End of Year Monitoring of Higher Education Enrolments 2022/23

Date: 05 October 2023
Reference: W23/26HE
To: Heads of higher education institutions in Wales
Principals of directly-funded further education colleges in Wales
Response by: 19 January 2024
Contact: Name: James Morgan
Telephone: 029 2085 9724
Email: james.morgan@hefcw.ac.uk

This circular gives definitions and guidance to higher education providers relating to the end of year data that are extracted from the 2022/23 HESA student record.

The extraction is performed via the HESA Information Reporting Interface Service (IRIS) and is used to calculate part-time undergraduate credit based funding, the higher cost subjects premium for 2024/25, calculate any adjustment to the 2022/23 part-time undergraduate credit based teaching funding, monitor information on initial teacher education and medicine and dentistry courses and establish final numbers of students and credit values at providers for 2022/23.

If you require this document in an alternative accessible format, please email info@hefcw.ac.uk.

Welsh Government

Introduction

1. This circular gives definitions and guidance to higher education institutions (HEIs) and further education institutions (FEIs) with higher education provision (known collectively as higher education (HE) providers) that are funded directly by the Higher Education Funding Council for Wales (HEFCW). The guidance relates to the end of year data that are extracted from the 2022/23 Higher Education Statistics Agency (HESA) student record via the HESA Information Reporting Interface Service (IRIS) to enable HEFCW to:
 - a) Calculate funding allocations for part-time undergraduate credit based funding and the higher cost subjects premium for 2024/25;
 - b) calculate any adjustments to 2022/23 part-time undergraduate credit based funding;
 - c) monitor provision of medicine and dentistry courses;
 - d) establish final numbers of students and credit values at HEIs and FEIs for 2022/23 for funding modelling and information purposes.

In addition, we will provide information about initial teacher education (ITE) courses leading to qualified teacher status (QTS) to Welsh Government and the Education Workforce Council.

Main changes for 2022/23

2. The main changes made since the EYM 2021 survey are as follows:
 - a) 2022/23 is the first year of the HESA student record being collected under Data Futures. Annex K has been updated to reflect the changes to the student record, in line with the mappings provided in Annex J of HESES 2022/23, with updates made as necessary.
 - b) Annex A, which provides a summary of the EYM guidance, has been updated to include any changes made to the rest of the guidance in this circular;
 - c) Annexes B, C, D, F, G, H and J have been updated to reflect the changes made to HESES 2022/23;
 - d) Annex E has been updated to reflect the changes made to HESES 2022/23, with a further amendment to only include Academic Subject Categories (ASCs) and remove the reference to cost groups as they have not been implemented;
 - e) Annexes L, M, N and O have been updated to reflect the changes made to the rest of the EYM guidance.

Contents

3. This circular provides:
 - a) guidance and definitions for the various categories used to classify students;
 - b) information about the criteria used to extract EYM data from the 2022/23 HESA student record via IRIS;
 - c) details of the sign off arrangements for the tables made available through HESA IRIS outputs (see para 12 for the list of tables requiring sign off)
4. The contents of the annexes are as follows:

| Annex | | Page number |
|---------|---|-------------|
| Annex A | Summary guide to the EYM 2022/23 survey | 5 |
| Annex B | Definition of a recognised HE qualification | 15 |
| Annex C | Distance learning, campuses, subsidiaries, franchises, validation arrangements and other collaborative arrangements | 16 |
| Annex D | Definition of residential and funding status | 23 |
| Annex E | Definition of ASCs and ITE (QTS) specialist subjects | 27 |
| Annex F | Definition of mode of study | 30 |
| Annex G | Definition of level of study | 33 |
| Annex H | Rules for counting registrations | 35 |
| Annex I | Rules for counting credit values | 42 |
| Annex J | Table and column descriptions | 47 |
| Annex K | HESA/HESES/EYM mappings and end of year monitoring data extraction criteria | 53 |
| Annex L | Use of data by HEFCW | 65 |
| Annex M | Funding status reference grid | 67 |
| Annex N | Sample copies of IRIS output tables extracted from HESA data | 68 |

Adjustment of 2022/23 Funding

5. For the purposes of calculating the funding consequences of under-recruitment for 2022/23 funding, part-time undergraduate credit based teaching funding is recalculated using EYM data. Credit values (for part-time undergraduate students) resulting from modules for which students registered up to and including, as well as after, 1 November 2022 will be used and the number of credit values associated with modules from which students withdraw will be deducted. The signed off EYM tables from the HESA IRIS extraction will be used for this purpose.

Process for signing off end of year monitoring and other data extracted from the HESA student record

6. Providers must sign off the data presented in the final 2022/23 HESA student record IRIS outputs as of the 3 November 2023 HESA final sign off date, or as of the final sign off date as agreed if an extension has been granted. The deadline for returning the signed IRIS outputs to HEFCW is **19 January 2024**. Note that given this is the first year of producing IRIS outputs under the new HESA student record, we may need to rerun the IRIS outputs if any amendments to the IRIS programs are made. If any reruns fall after a provider's final sign off of the HESA data, then we will notify the provider that a new set of IRIS outputs is available. We will keep providers informed of any reruns and advise that if you sign off data earlier than the final or extended final sign off date, then you should await confirmation from HEFCW that there aren't any further updates to the IRIS outputs before signing them off.
7. During the HESA data quality checking period from 18 August to 27 October 2023, HEFCW will conduct quality checks of the data submitted. Any anomalies will be queried with the relevant provider. This is to assist with the providers own internal quality checking process and to ensure the data are fit for purpose for HEFCW. As described in the [HESA Student Record collection schedule](#), providers are required to either resubmit their data to amend these anomalies, or provide an explanation as to why they are genuine.
8. Prior to returning the signed off IRIS outputs to HEFCW, providers must have undertaken sufficient checks to be satisfied that the extracted data are accurate, and/or have made amendments where necessary if data are not accurate. As 2022/23 is the first year of the new student record under Data Futures, we are allowing changes to be made to all IRIS outputs at the sign off stage. Providers should provide an explanation of any changes made. Further details of the process are contained in the Data Requirements circular for 2023/24, to be published in October 2023.
9. We do not require a hard copy of the signed IRIS outputs. Signed outputs should be returned by emailing them to James Morgan at hestats@hefcw.ac.uk. The deadline for return of the signed off outputs is **19 January 2024**. Details about the process will be emailed separately to authorised signatories and data contacts in October 2023 as a reminder.
10. The IRIS outputs requiring sign off have an "S" prefix in front of their filename and are as follows:
 - a) End of Year Monitoring
 - b) HEFCW National Measures
 - c) Part-time fee waiver allocations
 - d) Part-time fee waiver monitoring
 - e) Degree apprenticeships monitoring (along with the requested additional information)
 - f) Master's bursaries allocations
 - g) Master's bursaries monitoring

- h) Per capita
- i) Disability premium
- j) Access and retention premium
- k) Welsh medium premium
- l) Expensive subjects premium
- m) PGR training allocation
- n) Race equality / Wellbeing and mental health funding
- o) Targeted Employability Support funding

Audit of data

11. Providers are reminded that EYM data, and other tables as described in paragraph 10 as extracted from the HESA student record via IRIS, and any amendments made to the extractions, including methods used to calculate any estimates included in the amendments, may be subject to an external audit carried out by HEFCW or by contractors working on HEFCW's behalf. The systems and processes used to generate the HESA data extracted are in the scope of the institution's internal audits.

Further information

12. Any queries should be directed to James Morgan (email hestats@hefcw.ac.uk).

Annex A

Summary guide to the EYM 2022/23 survey

- 1 The EYM 2022/23 survey circular gives definitions and guidance to providers about the EYM data that are extracted from the 2022/23 HESA student record via IRIS. Not all providers will have data extracted for all tables. Tables 1a, 1b, 1c, 3, 4 and 5 are extracted for all providers.
- 2 Tables 2a, 2b and 2c are extracted only for those with initial teacher education (ITE) leading to qualified teacher status (QTS) provision; and Table 6 is extracted only for University of South Wales.

HESES/EYM population

- 3 The following students are **included** in the EYM extraction:
 - Registered students (i.e. those that have a binding undertaking to pay a fee to a provider (unless the fee has been waived)).
 - Students aiming to obtain a recognised HE qualification.
 - Students studying for at least three per cent of a full-time equivalent or approximately one week of study.
 - Students based in the UK who are part of distance learning or franchise arrangements or who are based at campuses of the provider in the UK.
 - Outgoing exchange students.
 - Students on a year out or part of a year out as part of their course
- 4 Student who are **excluded** from the EYM extraction are:
 - Incoming exchange students.
 - Students whose only activity during the year is writing up a thesis or similar piece of work.
 - Students franchised in from other provider.
 - Students franchised to providers outside the UK.
 - Students at campuses outside the UK.
 - Students who are distance learning outside the UK.
 - Students whose provision is part of a validation arrangement only.
 - Students who are dormant for the whole year.
- 5 Both fundable and non-fundable provision, that leads to a recognised HE qualification (see Annex B), is included in the EYM extraction, see paragraph 10 below for a description of fundability status.

Distance learning, campuses, franchises, validation arrangements and other collaborative arrangements

- 5 Providers are responsible for ensuring that EYM data have been correctly extracted for all their distance learning, campus and franchised out provision in the UK. Arrangements that are validation only, where the delivering partner is

HEFCW funded, are included on the HESA student record by the delivering partner and are therefore included in the EYM extraction for the delivering partner and not the validating partner. Distance learning provision outside the UK and provision delivered at campuses or partners outside the UK are excluded from the EYM tables. For HEIs such provision will be included on the HESA aggregate offshore record and will not be extracted through the HESA IRIS EYM tables.

6 Definitions used in this circular, defined more fully in Annex C, are:

- **Distance learning:** distance learning students are those that are students of the reporting provider, where staff employed by the reporting provider are responsible for providing all teaching or supervision, but who are located away from the reporting provider and are not part of a franchising or other collaborative arrangement with another provider or organisation. Such students are counted in the same way as other students who are based at the reporting provider, though categorisation into fundability status depends on the location of the student.
- **Campuses:** Students based at campuses other than the main campus(es) are counted in the same way as students at the main campus(es) though categorisation into fundability status depends on the location of the campus.
- **Franchise:** this refers to an HE course taught at an provider (the franchisee) which is not directly in receipt of funding from HEFCW for that course, for which quality assurance is provided by another Welsh provider (the franchisor) and for which funding is passed to the franchisee by the franchisor in order to provide the taught course. Students should be registered as students of the franchisor and this can be by registering for the course at the franchisor or franchisee provider. For FT UG courses, funding may be in the form of the tuition fee which could either be provided directly to the franchisee or passed to the franchisee by the franchisor. In all cases the franchisor will return student related data to HESA and HEFCW on behalf of the franchisee.

A franchise can be with publicly funded or non-publicly funded providers in Wales or in the rest of the UK. Whether the franchisee provider is publicly funded or not and the location of the franchisee provider affect the categorisation of students into fundability status.

Where a student is franchised out for only part of the year, they are counted as franchised out if the majority of their provision for the year is franchised out.

- **Validation arrangement:** A validation arrangement is where a university (the validating partner) is responsible for the academic standards and quality of a programme which is monitored alongside its own programmes, but a delivery partner develops, delivers and assesses the programme leading to a university award. If the delivery partner is a

provider that is directly funded by HEFCW then the provision will be included in the EYM extraction for the delivery partner.

- **Other collaborative arrangements:** If students are on courses which are run jointly by two or more providers, where activity takes place at both or all providers, which are not the subject of a franchising or validating arrangement, they should be counted at each provider in proportion to the number of credits associated with delivery at that provider. There may be cases where the IRIS data extraction does not fully reflect the collaborative arrangements that are in place for joint courses. If this is the case providers should submit amendments to the extracted IRIS tables as part of the signing off process.

Students taught as part of other collaborative arrangements, where no activity takes place at the returning provider, with providers or organisations in or outside Wales, not owned by the Welsh HEI, that are not franchising arrangements, are not in the EYM population. These may be, for example, partnerships with non-publicly funded colleges where the provider provides quality assurance or validating arrangements only and does not provide any funding to that college.

Mergers and wholly owned subsidiary bodies

- 7 Merged providers will be presented in any HESA IRIS outputs as one provider which will include any relevant group provision (see Annex K paragraph 3). Where providers merge and form a group so that some providers are subsidiaries of another provider (the 'parent') then EYM tables will be extracted under the parent provider as returned to HESA. This will be the case whether or not the subsidiaries are legal entities in their own right. Wholly owned subsidiaries are considered to be campuses of the parent provider for the purposes of this survey.
- 8 Interim arrangements for merged providers can be agreed with HEFCW for the first year of reporting to facilitate the extraction of data, for example, HEFCW can provide a breakdown of any comparative data on the EYM tables into the pre-merged providers.

Residential and funding status

- 9 Students are categorised into three types of residential and funding status, home fundable, home non-fundable and overseas. Home students are those domiciled in the UK, those domiciled in the EU who are eligible to be treated as home students, and those who are otherwise entitled to pay home fees. For EU students this will be those continuing students who started before 1 August 2021, who were previously treated as home students, plus any new entrants starting on or after 1 August 2021 who are entitled to pay home fees as defined in the regulations. Those who are otherwise entitled to pay home fees, who meet the requirements of the regulations, will include EEA and Swiss nationals, students resident in the Channel Islands or Isle of Man and some categories of

Ukrainian and Afghan nationals (Annex D gives more details). . The three definitions are summarised below. In referring to funding for a student place, for all categories of student, this would be funding for course costs that are not covered by the tuition fee. For FT UG/PGCE students, the source of the tuition fee is also taken into account.

- **Home fundable:** a home student would be fundable by HEFCW unless the student's place receives funding from other sources, is the responsibility of a body other than HEFCW (e.g. ITE (QTS) entrants from 2019/20 onwards), or for students under the FT UG/PGCE fee regime if the tuition fee is paid for by a public source. A fundable student would be included in funding calculations carried out by HEFCW as appropriate.
- **Home non-fundable:** if a home student's place is funded from sources other than HEFCW, is the responsibility of a body other than HEFCW (e.g. ITE (QTS) entrants from 2019/20 onwards), or students under the FT UG/PGCE fee regime, if the tuition fee is paid from a public source, for example, HEIW, the NHS or Welsh Government ; or if a place is funded by HEFCW under a specific scheme such as the degree apprenticeship scheme; or the student is studying at an FEI on a course that is specifically designated, the student would be counted as non-fundable. A student would also be counted as non-fundable if the course they are on is run only for a particular group of students and is not open to anyone who is suitable qualified to apply (referred to as a 'closed' course).

There are also conditions on location of provision which, if not met, mean that home students are counted as non-fundable. Home students franchised to non-publicly funded providers in the UK or publicly funded providers that are outside Wales within the UK are counted as non-fundable unless agreement has been made with HEFCW that Welsh domiciled students on these courses can be considered fundable.

Home distance learning students where the student is based outside Wales within the UK, and the student is not Welsh-domiciled, are counted as non-fundable unless agreement has been made with HEFCW that home domiciled students on these courses, that are not Welsh domiciles, can be returned as fundable.

Home students at campuses outside Wales within the UK are counted as non-fundable unless they are Welsh domiciled or unless agreement has been made with HEFCW that home domiciled students on these courses, that are not Welsh domiciles, can be returned as fundable.

- **Overseas:** these are students domiciled outside the UK or EU, or students domiciled in the EU who are not eligible to pay home fees. This will include the majority of EU students that started on or after 1 August 2021.

10 Annex M contains a grid which provides a look up to aid categorisation into fundability status.

Academic subject categories and ITE (QTS) specialist subjects

- 11 On Table 4, registrations are split into academic subject categories (ASCs). These are based on the HECoS code of the course. Registrations can be split between ASCs except for full-time undergraduate medicine and dentistry registrations and full-time ITE (QTS) registrations which are only counted in ASCs 1 and 11a respectively. Annex E gives more detail and a link to the mapping from HECoS codes to ASCs.
- 12 On Tables 2a, 2b and 2c, students studying secondary education ITE (QTS) courses are split by specialist subject. If a course is such that it is in a specialist subject with another subject that is not a specialism then registrations are counted wholly against the specialist subject (Annex E paragraphs 4 to 7 give more detail). HEIs should adjust their HESA IRIS output for EYM Table 2 to reflect this position where necessary.
- 13 On Tables 1a to 1c, each credit value is ascribed to the ASC of the subject taught in the module rather than the subject of the qualification aim of the student. This will be the HECoS code returned for the module on the HESA student record. Annex E gives more detail and a link to the mapping from HECoS codes to ASCs on the HEFCW website.

Mode of Study

- 14 The mode of study of a student is determined by how much time they spend studying, whether the student is charged a certain level of fee and whether or not they are on a year out as part of their course. Annex F gives the full definition. There are three modes of study:
 - **Full-time:** a full-time student is normally required to attend (whether at premises of the establishment or otherwise) for periods of a minimum of 24 weeks; **and** a whole full-time fee is chargeable for the current year of the programme of study (which will be a regulated fee for home UG/PGCE students of up to a maximum of £9,000).

An exception to this is if the student is in the final year of a full-time course in which they attend for less than 24 weeks in which case it may be that a whole fee is not charged;

 - **Full-time sandwich year out:** for a student to be classified as sandwich year out, their course should fit the definition of a sandwich course provided in Schedule 1 6(1) of the Education (Student Support) (Wales) Regulations 2018 (SI 2018 No. 191), or they should be full-time on a study or placement year abroad. In addition the fees chargeable are regulated fees of £1,800 for a work placement year of a sandwich course and £1,350 for a year abroad.

If a student follows the same pattern of study as other students on a sandwich year out on their course and would be considered to be on a

sandwich year out other than that they are an overseas student and are therefore not subject to regulated fees, then they should be counted as sandwich year out;

- **Part-time:** any student not classified as full-time or full-time sandwich year out should be classified as part-time on the survey.

Level of Study

15 The level of study of a student is determined by the qualification they are aiming for. Recognised HE qualifications are defined in Annex B. There are four levels of study defined: undergraduate non-degree; undergraduate degree; postgraduate taught; and postgraduate research, some of which are further split into franchised out and non-franchised out in the returned data:

- **Undergraduate non-degree:** all undergraduate level courses which lead to a qualification other than a first degree. For example, modules leading to credit that can potentially be counted towards an HE qualification, foundation degrees, HNCs and qualifications leading to certificates for the teaching of further education are non-degree courses.
- **Undergraduate degree:** undergraduate degree students are those aiming for a first degree. This includes degree courses with an integrated Master's year or an integrated foundation year.
- **Postgraduate taught:** postgraduate taught courses are those which require as a normal condition of entry that entrants be already qualified at degree level. Those courses that are mainly taught even though part of the course may include a dissertation are included as postgraduate taught. PGCE courses leading to QTS are included.
- **Postgraduate research:** These are postgraduate courses that are mainly research.

16 Full definitions are given in Annex G.

Completion status - registrations

17 On Tables 3, 4, 5 and 6, only completed or partially completed registrations are counted and non-completions are excluded. Completion status is determined on a year of study basis, not on a course basis. Completion status is defined as follows:

- **Non-completions** are where students do not complete their studies due to withdrawal or dropout, or fail to take part in required assessment procedures for the year.
- **Completions** are all eligible students who are registered or expected to register within the academic year minus those who are expected to not

complete. Any transfers between ASCs, modes or levels of study should be included.

- **Partial completions:** some full-time and sandwich students on taught courses that are non-completions can be counted as 0.5 of a completion if they meet certain criteria. If the course is semesterised, this is that the first semester is completed and if the course is not semesterised, that the first four months are completed. The exact criteria can be found in paragraph 16 of Annex H.

Estimation

- 18 When the EYM data are extracted, the number of students registered that have not completed in 2022/23 will mostly be known. There will be some circumstances where estimates have to be made, for example, where students are on a course which spans two academic years. In general, if providers have to make amendments to the extracted data, estimates should be based on the proportion of non-completions in the previous year or years, or for new provision, information about similar provision in the first year of delivery. However, other methods may be used if providers believe these would provide more accurate estimates.
- 19 The extraction methodology used in IRIS calculates estimates of non-completions where necessary and these are included in the IRIS output. Further information can be found in Annex H, paragraph 14. Where providers use estimates to amend the number of non-completions in the output from IRIS, they should keep auditable evidence to show the basis of these calculations.

Completion status – credit values

- 20 Tables 1a, 1b, 1c and 6 present full-time, sandwich year out and part-time undergraduate and postgraduate taught registrations for the academic year 2022/23 in terms of the credit values associated with the modules started in the current academic year. Credit values relating to modules started in the year are counted along with the number of non-completed credit values and the number of completed credit values is calculated and shown in the tables. Annex I paragraphs 18 to 22 describe how to determine completion status in detail and how some non-completions are counted as partial completions. Completion status is defined as follows:
- a) **Non-completions** are where not all of the assessment required for a module has been undertaken.
 - b) **Completions** are where all assessment required for a module has been undertaken.
 - c) **Partial completions:** for modules on full-time and sandwich taught courses only, credit values for non-completed modules can be counted as partially completed if they meet certain criteria: if the course is semesterised and all required assessments due for the module during the

first semester have been undertaken then the credit values for the first semester can be counted as completed; if the course is not semesterised and all required assessments due in the first four months have been undertaken and there is auditable evidence that the student was still in attendance then half the credit values for the module can be counted as completed. The exact criteria can be found in paragraph 21 of Annex I.

Estimation

- 21 When the EYM data are extracted, the number of completed credit values for modules started in 2022/23 will mostly be known. There will be some circumstances where estimates have to be made, for example, where students are on a module which spans two academic years, or where a student is eligible to take part in further assessment for a module after the end of the year in order to complete the module. In general, where estimates are used to make amendments to the extracted data, they should be based on the proportion of non-completed credits for the module in the previous year or years, or for new modules, information about similar provision in the first year of delivery. However, other methods may be used if providers believe these would provide more accurate estimates. Further information on estimation can be found in paragraph 21 of Annex I. The extraction methodology calculates estimates of non-completions where necessary and these are included in the IRIS output. Where providers make estimates of non-completions to amend the output from IRIS, they should keep auditable evidence to show the basis of these calculations.

Table descriptions

- 22 **Tables 1a, 1b and 1c** include data on credit values for home fundable undergraduate and postgraduate taught students, but not postgraduate research students. Data are a split by level and ASC. The credit values are counted in accordance with the guidelines set out in Annex I. Note that some students excluded from Tables 3 and 4 as non-completions may be shown as completing modules or credit values in Tables 1a, 1b and 1c. Similarly, final year students on non-standard academic year courses may be excluded from Tables 3 and 4 but credit values for modules relating to those students may be recorded in Tables 1a, 1b and 1c.
- 23 **Table 2a** includes data about full-time FT UG/PGCE registrations between 1 August and 1 November 2022 on ITE (QTS) courses for each provider delivering such courses. Data are by phase of study (primary or secondary) and by specialist subject for the secondary phase. Registrations are split into UG and PGCE provision. Total registrations between 1 August and 1 November are included along with the number of registrations gaining QTS.
- 24 **Tables 2b and 2c** include data about registrations on ITE (QTS) courses at the Open University in Wales, for part-time and part-time employment based routes respectively. Data are collected by phase of study (primary or secondary) and by specialist subject for the secondary phase. Registrations are split into UG

and PGCE provision. Total registrations between 1 August and 1 November are included along with the number of registrations gaining QTS.

- 25 **Table 3** includes data on all countable completed registrations, by mode and level of study. There are columns for home fundable, home non-fundable and overseas students. This table aims to have a complete end-year picture of the provision at a provider for the year. Data are counted to one decimal place where full-time taught partial completions are included as 0.5 of a completion.
- 26 **Table 4** includes data on all countable completed registrations for home fundable students, by ASC, mode and level of study, including a split of the undergraduate levels of study into franchised out and non-franchised out.
- 27 **Table 5** includes data on full-time/sandwich year out and part-time UG/PGCE completed registrations split into new entrants and continuing students. Data are presented by ASC group (for full-time/sandwich year out provision) and by whether the provision is fundable or not. Data are further split into Welsh residential status and other home residential status in order to reflect the different arrangements for tuition fee support and student support for these groups.
- 28 **Table 6** relates to provision at the University of South Wales only and includes information about Performance Element provision in ASC 10 at the University of South Wales.

HESA data

- 29 Annex K gives the criteria by which data are extracted from the HESA student record via the IRIS system for HEIs and HEFCW directly funded FEIs. All end of year monitoring data are now extracted from the HESA student record via IRIS and so particular attention should be given to the fields described in the annex in checking the IRIS EYM table output prior to signing and sending back to HEFCW. It is possible to make amendments to the data prior to sending the signed tables to HEFCW.
- 30 Further guidance and a reminder regarding the return of these tables will be emailed to all authorised signatories and data contacts at providers in October 2023.

Definition of a recognised HE qualification

- 1 A recognised HE qualification is one which is awarded on the successful completion of a prescribed course of HE as defined in the regulations¹. Such qualifications include any postgraduate or undergraduate degree, including foundation degree, accredited HE diploma or HE certificate, including HND and HNC. Other professional or vocational qualifications may be included provided they are generally recognised as HE qualifications. Such qualifications, for example, college certificates, are only considered recognised if they are validated by Aberystwyth University, Bangor University, Cardiff Metropolitan University, Cardiff University, Swansea University, the Open University, the University of South Wales, the University of Wales, the University of Wales Trinity Saint David, Wrexham Glyndŵr University or are included (or awaiting inclusion) within the Credit and Qualifications Framework for Wales (CQFW).
- 2 Courses, modules or units which enable credit to be obtained towards recognised HE qualifications (as defined above) also fall within the definition of recognised HE courses for the purpose of this survey. This includes programmes or individual courses which include foundation study as an integral part of a longer programme which leads to, or provides credit towards, a recognised HE award, provided the student has registered for the longer programme. It also includes stand alone modules that are credit bearing and are at HE level (level 4 and above on the CQFW), where that credit can potentially be accumulated over time to achieve an HE qualification, such as micro-credential modules.
- 3 For directly funded FEIs that are not also regulated, prescribed courses of HE that lead to a recognised HE qualification are those included in the FEI's portfolio of courses, as agreed with HEFCW. For directly funded FEIs that are regulated there is no requirement to have an agreed portfolio. Where a directly funded FEI has any specifically designated courses in addition to its directly funded courses, it should treat these as prescribed HE courses that lead to a recognised HE qualification. Providers that are not directly funded by HEFCW, that have specifically designated courses, are not included in the extraction of end of year data.

¹ [The Education \(Prescribed Courses of Higher Education\) \(Wales\) Regulations 1993](#)

Annex C

Distance learning, campuses, subsidiaries, franchises, validation arrangements and other collaborative arrangements

- 1 Distance learning provision that takes place in the UK, and provision at campuses, wholly owned subsidiaries and franchises that are within the UK are included on the EYM extraction. Provision that takes place outside the UK is not included in the coverage of the EYM extraction but for HEIs will be included in HESA's aggregate offshore record. Students on study or placement years or part years abroad as part of their course are treated as if their provision is where they normally study when they are not abroad for the purposes of extracting data.
- 2 There may be circumstances where providers are delivering courses using different methods of delivery to usual as a result of exceptional nationwide situations such as the Covid-19 pandemic, to ensure the safety of students and staff and in response to Welsh Government guidance. This may mean, for example, that a course is delivered using a mixture of on-site provision and distance learning, whereas in normal years it was delivered wholly on-site. If the delivery method of a course has been changed solely because of an exceptional nationwide situation, the course should be considered to be delivered via the original intended method of delivery. For example, students on a full-time course that is delivered via online learning for all or part of the year of study because of a pandemic, would not be considered to be distance learning. Conversely, students on a part-time course, designed to be delivered via distance learning, and for which there is no intention of reverting to on-site delivery when special measures are no longer in place, should be considered to be distance learning students. This should be reflected in the HESA student record return.
- 3 Where providers have concerns about how changes to course delivery are reflected in the EYM data extraction, they should contact HEFCW for advice.
- 4 It should be noted that the guidance provided in paragraph 8 about non-Welsh domiciled home distance learners based outside Wales, is intended to apply to courses that are designed to be delivered through distance learning and not to courses that had a distance learning element in place solely due to an exceptional nationwide situation.
- 5 Providers should also contact HEFCW for further guidance where they are not clear about how students based outside Wales or provision that is part of a franchising or other collaborative arrangement are counted for EYM purposes.
- 6 A reference grid which provides a look up to help categorise students by fundability status based on their location of study is at Annex M.

Distance learning students

- 7 Distance learning students are students registered with the reporting provider, where staff employed by the reporting provider are responsible for providing all teaching or supervision, but who are located away from the reporting provider and are not part of a franchising or other collaborative arrangement with another provider or organisation. Such students are not in attendance at the provider for the whole of the year, with the possible exception of occasional attendance, such as examinations or summer schools. Such students are counted in the same way as other students who are based at the reporting provider, though categorisation into fundability status depends on the location of the student. It should be noted that courses that are designed to be taken in person, but have an online learning element, would not be considered to be distance learning.
- 8 If the student is a home student and is located within Wales, or is Welsh domiciled and located outside Wales within the UK, then the student can be counted as home fundable, provided they fit the other criteria to be fundable given in Annex D. Home students located outside Wales within the UK that are not Welsh domiciled are included as home and non-fundable, unless agreement has been sought and granted to include such students as home fundable. Providers may only return data relating to home students that are distance learning and located outside Wales, and are not Welsh domiciles, as home fundable if HEFCW has been notified of the courses these students are on and has agreed that these students should be fundable. Details of how to go about getting this agreement are in paragraphs 30 to 32 below.
- 9 If a student located outside Wales regularly travels to a campus of the provider, or other premises owned or hired by the provider, that is located in Wales for lectures, tutorials or other teaching or academic requirements, and this makes up the majority of activity for the reporting year, then it is likely that the student is not a distance learning student for that year. If the student spends the majority of the reporting year away from the provider and most academic activity takes place by online or postal correspondence, then the student should be considered to be a distance learning student for that year.
- 10 Distance learning that takes place outside the UK is excluded from the main EYM population and is not included in the extraction. For HEIs data relating to these students will be returned on the HESA aggregate offshore record.
- 11 A year out as part of a sandwich course, exchange scheme or other placement scheme should not be considered to be distance learning. In these cases, the student should be considered to be attending the place of study normally attended when not on their year out in order to determine their fundability status.

CampusesCampuses based in Wales

- 12 Students based at campuses in Wales are counted as home fundable, home non-fundable or overseas as appropriate.

Campuses based outside Wales in the UK

- 13 Where a provider has a campus outside Wales, but in the UK, only home students based at that campus that are Welsh domiciled should be considered fundable, provided they fit the criteria to be fundable in Annex D. Other students at the campus should be included on the HESA student record as home non-fundable or overseas as appropriate. If a non-Welsh domiciled home student is based at both a campus of the provider in Wales and a campus outside Wales within the UK, then in the year of return, they should only be considered fundable if they spend the majority of their time at the campus in Wales.
- 14 Agreement can be sought to include home non-fundable students based at a campus outside Wales, but in the UK, as fundable. Providers may only return data relating to home students that are based at a campus of the provider that is located outside Wales, and are not Welsh domiciles, as home fundable if HEFCW has been notified of the courses these students are on and has agreed that these students should be fundable. Details of how to go about getting this agreement are in paragraphs 30 to 32 below.

Campuses based outside the UK

- 15 Provision at campuses outside the UK is not included in the EYM population, however, such provision should be included by HEIs on the HESA aggregate offshore record.

Wholly owned subsidiary bodies

- 16 Providers may consist of one legal entity or have a group structure where one or more providers are wholly owned subsidiaries of a 'parent' provider that are each legal entities in their own right.
- 17 Wholly owned subsidiaries are considered to be campuses of the parent provider for the purposes of EYM and HESES.

Franchises

- 18 The term 'franchise' refers to an HE course taught under a sub-contractual arrangement at a provider (the franchisee) which is not directly in receipt of funding from HEFCW for that course, for which quality assurance is provided by another Welsh provider (the franchisor) and for which funding is passed to the franchisee by the franchisor in order to provide the taught course. Students should be registered as students of the franchisor and this can be by registering

for the course at the franchisor or franchisee provider. For FT UG courses, funding may be in the form of the tuition fee which could either be provided directly to the franchisee or passed to the franchisee by the franchisor.

- 19 Data relating to students taught on the basis of a franchise agreement, referred to as 'franchised out' students, should be included in any data returns by the franchisor on behalf of the franchisee, and are included in the franchisor's EYM extraction. Undergraduate franchised out assumed completed registrations are categorised separately in Table 4.
- 20 If students are part of a franchise arrangement and the franchisee delivers the provision through distance learning, the guidance for franchise arrangements should be followed first and then the guidance relating to distance learning arrangements should be followed in categorising students by fundability status.

Franchises based in Wales

- 21 If the franchisee is in Wales and is a publicly funded provider (i.e. is an HEI or FEI in receipt of funding council or government funding) then the franchised out students are counted in the EYM return at the franchisor. The students will be included as home fundable or non-fundable or overseas as appropriate according to the definitions in Annex D.
- 22 If the franchise arrangement is with a non-publicly funded provider in Wales then any student data are included as home non-fundable or overseas in the EYM extraction. Providers may only return data relating to Welsh domiciled students franchised to non-publicly funded providers in Wales as home fundable on the HESA student record if HEFCW has been notified of the courses these students are on and has agreed that they should be fundable. Details of how to go about getting this agreement are in paragraphs 30 to 32 below.

Franchises based outside Wales within the UK

- 23 If the franchise arrangement is outside Wales within the UK with a publicly or non-publicly funded provider then any student data are included as home non-fundable or overseas in the EYM extraction as appropriate. Providers may only include data relating to Welsh domiciled students franchised to providers outside Wales as fundable if HEFCW has been notified of the courses these students are on and has agreed that they should be fundable. Details of how to go about getting this agreement are in paragraphs 30 to 32 below.

Franchises outside the UK

- 24 Data relating to franchises outside the UK are not included on the EYM data extraction, however, such provision should be included by HEIs on the HESA aggregate offshore record.

Partial franchises

- 25 Where students are part of franchise arrangement where they are only franchised out for part of the year, they are included as franchised out registrations if the majority of their provision for the year is franchised out, otherwise they are included as non-franchised out.
- 26 In the IRIS system, for credit values, a more detailed split of franchised out provision is made. All credit values are counted as franchised out for modules that are 100% franchised out and where modules are partially franchised out, the proportion of the module that is franchised out is applied to the number of credit values to get the number of franchised out credit values. The wholly franchised out credit values and the partially franchised out credit values are shown in two separate columns in Table 1c. See Annex K, paragraph 39 for further guidance.

Validation arrangements

- 27 A validation arrangement is where a university (the validating partner) is responsible for the academic standards and quality of a programme which is monitored alongside its own programmes, but a partner (the delivery partner) develops, delivers and assesses the programme leading to a university award. Where validation is the only element of the partnership arrangement, such programmes would not be returned on HESA by the validating partner.
- 28 Where the validated provision is based in the UK and the delivery partner is a HEFCW-funded Welsh provider, then the delivery partner would return the provision on the HESA student record, with fundability status and other definitions applied as outlined in the EYM/HESES guidance. Provision delivered by a delivery partner based outside Wales would only be returned on the HESA student record if the delivery partner is a subscriber to HESA.
- 29 Validated provision based in the UK is currently not included on the HESA student record by the validating partner, and would be returned by the delivery partner where appropriate.
- 30 Where the delivery partner is based outside the UK, then the validating partner would include the provision on the HESA aggregate offshore record.

Other collaborative arrangements

- 31 If students are on courses which are run jointly by two or more Welsh providers, where activity takes place at both or all providers, which are not the subject of a franchising or validating arrangement, they should be counted at each provider in proportion to the number of credits associated with delivery at each provider. If the course is run jointly between a Welsh provider and a provider outside Wales, then only the provision delivered at the Welsh provider should be included at the Welsh provider. On the HESA student record, courses that are run jointly may not be returned such that data can be counted in this way.

Therefore, there may be cases where the IRIS data extraction does not fully reflect the guidance. If this is the case providers should submit amendments to the extracted IRIS tables as part of the signing off process.

- 32 Students taught as part of other collaborative arrangements, where no activity takes place at the returning provider, with providers or organisations in or outside Wales, not owned by the Welsh HEI, that are not franchising arrangements, are not in the EYM population. These may be, for example, partnerships with non-publicly funded colleges where the provider provides quality assurance or validating arrangements only and does not provide any funding to that college. If providers have students that are returned on the HESA student record, but do not fit the criteria to be in the EYM population, they should contact HEFCW to be certain that they are not being excluded from the IRIS EYM tables in error.

Approval to count students as fundable

- 33 Where providers wish to seek approval to return data related to Welsh domiciled students franchised to providers outside Wales within the UK or to non-publicly funded providers within the UK as fundable, they should submit evidence outlining why they think the provision should be fundable, including:
- Details of any franchise arrangement, for example, the organisation franchised to, and if it is with a non-publicly funded provider, why it is with that particular provider and not a publicly funded provider.
 - If there are other partners involved, why funding is not available from elsewhere.
 - If the provision is bespoke provision for a particular partner, how the course is run so that it is not a closed course run just for that partner.
 - The numbers and credits involved by mode, level and domicile
 - Any other relevant information to support the provision being HEFCW-fundable.
- 34 Where providers wish to seek approval to return data relating to home domiciled students, that are not Welsh domiciled, that are distance learning but are located in the UK outside Wales or are based at campuses in the UK outside Wales, as fundable, they should submit evidence outlining why they think the provision should be fundable, including:
- Details of the course the students are studying for, including subject and qualification aim.
 - The numbers and credits for all students on the course, by domicile (Welsh/other home/overseas).
 - Reasons why allowing non-Welsh domiciled students that are based outside Wales to be returned as fundable will benefit Wales and/or the local region.
 - Any other relevant information to support the provision being HEFCW-fundable.

- 35 In considering requests, we are looking for evidence that changing the fundability status of students would provide benefits, such as:
- Benefits to Wales and the region, for example, is there a route for students taking the provision to gain employment in Wales or contribute to Wales in some way after they graduate or during their studies.
 - Improvements in recruitment, for example, are the courses being run for both English and Welsh domiciles, where having the England based students may mean a course is feasible to run for Welsh domiciles.
 - Financial viability, for example, a course may become more financially viable with additional fundable students.
 - Increasing the diversity of the student body, for example, making courses more accessible for disabled students.
- 36 The request should be submitted to Hannah Falvey at hestats@hefcw.ac.uk. Submissions will be considered by HEFCW's Data and Analysis Group at the earliest opportunity and on a case by case basis. In looking at the evidence, we will consider how approving the request might improve recruitment and financial viability, raise the provider's profile and/or increase the diversity of the student body, as described above. We will also consider the balance of student numbers and funding by domicile and location, and how the provision contributes to the promotion of HE. Any questions about the process should be directed to hestats@hefcw.ac.uk. Note that any provision submitted for approval should only be returned as fundable on HESA and HESES if confirmation has been received from HEFCW.
- 37 Any request must be made in time to return the HESES survey data. A retrospective request which would mean data are only included in the EYM data extraction would not be accepted. Therefore, only arrangements which have already received approval should be included as fundable on the HESA student record and subsequently extracted to create the EYM return.
- 38 Any approvals granted through this process will be reviewed after three years. Providers will be expected to provide additional information to inform the review when requested. If there is any material change in the provision that approval has been given for, including significant increases in numbers, whether three years has passed or not, then providers must resubmit a request for approval.

Definition of residential and funding status

Home students

- 1 Home students are those domiciled in the UK, those domiciled in the EU who are eligible to be treated as home students, and those who are otherwise entitled to pay home fees. For EU students this will be those continuing students who started before 1 August 2021, who were previously treated as home students, plus any new entrants starting on or after 1 August 2021 who are entitled to pay home fees as defined in the regulations. Those who are otherwise entitled to pay home fees will include EEA and Swiss nationals who meet the requirements of the regulations, students from Crown dependencies, and students from Ukraine and Afghanistan who meet the requirements of the regulations..
- 2 Students who are entitled to pay home fees are defined in the Education (Fees and Awards) (Wales) Regulations 2007 as amended. The amendments relating to the changes for EU and other students starting on or after 1 August 2021 can be found in the Education (Student Finance) (Miscellaneous Amendments) (Wales) (EU Exit) Regulations 2021 (SI 2021 No. 481). Other recent amendments made in 2021 and 2022, including those relating to students from Crown Dependencies, Ukrainian nationals and Afghan nationals are included in the Education (Student Fees, Awards and Support) (Amendment) (Wales) Regulations 2021, the Education (Student Finance) (Miscellaneous Amendments) (Wales) Regulations 2022, the Education (Student Finance) (Eligibility for Ukrainian Nationals and Family Members) (Miscellaneous Amendments) (Wales) Regulations 2022 and the Education (Postgraduate Student Support) (Miscellaneous Amendments) (Wales) Regulations 2022².
- 3 We would also like to draw your attention to Student Finance Wales information notices from 2021 and 2022 that contain information about changes to home fee status made in the regulations, these are [SFWIN 01/2021](#), [SFWIN 02/2021](#), [SFWIN 03/2021](#), [SFWIN 08/2021](#), [SFWIN 01/2022](#), [SFWIN 04/2022](#) and [SFWIN 06/2022](#). The Student Finance Wales notices can be found at: [Information Notices - Policy information - Student Finance Wales, Practitioners](#)

² [Education \(Fees and Awards\) \(Wales\) Regulations 2007 \(SI 2007 No. 2310\)](#)
[Education \(Student Finance\) \(Miscellaneous Amendments\) \(Wales\) \(EU Exit\) Regulations 2021 \(SI 2021 No. 481\)](#)
[Education \(Student Fees, Awards and Support\) \(Amendment\) \(Wales\) Regulations 2021 \(SI 2021 No. 1365\)](#)
[Education \(Student Finance\) \(Miscellaneous Amendments\) \(Wales\) Regulations 2022 \(SI 2022 No.79\)](#)
[Education \(Student Finance\) \(Ukrainian Nationals and Family Members\) \(Miscellaneous Amendments\) \(Wales\) Regulations 2022 \(SI 2022 No. 764\)](#)
[Education \(Postgraduate Student Support\) \(Miscellaneous Amendments\) \(Wales\) Regulations 2022 \(SI 2022 No. 403\)](#)

- 4 The above regulations and amendments can be found on the National Archives UK legislation website, www.legislation.gov.uk, under 'Browse Legislation', 'Wales', 'Wales Statutory Instruments'.
- 5 Where reference is made to total home students, this relates to the sum of those fundable and non-fundable as defined in paragraphs 7 and 8 below. 'HEFCW funding' referred to below does not include funding for special initiatives or schemes even if the funding is administered and paid to providers by HEFCW.
- 6 In referring to funding for a student place below we mean funding for course costs that are not covered by the tuition fee. For the purposes of the guidance below, bodies such as Welsh Government, Health Education and Improvement Wales (HEIW), NHS and the Home Office, where providing funding for places on a course that is run to train people that work in that body and the whole course or a large proportion of the course is funded by the body, would be considered to be a public body and not an employer. If an individual were to be employed by a body that would be considered a public body, and the body were to pay for the individual's place on a course then it would be considered to be the employer and the place would be considered to be funded by the student's employer. For home FT UG/PGCE students the source of the tuition fee payment is also taken into account when determining fundability status (see paragraph 8e below).
- 7 In following the guidance in this annex, providers should take note of the guidance relating to any changes in delivery method because of an exceptional nationwide situation in Annex C, paragraphs 2 to 4. A reference grid which provides a look up to help categorise students by fundability status is at Annex M.

Eligible for HEFCW funding – home fundable

- 8 Home students are eligible for HEFCW funding unless their place is considered ineligible as described in paragraph 8 below. Where a course is self-financing (i.e. the course is financed by a particular employer or organisation) but open (i.e. other candidates who are suitably qualified may be enrolled), then any additional students that the finance does not cover may be returned as eligible for HEFCW funding.

Ineligible for HEFCW funding – home non-fundable

- 9 Home students ineligible for HEFCW funding are those who may pay a home fee but whose place is not considered eligible for any available HEFCW funding (for example, per capita funding). Students should be considered non-fundable where any of the following apply:

Based on location of the student:

- a) The student is based at a campus outside Wales within the UK or is distance learning outside Wales within the UK, and the student is not

Welsh domiciled, unless HEFCW has agreed that the students are fundable;

- b) The student is part of a franchise based outside Wales within the UK, or a franchise with a non-publicly funded institution, unless the student is Welsh domiciled and HEFCW has agreed that the provision is fundable;

Based on the funding source or the responsible body:

- c) The student place is on a self-financing course that is closed, i.e. the course is not open to any suitably qualified candidate, for example, courses specifically for particular employers;
- d) The student place is funded through the continuation of European funding or replacements for such funding;
- e) Funding for the student place, or for FT UG/PGCE students, the tuition fee, is paid from a public source and not directly by the student (via loan/grant or, for example, themselves, their employer or other private source). For example, places on the National MA Education (Wales) programme funded by Welsh Government, places funded by Welsh Government through Personal Learning Accounts and places funded by HEIW, NHS or the Home Office;
- f) For part-time and PGT students, if the student place is funded from private sources such as a parent or sponsor;
- g) Funding for the student place is provided through a specific HEFCW scheme, for example, the degree apprenticeship scheme (see circular [W22/14HE](#) for details of eligibility for the degree apprenticeship scheme);
- h) The place is the responsibility of a public body other than HEFCW, e.g. Welsh Government for ITE (QTS) entrants from 2019/20 onwards or HEIW for nursing students. For places on courses where the responsible body is HEIW, but the student is not eligible for bursary funding because they have not committed to working in Wales for two years following completion of their course, then the student can be counted as fundable.

Based on alignment with research funding criteria:

- i) The students are postgraduate research students who are not in 2021 REF units of assessment (UoAs) included in the QR funding model for 2022/23. Details of the UoAs included in the QR funding model for each institution can be found in Annex A of HEFCW circular [W22/27HE](#), HEFCW's Funding Allocations 2022/23;

Based on other criteria:

- j) The student is studying on a course at a directly funded but not regulated FEI that is not listed in its agreed portfolio with HEFCW and the course is a specifically designated course.

Overseas students

- 10 Overseas students are those domiciled outside the UK who are not entitled to pay a home fee. This will include the majority of EU students that started on or after 1 August 2021. In addition, any UK-domiciled students who are not entitled to pay a home fee, should be included in this category.

Annex E**Definition of ASCs and ITE (QTS) specialist subjects**

- 1 HECoS codes of courses and modules are used to assign ASCs. Below is a description of the ASCs with ASCs 1 and 11 being split into sub-categories. The mapping from HECoS codes to ASCs is available on the [HEFCW website](#).

| ASC | Name | Description of contents |
|------------|---|--|
| 1 | Clinical and Pre-clinical/non-clinical Subjects 1a 1b 1c 1d | Pre-clinical/non-clinical Medicine Clinical Medicine Pre-clinical/non-clinical Dentistry Clinical Dentistry |
| 2 | Subjects and Professions Allied to Medicine | Subjects Allied to Medicine (excluding Pharmacology, Toxicology and Pharmacy) Social Work |
| 3 | Science | Physical Sciences Biological Sciences Agriculture and Related Subjects Pharmacology, Toxicology and Pharmacy |
| 4 | Engineering and Technology | Engineering Technologies |
| 5 | Built Environment | Architecture, Building and Planning |
| 6 | Mathematical Sciences, IT and Computing | Mathematical Sciences Computer Sciences Econometrics |
| 7 | Business and Management | Business and Administrative Studies |
| 8 | Social Sciences | Social Studies (excluding Social Work and Econometrics) Law |
| 9 | Humanities | Mass Communications and Documentation Linguistics, Classics and Related Subjects Languages and Related Subjects Historical and Philosophical Studies Imaginative Writing |
| 10 | Art, Design and Performing Arts | Creative Arts and Design (excluding Imaginative Writing) |
| 11 | Education 11a ITE (QTS) 11b Non-QTS | Any ITE leading to QTS Other education |

Apportionment of student registrations between ASCs

- 2 The distribution of student registrations between ASCs on Tables 4 and 5 depends on the assigned subject of qualification aim, with the following exceptions:

Initial Teacher Education

- 3 All undergraduate and postgraduate taught registrations on ITE courses leading to QTS are wholly assigned to ASC 11a (Education ITE (QTS)) irrespective of their HECoS codes. ASC 11a contains all and only those students on courses of ITE for primary or secondary teachers which lead to QTS upon successful completion. Courses of ITE for teachers in adult and further education and in-service training for teachers are recorded under ASC 11b (Education non-QTS).

ITE (QTS) secondary education specialist subjects

- 4 Each year, the Welsh Government set national intake targets for ITE (QTS) for the different phases (primary and secondary) and levels of study (undergraduate degree and PGCE). Within these national level targets, the Education Workforce Council (EWC) assigns intake targets for each ITE Partnership by level of study (undergraduate degree and PGCE) and, for secondary education, specialist subject. The specialist subjects for 2022/23 are listed in Tables 2a to 2c in Annex N. Targets for each ITE Partnership can be found on the [Education Workforce Council \(EWC\) website](#).
- 5 For registrations in secondary education, if a course is joint between specialist subjects, and the ITE Partnership that the provider belongs to has intake targets in both subjects, then registrations are split between the two specialisms and counted as 0.5 in each specialism. If a course is such that it is in a specialist subject with another subject that is not a specialism, then registrations on that course are counted wholly against the specialist subject. If there is no split into two specialist subjects, then registrations are counted as whole numbers.

Medicine and dentistry

- 6 All full-time undergraduate registrations on courses in medicine and dentistry are wholly assigned to the appropriate code in ASC 1. This includes both the clinical and pre-clinical/non-clinical parts of the course and any intercalated years. Courses other than medicine or dentistry are not assigned to ASC 1, either in part or in whole.

Major/minor or balanced combinations

- 7 Where HECoS codes indicate a major/minor or balanced combination of subjects split between two or more ASCs, registrations are allocated to the ASCs pro rata to the returned subject weightings and the resulting numbers are rounded to whole numbers or to 0.5 where partial completions are included

(see Annex H, paragraph 15) which, in total, show the correct number of completed student registrations.

Apportionment of credit values between ASCs

- 8 Each credit value is assigned to the ASC of the subject taught in the module rather than the subject of the qualification aim of the student. This is the HECoS code returned against the module on the HESA student record - see Annex K. The HECoS to ASC mapping given in paragraph 1 is used to categorise credit values into ASCs.
- 9 Credit values relating to registrations in ASCs 1 and 11a are not distributed across other ASCs and are only counted in ASCs 1 and 11a respectively. Credit values relating to individual modules of courses other than medicine and dentistry or ITE (QTS) are not assigned to ASC 1 or ASC 11a.

Definition of mode of study

Full-time

- 1 Students are classified as registered for full-time study if:
 - a) they are normally required to attend (whether at premises of the establishment or otherwise) for periods of a minimum of 24 weeks; **and**
 - b) a whole full-time fee is chargeable for the current year of the programme of study (which will be a regulated fee for home UG/PGCE students); **or**
 - c) they are in the final year of a full-time course in which they attend for less than 24 weeks.
- 2 Full-time regulated fees for home UG/PGCE students are up to a maximum of £9,000.
- 3 Full-time students will normally be studying for a qualification at the credit value rate shown in the table below, i.e. studying for the number of credit values for their qualification over the time period specified for a full-time student. Where a student repeats a year of study or part of a year of study on a full-time or part-time basis and has not progressed to the next year of study, the length of the course is effectively increased and the number of credit values that can be recorded increases accordingly.
- 4 There are some qualifications that don't have a normal duration if full-time, and are usually studied on a part-time basis. For example, HEFCW guidance on degree apprenticeships states that the apprenticeship should be no less than 3 years and no longer than 5 years. Similarly there is some flexible provision which is usually studied on a part-time basis and therefore does not have a normal duration if full-time. Where providers are unsure about the normal duration of a course, then they should contact hestats@hefcw.ac.uk.
- 5

| Qualification | Credit Values | Normal duration if full-time |
|--|---|------------------------------|
| Professional doctorate | 540 | 3 years |
| First degree with integrated Master's | 480 | 4 years |
| First degree with integrated foundation year | 360 for the degree element plus up to 120 for the foundation year | 4 years |

| | | |
|---|--|--|
| First degree, plus sandwich or other year out | 480 (year out included as 120 credits) | 4 years (including 1 sandwich or other year out) |
| First degree | 360 | 3 years |
| DipHE | 240 | 2 years |
| Foundation degree (with conversion module(s)) | 240 (+36) | 2 years (+ duration of module) |
| HND | 240 | 2 years |
| HNC | 120 | 1 year |
| Master's degree with dissertation | 180 | 1 year (whole 12 months) |
| Cert HE | 120 | 1 year |
| Postgraduate diploma | 120 | 1 year |
| PGCE | 120 | 1 year |
| PGCert | 60 | 6 months to 1 year |
| Most minor qualifications | 60 | 6 months |

- 6 This includes all full-time, sandwich, placement, study and language year abroad students other than those falling within the definition of full-time sandwich year out below.

Full-time sandwich year out

- 7 Students are classified as registered for sandwich year out study if all of the following apply:
- a) they are pursuing studies where their course falls within the definition of sandwich provided in Schedule 1 6(1) of the Education (Student Support) (Wales) Regulations 2018 (SI 2018 No. 191), or they are full-time on a study or placement year abroad; and
 - b) for home students, the fees chargeable for sandwich years out and study or placement years abroad are:
 - Regulated fees of up to £1,350 for undergraduates on courses provided in conjunction with overseas institutions (whether or not taken under the Erasmus+, Taith or Turing programmes), where study at the home institution is for less than 10 weeks.
 - Regulated fees of up to £1,800 for undergraduates on sandwich years out that are not Erasmus+, Taith or Turing years abroad where study at the home institution is for less than 10 weeks.
- 8 If a student follows the same pattern of study as other students on a sandwich year out on their course and would be considered to be on a sandwich year out other than that they are an overseas student and are therefore not subject to regulated fees, then they should be counted as sandwich year out.

Part-time

- 7 Students are classified as registered for part-time study if they do not meet the requirements to be either full-time or full-time sandwich year out. If a part-time student is on a placement or is spending time abroad as part of the course, the student should still be returned as part-time. Most distance learning would be considered part-time, however, the definition of full-time, including whether a full-time regulated fee is chargeable, should be considered first to ensure the course is correctly categorised.

Definition of level of study

Undergraduate degree

- 1 Undergraduate degree students are those aiming for a first degree. This includes integrated degree/Master's courses or degree courses that have an integrated foundation year. In both cases the activity is counted as undergraduate degree in every year of the course including the Master's and foundation years respectively.

Undergraduate non-degree

- 2 Undergraduate non-degree is defined as all undergraduate level courses which lead to a qualification other than a first degree, or lead to HE level credit at levels 4, 5 or 6 of CQFW that can be accumulated to achieve an HE qualification.. In general, such courses will be the equivalent of up to two years' full-time study, but the length of the course is not a defining factor when classifying courses as degree or non-degree. The relevant factor is whether the course enables the student to achieve a first degree or some other qualification or credit that can be accumulated towards an HE qualification - it is the other qualification, or credit that can be accumulated, that would be classified as non-degree. Students on all programmes below first degree level should be classified as undergraduate non-degree even if the title of the qualification includes the word 'degree'. In particular, foundation degrees should be classified as non-degree.
- 3 Both full-time and part-time courses leading to certificates for the teaching of further education, are treated as undergraduate courses regardless of the course or qualification aim returned to HESA.

Postgraduate

- 4 Postgraduate students are those on courses which require as a normal condition of entry that entrants be already qualified at undergraduate degree level. There are two groups of postgraduate, postgraduate taught and postgraduate research.

Postgraduate Taught

- 5 Postgraduate taught students are those attending courses which are mainly taught even though part of the course may include a dissertation. It includes all students on postgraduate degrees which are not mainly by research.
- 6 PGCE courses are to be included as taught postgraduate courses provided that they lead to QTS.

Postgraduate Research

- 7 Postgraduate research students are those attending courses which are mainly research although these may contain some formal teaching.

Rules for counting registrations

- 1 Only students who meet the following criteria are included in the data extraction:
 - a) they are registered. A registration is considered as a binding undertaking to pay a fee to an provider (unless the fee has been waived) as opposed to an acceptance of a place;
 - b) they are aiming to obtain a recognised HE qualification as defined in Annex B;
 - c) they are aiming to study at least 3 per cent of a full-time equivalent (FTE), or approximately one week of study.

- 2 Included are:
 - a) new registrations;
 - b) students re-registering for second or subsequent years of their study, including any repeated years;
 - c) students registered at FEIs, who are pursuing prescribed HE qualifications as defined in Annex B, where the FEI either receives mainstream funding from HEFCW directly, or, through a franchise agreement (data are returned only by the provider which franchises out the course);
 - d) outgoing exchange students, including Erasmus+ students and students on the Taith or Turing schemes;
 - e) distance learners in the UK;
 - f) students franchised to other providers in the UK;
 - g) students at campuses in the UK.

- 3 Excluded are:
 - a) incoming exchange students, including Erasmus+ or Taith scheme students;
 - b) students whose only activity during the year being counted is writing up a thesis or similar piece of work;
 - c) distance learners outside the UK;
 - d) students franchised to providers outside the UK;
 - e) students at campuses outside the UK;
 - f) students whose provision is part of a validating arrangement only;
 - g) students who are dormant for the whole year.

Students registered for more than one qualification or course

- 4 No full-time or sandwich student should be counted twice in the same academic year; nor should full-time or sandwich students who are registered for the main and an additional qualification offered within a single course be counted twice. However, students who are registered for two separate courses, where one is

full-time or sandwich, and the other is part-time, will be included in Tables 3 and 4 under both full-time or sandwich and part-time. For these purposes, a part-time course should be considered to be separate if the ability to follow that course is not dependent on concurrent enrolment on the full-time course and the student continues to meet all of the study requirements of the main course without increasing the length of the main course. For both full-time and part-time courses which lead to more than one qualification, only a single registration should be included. Providers should ensure that the EYM extraction of their data reflects these criteria.

Non-standard academic years

- 5 Those students who are following programmes of study which do not coincide with the academic year (1 August to 31 July) will be counted once only for each period of **up to** 12 months of study. They should normally be counted in the year in which the first registration occurs and in the years including the anniversaries of the first registration. An exception to this is if they go beyond the anniversary of the start date by less than two weeks, in which case a further registration would not be counted.

Example 1: A student enrolls for a full-time PhD in April 2021 and completes the programme in March 2024. She should be counted as a registration in HESES/EYM 2020/21, 2021/22 and 2022/23. She is counted three times, once for each 12 month period of full-time study, in the academic year in which she first registered and in the two subsequent academic years containing the anniversary of the first registration.

Example 2: A student enrolls for a part-time first degree in January 2023 and aims to complete the programme within six years. They would be counted as a registration in HESES/EYM 2022/23, and for each HESES/EYM up to HESES/EYM 2027/28, assuming that they take the full six years and finish in December 2028. They are counted six times, once for each 12 month period of full-time study, in the academic year in which they first registered and in the five subsequent academic years containing the anniversary of the first registration.

Example 3: As example 2, but personal circumstances mean that the student takes an extra two months to finish the course, and so finishes at the end of February 2029. As they have studied for two months beyond the anniversary of their start date, they will be counted as a registration for a seventh time, in HESES/EYM 2028/29.

Example 4: As example 3 but the student takes only an extra 10 days to finish the course. As this is less than two weeks beyond the anniversary of the start date, they would not be returned as a registration in 2028/29.

Final year of full-time study

- 6 Full-time programmes in which the final year does not fit the usual criterion to be full-time in terms of length, i.e. the final year is less than 24 weeks, but the

student has not changed their mode of study, will be included as full-time for the whole of the programme.

Example 5: A student enrolls on a full-time undergraduate course that starts on 1 October 2022 and finishes on 31 January 2024. He should be included in HESES/EYM 2022/23 as a full-time registration; and as a full-time registration again in HESES/EYM 2023/24 as even though he attends for less than 24 weeks, he has not changed his mode of study and is still registered as a full-time student.

Example 6: A student enrolls for a full-time 30 month undergraduate course that starts on 1 February 2023 and finishes on 31 July 2025. He will be included as a full-time registration in Table 3, Table 4 and Table 5 (as a new entrant) on EYM 2022/23, and again as a full-time registration in Tables 3 and 4 on EYM 2023/24 and EYM 2024/25, and on Table 5 as a continuing student in both 2023/24 and 2024/25 .

Repeated years of study

- 7 Where students repeat a full year on a full-time basis, and have not progressed to the next year of study, they will be included as a full-time student. Where a student repeats a year or part of a year on a part-time basis, and there has been no progression to the next year of the course, the student will be included as a part-time student. In both cases, the total length of their course will increase by one year.

Example 7: A student enrolls for a three-year full-time first degree course that starts in October 2022 and finishes in July 2025. He fails his first year of study and is permitted to repeat the whole year. He would be counted as a full-time registration on Tables 3 and 4 and Table 5 (as a new entrant) in EYM 2022/23 and again as a full-time registration on Tables 3 and 4 and Table 5 (as a continuing student) on EYM 2023/24, EYM 2024/25 and EYM 2025/26. He has been counted four times in total, including the repeat year,

Completions and non-completions

- 8 In Tables 3, 4, 5 and 6, the EYM extraction identifies the number of registered students who complete the year of study. This is all eligible students who have registered within the academic year minus those who have not completed. Any transfers between ASCs, modes or levels of study are included.
- 9 Non-completions occur where students do not complete their studies due to withdrawal, dropout, or failure to complete the year of study or take part in required assessment procedures. A registered student should generally be considered to be actively pursuing studies unless the provider has been formally notified of the student's withdrawal from the course. However, non-attendance for examinations generally indicates a student's failure to complete the year of study.

- 10 Students who sit examinations at the end of the course or year of study and fail them are deemed to have completed their studies and are **not** included as non-completions.
- 11 Completion status is determined on a year of study basis, not on a course basis. For example, a first degree student who takes all assessments required for the first year is counted as a completion for that year.
- 12 Students interrupting their studies for the remainder of the year of study for personal reasons are included in the definition of non-completions.
- 13 Students who do not take part in all or some of the required assessment procedures for the year of study, can complete by being assessed after the end of the academic year in order to enable them to progress to the next year or graduate. This will be, for example, where a student who did not sit the original examination within the year because of illness, takes a resit examination that takes place after the end of the academic year or where a student will be handing in coursework after the end of the academic year, by agreement with the institution. Estimates of the number of registrations expected to complete in this way will be included in the number of completions in the tables.
- 14 At the time of extraction of EYM data, it will be known if students who did not complete due to non-attendance at examinations, or non-participation in other assessment procedures, are eligible to take part in further assessment after the end of the academic year in order to complete. It will also be known for the previous year how many of those eligible to complete under these circumstances actually went on to complete. An estimate of such students will be included in the EYM extraction. In making any amendments to the EYM extraction at sign off, providers should use the proportion of these students who did complete in the previous year, to estimate the number of such students who will complete for 2022/23. Providers must keep auditable evidence to show the basis of their calculations. Where the student has failed to take part in required assessment procedures and there is no alternative arrangement to assess the student, they are counted as a non-completion.
- 15 Some non-completions can be included as partial completions, and these are described in paragraph 16 below. Where registrations fall into the definition of partial completions, and returned as such on the HESA student record, they will be included in the total returned as 0.5 of a completion.
- 16 For **full-time and sandwich taught** courses only, registrations are considered as having partially completed in the following cases:
 - a) *Where the course is semesterised, if*
 - individual modules are presented on a semester basis; and
 - the student has not withdrawn before the end of the semester in which the modules start; and
 - the student has taken part in all assessment procedures required for the modules pursued that take place during or immediately after the end of the semester;

then, even if there is additional assessment of the work undertaken during the semester that falls at the end of the year of study, that the student does not undertake, the student can be counted as a partial completion.

b) *Where the course is not semesterised, if*

- the student has not withdrawn in the first four months of attendance; and
- the student has taken part in all assessment procedures required for all modules started in the first four months, that take place during the first four months; and
- there is auditable evidence to show that the student was still in attendance at the end of the four months;

then, even if there is additional assessment of the work undertaken during the first four months that takes place at the end of the year of study, that the student does not undertake, the student can be counted as a partial completion.

Example 8: A student enrolls for a semesterised full-time undergraduate course that normally starts on 1 October 2022 and finishes on 30 June 2024. She completes the first semester of the first year but drops out in the second semester due to personal reasons. She rejoins the course in the 2023/24 academic year and completes the whole of the first year, and then goes on to complete the second year of the course in the 2024/25 academic year. She will be included in EYM 2022/23 as 0.5 of a full-time completed registration in Table 3, Table 4 and Table 5 (as a new entrant). In 2023/24 and 2024/25 she will be included on EYM Table 3 and Table 4 as a full-time registration and in Table 5 as a continuing student.

Example 9: 23 students enrol for a full-time first degree course. 2 students fail the first year and do not progress onto the second year of the course, instead, they repeat the whole of their first year on a full-time basis. They would be counted as a registration four times, twice for the first year of their course and once each for the second and third years of the course.

Example 10: 57 students enrol for a full-time first degree course starting in October 2022. 2 students fail the first year. The first student failed 2 modules out of a total of 10 modules and so was eligible to progress to the second year providing the 2 failed modules were retaken alongside the second year modules. This student would be counted as a full-time student three times, once for the first year of the course in 2022/23, once for the second year of the course in 2023/24 and once for the third year of the course in 2024/25.

The second student failed 5 of the 10 modules taken in the first year and did not progress to the second year of the course. He retook the 5 failed first year modules on a part-time basis in the 2023/24 academic year with the intention of resuming full-time study for the second year of the course in 2024/25. He would be counted as a full-time student for the first year of the course in 2022/23, as a part-time student in his second year at the institution in 2023/24, and as a full-time student in the second and third

years of the course (in his third and fourth year at the institution) in 2024/25 and 2025/26.

- 17 Further examples can be found in Annex H of the HESES 2022/23 circular [W22/40HE](#).

New entrants and continuing students– home undergraduate and PGCE (QTS) – Table 5

- 18 Data relating to undergraduate and PGCE (QTS) students are included on Table 5.

New entrants

- 19 For the purposes of extracting data to Table 5, new entrants are defined as students that are in their first year of study and are registered for a prescribed HE course leading to a recognised HE qualification. This includes:
- students undertaking a foundation year (year 0) as an integrated part of an HE course;
 - students entering directly into year 2 or a subsequent year of a course.

Not included as new entrants are:

- students who have already completed an integral foundation year (year 0);
 - students retaking the first year of a course;
 - students transferring from another course after spending their first year at the provider on the original course;
 - students who have completed an HND or foundation degree who take a top-up year to study for a degree at the same provider;
 - students who resume study after a period of inactivity.
- 20 If a student is on a course such that the first year of the course spans two academic years, they will only be counted as a new entrant in the academic year containing the start of their first year at the provider.

Example 11: A student starts a full-time HND course in 2020 and completes the course gaining an HND in July 2022. He then goes on to do a top-up year at the same institution in order to gain a degree and completes this in July 2023. He would be included as a new entrant in Table 5 on EYM 2020/21 only, and **not** counted as a new entrant in Table 5 of EYM 2022/23.

Continuing students

- 21 Students counted as continuing students on Table 5, are defined as students who are in their second or further year of study at the provider and are

registered for a prescribed HE course leading to a recognised HE qualification. This will include those that:

- are retaking the first year of a course;
- have transferred in from another course after spending their first year at the provider on the original course;
- are starting the first year of a course after completing an integral foundation year.

- 22 If a student is on a course such that a year of the course spans two academic years, they will only be included in the academic year containing the anniversary of their start date.

Split of home residential status and eligibility for funding status

- 23 Data relating to home new entrants and continuing students at the provider are broken down into home residential status (Welsh) and home residential status (other). For the purposes of extracting data in Table 5, residential status is based on the domicile as returned on the HESA student record.
- 24 Data are also extracted split into fundable and non-fundable. These categories follow the definitions in Annex D with the exception that HEIW/NHS-funded students are **excluded** from the registration count.

Rules for counting credit values

- 1 Full credit value data is included in the EYM extraction to enable any adjustments to funding to be calculated, and for an end of year credit value total to be calculated.
- 2 The guidance below should be used by providers in checking credit value data extracted as part of the IRIS outputs in Tables 1a, 1b, 1c and 6.
- 3 Annex K contains details of how we extract credit value data from the HESA student record via IRIS.
- 4 Only credit values associated with modules relating to registrations that are eligible to be counted as defined in Annex H, that are home fundable, are included in the extraction.
- 5 The numbers of credit values associated with enrolments are calculated by multiplying the total number of enrolments on each module by the number of achievable credit values associated with the module. For example, if 50 students are registered on a module from which 10 credit values may be achieved, the number of credit values counted is 500. Credit values that will be counted are the credit values associated with the module being pursued, not those successfully achieved.
- 6 All credit based data should conform to the Credit and Qualifications Framework for Wales (CQFW), except that in counting credit values the level of study is that of the overall qualification aim and not that of the module, if different.
- 7 The total numbers of credit values recorded for each course on the HESA student record should not exceed that shown in the table in paragraph 3 of Annex F, for each student over the course as a whole, unless a year of study or part of a year of study is repeated where a student has not progressed to the next year of study (see paragraph 16 below). If there are courses which do not fit into the categories in the table, HEFCW should be contacted for advice.
- 8 Where an institution has not formally allocated CQFW credit values to elements of its programmes, then notional credit values should be returned on the HESA student record on the basis of the CQFW standard. This is 120 credit values for one academic year of HE experience for full-time undergraduates, 180 credit values for postgraduates with one full 12 month year of HE, for example, an MSc with dissertation; and 120 credit values for postgraduate courses of less than a full 12 months, for example, a postgraduate diploma without a dissertation. In this context, it will be helpful to note the CQFW definition of the study year in terms of notional learning time: 1,200 hours for undergraduates (academic year); 1,800 hours for postgraduates (12 month year). (See [CQFW guidance](#) and [QAA frameworks document](#).)

- 9 Each module is assigned to the academic year in which the module started, and all credit values associated with that module shown in EYM in that academic year only. In this way each credit value will be counted once only, even if the module spans two academic years.
- 10 Only modules essential for the award of the qualification will be counted, and these are expected to be returned as countable on the HESA student record. Optional or elective modules not essential to the award of the qualification must **not** be returned as countable.

Example 1: A student enrolls for a part-time course on 1 February 2023 and completes the programme on 31 May 2025. The credit values to be extracted for EYM 2022/23 would be those associated with modules commenced between 1 February 2023 and 31 July 2023 and would be in column 2 of Table 1c. Those relating to modules commencing between 1 August 2023 and 31 July 2024 would be in column 1 of Table 1c of EYM 2023/24; and those relating to modules started between 1 August 2024 and 31 May 2025 would be in column 1 of Table 1c of EYM 2024/25.

Example 2: A student enrolls for a part-time HNC on 1 October 2021 and finishes on 30 June 2023. All credit values associated with modules started in the period 1 October 2021 to 31 July 2022 would be extracted for EYM 2021/22 and all credit values associated with modules started in the period 1 August 2022 to 30 June 2023 would be extracted for EYM 2022/23. The overall total number of fundable credit values for the course as a whole in EYM 2021/22 and 2022/23 should not exceed 120 credit values.

Modules taken on a not for credit basis

- 11 If students are taking module(s) which are credit bearing but on a not for credit basis, they should be recorded as such on the HESA student record. These modules are excluded from the EYM extraction

Example 3: A part-time module worth 10 credits starts in February 2023, finishing in May 2023. 23 students enrol on the module, which is the only module they are taking in the year, and are asked at the start of the module if they intend to take the exam at the end of the module, and this is formally recorded by the institution. 6 students declare that they will not be taking the exam and so took the module on a not for credit basis, and this is recorded on the provider's student record system. Of the 6 students who declared they would not take the exam, 1 changes their mind and sits the exam in May and this is also recorded on the system. Therefore, in extracting data from the HESA student record to column 1 of Table 1c, 180 credits are counted.

Repeated years

- 12 Where students repeat a year on a full-time or part-time basis, the length of the course is effectively increased and the number of values increases accordingly (for example, a part-time degree usually lasting six years where 60 credits are taken per year with a repeat year becomes a seven year degree equivalent to 420 fundable credit values). Credit values associated with students repeating a full year on a full-time basis, where the student has not progressed to the next year of study, are counted. Similarly, credit values associated with students repeating a semester or part of the year on a part-time basis who have not progressed to the next year of study and are not taking any modules relating to the next year of study, are counted. However, credit values associated with repeat modules where the student has progressed to the next year of study are **not** counted, unless the credit values associated with the module were counted as not completed in the previous year. In such cases, where credit values associated with a repeat module are counted, the maximum number of credit values over the whole course should not exceed those listed in paragraph 3 of Annex F. Modules returned on the HESA student record should be recorded as countable or not countable accordingly so that they can be extracted correctly.
- 13 Where a student studying for a full-time course is also studying for a part-time course which is eligible to be counted, as described in paragraph 4 of Annex H, then the credit values relating to modules of the part-time course are counted.

Completions and non-completions

- 14 A module and the credit values associated with it are counted as completed if all assessment required for that module has been undertaken. Otherwise, the module and the credits associated with it are counted as not completed.
- 15 Where a student withdraws or drops out of their course having completed some modules, or continues but withdraws or drops out of some modules, only the credit values associated with those modules that were not completed are included as non-completions. Credit values associated with the completed modules are **not** counted as non-completions.
- 16 Credit values associated with students who do not take part in all or some of the required assessment procedures for a module for the year of study, can be counted as completed if the student is assessed after the end of the academic year in order to enable the student to progress to the next year or graduate. This will be, for example, where a student who did not sit the original examination for the module within the year, because of illness, takes a resit examination that takes place after the end of the academic year or where a student will be handing in coursework for the module after the end of the academic year, by agreement with the provider. However, at the time of extraction of the EYM data, these credit values will be classified as not completed, according to the definition above, as the student will not have taken part in the required assessment for the module, and it will not yet be known whether they will take the assessment after the end of the academic year. Paragraph 17 below explains how estimates of the numbers of such credit

values are included in the EYM extraction and can be amended by providers at sign off.

- 17 At the time of extraction of the EYM data, it will be known if students who did not complete a module due to non-attendance at examinations, or non-participation in other assessment procedures, are eligible to take part in further assessment after the end of the year in order to complete the module. It will also be known for the previous year how many of those eligible to complete under these circumstances actually went on to complete the module. The EYM extraction estimates the number of non-completions. If amendments are necessary to reflect students in this situation, providers should use the proportion of these students who did complete the module in the previous year, to estimate the number of such students who will complete the module for 2022/23, and therefore the number of credit values associated with them that should be counted as completed. (See example 4 below). Providers must keep auditable evidence to show the basis of their calculations. Where assessment procedures for a module have not taken place, and there is no alternative arrangement to assess the student for that particular module, the credit values associated with the module should be counted as not completed.
- 22 For **full-time and sandwich taught** courses only, credit values for non-completed modules may be returned as partially completed on the HESA student record in the following cases:
- a) *Where the course is semesterised, if*
- all required assessments due for the module during the semester in which the module starts have been undertaken;
- then, even if there is additional assessment for the module at the end of the year of study, that the student does not undertake, credit values relating to the module for the first semester can be counted as completed.
- b) *Where the course is not semesterised, if*
- all required assessments due for the module in the first four months of attendance have been undertaken; and
 - there is auditable evidence that the student was still in attendance at the end of the four months;
- then, even if there is additional assessment for the module at the end of the year of study, that the student does not undertake, half the credit values associated with the module can be counted as completed.

Example 4: 10 students enrol for a part-time course in English starting in May 2023. The first module of the course, which is worth 20 credit values, starts in May 2023 and finishes in October 2023. In the previous year, out of 12 students starting the equivalent module, 1 withdrew from the module in June and 2 withdrew from the module in August, having taken no assessment for the module. In column 2 of Table 1c, $10 \times 20 = 200$ credit values are counted in ASC 9. In column 3, an estimate of the number of credit values not completed, based on previous years' data, calculated as $3/12 \times 10 \times 20 = 50$, is counted in ASC 9. The total number of assumed credit values for the module, calculated in column 4, would be 150.

Example 5: 57 students enrol for a part-time first degree course in October 2022. 1 student fails 2 out of 3 modules taken in the first year and does not progress to the second year of the course. All modules are worth 20 credits each. The student retakes the 2 failed first year modules in the 2023/24 academic year with the intention of resuming study for the remainder of the course in 2024/25. In the first year of the course, 60 completed credit values would be counted on Table 1c for 2022/23 for the student. For the year in which the student repeated the 2 failed modules, 40 credit values would be counted, on Table 1c for 2023/24. For the second year of the course (the student's third year at the institution), 60 credit values would be counted on Table 1c for 2024/25, and similarly, 60 credit values would be counted for each subsequent year. The number of credit values counted in total for this student over the whole course, assuming they took 60 credits per year for the rest of the course and did not repeat any more modules, which has taken seven years, would be 400.

Table and column descriptions

Directly funded HEIs and FEIs

- 1 All tables will be as drawn from the HESA student record as part of the IRIS transaction, each time there is a submission of data.
- 2 For merged providers EYM tables extracted through the HESA IRIS system will be presented as one institution that includes all providers that were part of the merger.
- 3 In all tables, data relating to franchised out students are included in the tables of the franchisor only (see Annex C, paragraph 18) and included in all relevant columns.
- 4 Data returned in Tables 3, 4, 5 and 6 are shown to one decimal place, where full-time taught partial completions are included as 0.5 of a completion. In Table 4, completed registrations are apportioned between ASCs, and figures are rounded to whole numbers or the nearest multiple of 0.5, as described in Annex E, paragraph 7.
- 5 Data on Table 2 are shown as whole numbers unless secondary education registrations have been split between specialist subjects, as described in Annex E, paragraph 5, when 0.5 is counted against each subject. Secondary education totals within each level of study (undergraduate degree or PGCE) will be whole numbers.

Table 1a, 1b and 1c

- 6 Tables 1a, 1b and 1c include information on all home fundable assumed completed credit values for the academic year 2022/23 by level of study (with undergraduate split into degree and non-degree on Tables 1a and 1b), mode of study, whether the credit value is wholly or partially franchised out or not and ASC. Credit values are included in accordance with the guidelines set out in Annex I.
- 7 The tables have four principal columns.
 - **Column 1:** Numbers of credit values arising from registrations on modules between 1 August 2022 and 1 November 2022 inclusive. Figures are net of all known transfers, withdrawals and dropouts occurring up to 1 November 2022.
 - **Column 2:** Numbers of credit values arising from forecast new registrations on modules after 1 November 2022. Figures recorded here are after allowance for transfers after 1 November 2022.

- **Column 3:** Numbers of credit values associated with non-completions of modules, after 1 November 2022. Credit values in column 3 are a subset of those returned in columns 1 and 2.
- **Column 4:** This shows the overall assumed completed credit values to be used in the calculations of the main teaching funding arising from registrations on modules for the academic year 2022/23. It is the sum of columns 1 and 2, minus column 3.

8 Table 1c has two further columns.

- **Column 5a:** The number of assumed completed credit values associated with students who are wholly franchised out. See Annex C and Annex K paragraph 23 for further guidance. Credit values included here are net of all known or predicted transfers or non-completions, consistent with column 4, and are a subset of the data returned in column 4.
- **Column 5b:** The number of assumed completed credit values associated with students who are partially franchised out. See Annex C and Annex K paragraph 23 for further guidance. Credit values included here are net of all known or predicted transfers or non-completions, consistent with column 4, and are a subset of the data returned in column 4.

Table 2a

9 Table 2a shows information about home full-time ITE (QTS) registrations in ASC 11a between 1 August 2022 and 1 November 2022 inclusive, for both registrations and those gaining QTS. The table shows information by:

- Phase (secondary or primary)
- Level of study (undergraduate degree or PGCE for primary phase, PGCE for secondary phase)

Specialist subject of study for secondary phase.

10 Figures are net of all known transfers, withdrawals and dropouts occurring up to 1 November 2022. Those registrations repeating the first year of the course are excluded from the table.

Table 2b

11 Table 2b shows information about home part-time ITE (QTS) registrations in ASC 11a at the OU in Wales between 1 August 2022 and 1 November 2022 inclusive, for both registrations and those gaining QTS. The table shows information by:

- Phase (secondary or primary)
- Level of study (undergraduate degree or PGCE for primary phase, PGCE for secondary phase)
- Specialist subject of study for secondary phase..

- 12 Figures are net of all known transfers, withdrawals and dropouts occurring up to 1 November 2022. Those registrations repeating the first year of the course are excluded from the table.

Table 2c

- 13 Table 2c shows information about home part-time employment based ITE (QTS) registrations in ASC 11a at the OU in Wales between 1 August 2022 and 1 November 2022 inclusive, for both registrations and those gaining QTS. The table shows information by:
- Phase (secondary or primary)
 - Level of study (undergraduate degree or PGCE for primary phase, PGCE for secondary phase)
 - Specialist subject of study for secondary phase.
- 14 Figures are net of all known transfers, withdrawals and dropouts occurring up to 1 November 2022. Those registrations repeating the first year of the course are excluded from the table.
- 15 Tables 2a, 2b and 2c have the following columns:

Column 1: Number of ITE(QTS) registrations between 1 August 2022 and 1 November 2022

Column 2: Number of ITE(QTS) registrations gaining QTS (of those in Column 1)

Table 3

- 16 Table 3 includes information on all assumed completed student registrations for the academic year 2022/23 by level of study, mode of study and residential and fundability status. Registrations are included in accordance with the guidelines set out in Annex H.
- 17 The table has four columns.
- **Columns 1a to 1c:** Numbers of assumed completed full-time registrations, split into home fundable, home non-fundable and overseas. Figures are net of all known and predicted transfers, withdrawals and dropouts.
 - **Column 2a to 2c:** Numbers of assumed completed sandwich year out registrations, split into home fundable, home non-fundable and overseas. Figures are net of all known and predicted transfers, withdrawals and dropouts.
 - **Column 3a to 3c:** Numbers of assumed completed part-time registrations, split into home fundable, home non-fundable and overseas. Figures are net of all known or predicted transfers, withdrawals and dropouts.

- **Column 4a to 4c:** These columns show the overall number of assumed completed registrations. It is the sum of columns 1, 2 and 3, split into home fundable, home non-fundable and overseas.

Table 4

- 18 Table 4 includes information on all home fundable assumed completed registrations for the academic year 2022/23 by level of study (with undergraduate split into degree and non-degree), mode of study, whether the registration is franchised out or not (undergraduate only) and ASC.
- 19 The table has four columns:
- **Columns 1a to 1f:** Numbers of assumed completed home registrations for full-time undergraduate and postgraduate students, in terms of headcount of individuals.
 - **Column 2a to 2f:** Numbers of assumed completed home registrations for sandwich year out undergraduate and postgraduate students, in terms of headcount of individuals.
 - **Column 3a to 3f:** Numbers of assumed completed home registrations for part-time undergraduate and postgraduate students, in terms of headcount of individuals.
 - **Column 4a to 4c:** These columns show the overall number of assumed completed home fundable registrations. It is the sum of columns 1, 2 and 3, split by level of study.

Table 5

- 20 Table 5 includes information on assumed completed home fundable and non-fundable (**excluding** those funded by HEIW/NHS) registrations that are undergraduate or PGCE (QTS) new entrants or continuing students at the provider for the academic year 2022/23. Data are presented by whether the student is a new entrant or continuing at the provider. The data are a subset of those returned in Table 3. Registrations are included in accordance with the guidelines set in Annex H. Figures are net of all known transfers, withdrawals and dropouts. There are three ASC groups used for full-time/sandwich year out provision, ASCs 1a and 1b; ASCs 1c and 1d; and ASCs 2 to 11.
- 21 Students from the EU included in this table should only be those with home residential status.
- 22 The table is split into two subtables containing data about completed registrations.
- New entrants - columns 1 to 4.
 - Continuing students at the institution – columns 5 to 8.

23 The columns contained within each of these sub tables are described below:

- **Columns 1a, 4a:** Number of completed HEFCW-fundable registrations that have home residential status and are from Wales.
- **Columns 1b, 4b:** Number of completed HEFCW non-fundable registrations (other than those funded by HEIW/NHS) that have home residential status and are from Wales.
- **Columns 2a, 5a:** Number of completed HEFCW-fundable registrations that have home residential status and are not from Wales.
- **Columns 2b, 5b:** Number of completed HEFCW non-fundable registrations (other than those funded by HEIW/NHS) that have home residential status and are not from Wales.
- **Columns 3, 6:** Total number of completed home registrations. The calculation is done automatically in the spreadsheet.

Table 6

24 Table 6 presents information about Performance Element provision in ASC 10 at the University of South Wales. The criteria used to extract the information from the HESA student record is defined in Annex K paragraph 41.

25 The table has the following columns over three sub-tables:

Table 6a and 6b – credit values

- **Columns 1 to 4:** Numbers of assumed completed home fundable credit values associated with ASC 10 performance element related registrations at the University of South Wales. Table 6a shows data about full-time credit values and Table 6b about part-time credit values. The columns on each of Tables 6a and 6b are of the same format as those included in paragraph 6. The credit values are a subset of those included for ASC 10 in Tables 1a and 1c.

Table 6c – registrations

- **Columns 1a and 1c:** Numbers of assumed completed home fundable registrations for full-time undergraduate and postgraduate students enrolled on ASC 10 performance element related courses at the University of South Wales.
- **Columns 3a and 3c:** Numbers of assumed completed home fundable registrations for part-time undergraduate and postgraduate students enrolled on ASC 10 performance element related courses at the University of South Wales.

- **Columns 4a and 4c:** Total numbers of assumed completed home fundable registrations enrolled on ASC 10 performance element related courses at the University of South Wales, by level of study.

HESA/HESES mappings and end of year monitoring data extraction criteria

- 1 This annex provides mappings which HEFCW will use to extract EYM and other data from the HESA student record, including as part of the HESA IRIS process. It should be noted that in some cases it is not possible to define HESES/EYM categories entirely in terms of HESA fields. In particular, where students follow non-standard academic years and patterns of study within the institution are not the same from year to year, there may be discrepancies in comparisons made.
- 2 In all cases, the HESES rules must be followed when completing the HESES return. In coding student data for the HESA student record, where fields ask for funding council definitions to be used then it is those contained in this circular and the HESES circular that should be used. However, it should not be assumed that students fall into a particular HESES category solely on the basis of the coding of HESA fields as there may be cases where only an approximate match of definitions can be made.
- 3 The EYM tables for merged providers extracted through the HESA IRIS system will be presented as one institution. This enables estimations to be calculated on an institution wide basis, however, the HESA IRIS EYM student data sheets include an Venue.VENUEID field for checking purposes.
- 4 The mappings show the name of the relevant HESA field in the form of Entity.FIELDNAME. Guidance relating to the HESA fields can be found in the HESA student record coding manual, available at [HESA student record 2022/23 coding manual](#).
- 5 The mapping in this annex is based on the new student record data being collected under the Data Futures programme from 2022/23. Should providers have any concerns over the mappings in this annex, they should contact HEFCW. Should there be any changes to the mappings shown below, either as a result of feedback from providers or to refine the mappings as more information is known, we will let providers know. Providers can also inform us during the submission process, after the publication of EYM, if they have any further concerns. If any further changes to the mapping are then deemed necessary, after the EYM circular is published, we will inform providers. Providers should note that HESA have provided [mappings](#) from the fields on the previous student record to the fields on the new student record.
- 6 In the following guidance, where we refer to a student or students, we mean a student on distinct engagement.

HESES/EYM population

- 7 The following categories of students are excluded from the HESES/EYM population:

| | |
|---|---|
| Writing up or dormant for the whole academic year | SessionStatus.STATUSCHANGEDTO = 02, 04 and SessionStatus.STATUSVALIDFROM ≤ 2022-07-31 |
| Incoming exchange students | Engagement.INCOMINGEXCHANGE = 01, 02, 03 ,04 |
| Students not studying for at least 3% FTE | ReferencePeriodStudentLoad.RPSTULOAD < 3.0 |

- 8 The following students, though in the population, will not be counted as registrations for HESES/EYM (some credit values associated with these students may be counted where a module is started in 2022/23):

| | |
|---|---|
| Students in their final student course session of an engagement attending a course assumed to follow a non-standard academic year | Leaver.ENGENDDATE ≤ 2023-07-31 and Leaver.ENGENDDATE ≤ anniversary of Engagement.ENGSTARTDATE in 2022/23 plus two weeks |
|---|---|

HESES/EYM categorisation**Residential status and eligibility for mainstream funding**

- 9 Students will be categorised into residential status and eligibility for funding as follows:

| | |
|-------------------|--|
| Home fundable | FundingBody.FUNDINGBODY = 5017 |
| Home non-fundable | FundingBody.FUNDINGBODY ≠ 5017 and Engagement.FEEELIG = 01, 03 |
| Overseas | Otherwise |

- 10 In using this coding to categorise home students as non-fundable, we are assuming that where Engagement.FEEELIG is 03 that the student is home, as eligibility of overseas students is likely to have been assessed in order to inform

the level of fee charged. This could lead to some students being categorised as home non-fundable where in fact they should be overseas. Providers should pay regard to the coding of this field in order to ensure that students are correctly categorised, and minimise the use of Engagement.FEEELIG = 03.

- 11 Home undergraduate and PGCE registrations will be further categorised by residential status, using domicile as a proxy (see paragraph 21 below), into home residential status (Welsh) and home residential status (other). In doing this for Table 5 of EYM/Table 3 of HESES, registrations will also be categorised by funding eligibility categories, HEFCW-fundable and non-fundable, with HEIW/NHS-funded students excluded. Full-time home ITE (QTS) students that entered study in 2019/20 and subsequent years are expected to have been returned on the HESA student record as non-fundable. See paragraph 20 below.

Assignment to ASCs

Registrations

- 12 Full-time registrations will be assigned to ASCs on the basis of the HECoS codes shown in QualificationSubject.QUALSUBJECT and the proportions in each subject shown in QualificationSubject.QUALPROPORTION, with the exceptions of full-time undergraduate medicine and dentistry (ASC 1) and full-time undergraduate and PGCE ITE (QTS) (ASC 11a). The mapping between HECoS codes and ASCs linked to in Annex E will be used.
- 13 Where postgraduate medicine or dentistry provision is coded using the general HECoS codes 100271 (medicine) and 100268 (dentistry), it will be assumed to be non-clinical.

Full-time undergraduate medicine and dentistry provision

- 14 Full-time undergraduate medicine and dentistry registrations will be assumed to be those with all course subjects of study in HECoS codes as given in the mapping linked to in Annex E, as they cannot be split between ASCs in returning data on the HESES survey. Students on courses coded as both non-clinical and clinical medicine or dentistry will be categorised into non-clinical or clinical based on the year of programme (e.g. if a course is coded as 50% pre/non-clinical medicine and 50% clinical medicine then if the first year of the course is known to be pre-clinical, then students in the first year will be coded as pre/non-clinical medicine). ASCs will be assigned as follows:

| | QualificationSubject.QUALSUBJECT |
|------------------------|--|
| Non-clinical medicine | 100276 |
| Clinical medicine | 100267, 101309, 101324, 101325, 101327, 101331, 101334, 101336, 101337, 101339 |
| Non-clinical dentistry | 100275 |

| | |
|--------------------|--------|
| Clinical dentistry | 100266 |
|--------------------|--------|

- 15 Year of programme will be assigned as follows:

| | |
|-------------------------------------|---|
| Registrations on intercalated years | StudentCourseSession.INTERCALATION = 01 |
| Year of programme | StudentCourseSession.YEARPRG |
| Year 0 | 0 |
| Year 1 | 1 |
| Year 2 | 2 |
| Year 3 | 3 |
| Year 4 | 4 |

Full-time undergraduate and postgraduate taught ITE (QTS) (ASC 11a)

- 16 Registrations will be assigned to ASC 11a, ITE (QTS), where Course.TTCID = 01. Registrations will be further categorised as follows:

| | |
|-----------------|---|
| Primary phase | StudentAccreditationAim.STUACCID = 20201, 20206, 20207, 20208, 20209, 20212 |
| Secondary phase | StudentAccreditationAim.STUACCID = 20203, 20204, 20205, 20211 Subject of study will be assigned using QualificationSubject.QUALSUBJECT and QualificationSubject.QUALPROPORTION |
| Gained QTS | QualificationAwardAccreditation.QUALAWARD ACCID = 20201, 20202, 20203, 20204, 20205, 20206, 20207, 20208, 20209, 20211, 20212 |

- 17 If a secondary programme has a subject attached to it which is not in the list of subject specialisms, then the registration will be proportioned amongst those that are in the list, with the non-specialist subject not included in the apportionment. For example, if a qualification is equally split between three subjects and only two are subject specialisms, then in the analysis, the registration would be split equally between the two subjects that are subject specialisms.

Credits

- 18 Credit values, taken from Module.CRDTPTS, are assigned to ASCs according to the HECoS codes of the module, returned in ModuleSubject.MODSBJ, and the respective proportions in each subject, returned in ModuleSubject.MODPROPORTION, using the mapping linked to in Annex E.

- 19 Exceptions to this are medicine and dentistry courses, conservatoire provision at the Royal Welsh College of Music and Drama returned by the University of South Wales and ITE (QTS) courses. Modules will be assigned to medicine and dentistry (ASC 1b/1d for clinical and ASC 1a/1c for non-clinical/pre-clinical) only where the course is in medicine or dentistry. Conservatoire provision will be all and only those modules associated with courses at the Royal Welsh College of Music Drama campus of the University of South Wales identified using Venue.VENUEID. For postgraduate medicine and dentistry courses, if the module subject ModuleSubject.MODSBJ is coded the general HECoS codes 100271 (medicine) or 100268 (dentistry), it will be assumed to be in medicine and dentistry unclassified.

Mode of study

- 20 Mode of study is categorised as follows:

| | |
|-----------------------------|---|
| Full-time | StudentCourseSession.SCSMODE = 01 and StudentCourseSession.PLACEMENT ≠ 01, 02 |
| Full-time sandwich year out | StudentCourseSession.SCSMODE = 01 and StudentCourseSession.PLACEMENT = 01, 02 |
| Part-time | Otherwise |

Level of study

- 21 Level of study is categorised as follows:

| | |
|--|--|
| Undergraduate degree | Qualification.QUALCAT = H0003, H0004, H0005, H0009, I0001, M0002 |
| Undergraduate non-degree | Qualification.QUALCAT = All other H, I, J and C codes except Qualification.QUALCAT = H0013 and Course.TTCID = 01 or Qualification.QUALCAT = M0016 and Course.TTCID ≠ 01 |
| Postgraduate taught (including PGCE (QTS)) | Qualification.QUALCAT = All E codes, All other M codes except Qualification.QUALCAT = M0016 and Course.TTCID ≠ 01 or Qualification.QUALCAT = H0013 and Course.TTCID = 01 |
| Postgraduate taught (PGCE (QTS)) | Qualification.QUALCAT = M0016 and Course.TTCID = 01 or Qualification.QUALCAT = H0013 and Course.TTCID = 01 |

| | |
|-----------------------|---|
| Postgraduate research | Qualification.QUALCAT = All D and L codes |
|-----------------------|---|

New entrants and continuing students

22 New entrants and continuing students are categorised as follows:

| | |
|--------------|---|
| New entrants | Engagement.ENGSTARTDATE ≥ 2022-08-01 |
|--------------|---|

| | |
|---------------------|---|
| Continuing students | Engagement.ENGSTARTDATE < 2022-08-01 |
|---------------------|---|

23 New entrants and continuing students at the provider will be considered home fundable or non-fundable according to the criteria in paragraph 8. HEIW/NHS students will be identified and excluded using FundingBody.FUNDINGBODY = 5006, 5055. They will be further categorised into residential status, using domicile as a proxy, as follows:

| | |
|---------------------------------|-----------------------|
| Home residential status (Welsh) | Z_PERMADDCOUNTRY = XI |
|---------------------------------|-----------------------|

| | |
|---------------------------------|-----------|
| Home residential status (other) | Otherwise |
|---------------------------------|-----------|

24 For the purposes of Tables 2a to 2c of HESES, ITE (QTS) registrations will be counted as new entrants as follows:

| | |
|--------------|--|
| New entrants | StudentCourseSession.YEARPRG = 01 and Engagement.ENGSTARTDATE ≥ 2022-08-01 |
|--------------|--|

Students franchised out

25 Part-time and full-time students that are franchised out are counted as those studying on modules taught at another institution. Students on partial franchises are counted as franchised out if the majority of their activity for the year is franchised out (see paragraph 25, Annex C). The table below shows what will be counted as franchised out registrations in our HESES/EYM data extractions:

| | |
|-------------------------------------|--|
| Wholly franchised out registrations | ModuleDeliveryRole.FRANIND = 01 and ModuleDeliveryRole.MDRPROPORTION = 100 for all modules started in the academic year (ModuleInstance.MODINSTSTARTDATE ≥ 2022-08-01 and ModuleInstance.CONTINUING ≠ 01) |
|-------------------------------------|--|

| | |
|--|---|
| Partially franchised out registrations (where resulting proportion $\geq 50\%$) | ModuleDeliveryRole.FRANIND = 01 and ModuleDeliveryRole.MDRPROPORTION > 0 for at least one module started in the academic year (ModuleInstance.MODINSTSTARTDATE $\geq 2022-08-01$ and ModuleInstance.CONTINUING $\neq 01$) |
| | Proportion of registration franchised out = Sum of Module.CRDTPTS x ModuleDeliveryRole.MDRPROPORTION over all modules with ModuleDeliveryRole.FRANIND = 01 and ModuleDeliveryRole.MDRPROPORTION > 0, divided by total credit points over all modules started in the academic year |

- 26 In analysing franchised out data, the proportions may also be used to determine what volume of registration activity is franchised out to get a more accurate view of the extent of franchise provision. Further guidance on franchised out credit values can be found in paragraph 43 below.

Welsh speaking ability and teaching through the medium of Welsh

- 27 Of ITE (QTS) new entrants returned on Tables 2a to 2c of HESES, it will be assumed that those training to teach through the medium of Welsh are on a course that is identified as providing training to teach through the medium of Welsh, using the Bilingual ITT marker (Course.BITTM), as follows:

| | |
|---|-----------------------|
| Training to teach through the medium of Welsh | Course.BITTM = 01, 02 |
|---|-----------------------|

- 24 ITE (QTS) entrants and ITE (QTS) entrants who are training to teach through the medium of Welsh are categorised into Welsh speaking ability, for the purposes of Tables 2a to 2c of HESES, as follows:

| | |
|--------------------------|---|
| Fluent in Welsh | LanguageProficiency.LANGUAGEPROFICIENCYID = 01 and LanguageProficiency.PROFICIENCYTYPE = 02 and LanguageProficiency.PROFICIENCYLEVEL = 01 |
| Welsh speaker not fluent | LanguageProficiency.LANGUAGEPROFICIENCYID = 01 and LanguageProficiency.PROFICIENCYTYPE = 02 and LanguageProficiency.PROFICIENCYLEVEL $\neq 01$ |

Not a Welsh speaker/ Otherwise
not known/not
collected

25. The extraction of Welsh speaking ability and teaching through the medium of Welsh for ITE (QTS) students will be carried out using signed off HESA data and will not be part of the IRIS data extraction for EYM. Therefore, Tables 2a to 2c of EYM in the IRIS output will only show registrations and registrations gaining QTS.

Year abroad registrations

- 28 Undergraduate students on a year abroad, through the Taith, Erasmus+, Turing or other scheme, or work placement year abroad are categorised as follows:

| | |
|--|---|
| Erasmus+ year abroad registrations | OffVenueActivity.MOBSCHEME = 03 and OffVenueActivity.COUNTRY ≠ GB, XF, XG, XH, XI, XJ, XK (not in UK) |
| Turing scheme year abroad registrations | OffVenueActivity.MOBSCHEME = 05 and OffVenueActivity.COUNTRY ≠ GB, XF, XG, XH, XI, XJ, XK (not in UK) |
| Taith scheme year abroad registrations | OffVenueActivity.MOBSCHEME = 06 and OffVenueActivity.COUNTRY ≠ GB, XF, XG, XH, XI, XJ, XK (not in UK) |
| Other year abroad registrations | OffVenueActivity.MOBSCHEME = 01, 04 and OffVenueActivity.COUNTRY ≠ GB, XF, XG, XH, XI, XJ, XK (not in UK) |
| Sandwich placement year abroad registrations (not a specific scheme) | OffVenueActivity.MOBSCHEME = 02 and OffVenueActivity.COUNTRY ≠ GB, XF, XG, XH, XI, XJ, XK (not in UK) |

Higher level and degree apprenticeships

- 29 Though not extracted as part of the EYM return, we will extract data for registrations that are studying for an HE qualification as part of a higher level apprenticeship (HLA) or a degree apprenticeship funded through the HEFCW scheme, identified as follows:

| | |
|---|--|
| Those who are studying as part of a HLA | StudentInitiative.STUINITID = 004 OR CourseInitiative.COURSEINITID = 004 |
|---|--|

| | |
|--|---|
| Those who are studying as part of a degree apprenticeship under the HEFCW scheme | StudentInitiative.STUINITID = 020 OR CourseInitiative.COURSEINITID = 020 |
|--|---|

- 30 Additional information is collected about degree apprenticeships on the monitoring return and mappings and guidance here and elsewhere in this circular should be used in completing that return.

Registrations up to 1 November

- 31 The following registrations will be assumed to be those registrations up to 1 November, counted for provision on Tables 2a to 2c of EYM:

| | |
|---|--|
| Those who started on or before 1 November 2022 | Engagement.ENGSTARTDATE ≤ 2022-11-01 |
| Excluding those that left on or before 1 November 2022 and did not complete | Leaver.ENGENDDATE ≤ 2022-11-01 and Leaver.ENGENDDATE is not blank and FundingAndMonitoring.FUNDCOMP ≠ 01 |

Completions

- 32 Registrations that are eligible to be counted on HESES/EYM are assumed to be completed as follows:

| | |
|--|------------------------------------|
| Registrations that completed the year of programme | FundingAndMonitoring.FUNDCOMP = 01 |
|--|------------------------------------|

- 33 For full-time and sandwich year out taught students eligible to be counted on HESES/EYM, registrations will be assumed to fit the definition of a partial completion as follows, and will be counted at 0.5:

| | |
|--|------------------------------------|
| Registrations that partially completed the year of programme | FundingAndMonitoring.FUNDCOMP = 04 |
|--|------------------------------------|

- 34 Proportions in each completion status category for registrations with known completion status will be used to estimate the number of completed and partially completed registrations for those registrations with unknown completion status (FundingAndMonitoring.FUNDCOMP = 03, students are yet to complete but have not failed to complete) and these will be added to the count of completed registrations.

Assignment of credit values to columns in Tables 1a, 1b and 1c (EYM)

- 35 For all columns of data, modules will be counted if they fit the following criteria.

| | |
|----------------------------|---|
| Modules started in 2022/23 | ModuleInstance.MODINSTSTARTDATE ≥ 2022-08-01 and ≤ 2023-07-31 and ModuleInstance.CONTINUING ≠ 01 |
|----------------------------|---|

| | |
|---------------------|------------------------------|
| Module is countable | ModuleInstance.MODCOUNT = 02 |
|---------------------|------------------------------|

| | |
|---|-----------------------------------|
| Module is not on a not-for-credit basis | ModuleInstance.MODULEOUTCOME ≠ 04 |
|---|-----------------------------------|

- 36 The number of credit points counted will be taken from Module.CRDTPTS.

Column 1

- 37 Credit values for modules associated with the following registrations, that were started in the 2022/23 academic year, will be assumed to be in column 1:

| | |
|--|--------------------------------------|
| Those who started on or before 1 November 2022 | Engagement.ENGSTARTDATE ≤ 2022-11-01 |
|--|--------------------------------------|

Column 2

- 38 Credit values for modules associated with the following registrations, will be assumed to be in column 2:

| | |
|---|--------------------------------------|
| Those who started after 1 November 2022 | Engagement.ENGSTARTDATE > 2022-11-01 |
|---|--------------------------------------|

Column 3

- 39 Credit values included in columns 1 and 2 will be counted as not completed where:

| | |
|-----------------------|--|
| Modules not completed | ModuleInstance.MODULEOUTCOME = 03 or ModuleInstance.MODULEOUTCOME = 02 and mode of study is part-time |
|-----------------------|--|

- 40 Credit values included in columns 1 and 2 will be assumed to be partially completed, and counted at 0.5, where:

| | |
|-------------------------------------|--|
| Modules assumed partially completed | ModuleInstance.MODULEOUTCOME = 02 and mode of study is full-time or sandwich |
|-------------------------------------|--|

- 41 Proportions in each module outcome for modules with known outcomes will be used to estimate the number of credit values associated with modules coded with unknown outcome (ModuleInstance.MODULEOUTCOME = 05, 06) that are not completed and these will also be counted in column 3

Column 4

- 42 Column 4 credit values will be calculated as columns 1 plus 2 minus column 3.

Columns 5a and 5b (Table 1c of EYM)

- 43 Franchised out modules for part-time registrations are counted as those not taught by the provider and are split between those wholly franchised out credit values, and those that are partially franchised out as defined below.

| | |
|--|---|
| Wholly franchised out credit values | Sum of Module.CRDTPTS for all modules, where ModuleDeliveryRole.FRANIND = 01 and ModuleDeliveryRole.MDRPROPORTION = 100 |
| Partially franchised out credit values | Sum of Module.CRDTPTS x ModuleDeliveryRole.MDRPROPORTION over all modules with ModuleDeliveryRole.FRANIND = 01 and ModuleDeliveryRole.MDRPROPORTION > 0 that are not wholly franchised out as above |

- 44 Credit values extracted for degree apprenticeships monitoring are also extracted using these criteria

Performance Element provision

- 45 Registrations and modules at the University of South Wales will be considered to be conservatoire performance element provision where and only where Venue.VENUEID is the identifier for the Royal Welsh College of Music and Drama.
- 46 Registrations and credit values will be taken as those prior to any exclusion of non-completions.

Students outside the HESES/EYM population

- 47 Providers return a headcount split into dormant students, students continuing study, students successfully completing and students who have withdrawn, on the HESA aggregate offshore record. We will include all headcount numbers other than the dormant students in the count against each category for our 2022/23 analysis below.
- 48 The headcount of students returned on the HESA aggregate offshore record that are based outside the UK, and will be categorised as follows:

| | |
|--|------------------------|
| Students based at a campus outside the UK | TYPE = 1 and LEVEL ≠ F |
|--|------------------------|

| | |
|--|------------------------|
| Other students based outside the UK | TYPE ≠ 1 and LEVEL ≠ F |
|--|------------------------|

49 Data will be broken down into level of study, where:

| | |
|----------------------|--------------|
| Undergraduate degree | LEVEL = H, I |
|----------------------|--------------|

| | |
|--------------------------|--------------|
| Undergraduate non-degree | LEVEL = J, C |
|--------------------------|--------------|

| | |
|---------------------|--------------|
| Postgraduate taught | LEVEL = E, M |
|---------------------|--------------|

| | |
|-----------------------|--------------|
| Postgraduate research | LEVEL = D, L |
|-----------------------|--------------|

50 Included in the total headcount will be the sum of HEADCOUNTSCS, HEADCOUNTSSC and HEADCOUNTSW.

Use of data by HEFCW

- 1 The main uses of end of year monitoring data are to calculate funding for part-time undergraduate credit based funding and the higher cost subjects premium, to monitor part-time undergraduate credit based funding allocations, and to provide a comprehensive end of year picture for the sector. An outline of the reasons for extracting the data on each table is given below.

Tables 1a, 1b and 1c

- 2 Tables 1a, 1b and 1c present data relating to credit values for all modes of study and levels of study apart from postgraduate research.
- 3 Credit values for part-time undergraduate provision from Table 1c are used as the basis for calculating funding for part-time undergraduate credit based funding allocations for 2024/25 and any adjustment to part-time undergraduate credit based funding allocations for the 2022/23 academic year. Credit-based teaching funding allocations for 2022/23 were calculated separately for part-time undergraduate (not franchised out) and part-time undergraduate franchised out levels of study. Credit values associated with home fundable registrations are extracted, by ASC, in these two categories.
- 4 Credit values for full-time undergraduate provision from Tables 1a and 1b are used as the basis for calculating funding for the part-time undergraduate higher cost subjects premium for 2024/25, for subjects in ASCs 1, 3, 4 and 6 except clinical medicine and dentistry.
- 5 Additionally, credit values associated with full-time and postgraduate taught and part-time postgraduate taught provision are extracted.
- 6 Extracting credit values data for all taught levels of study, modes of study and ASCs ensures that HEFCW has a complete picture of the number of credit values associated with home fundable registrations for the whole of the academic year.

Tables 2a,2b,2c

- 7 Data from Tables 2a, 2b and 2c are used to predict and monitor the number of teachers qualifying with QTS in each phase, level of study and subject and are provided to the Welsh Government and the Education Workforce Council. In addition to the data in Tables 2a, 2b and 2c shown in Annex N, we will also be extracting the Welsh language and Welsh medium data, and data on overseas students, that was collected on Tables 2a to 2c of HESES 2022/23. This extraction will be done after the HESA collection is closed and will not be provided through IRIS. We will also be providing this data to the Welsh Government and the Education Workforce Council.

Tables 3 and 4

- 8 Tables 3 and 4 present data relating to registrations. Table 3 shows data on all completed registrations for the year. The data are used to gain a complete, up to date picture of the size of the sector and also of the scale of provision that is not fundable by HEFCW. Table 3 is also used as an update to the figures that are provided on the student number forecasts return in July.
- 9 Table 4 presents data for home fundable registrations only, by ASC. The data are used to look at patterns in student recruitment and to provide data to inform policy about particular subject areas. The data are also used to monitor the number of credit values returned in the survey, per registration.
- 10 In Table 4, categories of undergraduate provision are broken down into degree and non-degree and by whether the registration is franchised out or not. This is to enable us to monitor levels of provision within undergraduate and monitor any changes in franchised provision available.

Table 5

- 11 Table 5 includes data relating to full-time and part-time undergraduate and PGCE (QTS) home registrations separately for new entrants and continuing students. The data are presented split by ASC group (for full-time/sandwich year out), residential status and whether fundable or non-fundable. HEIW/NHS-funded students are excluded from the table.
- 12 The data are split by these categories in order to get figures for students under the full-time fee regime and to be able to estimate tuition fee income for different areas of provision. These figures will be used to monitor estimates of numbers of students and fee income for full-time students, including by comparing to data from other sources such as Welsh Government student forecasts, the SLC, HESES and institutions' fee and access plans. Medicine and dentistry are also split in the table for full-time provision and figures returned will be used to monitor changes in medicine recruitment given the additional funded places allocated from 2018/19.
- 13 Part-time figures will be used to understand the changes happening in part-time undergraduate entrants.

Table 6

- 14 Data presented in Table 6 will be used to monitor Performance Element provision at the University of South Wales.

| Distance learning | F | F | O | F | NF | O | NF & NR |
| At provider's campus | F | F | O | F | NF | O | NF & NR |
| Franchise to publicly funded provider | F | F | O | NF | NF | O | NF & NR |
| Franchise to non-publicly funded provider | NF | NF | O | NF | NF | O | NF & NR |
| Other collaborative arrangements/partnerships, including validation arrangements ¹ | NF & NR | NF & NR | O & NR | NF & NR | NF & NR | O & NR | NF & NR |
| Any location with place funded from other sources or as part of a specific scheme ² or the place is on a closed course ³ | NF | NF | O | NF | NF | O | NF & NR |

FT UG/PGCE students

| | In Wales | | | In UK outside Wales | | | Outside UK |
|--|----------------|---------------------|----------|---------------------|---------------------|----------|---------------|
| | Welsh domicile | Other home domicile | Overseas | Welsh domicile | Other home domicile | Overseas | All domiciles |
| Distance learning - fees paid through grants/loans or by student/employer | F | F | O | F | NF | O | NF & NR |
| At provider's campus - fees paid through grants/loans or by student/employer | F | F | O | F | NF | O | NF & NR |
| Franchise to publicly funded provider - fees paid through grants/loans or by student/employer | F | F | O | NF | NF | O | NF & NR |
| Franchise to non-publicly funded provider - fees paid through grants/loans or by student/employer | NF | NF | O | NF | NF | O | NF & NR |
| Other collaborative arrangements/partnerships, including validation arrangements ¹ - fees paid through grants/loans or by student/employer | NF & NR | NF & NR | O & NR | NF & NR | NF & NR | O & NR | NF & NR |
| Any location with fees paid by a public body or responsibility of a public body other than HEFCW or funded as part of a specific scheme ² or the place is on a closed course ³ | NF | NF | O | NF | NF | O | NF & NR |

Notes:

F = home fundable

NF = home non-fundable

O = overseas

NR = non-returnable on HESES/EYM

¹Other collaborative arrangements/partnerships include partnerships with providers or organisations not owned by the Welsh HEI, that are not franchising arrangements, for example partnerships with non-publicly funded colleges where the provider provides quality assurance or validating arrangements only and does not provide any funding to that college.

²For example, the HEFCW-funded degree apprenticeship scheme.

³A course is closed if the costs of that course are met by a particular company or organisation and the course is not open to all those suitably qualified.

For joint courses, only provision belonging to the Welsh provider should be considered for inclusion on HESES/EYM. The rules above should be applied to that provision.

Shaded cells imply that approval can be sought to include students as fundable.
