

HEFCE 01/16

March

Invitation to apply

Rewarding and developing staff in higher education

Rewarding and developing staff in higher education

To	Heads of higher education institutions funded by HEFCE and TTA
Of interest to those responsible for	Human resources management and institutional strategic management
Reference	01/16
Publication date	March 2001
Enquiries to	Claire Warnes (for general enquiries on this special funding initiative), tel 0117 931 7311, e-mail c.warnes@hefce.ac.uk HEFCE Regional Consultants (list at Annex A) (for enquiries on institutional human resource strategies)

Executive summary

Purpose

1. This document provides feedback on the HEFCE consultation (HEFCE 00/56) and invites higher education institutions to apply for special funding to support the development and implementation of human resource strategies. These additional resources to recruit, retain, reward and develop staff in higher education were announced as part of the Government's year 2000 spending review.

Key points

2. We provide a summary of the responses received to the consultation.
3. We will distribute the funds to institutions in proportion to their combined basic recurrent HEFCE grants for teaching and research. Funding will be released following consideration of human resource strategies addressing certain priority areas. The Teacher Training Agency (TTA) will provide support under this initiative for TTA-funded activity.
4. Institutions are free to determine their own objectives and specific targets. We will monitor these through annual operating statements.

Action required

5. Institutions are invited to submit their HR strategies to us by 1 June 2001. These strategies may be submitted as 'full' or 'emerging', and this information should be indicated by attaching a completed Annex E to the front of the strategy.

Introduction

6. As part of the year 2000 spending review the Government announced additional resources to help institutions recruit, retain and develop staff, as well as helping to modernise management processes in the sector. The Government has set aside £50 million in 2001-02 rising to £110 million in 2002-03 and £170 million in 2003-04 (these figures refer to financial years). Converting to academic years, we will allocate £80 million in 2001-02 and £120 million in 2002-03. We expect to allocate at least £170 million in 2003-04. The TTA has received £2.3 million for the financial year 2001-02 rising to £5.5 million in 2002-03 and £7.8 million in 2003-04. The equivalent amount for the 2001-02 academic year is £3.8 million. The indicative amounts for the academic years 2002-03 and 2003-04 are £5.8 million and £9.1 million respectively.

7. These additional resources recognise that the world class reputation of the higher education (HE) sector depends on its ability to recruit and retain good quality staff. Over the last decade the sector has an impressive record – delivering world-leading research, maintaining low drop-out rates and sustaining a reputation for quality that continues to attract a significant share of the market for overseas students. All these achievements depend on the commitment and expertise of staff.

8. Human resource (HR) management in higher education has many positive aspects, including devolved responsibilities, wide participation in decision-making, a questioning ethos and a good record of delivery. However, in a more competitive world there will inevitably be more demands. High quality HR management will be a key element to future success. The additional funding will enable higher education institutions (HEIs) to support existing investments and create new opportunities.

9. The consultation paper stated that we would release funding to institutions on receipt of an HR strategy that identifies objectives, describes how the money will be spent, and sets specific targets. These would include improvements both to outcomes and to HR management processes. Recognising the diversity of needs across institutions, we stated that it is for institutions themselves to determine their priorities and how these would be tackled. We stated that we expect strategies to specifically cover the areas outlined in Annex B.

10. The consultation proposed that we would allocate funding as a proportion of an institution's total core funding from HEFCE: the assumed resource for teaching, plus the basic research grant.

Feedback from consultation (HEFCE 00/56)

11. We asked institutions, representative bodies and professional bodies to respond to the following questions:

- a. Do you agree that human resource strategies should cover the areas set out Annex B? Should anything else be added?
- b. Is the proposed method of distributing and monitoring the funding likely to lead to demonstrable improvements in human resource management whilst minimising transaction costs?
- c. Do you agree that the HEFCE should explore the development of a limited number of sector-wide human resource performance indicators or measures?

12. A list of those organisations submitting written responses is at Annex D. A summary of the responses is set out below. These include comments made at the workshop sessions of our Annual Conference in Manchester in January 2001.

General responses

13. Respondents overwhelmingly welcomed the initiative to provide £330 million to invest in human resources development. However, respondents from both institutions and trade unions commented that these resources were insufficient to cover all six of the priority areas set out in the consultation. In support of this, institutions referred to the figures identified in the Bett Report and gave examples of the typical costs of introducing job evaluation schemes.

14. Respondents welcomed the fact that the funding would be available for three years, but made the point that investment needs to continue longer term and eventually should be considered as core funding.

15. Respondents requested that the term 'staff pay supplement' which appeared in Annex A of the consultation should be amended to 'human resource supplement', since the funding relates to a wider range of priority areas than simply pay. This we have done.

16. A number of institutions stated that the HEFCE should be sensitive to the current industrial relations climate within the HE sector. Trade unions were concerned that our approach should not undermine national pay bargaining. Two trade unions raised the point that national pay bargaining covers the whole of the UK, while this initiative covers only English institutions. Additionally, some trade unions commented that funding should be directed at pay and no other activities.

17. In developing the consultation, we were sensitive to these issues and framed the consultation to give employers and unions sufficient flexibility to take this initiative forward in whichever way they see fit. This should not cause alterations to the current negotiating framework, or to institutions' and trade unions' ability to negotiate over terms and conditions.

18. A few respondents felt that the proliferation of strategies for different initiatives will become unsustainable. We believe that investment in human resources is central to the effective management of higher education institutions. We therefore expect HEIs to integrate their HR strategy within their corporate plans and alongside documents such as their learning and teaching, widening participation, research and Higher Education Reach-out to Business and the Community (HEROBC) strategies.

Responses relating to the areas of coverage of the HR strategies

19. The majority of respondents agreed that the priority areas which we set out were correct. Additional comments were as follows:

- a. Some institutions felt that it would be helpful to provide specific permission to include expenditure on infrastructure and communication. We believe that it may be necessary for institutions to use the funding to invest in technology or communication to support their activities in the six priority areas, but it would be wrong to use the funding to cover investment in activities that were not directly supporting at least one of the priority areas.

- b. Some institutions commented that it would be helpful to use the funding to support the early retirement of staff. Funding can be used for that purpose so long as it is in the context of a regular review of staffing needs as described in priority area d of our consultation (see Annex B).
- c. The Universities and Colleges Employers Association (UCEA), Universities UK, Standing Conference of Principals (SCOP) and Higher Education Staff Development Agency (HESDA) submitted a joint response to the consultation, welcoming the proposed approach. Their comments included the fact that institutions should already be addressing the priority area identified of tackling poor performance. There is concern about the operation of model statutes in the pre-1992 institutions, as mentioned in the Bett Report. UCEA has established a working group under the chairmanship of Professor Graham Zellick, Vice-Chancellor of the University of London, and discussions on this matter are to commence shortly with the Privy Council. We will work with these representative bodies to monitor progress on the initiative within the HE sector.
- d. A large number of institutional respondents interpreted Annex B paragraph e narrowly, as the HEFCE simply requiring institutions to develop performance-related pay (PRP). Some institutions and trade union respondents commented that PRP was likely to be divisive and non-productive within the HE sector, especially given the relatively low level of funding to support all of the priority areas. We recognise the challenges posed by introducing performance review systems linked to reward. For this reason, the consultation explained that we do not expect this area to be addressed until 2002-03, giving institutions time to consider the implications and to focus their energy in the first year on addressing the first three priority areas (outlined in Annex B). Some institutions may choose to address all six priority areas sooner.
- e. The Equal Opportunities Commission expressed the view that HEFCE, as the largest funding body for higher education, is obliged to ensure that its funds are not spent in a discriminatory way and to take reasonable steps to ensure this. We are committed to promoting equal opportunities within the sector. We will monitor how funds under this initiative are used to pursue this objective through the analysis of the HR strategies. We will also support the parallel work of the newly formed Equality Challenge Unit.
- f. One institution commented that requiring targets for equal opportunities and salary levels is inappropriate. We believe it is for institutions to set their own targets. However, targets across all priority areas are necessary if institutions and HEFCE are to monitor the development of good practice in HR management in the HE sector. Another institution commented that insufficient reference was made to the strong emphasis that HEIs place on teamwork. This is explicitly covered in priority area e (Annex B). We believe institutions have scope themselves to recognise the contribution of individuals and teams to organisational performance within the other priority areas.
- g. One institution believed that an omission from the priority areas related to the encouragement of entrepreneurship and risk-taking among academic and support staff in pursuit of innovation and commercialisation. We believe this could be covered as a development issue or may be appropriately considered within existing HEROBC funding, and in future by the Higher Education Innovation Fund (HEIF).

20. Given the consultation responses we will retain the six areas set out for inclusion in institutional HR strategies. We believe they provide sufficient flexibility for institutions to address their own specific priorities.

Responses relating to the method of allocation and monitoring

21. Institutions generally welcomed our proposed method of allocation and monitoring as it will enable them to target their own priorities as efficiently as possible. However, major concerns arose over the use of the formula for distribution of funding, which only recognised HEFCE-funded activity. The following issues were raised:

a. The strongest objections were received from institutions with TTA-funded activity. In response to these concerns we have had discussions with the DfEE, and established that the TTA grant included an element for rewarding and developing HE staff. We have agreed with the TTA that it will allocate a comparable amount to institutions which have TTA-funded activity. To minimise administration costs, TTA will join with us to distribute funding. Indicative allocations for both HEFCE and TTA funding are at Annex C.

b. Similar objections were received relating to institutions that receive NHS funding contracts. However, the situation here is different because institutions that bid for NHS contracts make judgements about the economic price of provision. As the market has determined the price, there is no convincing argument as to why we should interfere with this mechanism.

c. A number of large further education colleges (FECs) which operate mixed further education (FE) and HE provision, commented that they receive half of their funds from HE sources, yet are ineligible to receive funds under this special initiative. We support FECs which provide HE via the HE in FE Development Fund. The sums distributed through this fund are in part determined by the levels of special funding that HEIs receive. Therefore, when determining future budgets for the HE in FE Development Fund we will take into account the special funding which we allocate to HEIs via the Rewarding and Developing Staff in HE initiative. We believe this is the best way to target our resources to support the development of HE in FECs. A small number of institutions commented that funding should be allocated on the basis of all FE and HE activity being undertaken at an institution. The funding for this initiative is for HE activities only, so it cannot cover those areas for which the FEFC is solely responsible.

Additionally, where an FEC is in an indirect funding relationship with us, the funding it receives will form part of the HEFCE grant that determines the level of allocation to the partner HEI from this fund. We would expect the HEI to take account of the needs of the relevant staff involved within partner FECs in determining its strategy.

d. Five institutions requested that research-intensive institutions receive additional funds because of the high costs of recruiting and retaining high quality research staff. On the other hand, several smaller institutions requested additional funding for small and specialist institutions, which have specific problems in recruiting, retaining, rewarding and developing staff. A further five institutions commented that the method of allocation should be based on the headcount of staff employed by institutions.

We do not believe there is a case for further targeting the funding at any particular part of the sector, since all face their own specific challenges. Headcount of staff does not easily allow publicly and non-publicly funded activity to be separated.

- e. One trade union and a number of institutions suggested that some funding should be conditional upon membership of the Institute of Learning and Teaching. Institutions would be free to use the money to support this form of staff development, but we believe it is for institutions to determine whether this represents a priority for them.
- f. Four institutions commented that HEFCE's other special funding initiatives are used to support new activities. Since HR management is not a new activity, these institutions felt that the special funding approach was inappropriate as it increased the risk of intervention by HEFCE in institutions' activities and has the potential to stifle innovation. We have sought to provide institutions with as much freedom as possible, while assuring government stakeholders that the investment in recruiting, retaining, rewarding and developing staff will be effective.

One institution commented that the monitoring should be subject to HEFCE's project to assess the accountability burden of its activities on the institutions which it funds. We recognise that this initiative will have an impact on the accountability burden, and have assessed this as part of our project. We do not believe the arrangements set out in this report represent a major burden to institutions. For this reason, we decided to allocate the funds by formula and to monitor the activity through the annual operating statement that each institution currently submits to us. We will also review the accountability impact as part of our scheduled evaluation of the scheme in Autumn 2002.

- g. The joint response from Universities UK, SCOP, HESDA and UCEA requested that the method of allocation include an option to phase indicative allocations in line with institutions' own priorities. A number of institutional respondents requested that there also be an option to carry forward unspent funds. We agree that, where we can, we will allow institutions to phase their indicative allocations in line with their own priorities. However, we would expect institutions to fully spend their allocations over the three-year period.

Responses relating to performance indicators

22. Generally, but not universally, institutions welcomed our proposition to explore the feasibility of operating 'light-touch' monitoring of this initiative through the development of performance indicators (PIs). However, the key issues raised were that for PIs to be meaningful we would need to :

- ? cluster similar types of institution together
- ? develop appropriate targets for each of the PIs.

23. We will explore the usefulness of PIs, concentrating in the first instance on equal opportunities working with the Equality Challenge Framework. We will undertake work on this during 2002.

Other responses

24. One trade union response stated that, while willing to look at the means of ensuring equal pay for work of equal value, it did not accept the appropriateness of factor-based job evaluation schemes. A number of institutions took a similar position based on the expected cost of implementing such a process. Other institutions thought job evaluation might produce the biggest long-term saving for institutions by replacing existing grading structures for support staff.

25. There is no legal requirement for employers to use job evaluation, although there is a requirement for equal pay for work of equal value. We accept that the single best defence against equal value claims is a properly constructed job evaluation scheme. The HE Equality Challenge Unit is setting up an institutional advisory service which will give guidance to institutions on their position. We will draw the attention of the new HE Equality Challenge Unit to this consultation and to the issue of institution-wide job evaluation, so that it can provide appropriate advice to institutions on legal requirements and good practice.

26. Five institutional respondents and one trade union commented on the membership of the advisory group. We will ensure that the advisory group contains an appropriate range of individuals who understand the HE sector and the particular HR issues it faces.

27. Some institutions also raised a number of other HR-related issues, including those concerning the operation of the Universities Superannuation Scheme and Teachers' Superannuation Scheme, and raised a number of presentational points.

28. We have taken account of the range of responses to the consultation in producing this invitation to institutions to apply for special funding.

Allocating the additional resources

29. We will distribute the additional resources as a conditional grant. Each higher education institution will be allocated a proportion of the total funding according to the size of its combined HEFCE teaching assumed resource and basic recurrent research grant. Institutions with TTA-funded activity will be allocated further funding, based on the size of their TTA-funded activities. Indicative allocations for future years from the HEFCE and (where appropriate) the TTA are shown at Annex C.

30. We will release funding to institutions on receipt of an HR strategy that identifies objectives, describes how the money will be spent, and sets specific targets. This strategy may be submitted as 'full' or 'emerging'.

31. We will allocate funding for three years where we receive a 'full' strategy that explains in detail how and when an institution will cover, or is already covering, all six priority areas of Annex B.

32. Institutions may wish to submit 'emerging' strategies which explain in detail how and when they will cover priority areas a, b and c of Annex B and which defer consideration of priority areas d, e and f. In this case institutions should provide details of how they intend to develop 'full' strategies. On approval of an 'emerging' strategy, we will release funds for one year, with the further two years' funding being released on receipt and approval of a 'full' strategy in June 2002.

33. Institutions will already be addressing many of these areas and, for some, further investment in a particular area is of limited value. For this reason we want the additional funding to be targeted at institutional priorities, with strategies simply describing action within each area.

34. Funds will be released as long as the human resource strategy:

- ? integrates with the institution's mission and strategic plan
- ? covers all the priority areas listed above
- ? supports additional activity or the extension of existing activity that will yield further improvement
- ? contains targets that can be used to assess the effectiveness of the expenditure.

Strategies should cover three years, from 2001-02 to 2003-04. They will be reviewed by an advisory group comprising sector representatives and others with HR expertise. We will expect institutions to demonstrate the integration of their HR strategies within their corporate plan and alongside activities such as learning and teaching, research, widening participation and HEROBC strategies. Specific reference should be made to staff development within research strategies. The advisory panel reserves the right to refuse funding to strategies which do not meet the criteria laid out in Annex B. The panel also reserves the right to approve as 'emerging' those strategies submitted as 'full' if it is felt that the information provided is insufficient to warrant three years of funding. The panel will also refuse strategies which include proposals that it would consider discriminatory.

35. We would normally expect institutions to phase expenditure in line with the indicative allocations at Annex C, but some institutions may have a special requirement to phase their funding differently over the three years. Where institutions submit a full strategy in June 2001, they should indicate if they wish to phase their funding differently. Where we can, we will accommodate these requests.

Format of the HR strategies

36. Each institution should complete the checklist at Annex E and attach it to the front of its human resource strategy. In particular, each institution should indicate whether it wishes its strategy to be considered as 'full' or 'emerging' by ticking the appropriate box on this sheet.

37. We do not wish to prescribe to institutions a desired format for HR strategies. Although institutions must explain how they intend to address the six priority areas listed in Annex B, the content and structure of their strategies is at their own discretion. Indeed, they may wish to cross-refer to existing HR and other institutional strategies (learning and teaching, widening participation, research and HEROBC). Where institutions cross-refer to existing documents, they should provide a copy of these documents if we do not already hold copies. We hold the following documents for all institutions (which therefore do not need to be provided): corporate plans, widening participation strategies, learning and teaching strategies, and approved proposals under HEROBC. We do not hold copies of institutional research strategies.

38. Strategies should include a set of institutional objectives for recruiting, retaining, rewarding and developing staff linked to set of targets which can be monitored and evaluated by institutions and by HEFCE.

Monitoring and evaluation

39. The additional resources have been provided for a specific purpose, on a 'something for something' basis. Effective monitoring and evaluation will provide confidence that strategies are being achieved and that continued investment beyond 2003-04 is worthwhile. Our approach is designed to meet these requirements whilst minimising the burden on institutions and ourselves.

40. In detail the process is as follows:

- a. Institutions submit strategies by 1 June 2001.
- b. The HEFCE, acting on the advice of an advisory panel, confirms or otherwise funding by 6 July 2001.
- c. The HEFCE, again working with an advisory panel and following sector consultation, issues good practice guidance based on an analysis of institutions' strategies by December 2001.
- d. Where institutions have submitted 'emerging' strategies, or where the advisory group has approved strategies as 'emerging', institutions submit 'full' strategies by 1 June 2002.
- e. Institutions report on performance against strategies through their 2001-02 annual operating statements. Institutions may revise and resubmit strategies in the light of the good practice guidance that we will issue in December 2001.
- f. Institutions report on the effectiveness of their strategies through their 2002-03 operating statement, including the achievement of specific targets.
- g. During 2003-04, the HEFCE evaluates the effectiveness of the investment throughout the sector, using the institutions' operating statement submissions, supplemented, where necessary, by additional research.

41. Institutions may also wish to consider ongoing revision of other existing institutional strategies (including learning and teaching, widening participation and research) to disseminate any good practice developed during the production of their HR strategies.

Actions in the event of targets not being delivered

42. When monitoring strategies through the annual operating statement, we will expect institutions to report on progress against the objectives stated in their strategies and to identify slippage or changes in the proposed action in light of these. Evidence of progress will be used to support any a case for further investment as part of the Comprehensive Spending Review process.

43. We plan to discuss with universities and colleges whether performance indicators or specific reviews could be used to demonstrate sector-wide progress and needs. In time the evidence of sector-wide demonstration of performance may lead to the incorporation of this investment into core funding.

Timetable

12 February 2001	Responses to consultation received
26 March 2001	Applications for funds issued
1 June 2001	Full and emerging strategies received

6 July 2001

Funding confirmed

21 December 2001

Good practice guidance issued

1 June 2002

Receipt of full strategies from those institutions
which submitted emerging strategies in June 2001

Application procedure

44. Institutions should submit four paper copies of their HR strategies together with a completed Annex E by **1 June 2001** to:

Claire Warnes
HEFCE
Northavon House
Coldharbour Lane
BRISTOL BS16 1QD

Annex B

Specific areas which the HR strategies should cover

Each HR strategy should cover the following areas:

- a. Address recruitment and retention difficulties in a targeted and cost-effective manner.
- b. Meet specific staff development and training objectives that not only equip staff to meet their current needs but also prepare them for future changes, such as using new technologies for learning and teaching. This would include management development.
- c. Develop equal opportunities targets, with programmes to implement good practice throughout an institution. This should include ensuring equal pay for work for equal value, using institution-wide systems of job evaluation. This could involve institutions working collectively – regionally or nationally.

Strategies should also cover how institutions will address (or are already addressing) the need to achieve:

- d. Regular reviews of staffing needs, reflecting changes in market demands and technology. The reviews would consider overall numbers and the balance of different categories of staff.
- e. Annual performance reviews of all staff, based on open and objective criteria, with rewards connected to the performance of individuals including, where appropriate, their contribution to teams.
- f. Action to tackle poor performance.

Do you wish this strategy to be considered as:

Full

Emerging

Checklist

	Tick box
If you are submitting an emerging strategy, have you stated how you will develop a full strategy?	
Does your strategy state how and when you will address priority areas a, b and c of Annex B?	
Does your strategy state how and when you will address priority areas d, e and f of Annex B?	
Does your strategy identify objectives?	
Have you included specific targets?	
Does your strategy provide a breakdown of how you will spend the funding?	
Have you shown how this HR strategy integrates with your corporate plan and other institutional strategies (such as learning and teaching, widening participation, research, HEROBC)?	
Does this HR strategy make specific reference to staff development within research strategies?
