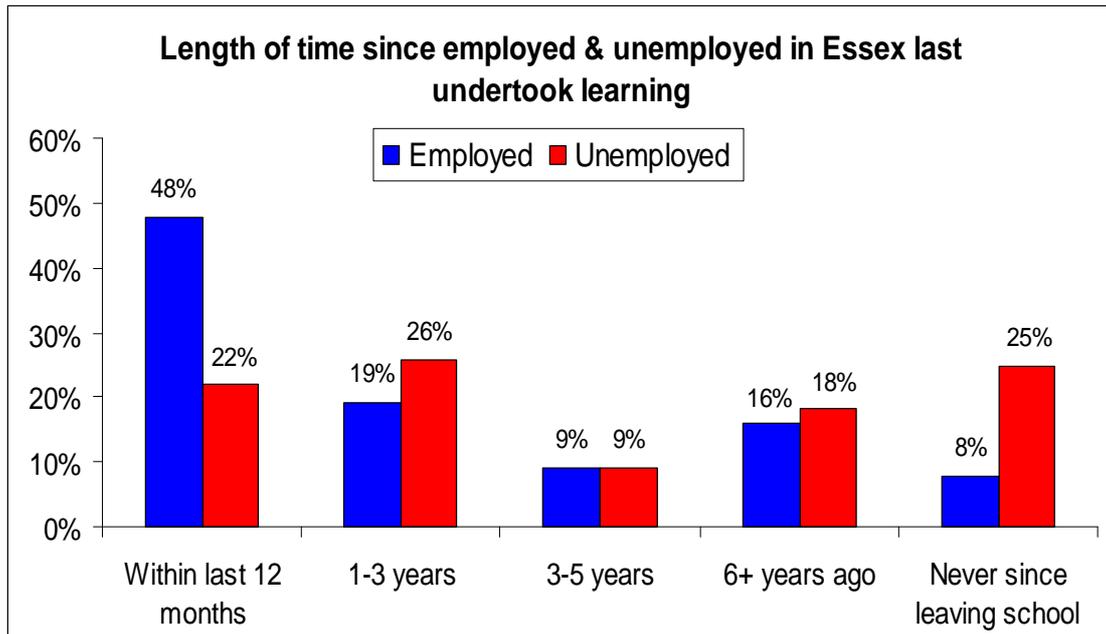

Source: Post 16 Learning Survey, LSC, Essex, 2001

Sample bases: 16-24 years, 384; 25-34 years, 583; 35-44 years, 808; 45-54 years, 514; 55-65 years, 373

Population bases: 16-24 years, 146,000; 25-34 years, 222,000; 35-44 years, 307,500; 45-54 years, 195,500; 55-65 years, 142,000

Chart 28 compares the learning patterns of the employed and unemployed population in Essex. The chart shows that the employed are more than twice as likely to have taken part in learning in the last 12 months than the unemployed. Conversely, one in four (25%) of the unemployed have not taken part in any sort of learning since leaving school compared to only eight per cent of those who are employed.

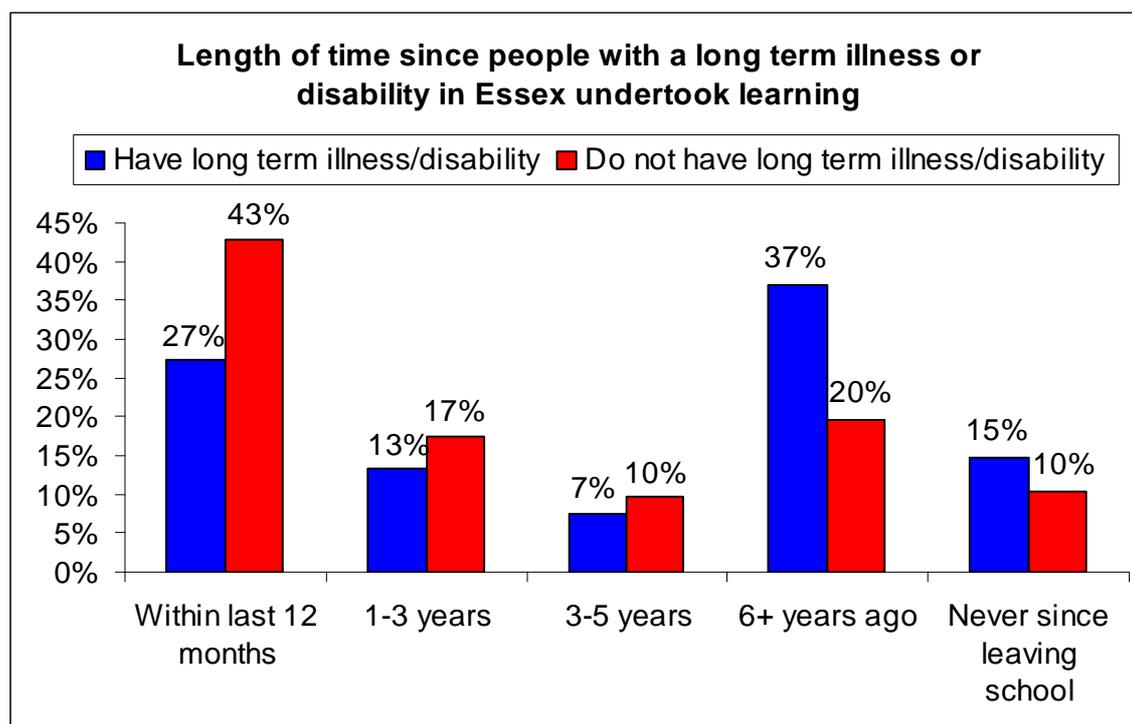

Chart 28

Source: Post 16 Learning Survey, LSC, Essex, 2001
 Base: Employed, 1,882; Unemployed, 109
 Population bases: Employed, 716,000; Unemployed 41,500

Chart 29 compares the length of time since undertaking any learning with those who have a long-term illness or disability with those who do not. As the chart shows, those who have a long-term illness or disability are less likely to have participated in learning over the last year.

Chart 29

Source: Post 16 Learning Survey, LSC, Essex, 2001

Sample bases: Have long-term illness/disability, 202; do not have long-term illness/disability, 2,453

Population bases: Have long-term illness/disability, 77,000; do not have long-term illness/disability, 936,000

Table 16 shows the reasons for learning given by those who have participated in learning in the last 12 months. Most learning undertaken is job related, with 87% of learners in Colchester undertaking training for job related reasons. This is slightly higher than the Essex average.

Table 16

Reasons for undertaking learning in the last 12 months		
	Colchester	Essex
	% of all learners in last 12 months	
Job related	87%	83%
Personal interest or development	23%	22%

Source: Post 16 Learning Survey, LSC, Essex, 2001

Figures may not add due to rounding

Sample bases (16 – 69 year old learners in last 12 months): Colchester, 94; Essex, 1,109

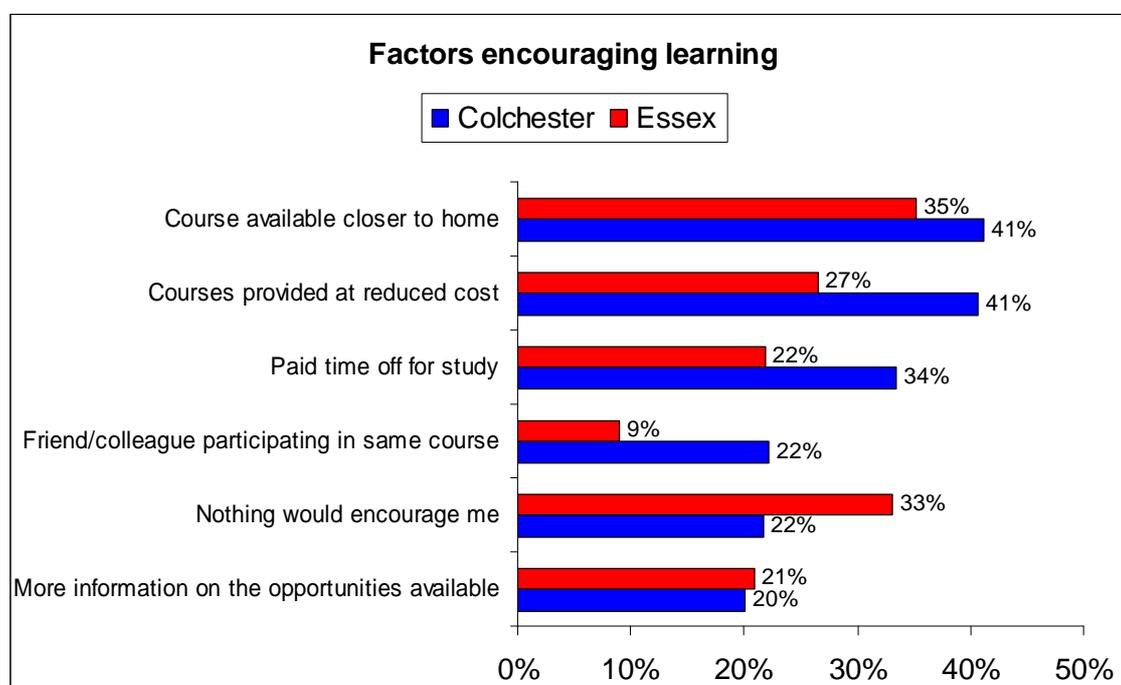

4.1.1 Motives, Barriers and Benefits of Learning for Adults

A key aim of the LSC, Essex Post 16 Learning Survey was to explore issues around which factors encourage Essex residents to learn, which act as barriers and what they perceive to be the key benefits of learning.

All residents were asked both what factors would encourage them to learn along with what factors would stop them learning.

Chart 30 shows the top six factors that would encourage Colchester residents to participate in learning. Courses being available close to home and provided at reduced cost appears to be of particular importance to potential learners in Colchester. Two-fifths (41%) of all residents state these as factors which would encourage learning, while just 35% and 27% respectively of all Essex residents do so. Paid time off for study is also an incentive to learn for Colchester residents.

Chart 30

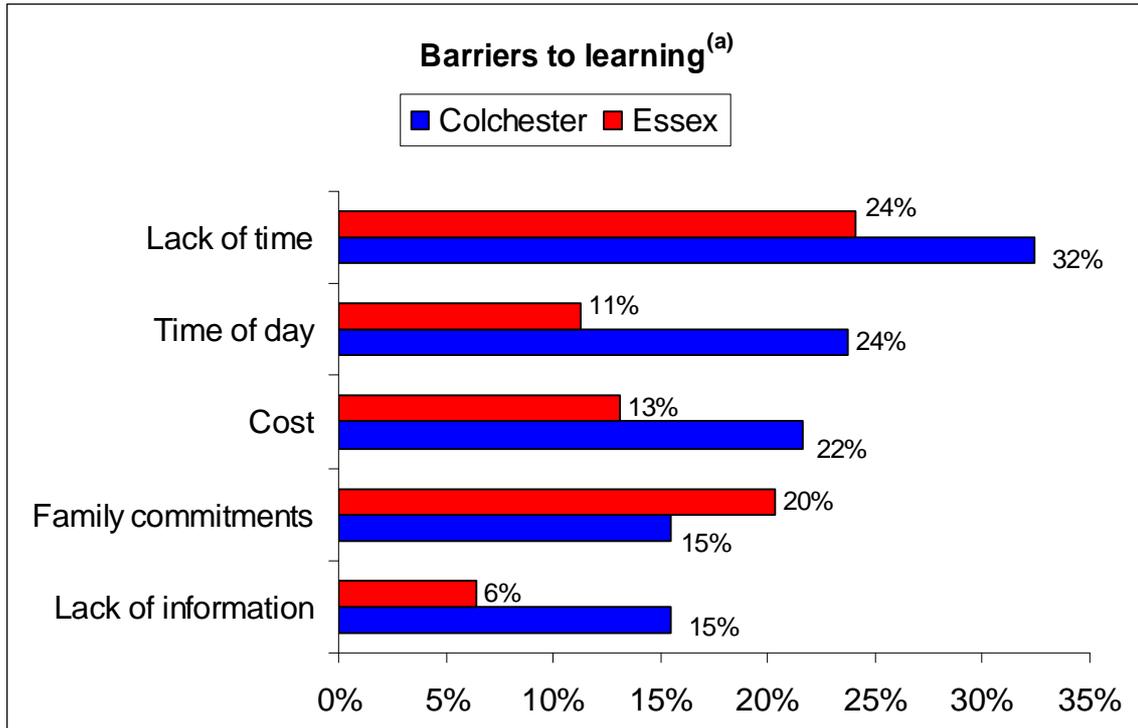

Source: Post 16 Learning Survey, LSC, Essex, 2001

Sample bases: Colchester, 194; Essex, 2,662

Population Base (16-65 year olds): Colchester, 105,000; Essex, 1,013,000

Chart 31 shows the top five barriers to learning for Colchester residents. The barriers perceived by Colchester residents are very different to those of Essex residents with lack of time being the key barrier for almost a third of people (Colchester, 32%; Essex, 24%). One in four Colchester residents (24%), cite time of day as opposed to only 11% of Essex residents.

Chart 31

Source: Post 16 Learning Survey, LSC, Essex, 2001

Sample bases: Colchester, 194; Essex, 2,662

Population bases (16-65 year olds): Colchester, 105,000; Essex, 1,013,000

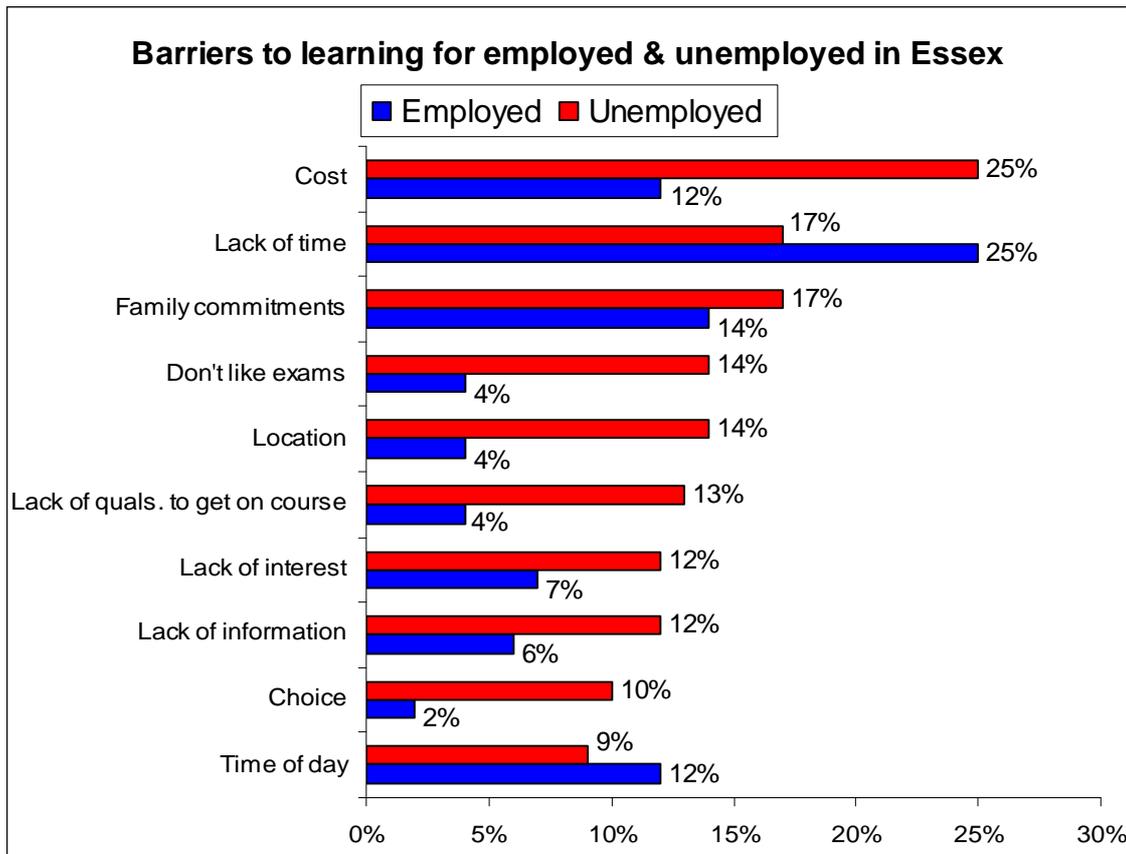

Notes:

(a) Includes factors that are either a 'fairly significant' or a 'significant' barrier

Charts 32 and 33 examine the above data in more detail by looking at the barriers to learning by two different sub groups of the Essex population (due to the limited survey sample size at the district level it is not possible to use district level data).

Chart 32 compares the barriers to learning for the employed and unemployed population in Essex. The unemployed are more likely to cite cost of learning as a barrier, whilst those who are employed rank lack of time and time of day as their main barriers.

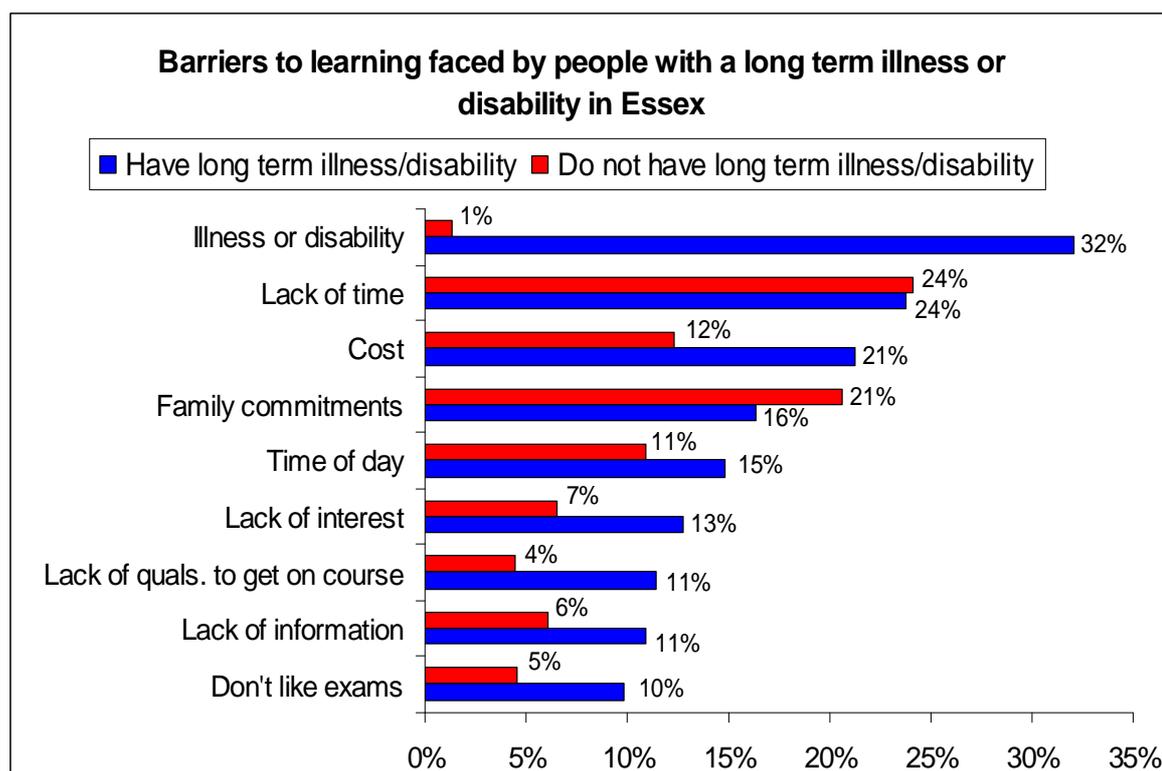

Chart 32

Source: Post 16 Learning Survey, LSC, Essex, 2001
 Base: Employed, 1,882; Unemployed, 109
 Population bases: Employed, 716,000; Unemployed 41,500

Chart 33 compares the barriers to learning for those who have a long-term illness or disability with those who do not. Significantly, one in three (32%) of those who have a long-term illness or disability state that their actual illness or disability is the main barrier to their learning.

Chart 33

Source: Post 16 Learning Survey, LSC, Essex, 2001

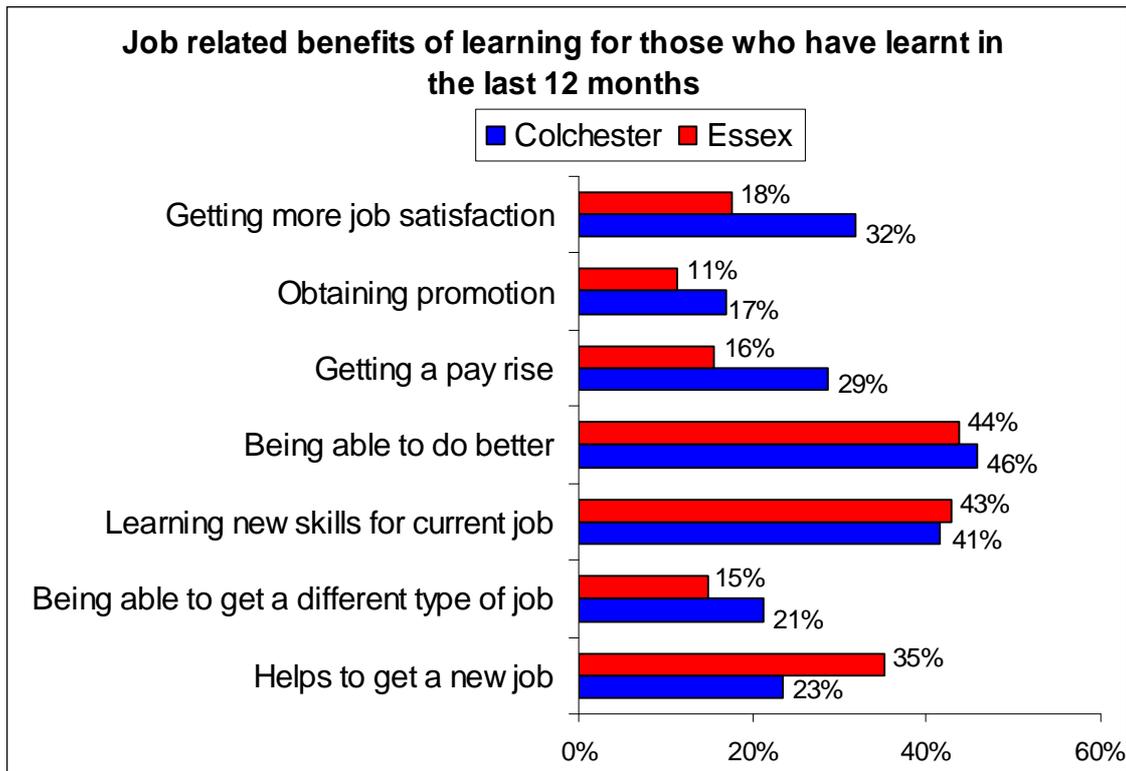

Sample bases: Have long-term illness/disability, 202; do not have long-term illness/disability, 2,453

Population bases: Have long-term illness/disability, 77,000; do not have long-term illness/disability, 936,000

Those residents who had taken part in learning in the last 12 months were asked about the benefits they thought they had received from their learning. The benefits were listed in terms of job related and other benefits.

In terms of job related benefits, as chart 34 shows, almost half of Colchester residents say they benefited from learning in order to do there job better (46%) and learning new skills for their job (41%), in line with Essex learners. Colchester learners differ from Essex learners in that they are more likely to cite the benefits of job satisfaction and getting a pay rise.

Chart 34

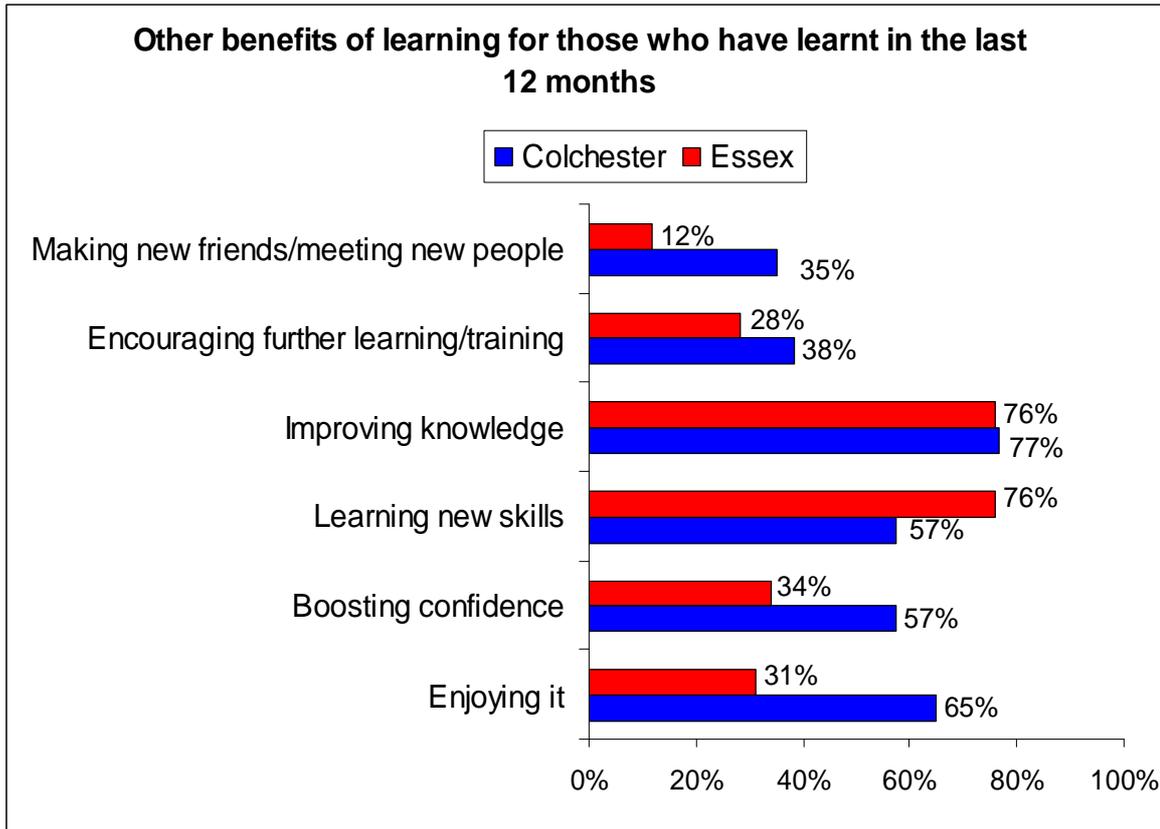

Source: Post 16 Learning Survey, LSC, Essex, 2001

Sample bases: Colchester, 94; Essex, 1,109

Population bases (16-65 year old learners in last 12 months): Colchester, 50,900; Essex, 422,000

As chart 35 shows, improving knowledge (77%), enjoying it (65%) and boosting confidence/learning new skills (both 57%) were the top three scoring other benefits of recent learning for Colchester learners.

Chart 35

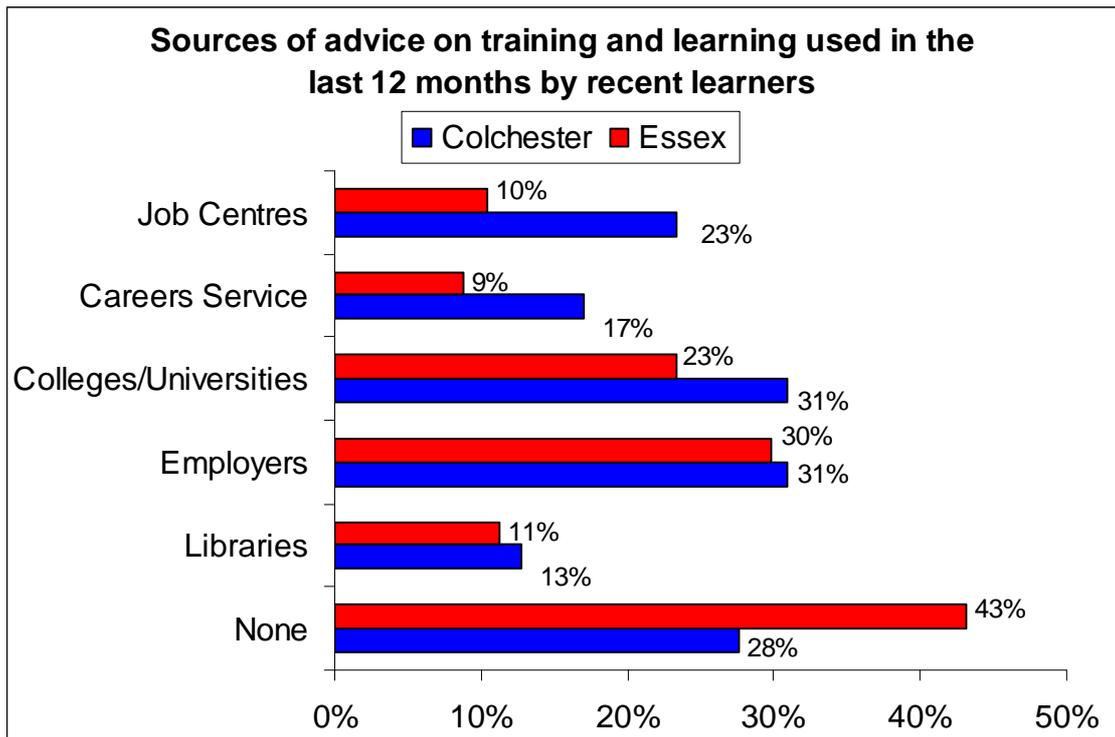

Source: Post 16 Learning Survey, LSC, Essex, 2001
 Sample bases: Colchester, 94; Essex, 1,109
 Population bases (16-65 year old learners in last 12 months): Colchester, 50,900; Essex, 422,000

4.1.2 Information, Advice and Guidance for Learning

Colchester learners are considerably more likely to seek information, advice or guidance for learning than all Essex learners. As chart 36 shows, two in five Essex learners say they had no sources of advice as opposed to only one in four in Colchester. Of those that did get advice, the most popular sources for this is shared by colleges/universities and the workplace, both at 31%.

Chart 36

Source: Post 16 Learning Survey, LSC, Essex, 2001

Sample bases: Colchester, 94; Essex, 1,109

Population bases (16-65 year old learners in last 12 months): Colchester, 50,900; Essex, 422,000

4.1.3 Future Learning Plans of Adults

In terms of their plans for future learning, Colchester residents' views of what they will do slightly differ from that of all Essex residents. As table 17 shows, while a third of Colchester and Essex residents say that they plan to learn within the next year, considerably more Colchester residents are considering it in the future. Less than Essex, about one in four say they have no plans for any future learning.

Table 17

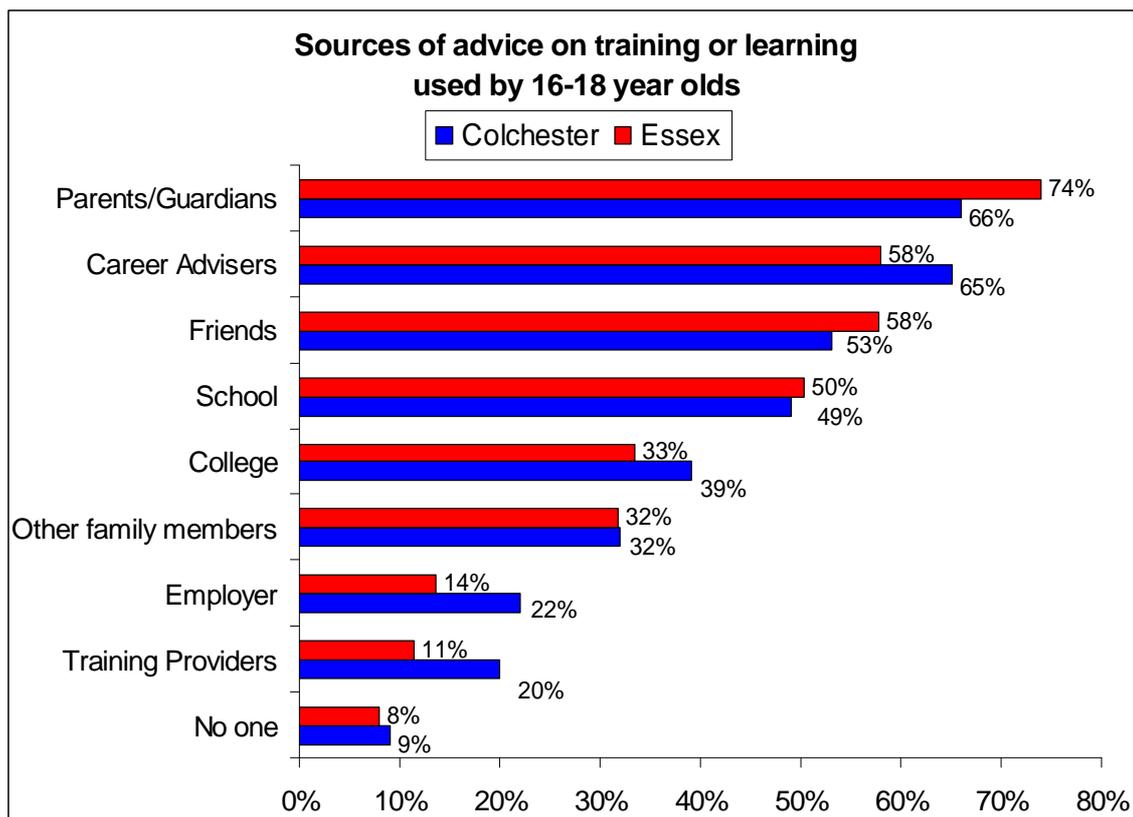

Likelihood of participating in learning in future		
	Colchester	Essex
	% of population	
Within the next 12 months	33%	31%
Not within the next 12 months but possibly at a later date	32%	23%
No plans for future learning	23%	33%

Source: Post 16 Learning Survey, LSC, Essex, 2001
Sample bases: Colchester, 194; Essex, 2,662
Population bases (16-65 year olds): Colchester, 105,000; Essex, 1,013,000

4.2 Learning Patterns of Young People

Young people were asked whom, if anyone, they went to for advice about their plans after leaving Year 11. As chart 37 shows, Colchester young people differ from Essex young people, with two in three using their parents/guardians and careers advisors as a source of advice.

Chart 37

Source: 16-18 Learning Survey, LSC, Essex, 2002

Sample bases: Colchester, 100; Essex, 1,420

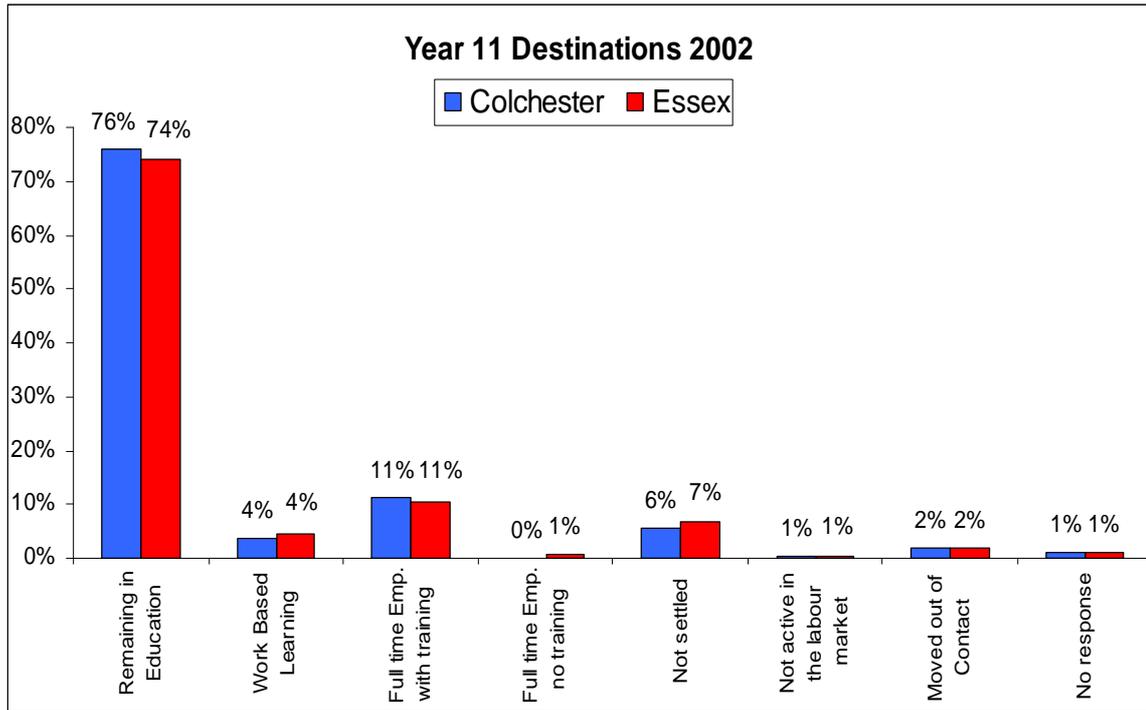

Population bases (16-18 year olds): Colchester, 2,900; Essex, 23,700

4.2.1 Destinations of Year 11 Leavers

Each year the Connexions service completes an Activity Survey of Year 11 school leavers from all schools in Essex. It tracks the intended next step of all Year 11 leavers. The data for the survey is collected for every Year 11 pupil attending a school in Essex, as such, the data presented in this section is based on pupils who attended any school in the district of Colchester regardless of where they reside.

Chart 38 shows the intended first destination all Year 11 Leavers at the end of the 2000-2001 academic year. As chart 37 shows a clear majority continue in education, slightly higher than the Essex average 76% to 74%.

Chart 38

Source: Connexions Activity Survey, 2002

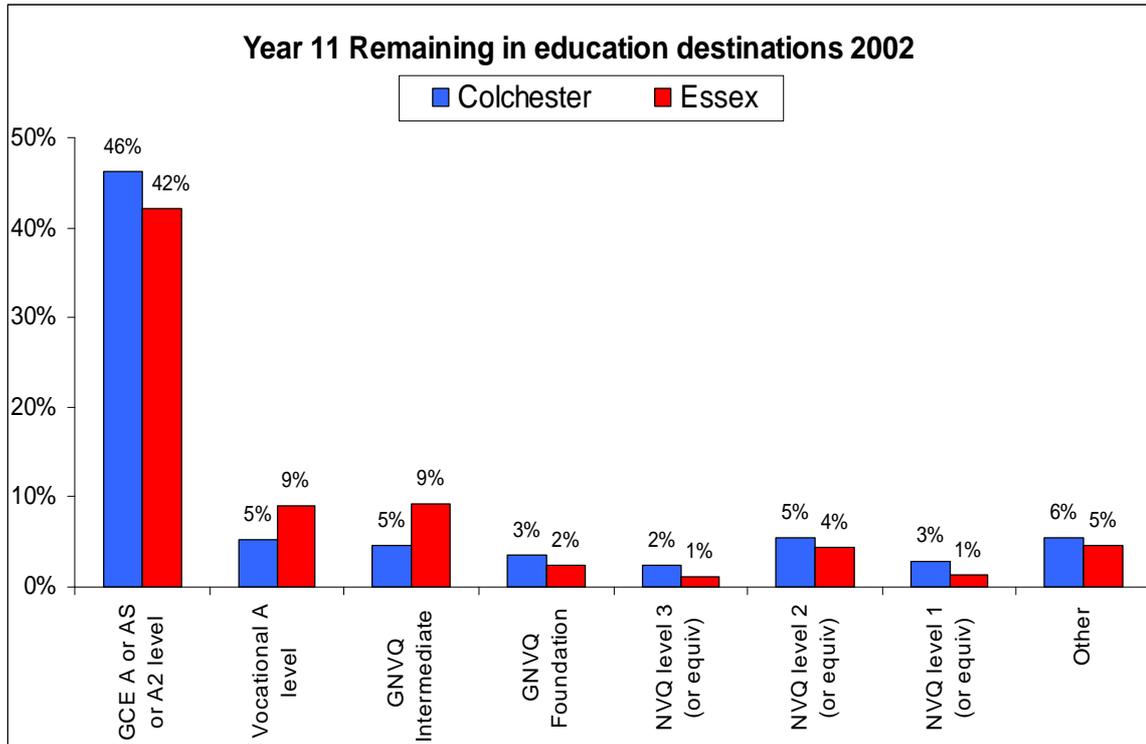

Base: Colchester, 1,899; Essex, 19,586

Note:

Expressed as a percentage of all Year 11 leavers

Chart 39 looks in more detail at the group that continue in education. Of those students remaining in education almost half pursue A level studies compared to 42% in Essex.

Chart 39

Source: Connexions Activity Survey, 2002

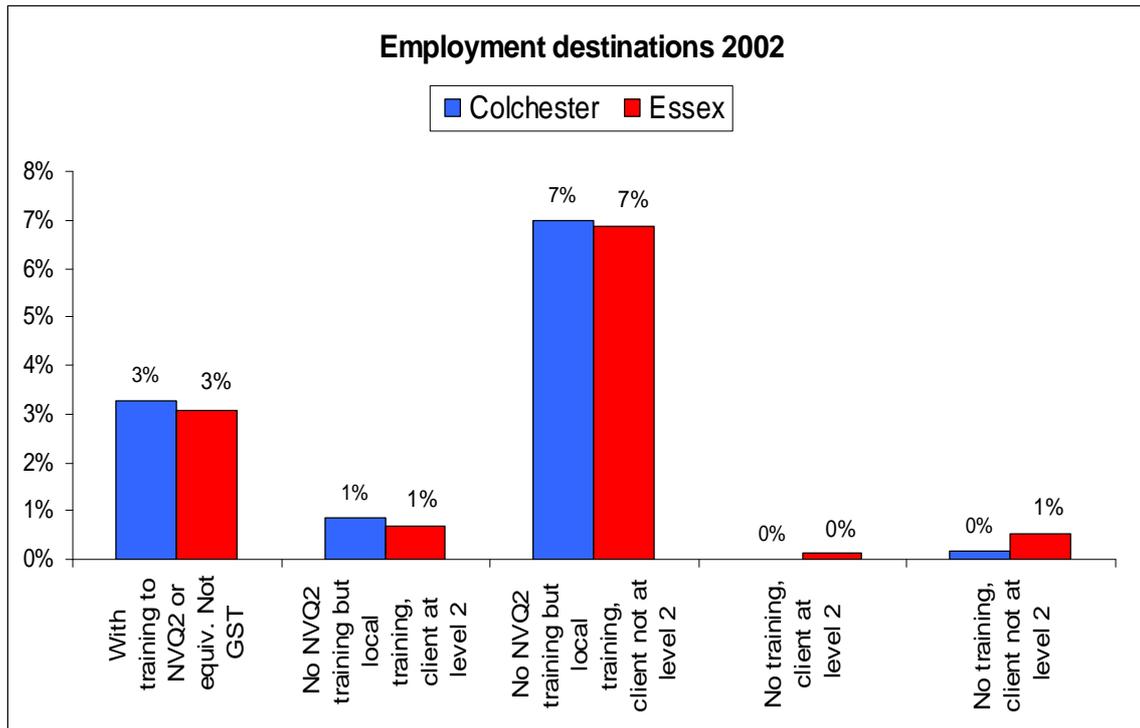

Base: Colchester, 1,899; Essex, 19,586

Note:

Expressed as a percentage of all Year 11 leavers remaining in education

Chart 40 focuses on the 11% of Colchester leavers that intended to move to some form of employment. The figures for Colchester are almost identical to that of Essex. It should be noted that the WBL referred to in chart 37 includes all those who are classed as WBL with employed status, whereas chart 40 refers only to those who are referred to as non-employed status (see glossary for details).

Chart 40

Source: Connexions Activity Survey, 2002

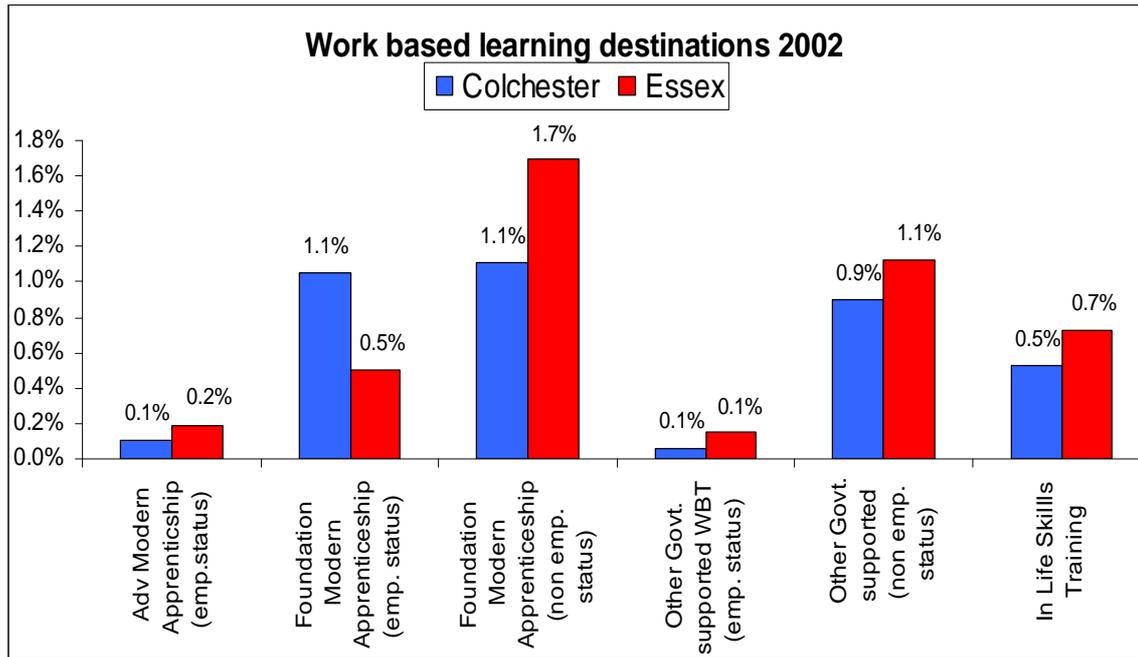

Base: Colchester, 1,899; Essex, 19,586

Note:

Expressed as a percentage of all Year 11 leavers entering employment

Chart 41 looks at the group of leavers who have entered WBL, but do not have a job (see glossary for details). Foundation modern apprenticeships, both employed and non employed status, are by far the most popular choices for this route in Colchester.

Chart 41

Source: Connexions Activity Survey, 2002

Base: Colchester, 1,899; Essex, 19,586

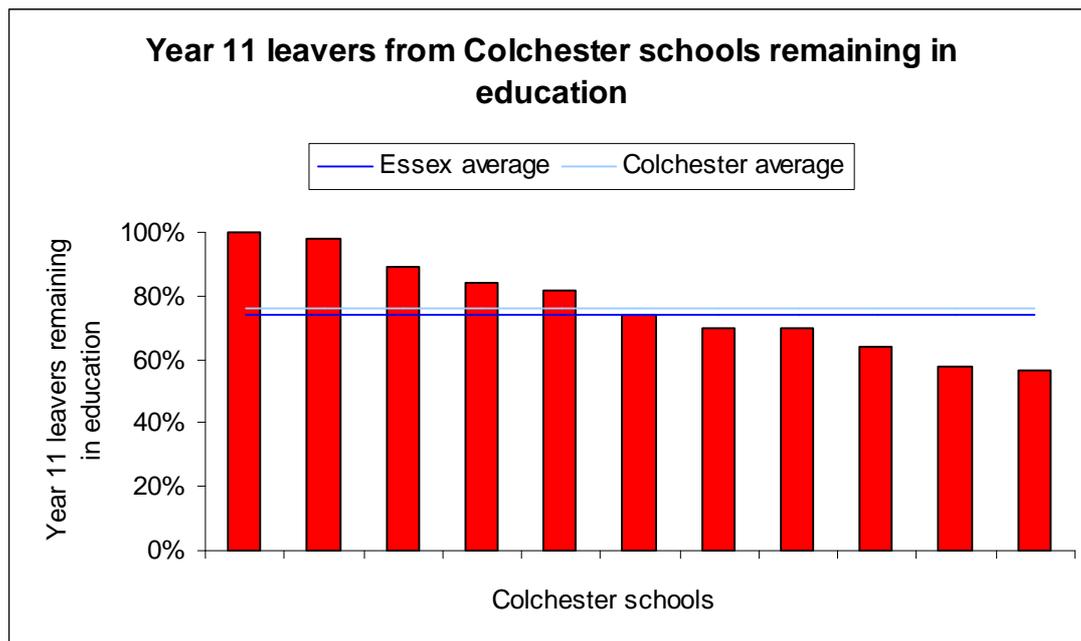

Note:

Expressed as a percentage of all Year 11 leavers entering WBL

Charts 42 to 45 are based on the same Activity Survey Data, but explore the patterns of first destinations by the schools within the district in more detail. Each chart compares the LEA-maintained schools in Colchester (schools are not named) with the average figures based on all LEA-maintained schools in Essex.

Chart 42 shows the proportion of Year 11 leavers continuing in education for each LEA-maintained school in Colchester.

Chart 42

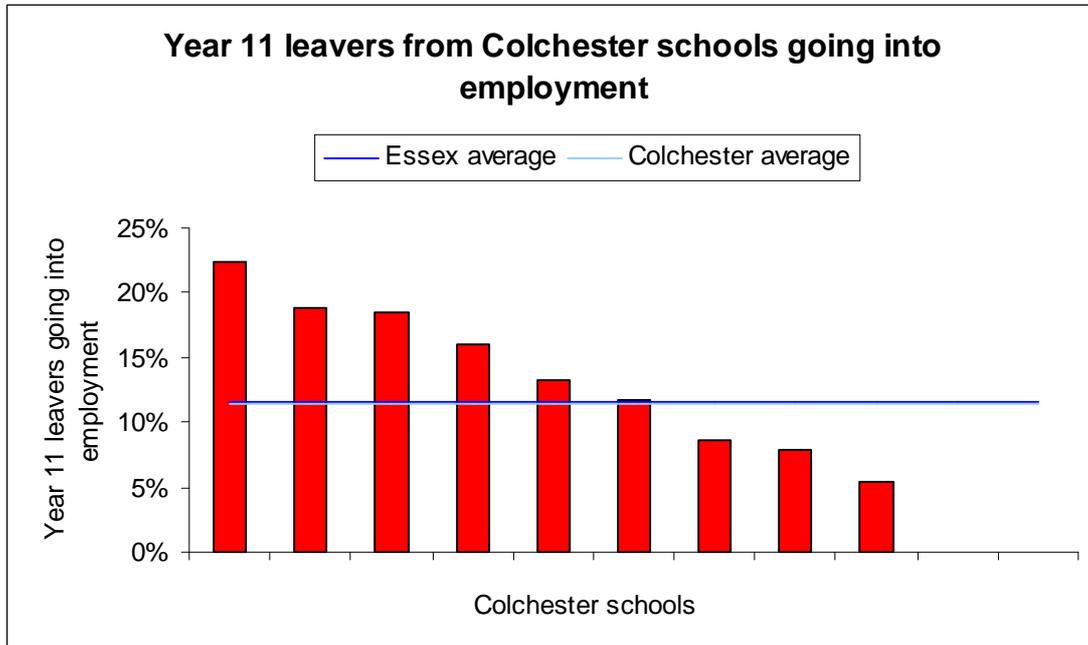

Source: Connexions Activity Survey, 2002

Note: Expressed as a percentage of the total number of Year 11 leavers

Chart 43 shows the proportion of Year 11 leavers entering employment for each LEA-maintained school in Colchester.

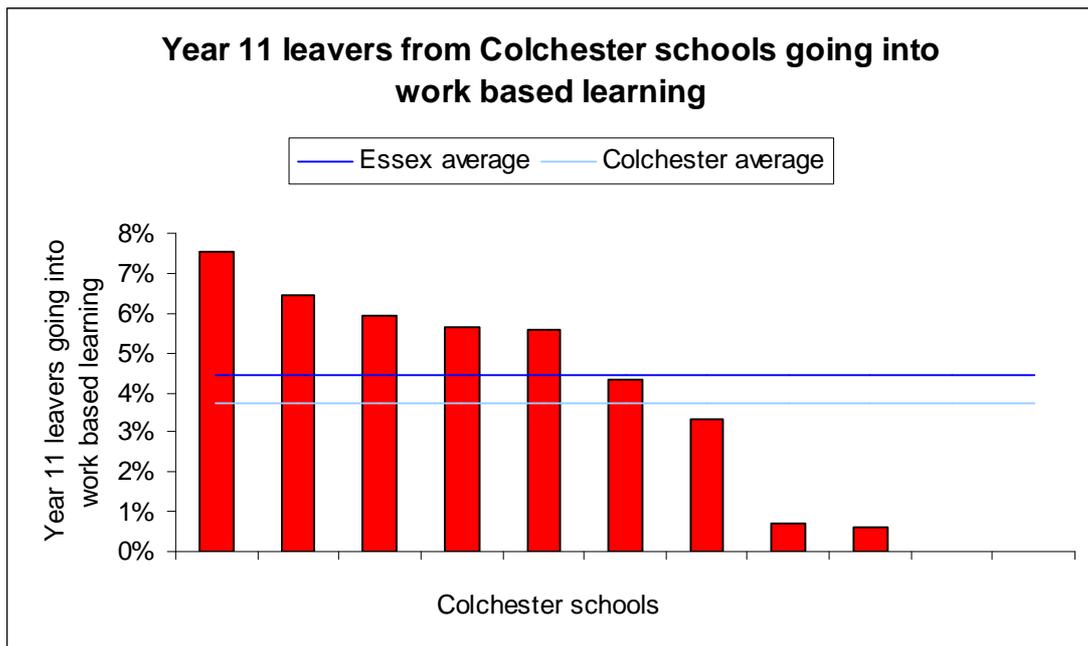

Chart 43

Source: Connexions Activity Survey, 2002
 Note: Expressed as a percentage of the total number of Year 11 leavers

Chart 44 shows the proportion of Year 11 leavers entering non-employed work based learning for each LEA-maintained school in Colchester.

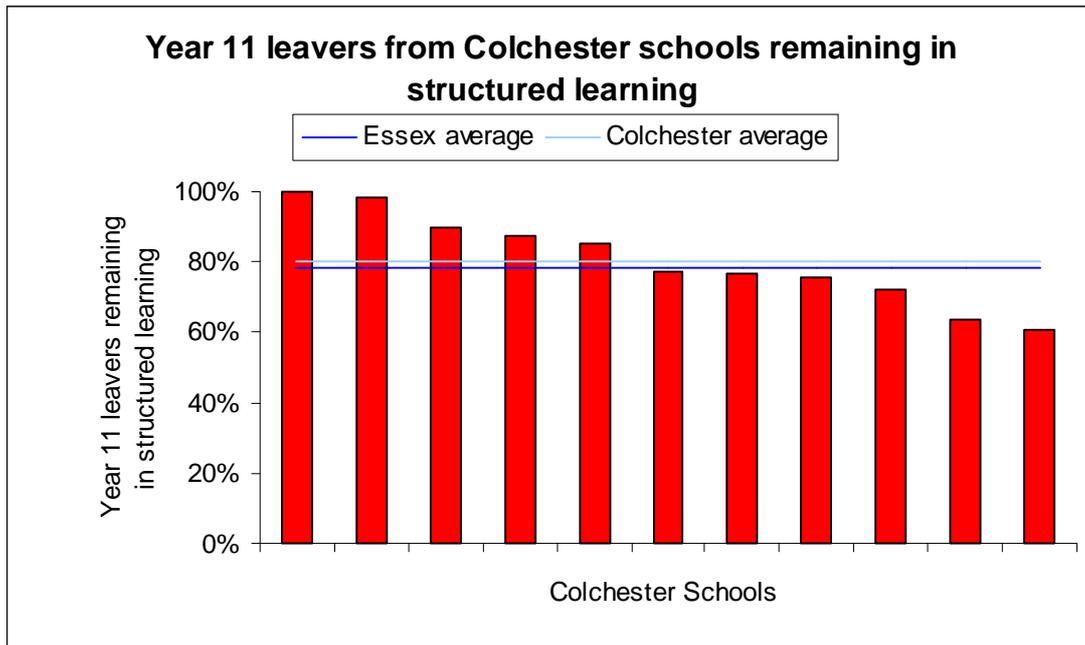

Chart 44

Source: Connexions Activity Survey, 2002
 Note: Expressed as a percentage of the total number of Year 11 leavers

Another way of analysing the first destination of Year 11 leavers is to look at all those who enter a form of structured learning as shown in chart 45. The definition of structured learning is remaining in education and non-employed work based learning.

Chart 45

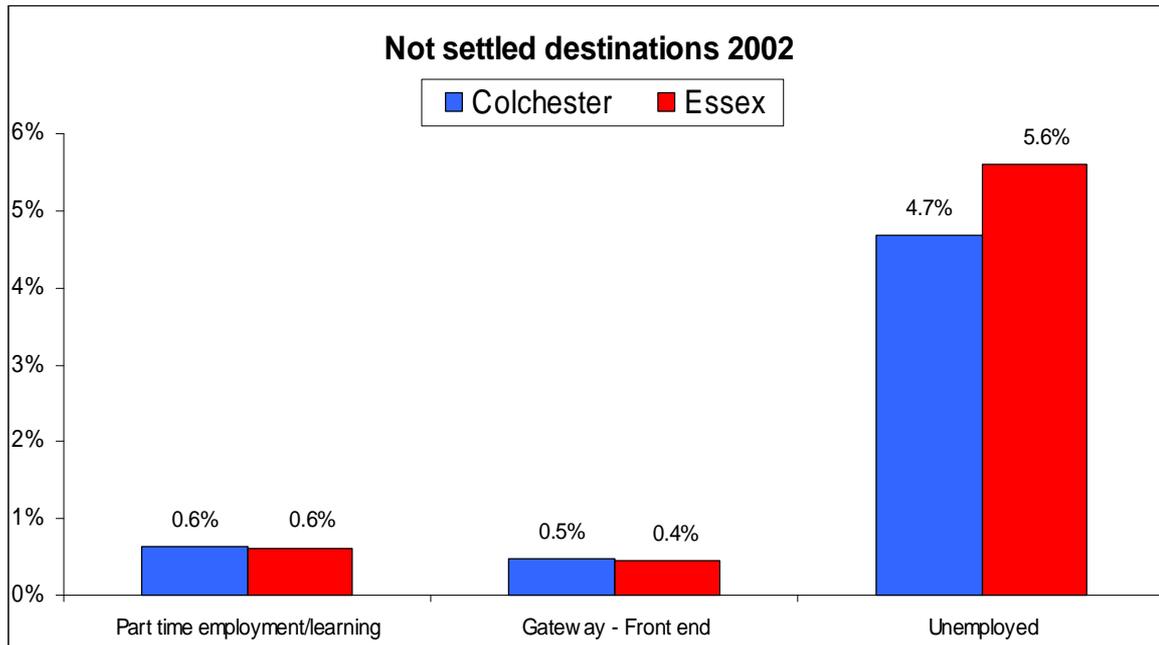

Source: Connexions Activity Survey, 2002

Note: Expressed as a percentage of the total number of Year 11 leavers

Chart 46 is also based on data from the Connexions Year 11 Leavers Survey. The chart looks at all those whose first destination after leaving Year 11 is not full time education or employment – in the survey their first destination is classed as ‘not settled’. As chart 45 shows Colchester leavers are slightly less likely to be unemployed when they leave school than their Essex counterparts.

Chart 46

Source: Connexions Activity Survey, 2002

Base: Colchester, 1,899; Essex, 19,586

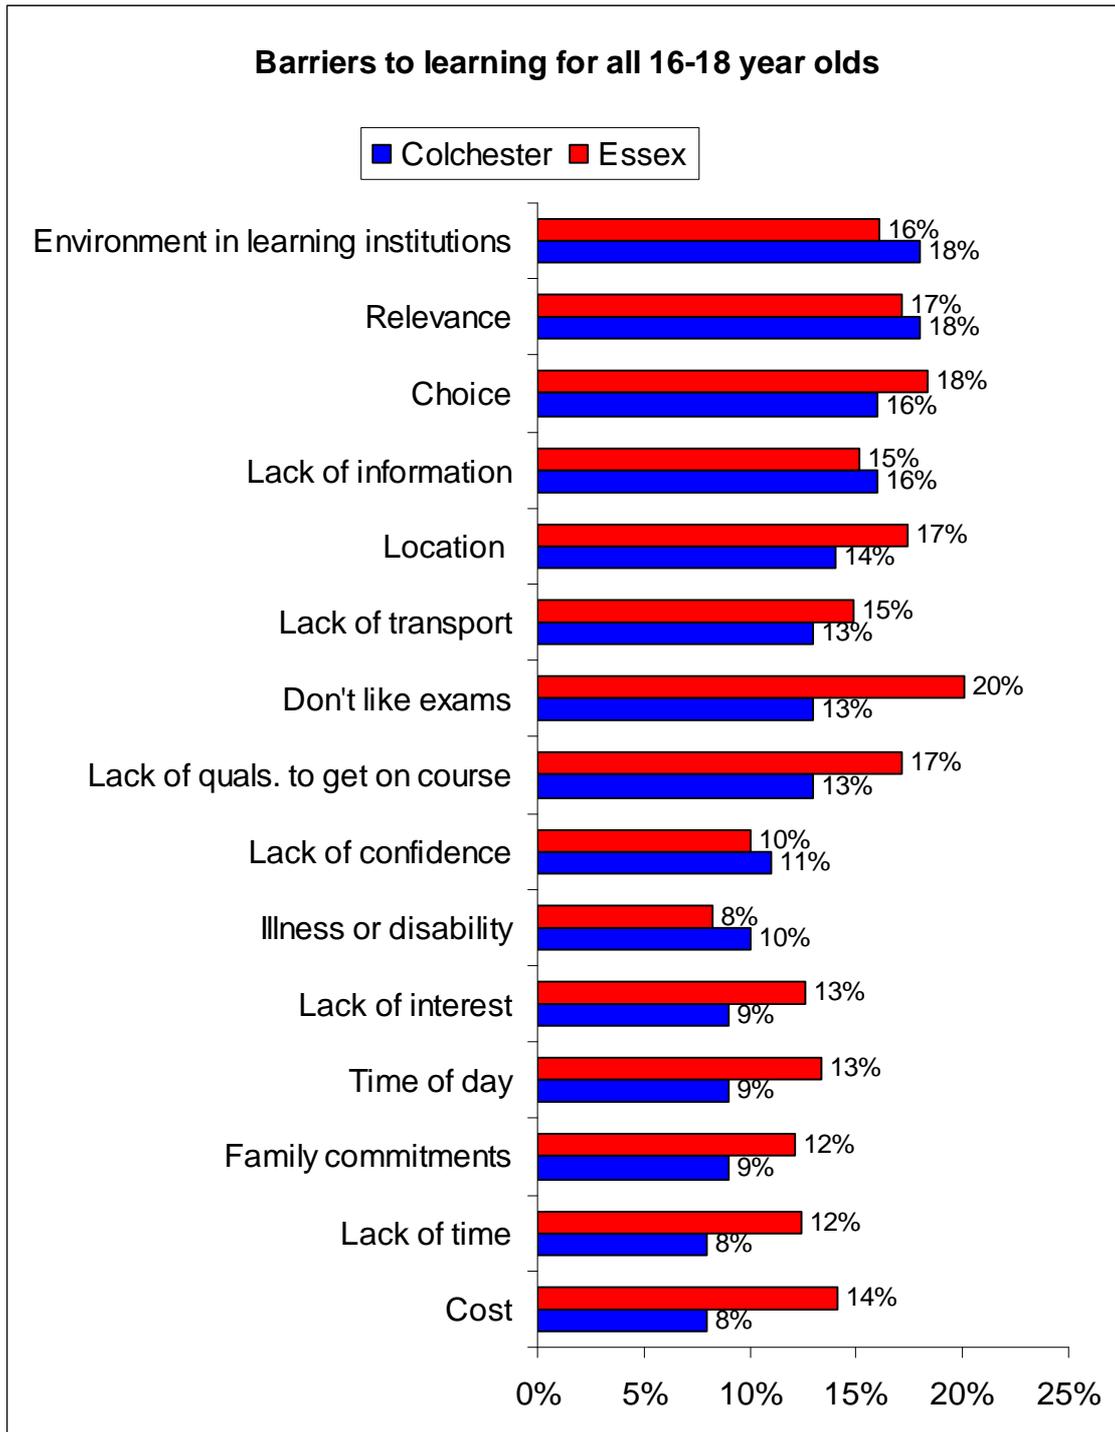

Note:

Expressed as a percentage of all Year 11 leavers who are not settled

4.2.2 Barriers and Benefits of Learning for Young People

As chart 47 shows, Colchester 16-18 year olds appear to perceive less barriers to learning than 16-18 year olds across Essex. One in six 16-18 year olds cite environment (18%), and relevance (18%) as barriers to learning – whereas the main barrier to Essex students of a dislike of exams (20%) is only considered a barrier by one in eight (13%) Colchester students

Chart 47

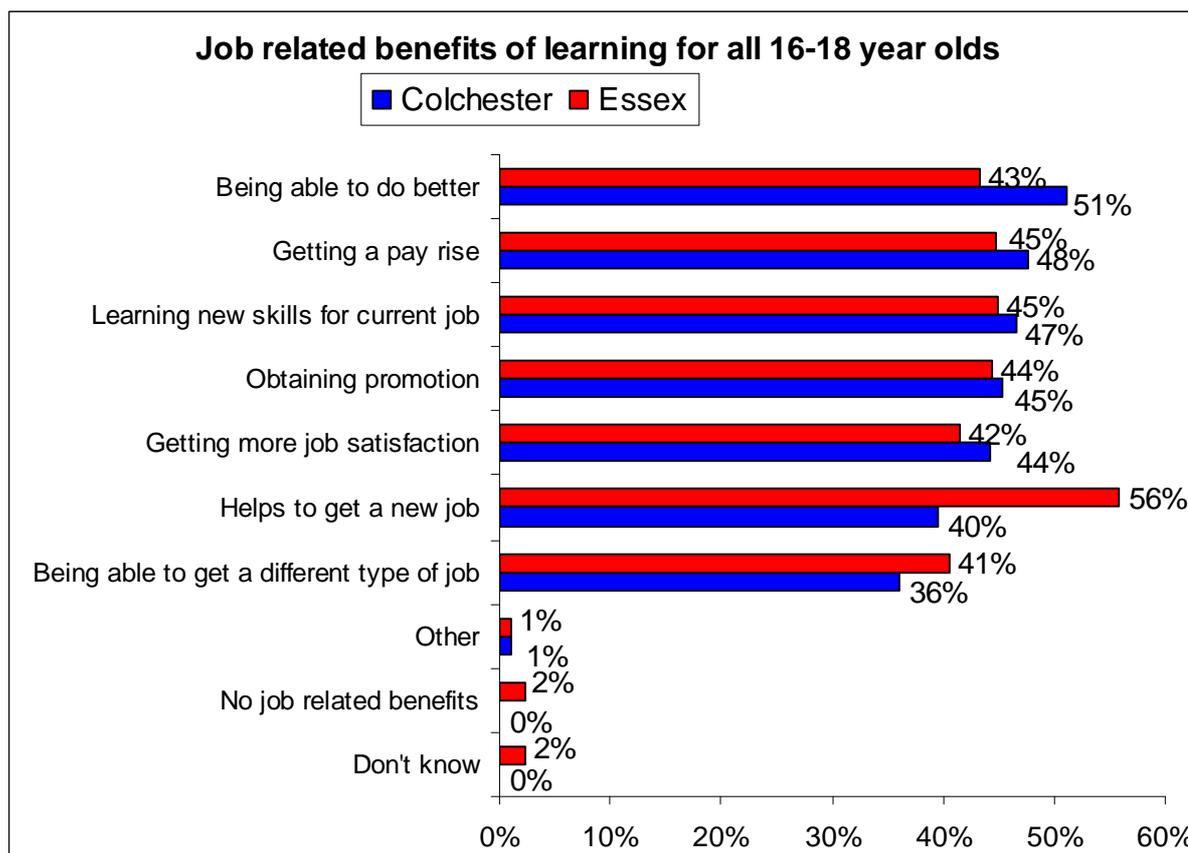

Source: 16-18 Learning Survey, LSC, Essex, 2002

Sample bases: Colchester, 100; Essex, 1,420

Population bases (16-18 year olds): Colchester, 2,900; Essex, 23,700

All 16-18 year olds – regardless of whether or not they have undertaken further learning – were asked what they perceived to be the job related and other benefits of learning. Those in Colchester are more likely to perceive the benefits of learning than those in Essex. As chart 48 shows, in almost every case, Colchester 16-18 year olds are more likely to see the job related benefits than those in Essex, the most notable exception being getting a new job

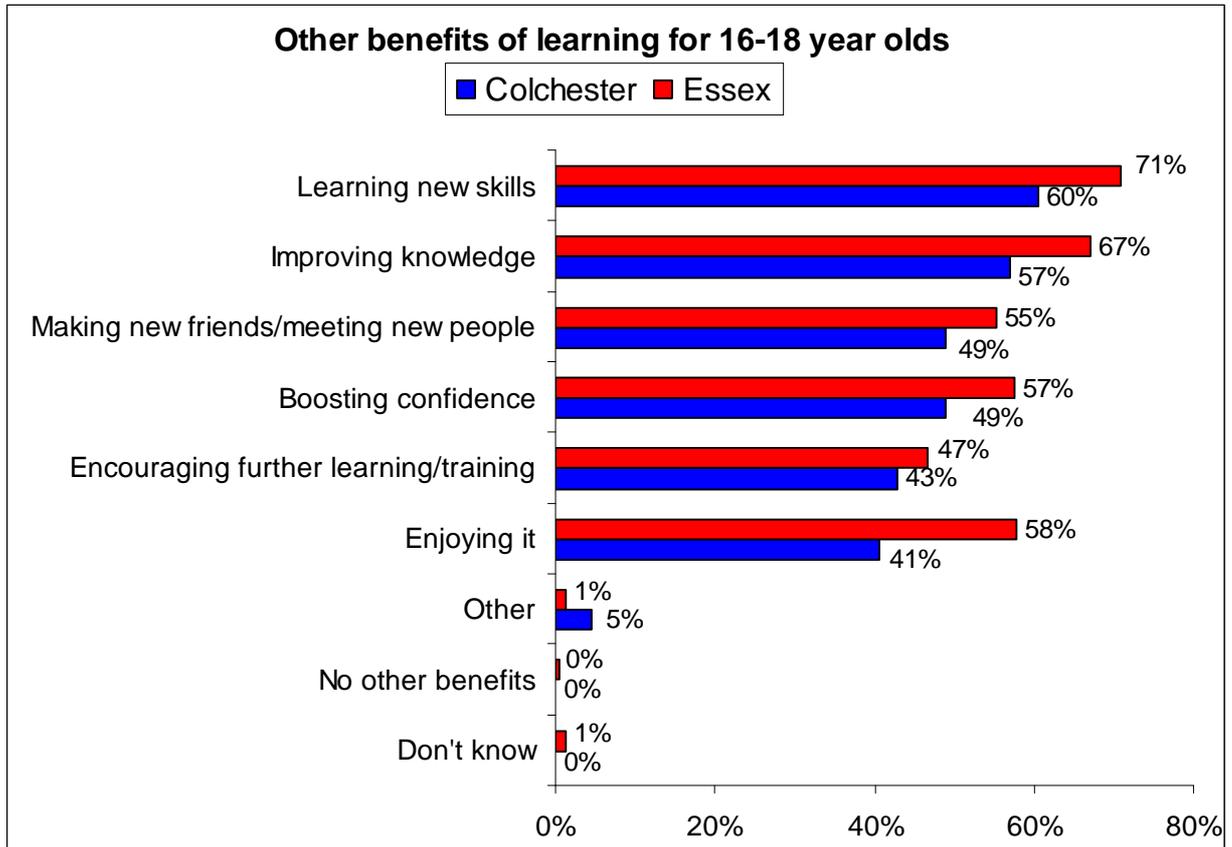

Chart 48

Source: 16-18 Learning Survey, LSC, Essex, 2002
 Sample bases: Colchester, 100; Essex, 1,420
 Population bases (16-18 year olds): Colchester, 2,900; Essex, 23,700

As chart 49 shows, in terms of other benefits of learning, Colchester young people are generally less likely to appreciate these than Essex young people.

Chart 49

Source: 16-18 Learning Survey, LSC, Essex, 2002
 Sample bases: Colchester, 100; Essex, 1,420
 Population bases (16-18 year olds): Colchester, 2,900; Essex, 23,700

Those young people who are not currently learning at all were asked why this was. Due to the small numbers involved it is only possible to report this at the Essex level. As table 18 shows, the key reason is the desire to work – the case for two in five young people. A lack of interest in learning is also common with one in three giving this as a reason. A further one in ten are actually waiting to start their learning.

Table 18

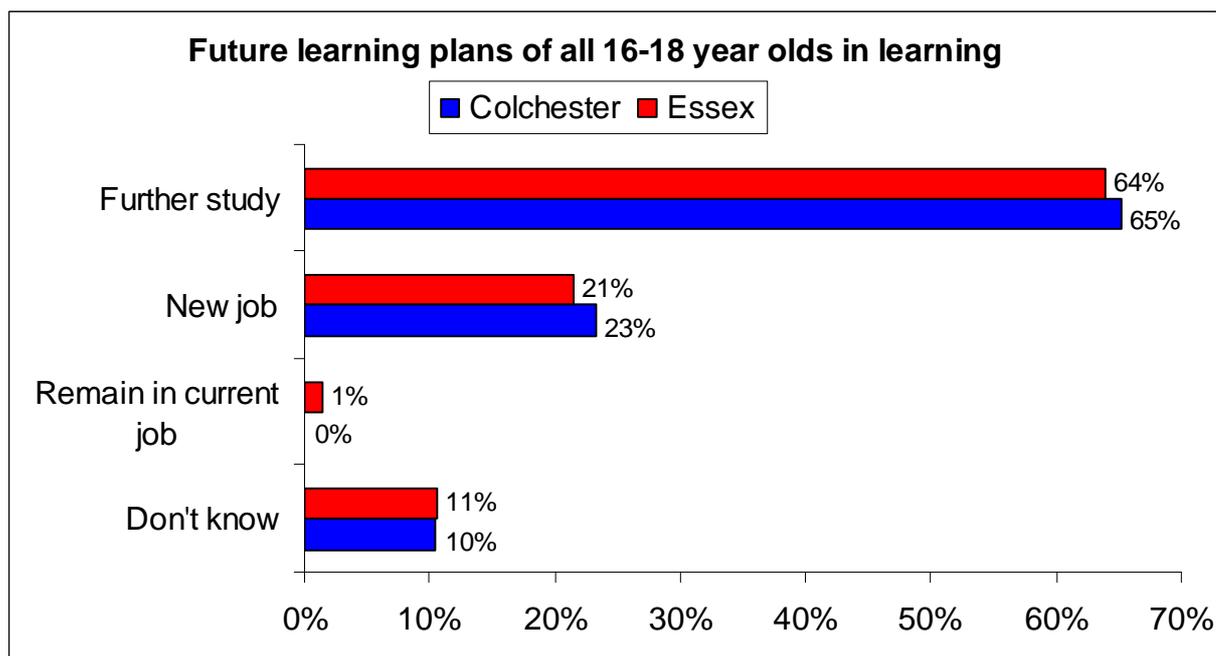

Reasons for not participating in learning for 16-18 year olds	
	Essex
	as % of all non-learners
In work/wanted to work instead	43%
Don't want to/not interested in study	29%
Looking for a placement/waiting to start	12%
Having a child/had a child	5%
Do not like school	3%
Cannot afford to study	2%
Taking a break from education	2%
Health reasons	1%

Source: 16-18 Learning Survey, LSC, Essex, 2002
Sample base: Essex, 263
Population base (16-18 year old non-learners): Essex, 4,400

4.2.3 Future Learning Plans of Young People

All those 16-18 year olds who are currently in some kind of structured learning were asked their plans for when they finished this learning. As chart 50 shows, Colchester young people follow the same pattern as for Essex, with almost two in three saying they will continue with some form of further study, two in ten finding a new job and one in ten unsure.

Chart 50

Source: 16-18 Learning Survey, LSC, Essex, 2002

Sample bases: Colchester, 86; Essex, 1,154

Population bases (16-18 year old learners): Colchester, 2,500; Essex, 19,300

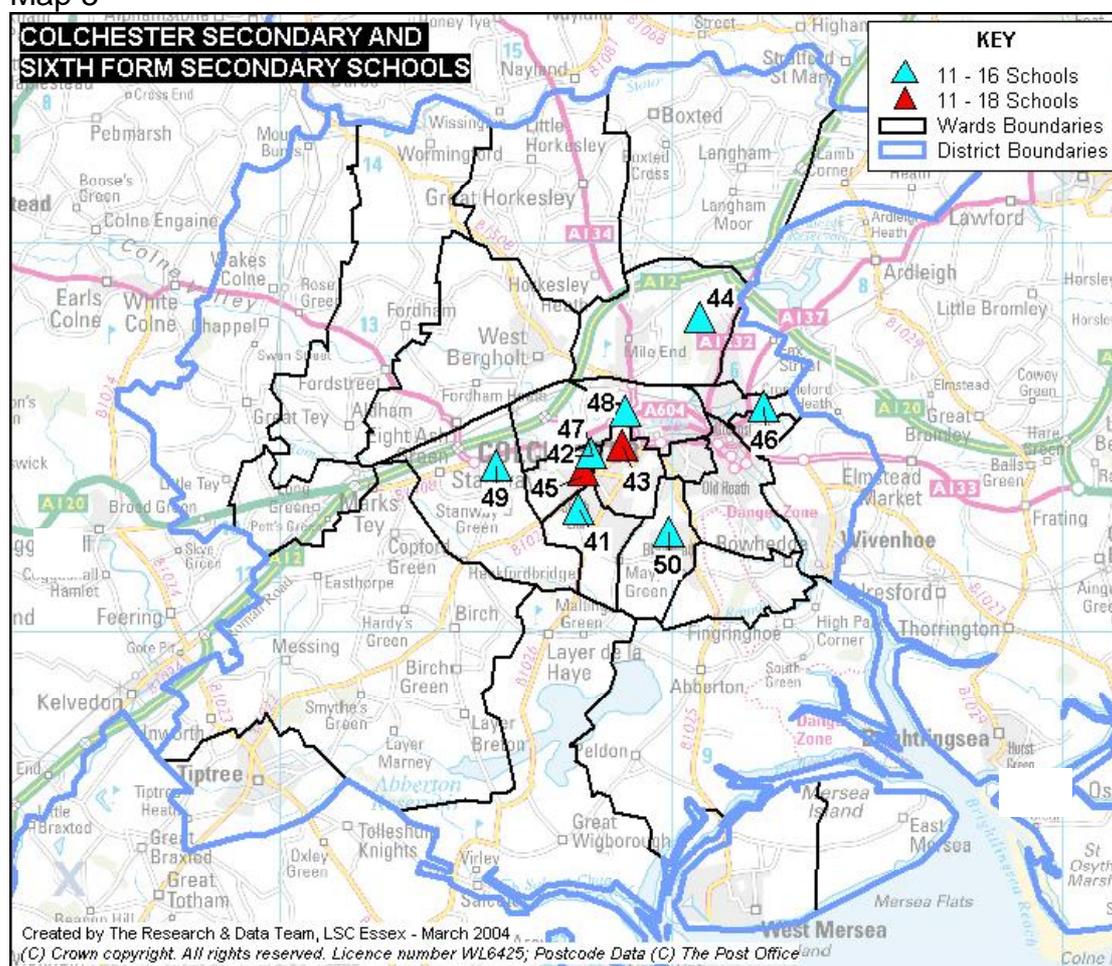

PROVISION

This section looks at each of the learning sectors funded by the LSC. For each sector there is a map of provision in the district, basic travel to learn analysis and any official published performance data that is currently available.

1. Secondary Schools

Map 5 shows all LEA-maintained 11-16 and 11-18 schools in Colchester. The numbers on the map relate to the table below the map. The table lists the names of all the schools along with the number of pupils on roll in January 2003.

Map 5

11-16 schools in the LSC, Essex area:

Number	School	Number on roll January 2003
41	Alderman Blaxill School	541
44	The Gilbert School	1,179
46	Sir Charles Lucas School	1,107
47	St. Benedict's RC College	816
48	St. Helena School	983
49	The Stanway School	800
50	The Thomas Lord Audley School	992

11-19 schools in the LSC, Essex area:

NUMBER	School	Number on roll January 2003	
		11 -16	16 -19
42	Colchester County High Sch for Girls	530	196

1.1 School Sixth Form Travel to Learn Patterns

Table 19 below shows the schools that sixth form pupils living in Colchester travel to, and the district the schools are located in. Please note that schools are only listed where they have more than 10 learners attending from this area, as such the column percentages in the table will not always add up. As the table shows almost 90% of students are attending schools in the Colchester district, with 34.6% of students attending the Phillip Morant School. A small number (6%) attend school in Tendring.

Table 19

Colchester resident School VI Form pupils by institution		
	% share of all Colchester resident School VI Form pupils	District/LEA
Colchester County High School for Girls	18.4%	Colchester
Colchester Royal Grammar School	21.3%	Colchester

Schools are not listed where their percentage share is < 1% or have fewer than 10 learners
* Special school

1.2 School Performance Data

The following section presents some of the Department for Education & Skills School Performance Tables. The first section mainly provides performance data on GCSE/GNVQ results, while the second section provides performance data on A/AS/ANVQ results. It should be noted that Independent schools are included in the performance tables.

1.2.1 GCSE Level Tables

Table 20

Colchester Royal Grammar School	98	1	1%
Donyland Lodge (i)	1	-	-
The Gilberd School	214	68	32%
The Philip Morant School	272	71	26%
Sir Charles Lucas School	208	119	57%
St Benedict's RC College	166	35	21%
St Helena School	179	115	64%
St Mary's School (i)	64	5	8%
The Stanway School	140	71	51%
The Thomas Lord Audley School	200	130	65%
Thurstable School	200	90	45%
England average	-	-	47%

Source: Department for Education and Skills, 2003

Notes:

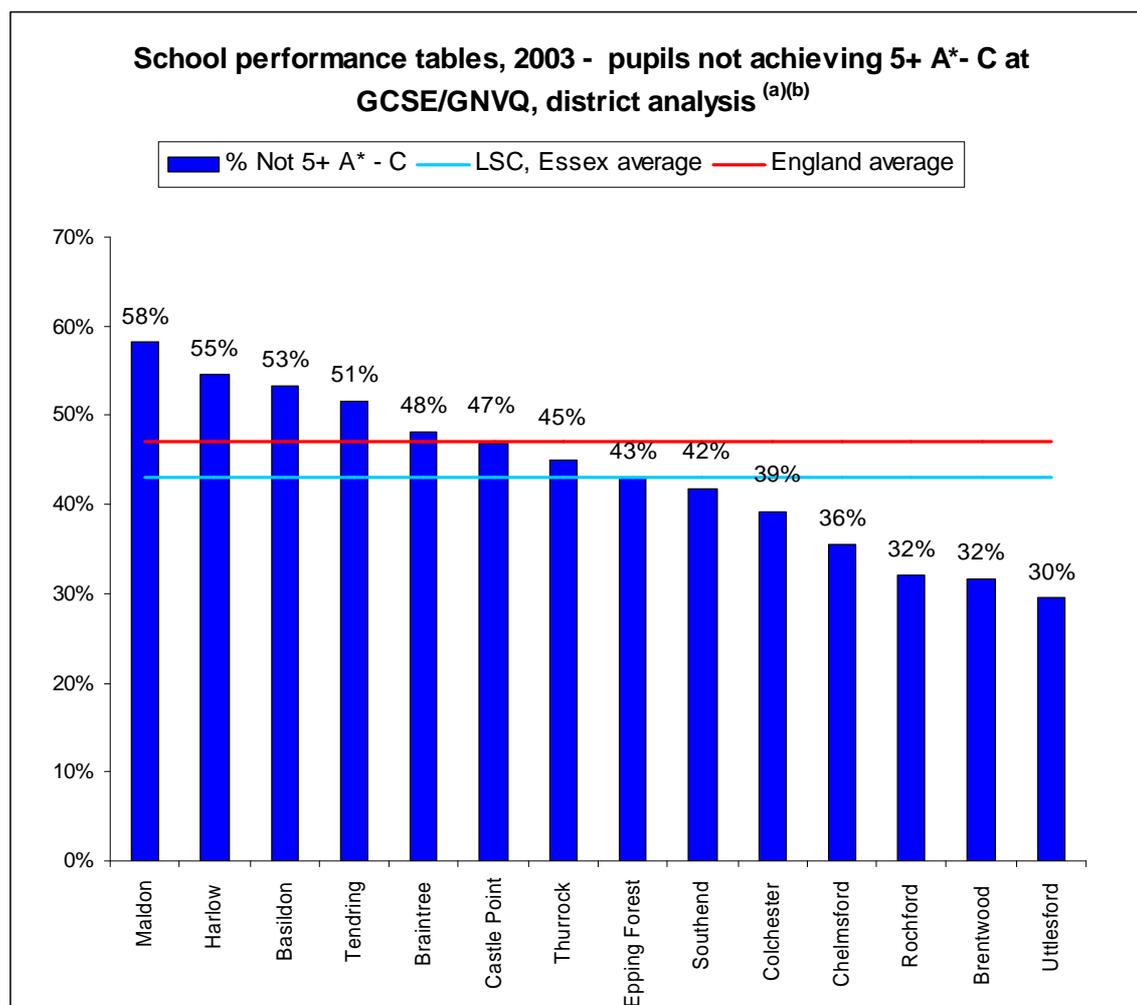

(a) This is calculated from the standard data on those achieving 5+ A* - C at GCSE/GNVQ in the DfES Secondary School Performance Tables, 2003

(i): Independent school

Chart 51 compares the number of pupils not achieving 5+ A*-C at GCSE/GNVQ between the 12 districts and two unitary authorities in Essex. Individual schools data has been combined into district level data to give an overall percentage of those pupils who are not achieving 5+ A*-C at GCSE/GNVQ. The lines on the chart show the Essex and England averages.

Colchester is ranked tenth of the 14 areas in Essex, with 39% of pupils not achieving 5+ A*-C at GCSE/GNVQ, meaning that within Essex the district is performing quite well in this area. This compares to an Essex average of 43% and an England average of 47%.

Chart 51

Source: Department for Education and Skills, 2003

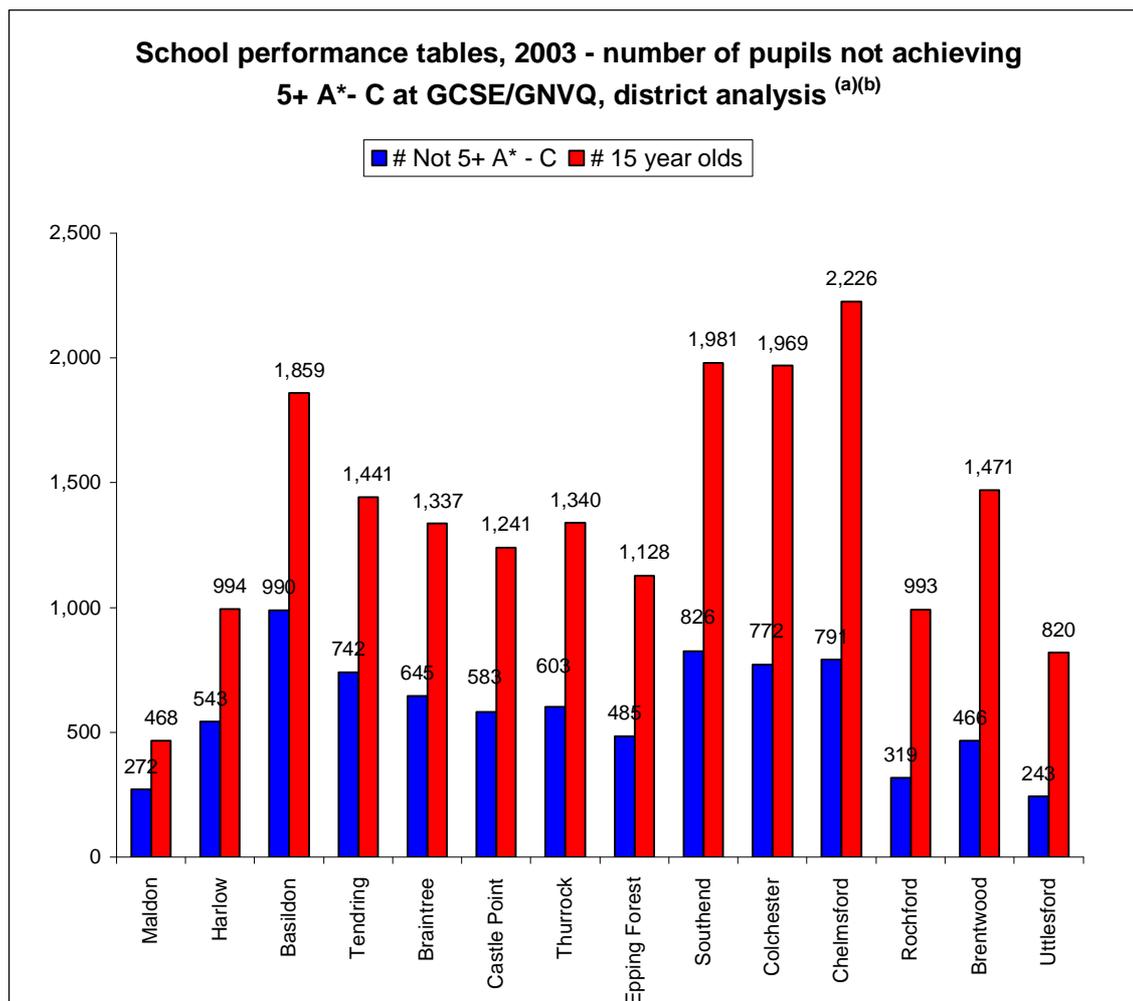

Notes:

(a) Based on pupils attending schools in each district, rather than pupils resident in each district e.g. pupils (from anywhere) attending schools in Chelmsford rather than pupils resident in Chelmsford

(b) This is calculated from the standard data on those achieving 5+ A*- C at GCSE/GNVQ in the DfES Secondary School Performance Tables, 2003

Chart 52 shows the same information as chart 51 but this time as a count of students not a rate. While Colchester has one of the lowest rates for non-achievement of 5+ A*-C grades due to its high number of students overall, the 39% non-achievement still equates to 772 students.

Chart 52

Source: Department for Education and Skills, 2003

Notes:

(a) Based on pupils attending schools in each district, rather than pupils resident in each district e.g. pupils (from anywhere) attending schools in Chelmsford rather than pupils resident in Chelmsford

(b) This is calculated from the standard data on those achieving 5+ A*- C at GCSE/GNVQ in the DfES Secondary School Performance Tables, 2003

Table 22

Secondary school performance tables, 2003 – key stage 3 to GCSE/GNVQ value added

Colchester	Value added measure ^(a)	% of pupils included in calculation ^(b)	Average number of GCSE/GNVQs taken by pupils in calculation ^(c)	% of pupils included in VA calculation at the school for both KS3 and GCSE/GNVQ ^(d)

The Thomas Lord Audley School	94.7	98%	9.3	98%
Thurstable School	99.3	96%	10.6	98%

Source: Department for Education and Skills, 2003

Notes:

(i): Independent school

Indicates that a school's value added measure has been suppressed because coverage is less than 50% of the cohort.

(a): The value added measure for each school is based on the progress made by individual pupils between KS3 and GCSE/GNVQ. Each pupil's value added score is calculated by comparing their GCSE/GNVQ performance with the median - or middle - performance of other pupils with the same or similar prior attainment at KS3. The individual scores are averaged to give a score for the school which is represented as a number based around 100. This indicates the value the school has added on average for their pupils.

In the 2003 tables, the top 5% of schools nationally on the KS3-GCSE VA measure achieved scores of 105.5 or above. The bottom 5% of schools on this measure achieved scores of 94.7 and below. The table below also shows the scores of schools in the top and bottom quarters.

Schools in quarter:	top 5%	top quarter	lowest quarter	lowest 5%
Range of KS3-GCSE /GNVQ VA measures	105.5 and above	101.2 and above	94.8 and below	94.7 and below

(b): This shows the percentage of 15-year old pupils that are included in the value added calculation. This gives some indication of schools where the value added measures may be unrepresentative.

(c): This shows the average number of GCSE/GNVQs taken by each pupil in the value added calculation. This gives an indication of the average number of GCSEs/GNVQs pupils take at the school.

(d): This shows the percentage of pupils included in the value added calculation that were at the same school for both their Key Stage 3 tests and their GCSE/GNVQ examinations.

Table 23

Secondary school performance tables, 2003 – other vocational qualifications for 15 year olds ^(a)

Colchester	Number of 15 year olds taking vocational courses	% of pupils achieving vocational courses ^(b)
Alderman Blaxill School	28	93%
Philip Morant School	24	13%

2.1 Further Education Travel to Learn Patterns

Table 28 shows the FE colleges that FE learners who live in Colchester travel to, and the district the providers are located in. Please note that FE colleges are only listed where they have more than 10 learners attending from this area, as such the column percentages in the table will not always add to 100%. The table looks separately at learners aged 16-18 and 19+.

An overwhelming 93.8% of 16 – 18 resident learners attend the two colleges in Colchester district, the largest share being 49.2% at Colchester Institute. There are a nominal number of learners attending elsewhere in this age group.

For the 19+ age group over half (55%) of learners attend Colchester Institute. The next largest share of learners is out of county in Suffolk with 14.1%.

Table 28

Colchester resident FE learners by institution			
	% share of all Colchester resident FE learners		District/LLSC
	16-18	19+	
Braintree College	<	6.6%	Braintree
Chelmsford College	1.2%	6.2%	Chelmsford
Colchester Institute	49.2%	55.0%	Colchester

These are the number of enrolments, not the number of learners.

Excludes learners whose age or area of learning is not recorded

3. Adult Community Learning

Map 7 shows the location of Colchester Adult Community College and its satellite locations. Please note that some of the satellite locations for Colchester Adult Community College may be located in other local authority districts and therefore will not be shown on this map. The table below the map shows the number of learners at the institution.

Map 7

Source: Adult Learning 2004-2005 issued Colchester ACC, Essex County Council

Adult Community Learning providers in the Colchester area:

Number	College
6	Grey Friars - Colchester

Colchester ACC satellites:

Number	Name of Satellite
6a	Alderman Blaxill School
6b	Garrison Pool
6c	Gilberd School
6d	Lexden Springs School
6e	Philip Morant School
6f	Sir Charles Lucas School
6g	Sixth Form College
6h	Stanway School
6i	Wilson Marriage Centre
6j	Brightlingsea Infants School
6k	Brightlingsea Community Association
6l	Mersea Island School
6m	MICA Centre, High Street, Mersea Island
6n	Thurstable School, Tiptree
6o	Parish Hall, Maypole Road, Tiptree

3.1 Adult Community Learning Travel to Work Patterns

Table 31 shows the ACL providers that ACL learners who live in Colchester travel to, and the districts the providers are in. Please note that ACL providers are only listed where they have more than 10 learners attending from this area, as such the column percentages in the table will not always add to 100%. The table relates to those ACL learners who are on LSC-funded FE courses within ACL provision (see glossary for explanation on ACL learner data), which accounts for around one-third of all ACL learners.

The majority (85.4%) of the learners in table 29 who live in Colchester attend Colchester Adult Community College. The remaining nominal numbers are spread throughout the county with the exception of those learning with St. Johns Ambulance.

Table 31

Colchester resident Adult Community learners by institution^(a)		
	% share of all Colchester resident Adult Community learners	Location of provider^(b) / LLSC
Colchester ACC	85.4%	Colchester
East Essex ACC	1.9%	Maldon
North Essex ACC	4.0%	Braintree
St Johns Ambulance	4.3%	National LSC
Tendring ACC	1.8%	Tendring

Source: Individualised Learner Record 2002/03
Population base: 1,982
Notes:
Adult Community Learning providers are not listed where their percentage share is < 1% or have fewer than 10 learners
(a) Refers only to LSC funded FE provision in ACCs – see glossary for further explanation.
(b) Refers to the main location of the provider. Learning may occur at other sites that may or may not be within this district.

Tables 32 and 33 offer further analysis showing enrolments of Colchester residents ACL learners by qualification level and also area of learning.

Table 32

Enrolments for Colchester resident ACL learners by Level		
	Enrolments	% Share
Level 1 and Entry	1,233	50%
Level 2	523	21%
Level 3 or Higher	367	15%

4. Work Based Learning

Map 8 and the tables below detail all the Work Based Learning (WBL) providers that LSC, Essex contracts with (as at July 2004). The locations shown on the map are a provider's main office or a training centre. However, actual training may occur at other sites via sub-contracted provision or at the place of employment. The four out-of-county providers are listed in the second table below - their training will be delivered via sub-contracted provision or at the place of employment. The table also indicates those providers only delivering Lifeskills provision – see the glossary for more details about the different types of learning that WBL providers deliver.

4.1 Work Based Learning Travel to Learn Patterns

Table 34 shows the WBL providers that WBL learners who live in Colchester learn with. Please note that WBL providers are only listed where they have more than 10 learners attending from this area, as such the column percentages in the table will not always add to 100%. The table looks separately at learners aged 16-18 and 19-24. As explained in the table notes, the learning can take place at various locations.

Table 34

Colchester resident WBL learners by institution			
	% share of all Colchester resident WBL learners		District/LLSC
	16-18	19+	
Catten College	3.3%	<	Colchester
CITB – Construction Skills	6.2%	<	Out of County
Colchester Institute	17.5%	9.5%	Colchester
Easi Hairdressing Academy	3.8%	2.9%	Colchester
Education & Youth Services Ltd	4.6%	<	E2E provision only

VT Plus	2.9%	10.2%	Out of County

Source: Individualised Learner Record, 2003/2004, Average in Learning

Population base: (16-18 Colchester resident WBL learners), 512 ;(19+ Colchester resident WBL learners), 341

Notes:

<: denotes less than 10 learners or less than 1% of all learners within age category

Excludes learners whose age is not recorded

Apparent long distances may be due to residents giving their home address while studying away.

(a) Modern Apprenticeship, NVQ Training and E2E learners are all included. Where a provider offers only E2E provision this will be stated in the final column of the table.

(b) Refers to the location of the main office of the training provider - actual training may occur at other sites via sub-contracted provision or at the place of employment, either or which may or may not be within this district.

'Out of county' is listed if the provider's main office is not in Essex.

Tables 35 and 36 offer further analysis showing average in learning of Colchester residents WBL learners by qualification level and also area of learning.

Table 35

Average in Learning for Colchester resident WBL learners^(a) by Level

Other services	485	7.6%	5,072	7.9%

Source: Annual Business Inquiry, 2002
Base: Colchester, 6,412; Essex, 63,895

Chart 53 shows how the number of VAT registered businesses in Colchester has changed since 1995.

Chart 53

Source: VAT registrations & de-registrations, Small Business Service, 2002

The following three sections are based upon the Learning & Skills Council National Employer Skills Survey (NESS). The data presented is based upon the county of Essex rather than individual districts. This is due to the sample size being unreliable at district level. The sample size for Essex was 2,357 employer interviews, and has been weighted on the employer base in the following tables.

2. Vacancies

This section looks at the vacancy situation for Essex employers in a variety of different themes.

Table 39

Vacancies		%
Whether have any vacancies	Yes	17%

SUPPORTING DATA

1. Mapping the Indices of Deprivation

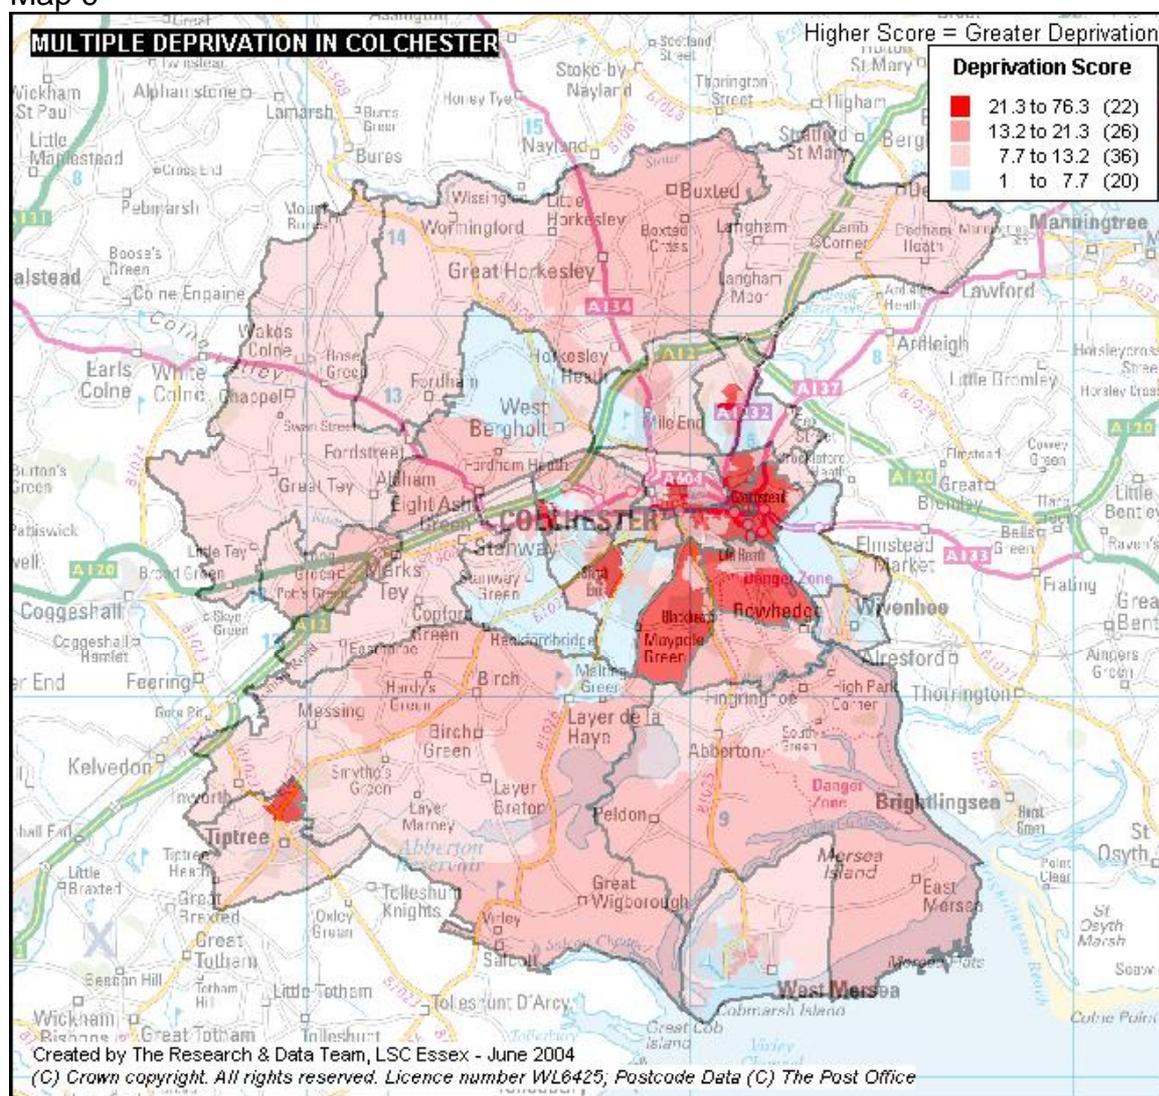

The Indices of Deprivation is a method of measuring levels of deprivation across England. The Office of the Deputy Prime Minister produced the Indices originally in 2000, these are the updated 2004 indices which look at super output areas as opposed to ward. An overall multiple indices of deprivation is calculated by combining the seven domains of deprivation used – Education, Skills and training, Employment, Living environment, Health and disability, Barriers to housing and services, Crime and Income. In addition to the multiple indices, each indicator has its own deprivation score and can be looked at independently. A deprivation score is available for every super output area in England.

The Multiple Indices of deprivation, as well as the domains of Education, Employment, Housing and Income are presented in a map format below. The maps presented are graded by colour to represent the score in each ward with red at one end of the scale to indicate a high deprivation score, and at the other end blue to indicate a lower score. Each map has a key with the deprivation score range displayed. This range is relevant to all wards in Essex so if a district has a high score, it is high in comparison to all the wards in Essex.

1.1 Map of Multiple Deprivation

As the key in map 9 shows, the Essex multiple deprivation score range of 1 to 76.3 for its 1,065 super output areas. For the 32,482 super output areas in England, the range is 0.59 to 86.83. The most overall deprived super output area in Essex is in the ward of Golf Green in Tendring, ranked 102 out of 32,482. The least deprived Essex super output area is in the ward of Saffron Walden Audley in Uttlesford, ranked 32,458. This range of rankings indicates the contrasting levels of deprivation to be found in Essex.

Map 9

Source: Indices of Deprivation 2004, SOA Lower Layer Level, Office of the Deputy Prime Minister ONS Super Output Area Boundaries. Crown copyright 2004. Crown copyright material is reproduced with the permission of the Controller of HMSO

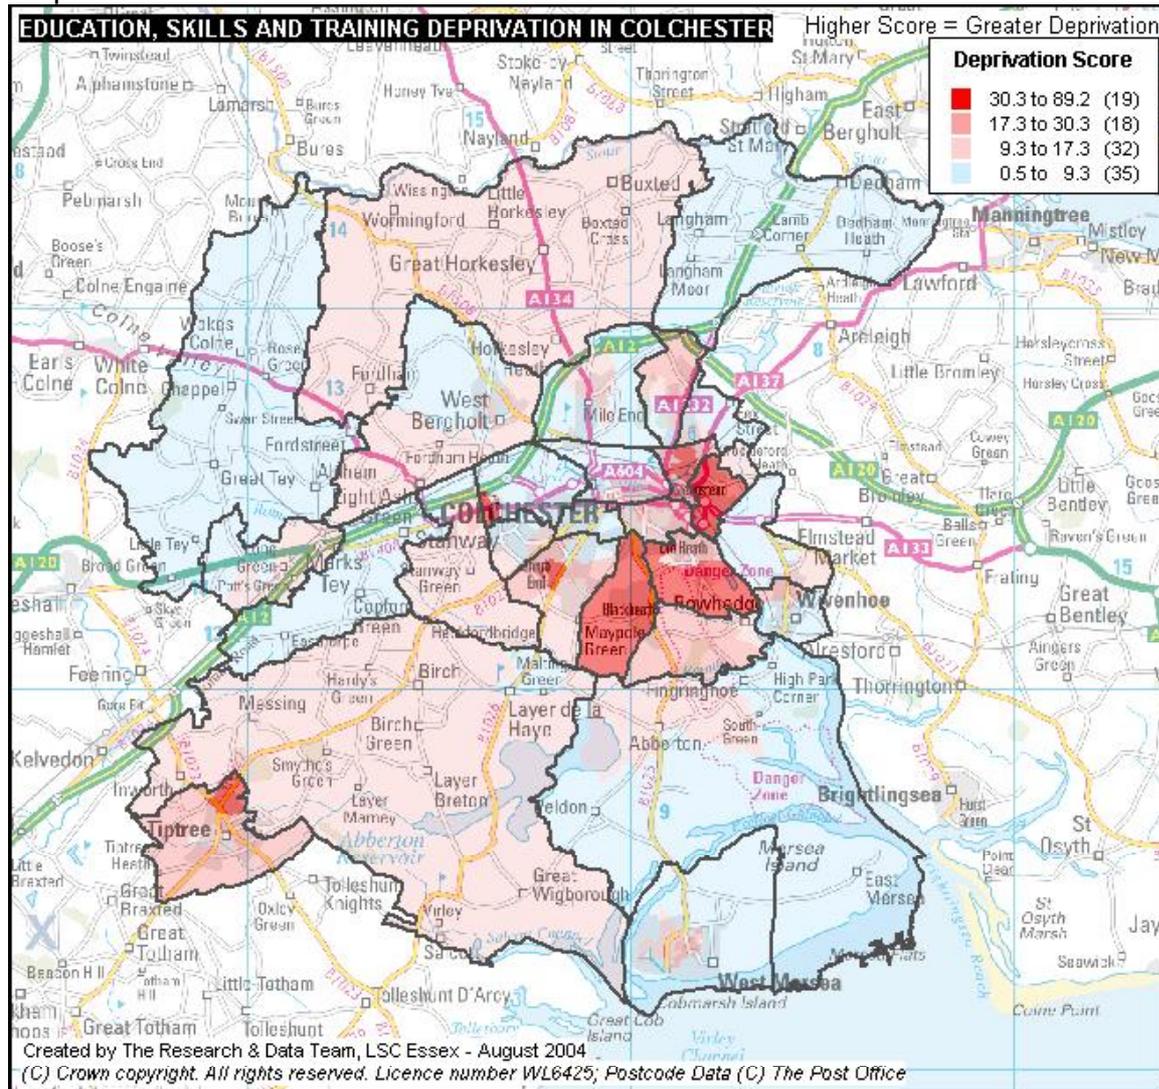

1.2 Map of Education, Skills and Training Deprivation

The indicators used to calculate the education score are:

1. Average points score of pupils at Key stage 2 (end of primary)
2. Average points score of pupils at key stage 3
3. Average points score of pupils at Key stage 4 (GCSE/GNVQ – best of eight results)
4. Proportion of young people not staying on in school or non-advanced further education above 16
5. Secondary school absence rate
6. Proportion of those aged under 21 not entering higher education

As the key in map 10 shows, the Essex education deprivation score range is between 0.5 and 89.2. The score range for the 32,482 super output areas in England is 0.03 to 99.22. The most educationally deprived super output area in Essex is in the Tilbury St Chads ward in Thurrock, ranked 128 out of 32,482. The least educationally deprived super output area in Essex is in the Christ Church ward in Colchester, ranked 32,302. This indicates that Essex wards are amongst the best and worst in England in terms of education, skills and training.

Map 10

Source: Indices of Deprivation 2004, SOA Lower Layer Level, Office of the Deputy Prime Minister ONS Super Output Area Boundaries. Crown copyright 2004. Crown copyright material is reproduced with the permission of the Controller of HMSO

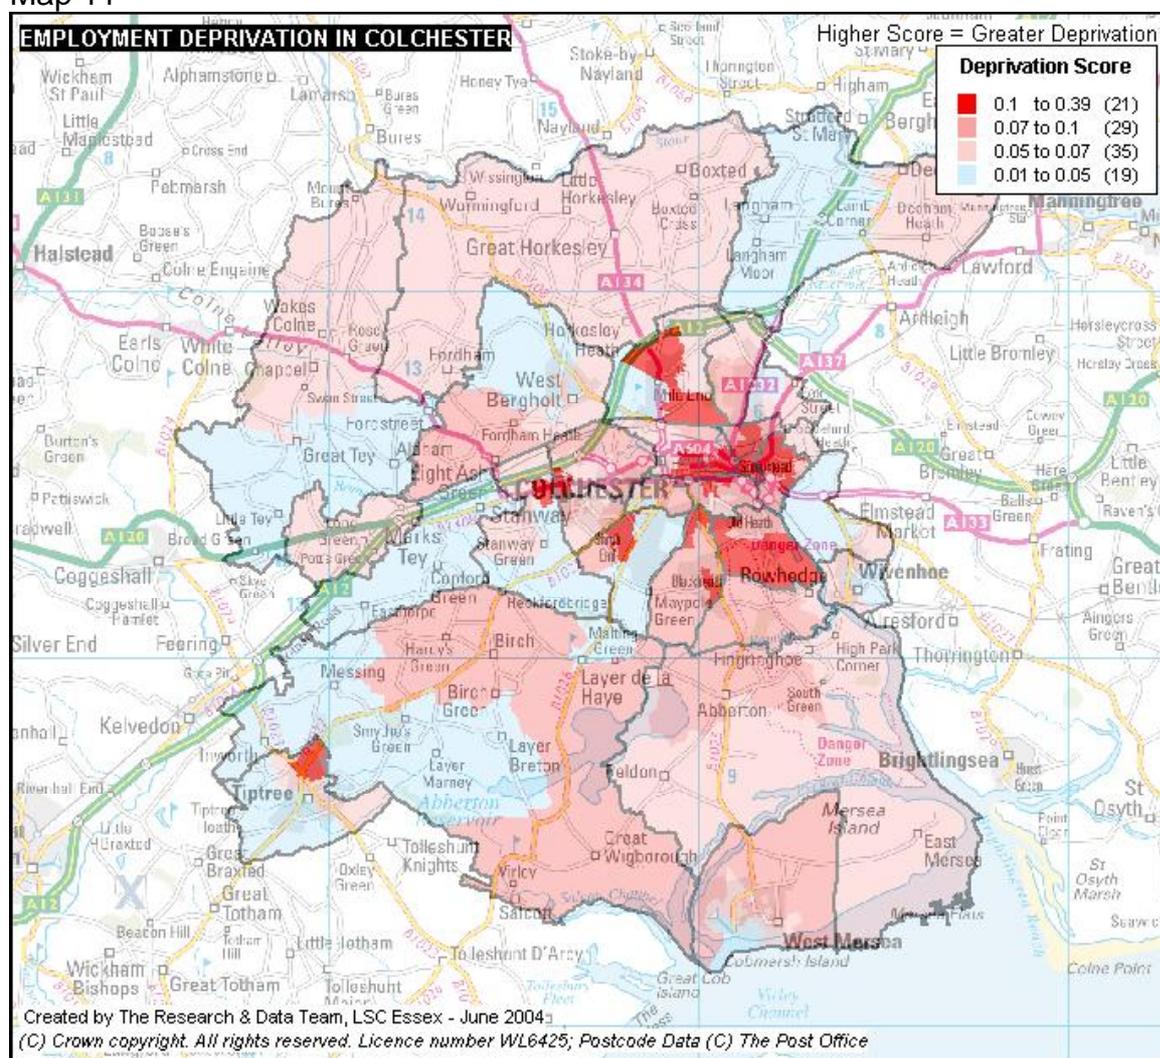

1.3 Map of Employment Deprivation

The indicators used to calculate the employment score are:

1. Unemployment Claimant Count (JUVOS) of women aged 18-59 and men aged 18-64;
2. Incapacity benefit claimants women aged 18-59 and men aged 18-64;
3. Severe disablement allowance claimants, women aged 18-59 and men aged 18-64;
4. Participants in New Deal for the 18-24's who are not included in the claimant count;
5. Participants in New Deal for the 25+ who are not included in the claimant count;
6. Participants in new deal for lone parents aged 18 and over.

As the key in map 11 below shows, the score range for employment deprivation in Essex is between 0.01 and 0.39. The score range for the 32,482 super output areas in England is 0.00 to 0.69. The most deprived super output area in Essex in terms of employment is in the ward of Golf Green in Tendring, ranked 142 out of 32,482. The least deprived super output area in terms of employment is Wivenhoe Cross in Colchester, ranked 32,427.

Map 11

Source: Indices of Deprivation 2004, SOA Lower Layer Level, Office of the Deputy Prime Minister ONS Super Output Area Boundaries. Crown copyright 2004. Crown copyright material is reproduced with the permission of the Controller of HMSO

1.4 Map of Barriers to Housing and Services Deprivation

The indicators used to calculate the barriers to housing and services score are:

Sub-Domain: Wider Barriers

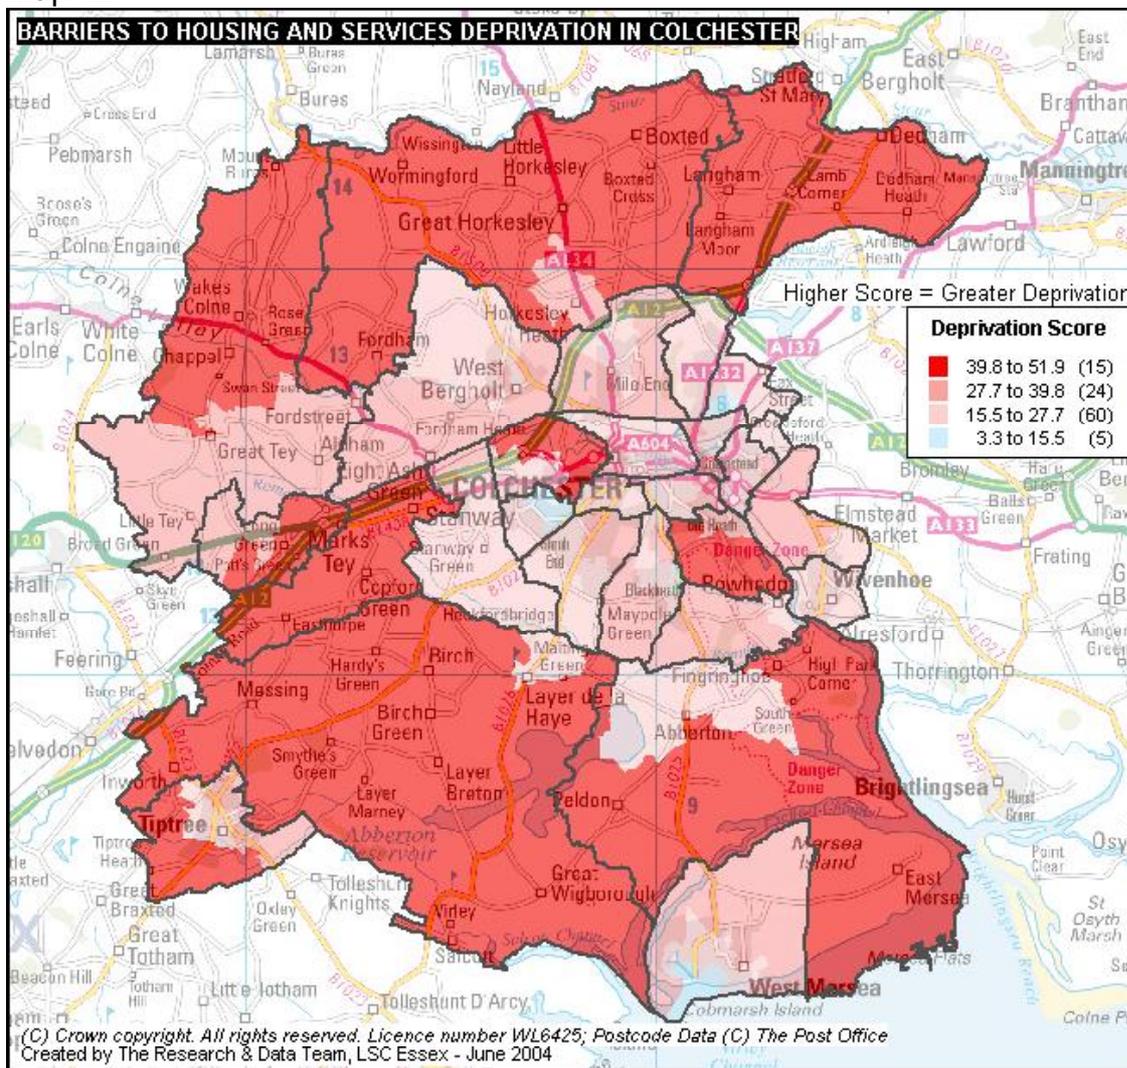

1. Difficulty of access to owner occupation
2. Household overcrowding;
3. LA level percentage of households for whom a decision on their application for assistance under the homeless provisions of housing legislation has been made.

Sub-Domain: Geographical Barriers

1. Road distance to GP premises;
2. Road distance to supermarket or convenience store;
3. Road distance to Primary school;
4. Road distance to Post Office.

As the key in the map 12 shows, the Essex score range for housing and services deprivation is 3.3 to 51.9. The England range for all 32,482 super output areas is between 0.28 and 66.98. The most deprived super output area in Essex in terms of housing and services is Panfield in Braintree, ranked 150 out of 32,482. The least deprived is in the Hawkwell South ward in Rochford, ranked 32,123.

Map 12

ONS Super Output Area Boundaries. Crown copyright 2004. Crown copyright material is reproduced with the permission of the Controller of HMSO

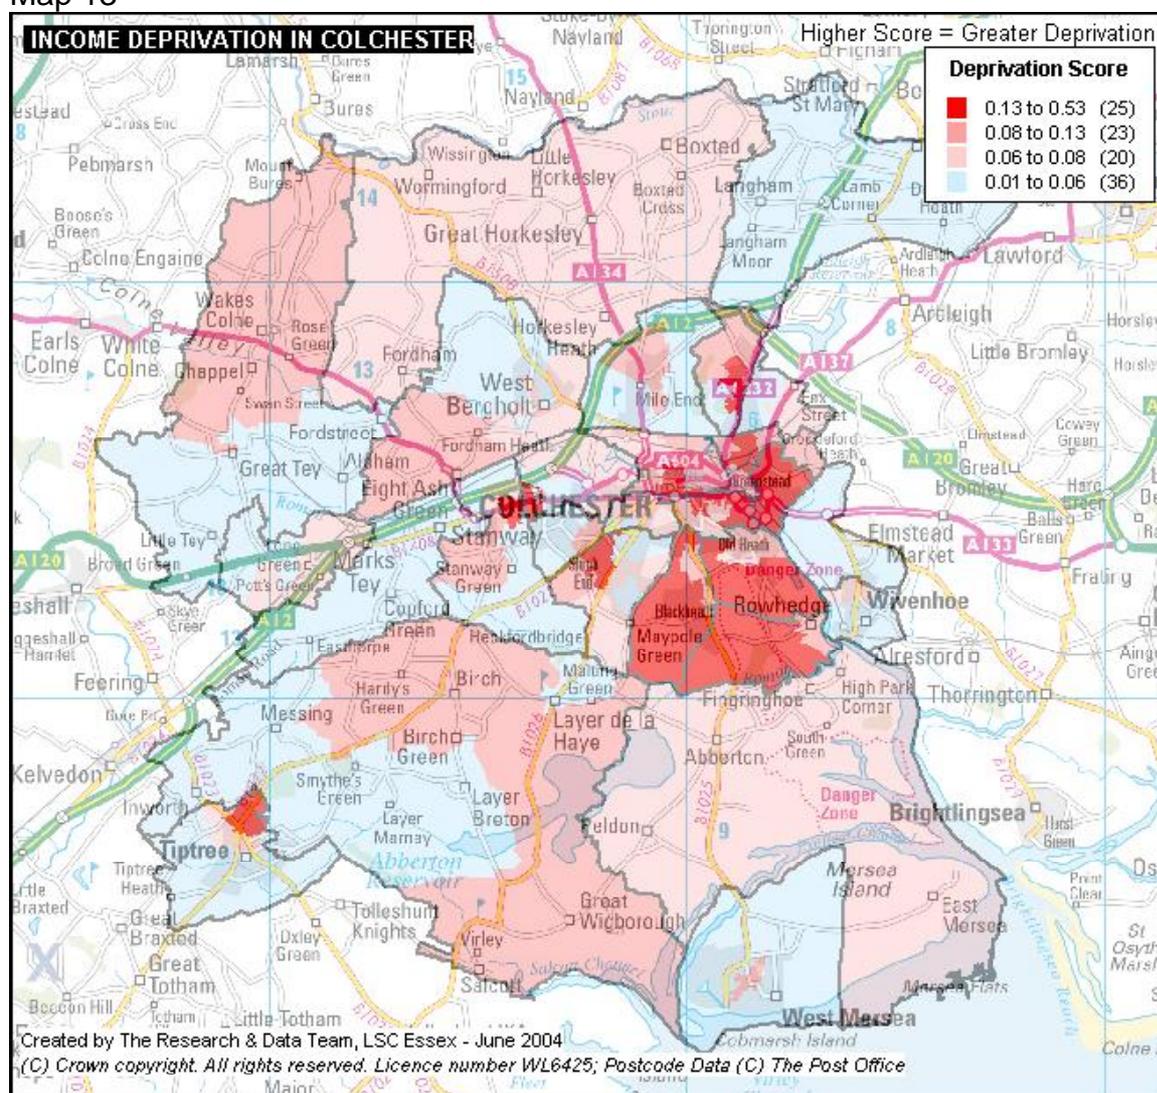

1.5 Map of Income Deprivation

The indicators used to calculate the income score are:

1. Adults and children in Income Support households;
2. Adults and children in income based Job Seekers Allowance households;
3. Adults and children in Working families tax credit households;
4. Adults and children in Disabled persons tax credit households; and
5. National Asylum Support Service (NASS) supported asylum seekers in England.

As the key in map 13 shows, the Essex score range for income deprivation is between 0.01 and 0.53. The England range for all 32,482 super output areas is between 0.00 and 0.96. The most deprived super output area in Essex in terms of income is in the ward of Kursaal in Southend, ranked 208 out of 32,482. The least deprived is in the ward of Hutton South in Brentwood, ranked 32,469.

GLOSSARY

16-18 Learning Survey	The 16-18 Learning Survey was conducted by Bostock Marketing Group (BMG) on behalf of LSC, Essex. Fieldwork was conducted during early 2002. A total of 1,400 16-18 year olds were interviewed; 100 in each of the 14 local authority districts that comprise the LSC, Essex area. Interviews were conducted by telephone. The figures reported throughout this document are weighted if they relate to Essex, and unweighted if they relate to the district/unitary authority.
Achievement rate	The achievement rate is one of the statistics reported on in the Summary Statistics document. (See also entry for Summary Statistics.) It is defined as: $\frac{\text{Number of qualifications achieved}}{\text{Total number of qualifications which have been completed}} \times 100$
ACL	Adult Community Learning. The ACL enrolment and student figures reported in this document are taken from the Individualised Student Record (ISR) data set. For the ACL sector the ISR data set captures Learning and Skills Council funded Further Education provision only. Further Education provision covers everything in the former Schedule 2 category, which includes some non-accredited courses, but covers predominantly accredited courses. The LSC does fund former non-Schedule 2 provision in the ACL sector, but this is not recorded by the ISR.
Activity Survey	An annual survey conducted by the Connexions in Essex into the first destinations of Year 11 students after they have completed their statutory education.
Census 2001	A complete survey of the entire population gathering demographic information every ten years.
Claimant Count	The claimant count records the number of people claiming unemployment-related benefits. These are currently the Jobseeker's Allowance (JSA) and National Insurance credits, claimed at Employment Service local offices. People claiming JSA (formerly Unemployment Benefit) must declare that they are out of work, capable of, available for and actively seeking work during the week in which the claim is made.
DETR	Department for the Environment, Transport and Regions. (Now disbanded and split into the ODPM, Office for the Deputy Prime Minister and the DFT, Department for Transport).
Dwelling	Property that exists either occupied or unoccupied.
Economically active	All those in employment plus also those who have actively sought work in the last four weeks.
FE	Further Education.

HE	Higher Education.
Household	Property that is in constant occupation by one or more persons.
Indices of multiple deprivation	This measure is an amalgamation of seven separate indices that show the relative deprivation of a super output area against all super output areas measured.
Individual Learner Record (ILR)	The data collection mechanism of the Learning & Skills Council. The ILR currently collects data for learners participating in Further Education, Work Based Learning and accredited Adult Community Learning in the 2002/2003 academic year. School Sixth forms will also be included in future.
Individualised Student Record (ISR)	The ISR was previously used to collect data on learners in Further Education institutions and learners participating in accredited learning in Adult Community Colleges. The Individual Learner Record will replace the ISR from the 2002/2003 academic year.
In-year retention rate	<p>The retention rate is one of the statistics reported on in the Summary Statistics document. (See also entry for Summary Statistics.) It is defined as:</p> $\frac{\text{Number of learners who continued to attend their course (of 12 weeks or more) at the end of the qualification, or the end of the teaching year (whichever is sooner)}}{\text{Total number of learners participating in a course of 12 weeks or more}} \times 100$
Learning	<p>The definitions of learning used in the two Learning Surveys commissioned by LSC, Essex are:</p> <p>“Taught learning which involves some teaching or instruction, either face to face or using written materials, audio tapes, video tapes, CD Rom etc”, <i>and/or non-taught learning, which is</i> “learning that has not involved any teaching or instruction but has led to you developing your skills, improving your knowledge or working towards a qualification”.</p> <p>Unless otherwise specified, both types of learning are included in any references to learning.</p>
Learning Gateway	A programme to help 16 and 17 year olds who have had negative experiences of learning. Life skills, one element of the Learning Gateway, can help a young person to gain new skills that may lead to employment or help progress into further learning. For more information see www.careersbp.co.uk .
Life skills	See entry for Learning Gateway.
NESS 2003	National Employer Skills Survey. One of the largest employer surveys in the UK undertaken each year by the National Learning and Skills Council.
Median	The number in the middle of a set of numbers; that is, half the

	numbers have values that are greater than the median and half have values that are less.	
Modern Apprenticeships	Part of the Government approved Work Based Learning scheme for 16 to 24 year olds. They involve a young person going into the workplace combining working and learning about a job whilst training towards a National Vocational Qualification (NVQ). A young person will have either employed status or non-employed status when enrolled on a foundation MA, but must have employed status when enrolled on an advanced MA.	
NVQ equivalence	The definitions of attainment levels listed here are those used by the Department for Education and Skills and are based on qualifications available from the Labour Force Survey.	
	Level 5 Higher degree	NVQ level 5
	Level 4 First degree Diploma in higher education RSA higher diploma Teaching (including FE, secondary, primary & others)	Other degree HNC, HND, BTEC etc higher Other HE below degree NVQ level 4 Nursing etc
	Level 3 NVQ level 3 RSA advanced diploma Scottish CSYS (67% of) Trade apprenticeship (50% of) GNVQ advanced	OND, ONC, BTEC etc national SCE higher or equivalent (3+) A level and equivalent (2+) City & guilds advanced craft AS level or equivalent (4+)
	Level 2 NVQ level 2 RSA diploma AS level or equivalent (2 or 3) BTEC, SCOTVEC first or general diploma O levels, GCSE or equivalent (5+ grades A-C)	GNVQ intermediate City & Guilds craft Trade apprenticeship (50% of) A level and equivalent (1) Scottish CSYS (33% of) SCE higher or equivalent (1 or 2)
	Below Level 2 NVQ level 1 CSE below grade 1 City & Guilds other AS level or equivalent (1) GNVQ/GSVQ foundation GCSE below grade C	SCOTVEC modules BTEC, SCOTVEC first or general certificate Less than 5 GCSE grades A-C RSA other YT, YTP certificate

Post 16 Learning Survey	The Post 16 Learning Survey was conducted by Bostock Marketing Group (BMG) on behalf of LSC, Essex. Fieldwork was conducted during Autumn/Winter 2001. A total of 2,800 people aged 16-69 were interviewed; 200 in each of the 14 local authority districts that comprise the LSC, Essex area. Interviews were conducted face to face in the respondent's home. The figures reported throughout this document are weighted if they relate to Essex, and unweighted if they relate to the district/unitary authority.
Sample and population bases	The sample base is referred to whenever survey data is cited at the foot of the chart, table or map. It refers to the number of people actually interviewed in relation to the chart/table/map. The population base is referred to whenever possible when a sample base is given. The population base allows you to apply the survey results to the population as a whole.
School performance tables	As produced by the Department for Education and Skills (www.dfes.gov.uk).
SIC	Standard Industrial Classification. Serves to classify a business by the type of economic activity they are engaged in.
SOC	Standard Occupational Classification. Serves to classify an individual by the type of economic activity they are engaged in.
UCAS	University and Colleges Admissions Service.
VAT de-registrations	The number of businesses de-registering from VAT each year. This is an indicator of the number of closures. It excludes the very smallest businesses which operate below the threshold for VAT registration (at the end of 2001, the VAT threshold was an annual turnover of £54,000). Businesses de-registering from VAT do so due to closure, or (in a minority of cases) because turnover has fallen below the registration threshold. Closure does not necessarily involve bankruptcy or insolvency proceedings, which make up only around one in four closures.
VAT registrations	The number of enterprises registering for VAT each year. This is an indicator of the number of business start-ups. It excludes the very smallest businesses which operate below the threshold for VAT registration (at the end of 2001, the VAT threshold was an annual turnover of £54,000).

WBL	Work Based Learning. Also see entries for Modern Apprenticeships and Learning Gateway.
Workforce Development Survey	The Workforce Development Survey was conducted by Prism Research on behalf of LSC, Essex. Fieldwork was conducted during Autumn/Winter 2001. A total of 1,400 employers were interviewed; 100 in each of the 14 local authority districts that comprise the LSC, Essex area. Interviews were conducted by telephone. The figures reported throughout this document are weighted if they relate to Essex, and unweighted if they relate to the district/unitary authority.
