'Meeting the Challenge' Quality Standards in Education for More Able and Talented Pupils

Consultation Document

Additional Needs

Date of Issue: 2 October 2006

Action Required: Responses by 19 January 2007

Title of document: 'Meeting the Challenge' Quality Standards in Education for More

Able and Talented Pupils.

Audience: All bodies concerned with education and training in Wales,

including 10% of schools, local education authorities, parents

and interested organisations.

Overview: The aim of this document is to consult with schools and local

education authorities (LEAs) on meeting the educational needs of more able and talented pupils. The Standards contained within this guidance aim to support schools and LEAs in identifying assessing and providing for more able and talented pupils as part

of a whole school improvement agenda.

Action required: Responses to this draft consultation should be sent by 19th

January 2007 to Rhian Jones at the address given below or e-mailed electronically to **education.training@wales.gsi.gov.uk**

Further information: Enquiries about this consultation document should be directed to

Miss Rhian Jones

Additional Copies: Can be obtained from Miss Rhian Jones

Related Guidance: 'A Curriculum of Opportunity,' ACCAC (2003)

Inclusion and Pupil Support, Welsh Assembly Government (2005)

Acknowledgement: The quality Standards contained in this guidance were developed

by the Welsh Assembly Government in collaboration with the National Association for Able Children in Education (Cymru). Grateful thanks to Johanna M Raffan, Director of NACE and Val Scott, Chair of NACE Cymru. The Standards are based on the NACE Challenge Award "Provision for Able, Gifted and Talented pupils: A Self Evaluation Framework for Schools and Local Authorities" written and developed by Heather Clements, Deputy Director Children Services, Harrow Council and Elaine Ricks, School Improvement Adviser, West Berkshire in

conjunction with NACE.

FOREWORD

The Welsh Assembly Government aims to develop Wales as a 'learning country' in which **all** children and young people are given opportunities and encouragement to maximise their potential. We want all our pupils to have the best start in life, the opportunity to reach their full potential, and a clear entitlement to influence the services that affect them.

There is no universally agreed definition of the pupils who generally would be assessed as 'more able'. Descriptions can include genius, gifted, exceptionally able, very bright, high flyer, very able and more able. In Wales, we have adopted the term 'more able and talented' to describe pupils who require opportunities for enrichment and extension that go beyond those provided for the general cohort of pupils. More able pupils, given extended opportunities, will not only discover but also develop their talents. The term 'more able and talented' encompasses pupils who are more able across the curriculum as well as those who show talent in one or more specific areas and strengths in leadership, team working and entrepreneurial skills.

These Standards have been developed to support schools and LEAs in meeting the needs of more able and talented pupils. It complements the guidance issued by ACCAC in 2003, "A Curriculum of Opportunity." In this guidance we consider how schools and LEAs might develop a supportive ethos to meet the needs of **all** pupils regardless of emotional, social, linguistic, cultural, physical or intellectual differences.

Schools that meet these standards are likely to be well placed to demonstrate that they have effective procedures for monitoring and self evaluation of their work to raise standards for more able and talented pupils. Estyn Inspectors will take account of this work in their inspections of schools and LEAs.

All pupils must be allowed to discover their potential through a curriculum of opportunity. All abilities and talents can then be nurtured through an enriched curriculum and extended learning experiences. Making provision to meet the needs of more able and talented pupils therefore will benefit all pupils.

I hope you find this guidance useful and I would welcome any comments you may have as part of this consultation in developing the Standards further.

Jane Davidson

Minister for Education, Lifelong Learning and Skills

Quality Standards in Education for More Able and Talented Pupils

Introduction

1. The Welsh Assembly Government aims to develop Wales as 'a learning country' in which all individuals are given the opportunities and encouragement to achieve their full learning potential. The Welsh Assembly Government is committed to fostering high levels of achievement for all its pupils:

All learners have individual learning requirements and need access to a range of approaches to meet their needs. We aim to ensure that all learners have the best possible start in life, the opportunity to reach their full potential, and a clear entitlement to influence the services that affect them. We recognise that the health, emotional, and social needs of learners are significant factors in supporting their access to learning.

The Learning Country 2: Delivering the Promise

- 2. In July 2003 the Welsh Assembly Government issued a consultation document 'Educating Pupils who are More Able and Talented: Guidance for Local Education Authorities. The consultation focused on:
 - **Definition:** in terms of creating an inclusive definition in Wales;
 - Aims and objectives of the Guidance in relation to LEAs: promoting inclusive practice and equality of opportunity, and clarifying issues in relation to identification, assessment and provision;
 - Identification: discussing a range of approaches and procedures that LEAs can implement to support schools in identifying their more able and talented pupils;
 - Effective provision for more able and talented pupils: examining teaching and learning styles, matching provision to individual needs, and extra curricular activities and partnerships;
 - Managing provision for more able and talented pupils: describing roles and responsibilities in relation to LEAs; and
 - Management guidelines for LEAs: ways in which LEAs can monitor, assess and evaluate their own strategies
- 3. In 2003, ACCAC issued *A Curriculum of Opportunity: Developing Potential into Performance*, guidance for schools on meeting the needs of more able and talented pupils. It included detailed guidance for schools on a range of issues including the identification of more able and talented pupils, learning styles, organisation of teaching groups, opportunities beyond the classroom, and developing effective school policy.
- 4. This guidance complements 'A Curriculum of Opportunity' and provides advice to LEAs on how to support schools in meeting the needs of more able and talented learners. It also aims to enhance and support the documentation and procedures that some LEAs already have in place.

Definition

- 5. This guidance subscribes to the definitions of 'more able and talented' set out in *A Curriculum of Opportunity: Developing Potential into Performance*. In Wales the term 'more able and talented' encompasses approximately 20% of the total school population, and is used to describe pupils who require enriched and extended opportunities across the curriculum in order to develop their abilities in one or more areas. In every school there will be a group of pupils who require greater breadth and depth of learning activities than is normally provided for the usual cohort of learners.
- 6. Ability and talent can manifest itself in many different ways e.g. academic, practical, creative and social fields of human activity. The needs of more able and talented pupils cannot be separated from the move to raise standards for all pupils. Research shows that schools that focus on the needs of more able and talented pupils improve the quality of learning and raise standards of achievement for all pupils.

The Role of the LEA

7. It is the role of the LEA to support schools in helping all pupils, including those who are considered to be more able and talented, to achieve their full learning potential.

'It is important that the LEA takes a leadership role in supporting schools in the development of good practice, and raises awareness of the fact that meeting the needs of more able pupils leads to higher standards for all.'

Curriculum of Opportunity 2003

- 8. LEAs can support schools in **developing their provision** by providing:
 - in-service training for senior managers, coordinators, curriculum leaders and class teachers;
 - good quality materials, including reference to relevant websites;
 - links with external agencies e.g. arts, business;
 - opportunities for curriculum leaders and school managers to share best practice in making provision for more able and talented pupils; and
 - training opportunities and support for school governors to develop their understanding about the identification and provision for more able and talented learners.
- 9. LEAs can help schools to **extend their provision** for more able and talented pupils by:
 - monitoring and evaluating the effect of school and LEA provision for more able and talented pupils;
 - identifying sources of funding that can support the further development of provision;
 - encouraging joint planning and use of resources to meet the needs of these pupils e.g. groups of schools, LEA consortia, summer schools; and

- enhancing the provision for such pupils through joint work with schools and partnerships with other national and local groups and providers.
- 10. LEAs can help schools **to secure high standards** and promote school improvement by:
 - providing relevant information to schools to encourage them to offer appropriate challenges to more able and talented pupils;
 - providing help and advice on school leadership and management, curriculum, pedagogy and transition in relation to these pupils, and disseminating best practice;
 - identifying and promoting improvements in schools in which provision for more able and talented pupils is causing concern; and
 - giving advice and support to parents and teachers about making provision for more able and talented pupils.
- 11. LEAs can support schools in **identifying** more able and talented pupils by providing:
 - guidance and training for teachers and school managers on a variety of assessment methods and using assessment information;
 - schools with information about pupils' attainment that will ensure identification especially after transition between schools;
 - relevant feedback to schools to develop their practices; and
 - specific guidance and support in the assessment of pupils from minority groups.
- 12. To ensure that the needs of more able and talented pupils from different socioeconomic groups and minority groups are met, the LEA should promote arrangements for identification and assessment of needs and subsequent provision that is equally accessible to children who:
 - are educated in mainstream schools;
 - are educated otherwise than at school:
 - are from minority ethnic groups;
 - are travellers;
 - are in the 'looked after' system:
 - have additional needs or disabilities;
 - have English as an additional language;
 - are educated 'out of county'; and
 - are excluded from school.
- 13. In order **to provide consistent and coherent support** for schools to develop and implement effective provision for more able and talented learners, LEAs need to:
 - establish an LEA policy on the education of more able and talented learners;
 - develop the policy in partnership with schools;
 - make the policy available to all relevant partners in the education of such pupils;

- encourage and assist schools to develop and implement their own school policy on provision for able and talented learners;
- monitor and evaluate the impact of the LEA policy on practice and standards;
 and
- review the policy at regular intervals.

14. In **considering strategies and developing a policy** LEAs should consider:

- how to raise teachers' awareness and ability to identify and respond to pupils who are more able and talented:
- how to use data that is LEA/school/individual pupil based to assist in the identification of such pupils;
- what training schools need to interpret the data for themselves;
- guidance on the implementation of schools' policies on providing for more able and talented learners;
- · how to recognise and address underachievement of pupils;
- the roles and responsibilities of the LEA in relation to parents, learners and governors;
- how the policy may be monitored and evaluated.

15. The LEA should monitor the implementation and effectiveness of the policy on a regular basis through:

- monitoring the extent to which the objectives in the Authority's strategy are met:
- analysing progress of high attaining pupils using a range of indicators;
- annual joint reviews of standards and school provision by performance management consultations and head teachers;
- review of Estyn inspection reports:
- analysis of any parental concerns or complaints about provision;
- review of participation of teachers in relevant training; and
- review of the addition to the range of provision made within the authority.

16. A **self evaluation framework** for schools is included at Appendix 1. LEAs should look at ways of supporting schools in implementing and developing the following:

- a whole-school policy that is being implemented effectively (Standard 1);
- accurate identification of pupils (Standard 2);
- regular tracking of pupil attainment, including at transition (Standard 3);
- a range of teaching approaches to reflect pupils' learning needs, suitably broad and flexible curriculum and appropriate pastoral care (Standard 4);
- clear procedures in place to identify under-achievement, including targets and learning goals (Standard 5);
- a professional development programme that includes a focus on teaching and learning and reflects individual staff needs (Standard 6);
- strategies to support exceptionally able pupils e.g. additional and different curriculum opportunities (Standard 7);

- appropriate resources including ICT and access to opportunities for independent learning (Standard 8);
- taking account of the views of parents/carers and more able and talented pupils and working with partners to enhance provision (Standard 9);
- procedures for monitoring and evaluating the effectiveness of the whole school policy (Standard 10).

Provision in Schools

17. Underpinning provision for able pupils is the recognition that schools provide educational opportunities, recognising that all pupils have a range of abilities, talents and learning needs. Pupils need to have a range of opportunities and challenges to make the most of their talents and skills, inside and outside the classroom. Underachievement needs to be identified as well as ensuring that the needs of exceptionally able pupils are met. This will also have implications for staff training that will need to equip all teachers to develop the talents and abilities of these pupils. This task, although challenging, will link with schools' developing approaches to teaching and learning, and will raise expectations for all pupils.

The Assembly Government has a vision for schools of the future which:

- provide high quality and inspirational teaching and learning;
- > provide a broad and stimulating curriculum offering choice;
- ➤ allow learners to develop at their own pace with attainment targets and methods of assessment designed to recognise a wider range of achievement;
- incorporate social inclusion, sustainable development, equal opportunities and bilingualism into all aspects of school life.

The Learning Country 2 : Delivering the Promise

18. More able and talented 14-19 year olds will benefit from enhanced opportunities offered through the Assembly Government's Learning Pathways policy. Each learner should have an individual learning pathway which meets their needs, and which may involve some provision at another school or learning setting. 14-19 Networks in each local authority area should ensure that provision is made for more able and talented learners in this age group.

Schools should ensure that they develop an ethos which challenges negative stereotypes about more able and talented pupils, together with effective pastoral systems to support their personal, social and emotional needs. Schools need to be alert to underachievement, particularly among groups who may be disadvantaged.

A Curriculum of Opportunity, 2003

Meeting the Challenge – Quality Standards

19. The Standards contained in this guidance have been devised to support schools by providing a clear framework for whole school quality provision for more able and talented pupils. The Standards will help schools to develop an action plan for their provision, and will ensure that their approach is inclusive. The Standards will cover all aspects and will support a whole school approach to raising standards. Inspection has shown that schools that provide well for able pupils, generally provide well for all pupils because individual needs are focussed upon across the curriculum.

Making provision to meet the needs of more able and talented pupils therefore will benefit **all** pupils.

Curriculum of Opportunity 2003

Success for All

20. Research has shown that high ability and talent are a developmental phenomena, which can rise and fall over time. Young people who go on to be successful also need to have self-belief, perseverance and the courage to take risks. A rich educational environment will shape these attitudes to learning, developing intrinsic motivation, curiosity, and love of learning that will equip young people with what Renzulli (1995) describes as the "task commitment" to succeed in life. These Standards describe how schools can set about ensuring that all more able and talented pupils have the educational experience that will help lead them on to that fulfilment in life.

The Three Levels of Entry

21. In developing quality provision for more able and talented pupils, schools will be at different starting points and the Standards can therefore be used flexibly to meet the needs of individual schools.

The Standards can be used on three levels as:

- 1. a development tool
- 2. an audit/action plan tool
- 3. as an assessment tool

The Standards as a Development Tool

- 22. For schools that are at an early stage of developing whole school provision for more able and talented pupils, the Standards will provide a clear structure and direction for longer term planning. The Standards will aid planning and will also provide purposeful links with other whole school teaching and learning initiatives in the school development plan. A school at the Development Stage may typically have some of the following characteristics:
- Whole school policy for more able and talented provision is not recent, or not yet formulated and auditing provision is at emergent stages. The SMT/ co-ordinator has not yet undertaken whole school or subject auditing and action planning.
- Identification of more able and talented pupils is not yet part of a whole school rationale, and provision will be limited. Identification may only be linked to academic ability.
- Whole staff or departmental discussion around able pupil issues may not have taken place, and monitoring of teaching, learning and pupil tracking does not have a systematic focus on able pupils across the curriculum
- The concept of underachievement, including that of very able pupils, may not be recognised on a whole school basis.
- 23. The overarching purpose of the Standards is to provide schools with a mechanism to develop a whole school strategy, including an action plan, to support provision for more able and talented pupils. Schools in the Development Stage may wish to use the Standards initially as a prompt for further action to develop their provision with a focus on particular key areas. However, it is important that the key issues around identification and provision as outlined in "Overcoming Difficulties" are discussed as early as possible so that staff can be considering the implications for their day-to-day teaching.
- 24. Schools may find that they progress in some Standards quite quickly through the Development Stage once whole staff discussion has taken place, and will soon be ready to move to the next step to use the Standards to audit and action plan for whole school improvement.

The Standards as an Audit/Action Planning Tool

25. Schools that have already developed policies and practices for more able and talented pupils will be ready to use the Standards as a whole school audit. The audit will recognise the good practice that is already in place, but will provide appropriate next steps to achieve whole school quality provision. Please refer to Annex 2.

The Standards as an Assessment Tool

26. Schools that have been systematically developing quality provision and action planning for more able and talented pupils can use the Standards to continually assess their provision as part of their ongoing assessment and self evaluation.

The Challenge Award

The Standards contained within this guidance have been developed by the National Association of Able Children in Education and adapted by the Welsh Assembly Government. They have been piloted across schools in England and Wales and have been developed and refined to aid school improvement and improve support for more able and talented pupils.

NACE also offers schools the opportunity to achieve a quality mark based on these Standards, known as "The Challenge Award." This is an award for primary and secondary schools that recognises and celebrates quality whole school provision for more able and talented pupils. The Award is separated into 10 Elements as illustrated by the Standards in this guidance and which provide a whole school framework for the continuous improvement of provision for those able pupils. The Elements cover all the key areas that impact on the learning of more able and talented pupils and to achieve the Award a school would have to provide evidence that it can meet the criteria outlined in each Standard. Further information can be obtained from:

NACE National Office, PO Box 242, Arnold's Way, Oxford. OX2 9FR

Fax: 01865 861880 e-mail: info@nace.co.uk

www.nace.co.uk Registered Charity No. 327

Meeting the Challenge - The Quality Standards

Standard 1: A whole school strategy, including an action plan, to support more able and talented Pupils

27. The success of provision for more able and talented pupils will depend on the development of a whole school approach and understanding of how to meet the needs of such pupils. The school Action Plan, will make clear how schools will manage and develop provision. The criteria, linked to the suggested evidence, will provide an audit framework. It may be that standards contained in schools' action plans will link with the strategy for Teaching and learning, as well as the School Development Plan (Curriculum of Opportunity Section 6).

Standard 2: Identification strategies and criteria

28. It is necessary to identify more able and talented pupils in order to create appropriate opportunity and provision. Schools will need to demonstrate a wide range of assessment strategies to ensure that all types of abilities are recognised, and that talents in sports and arts as well as academic subjects are identified (Curriculum of Opportunity Section 2).

Standard 3: A target for improvement of the school's provision and the performance of more able and talented pupils

29. The whole school action plan for provision for more able and talented should make clear what improvements will be brought about through its implementation. Those outcomes will be both quantitative and qualitative. For example, schools may aim to increase the breadth of extra-curricular programmes, or improve National Curriculum attainment levels. Individual pupil targets will be an important part of the evidence in this standard, and schools will need to show that they track the progress of more able and talented pupils. In some, cases schools will also need to target the performance of your selected pupils (*Curriculum of Opportunity Section 6*).

Standard 4a: The school uses a range of learning styles, teaching approaches and organisational strategies to meet the needs of more able and talented pupils

Standard 4b: The curriculum offers breadth, depth and flexibility to meet the needs of more able and talented pupils

Standard 4c: The provision addresses the pastoral care of more able and talented pupils as well as their learning needs

30. Providing challenge in day to day teaching is central to meeting the needs of more able and talented pupils. Evidence will show that teaching is motivational, provides challenge, reflects assessment for learning principles, and is appropriately differentiated to meet the needs of learners. Pupils also need the opportunity to develop the skills of independent learning. There also needs to be evidence of regular staff development which focuses on improving teaching and learning. The curriculum should be suitably broad, balanced and flexible to take account of the personal learning needs of more able and talented pupils. High quality careers guidance and pastoral support ensures that more able and talented pupils make choices that are appropriately aspirational, and helps secure their emotional well being.

(A Curriculum of Opportunity Sections 1, 3, 4,).

Standard 5: Regular reviews to identify underachievement and support individual pupils

31. The recognition that some pupils, for various reasons, may not be fulfilling their potential is an important aspect of ensuring quality provision for all pupils. To meet this standard, schools will have to demonstrate not only that the progress of more able and talented pupils is regularly discussed and reviewed, but also that there are clear procedures to identify underachievement. These pupils will then have to have specific targets or learning goals. Too many pupils, either for social or personal reasons, or simply through lack of good provision and low expectations, have abilities or talents that remain undeveloped throughout their school career. This is sometimes because such pupils can seem disaffected with school and can often lack motivation, or they are content just to "get by" in an attempt to hide their exceptionality. There are also pupils whose abilities may be not be recognised because they are "masked" through barriers to learning e.g. dyslexia, dyscalculia, or through speaking Welsh/English as an additional language (Curriculum of Opportunity section 2).

Standard 6: A commitment to improve the skills of all staff in the school to meet the needs of more able and talented pupils.

32. In order to develop quality provision for more able and talented pupils, it is essential that all staff are trained in understanding the needs of more able and talented pupils and how to provide for them in their daily classroom teaching. Research has shown that these pupils cannot make progress without the means to learn, and with specific provision and adult guidance, pupils will learn at a far greater speed than that of their peers. All curriculum subjects need to offer high-level learning opportunities in their classrooms. Teachers need to have a wide repertoire of approaches, and be able to challenge pupils' thinking through probing questioning and a problem solving approach to learning. Teachers also need to help pupils reflect on their own learning and thinking, so that pupils know how they learn best. It will be the role of the school co-ordinator for more able and talented pupils to ensure that the needs of able pupils are met through the staff development programme (*Curriculum of Opportunity Sections 1,3,4,5*).

Standard 7: The school has programmes to support exceptionally able pupils

33. Most schools will be able to meet the needs of exceptionally able pupils through their own quality curriculum provision, but there will be times when support needs to be provided through links with other organisations, subject specialist support, or with learning mentors. For this standard, schools need to show that they have strategies to provide for exceptionally able pupils and that they recognise that, without supportive intervention, these pupils' needs may not be met (Curriculum of Opportunity Definition and Section 5).

Standard 8: The school has a range of appropriate resources including ICT

34. It is important that teachers have access to appropriate resources to provide for differentiation, extension and enrichment activities. The teaching and learning materials used need to promote an approach of active learning that challenges pupils' thinking. Resources should also reflect the fact that pupils learn in different ways. It is also essential that pupils are able to develop the skills of independent learning. Increasingly, the role of ICT has become important in providing more able and talented pupils with access to on -line learning opportunities. To achieve this standard, schools will need to show that they have taken an audit of resources within the school (*Curriculum of Opportunity Sections 1,3,4,5*).

Standard 9a: Listening to and taking account of the views of more able and talented young people and encouraging them to take responsibility for their own learning

Standard 9b: Listening to and taking account of the views of parents/carers of more able and talented pupils, keeping them informed and encouraging them to take responsibility for supporting their child's learning at school

Standard 9c: Working with partners to enhance the provision for more able and talented pupils

35. One of the most important ways in which schools can evaluate their success ion providing for more able and talented pupils is to consult with them to seek their views and take action based on what they have to say. These pupils will tend to attain well because of their natural ability, but whether they are being challenged sufficiently to achieve their best outcomes can be judged through honest, regular, pupil consultation processes. The involvement of parents or carers plays a vital role in supporting the learning of more able and talented pupils. Some parents need help and advice about how to support a very able child. Parents are also a source of information about abilities and talents their child may demonstrate out of school. Knowing that their child has been identified as able means that parents can encourage their child to achieve their best and develop self – belief. Even if parents do not wish to become involved, they should still receive information about the school's approach to supporting more able and talented pupils, and opportunities that are available. Some schools will be working with a range of partners in order to enhance provision. Partnerships need to work collaboratively to ensure that the learning experiences of more able and talented pupils is coherent and of a consistently high quality. Resources should be deployed across partnerships to maximise opportunities for more able and talented learners. (Curriculum of opportunity Section 2, Appendix 5).

Standard 10: An effective procedure for monitoring the action plan and the effectiveness of the school's policy for more able and talented pupils

36. It is important that action plans are regularly monitored and reviewed to assess the effectiveness of the whole school policy. To meet this standard, schools will need to demonstrate that the policy will be reviewed and that teaching and learning are monitored through a variety of means. Talking to pupils is a valuable way of evaluating provision. Governors also need to be involved in this process, and be fully informed about the school's policy for providing for more able and talented pupils. (Curriculum of Opportunity Section 6)

Implementing the Standards

Whole School Commitment

37. Commitment to meeting the Standards needs to be shared by the whole school with a strong involvement from the head teacher and the senior management team. Governors also need to be involved. The starting point might be for the senior management team with the able pupil co-ordinator to discuss the Standards to see which aspects are being covered and what priorities for development areas might be. The next stage might be to make a presentation to whole school staff, highlighting what the school does already. This will give staff confidence. It would also be useful to indicate the time scale needed so that staff do not feel that it will be a pressure.

The coordination of practice and provision for more able and talented pupils will be strengthened by having a nominated member of staff as a 'champion'. The coordinator will require support from senior managers to meet responsibilities effectively.

Curriculum of Opportunity

Audit and Action Planning

- 38. At this stage, the Standards need to be looked at in more detail, using the criteria as an audit to create an Action Plan. Schools will need to identify relevant evidence to show that they have met the criteria. In a secondary school, information to support the audit should come from a wide range of sources. Using staff meetings or departmental meetings to carry out a whole school audit may be a useful strategy.
- 39. The action plan needs to address the areas for which schools do not currently have evidence. The success criteria for the actions to be undertaken need to be specific, measurable, achievable, realistic and timely (SMART), stating clearly who will do what, and how schools will know when they have achieved it. The timescale also needs to be realistic. For some schools, developing provision to meet the Standards will be a major undertaking in terms of development of practice.

Gathering Evidence

40. At this stage, schools should be able to start gathering evidence to show how they have met the criteria. All staff should be encouraged to contribute to the gathering of evidence. The "Possible Evidence" is only a guide, and schools will have further examples of their own. Evidence does not have to be only in written form and might include photographs, tapes, video material etc. Schools must make clear how evidence relates to the Standard and meets the criteria. Some schools have found it useful to focus on gathering evidence for one Standard at a time.

Overcoming Difficulties

41. Managing the implementation of a whole school initiative is not an easy task! Getting all staff on board, assuring them that it will not add to their workload, and developing a whole school understanding of issues related to provision for more able and talented pupils will take time. Whoever leads on the Standards within school will need to have some dedicated time to oversee the action plan, and to co-ordinate the compiling of evidence. Working towards the Standards will lead to discussion amongst staff on issues relating able pupils, possibly for the first time. Discussion is a healthy part of the process, and will help to establish how much understanding staff have about what the school is trying to achieve and why. Some of the more complex issues that need to be discussed may include:

What do you mean by 'More able and talented' pupils in the context of your school? What is going to be your school's definition of more able and talented?

42. Staff should work together to draft a working definition, and it may take some time to reach an agreement. Some schools will already have a definition in their able pupil policy that could be revisited. There may also be subject specific definitions for staff to consider. There are various definitions available that schools could use, as a starting point in formulating their own definitions. It may also be helpful to consider definitions of intelligence as part of this work. It is important that schools come to an agreed understanding about the nature of intelligence - that it is not fixed and that no–one is ever fully aware of an individual's potential for learning. Discussion about how schools recognise this in practice should follow and schools may wish to use LEA resources, or seek the use of a NACE consultant to take the lead in such an activity. There is also a wealth of print and web based materials on more able and talented that schools can use to stimulate staff discussion. Schools should not be tempted to hurry this stage as it is crucial to everything else that follows. There is no single definition. It is the process of ensuring that staff do not hold stereotypical or narrow views.

The identification of more able and talented pupils is linked to context and in every school there will be groups of pupils who require extended educational opportunities, regardless of how they compare to more able and talented pupils in other schools.

Curriculum of Opportunity

Issues in identification

Creating a Register

43. It is not necessary to have a register but schools need to identify more able and talented pupils to ensure that they are monitoring both the progress of individuals and the overall quality of their provision. How many pupils should be identified? Should pupils move off the register for any reason? If schools have worked on their principles these questions will be easier to answer. A good starting point is to ask staff "Why create a register?" Ask them to undertake a "PMI" i.e. jot down Plus, Minus and Interesting points about having a register. It is useful to follow this by considering the strengths and limitations of various types of quantative and qualitative identification methods, some of which may already be in use e.g.

Teacher Assessments, Classroom observation, Teacher nomination, Generic checklists, Subject specific checklists, Parental/Peer nomination, Tests, Ability profile tests, etc.

44. The above process should help staff to recognise that a wide variety of assessment methods need to be used to identify the abilities and talents of all pupils. It is important also at this stage to consider those who may be underachieving. Ability can often be masked by non-compliance. Some able pupils may be "coasting". Unless schools are providing a range of opportunities and sufficient challenge and stimulation in the classroom, some pupils will never have the chance to develop their particular talent, or be motivated enough to show what they can really achieve.

Identification is not an end in itself, and is only worthwhile to the extent that able pupils progress as a result of the school using it.

Curriculum of Opportunity

Changing practice

45. As a result of their audit, schools may have a number of development points on their action plan. These issues are likely to require professional development for a number, if not all, of the staff. Schools will need to think about the training staff need to provide more "challenge" in the classroom, or to provide appropriate extension or enrichment resources and activities. This may involve in- house INSET, or LEA or external consultancy. It is important not to separate out the Standards from other school developments on teaching and learning, particularly in the secondary school where this may be more likely to happen. Networking with other schools may also be beneficial and should be encouraged.

Appendix 1

A Self-Evaluation Tool for Meeting the Quality Standards for More Able and Talented Pupils

Standard 1: A whole school strategy, including an action plan, to support more able and talented pupils			
CRITERIA	POSSIBLE EVIDENCE	ACTIONS	COMMENTS
1.1 The school seeks to create a climate/ethos where the achievements of all are valued and success is celebrated	Celebration assemblies, displays of pupils' work, certificates, rewards, Award ceremonies, prizes that acknowledge talents, abilities & activities outside the curriculum and are culturally and socially inclusive School Mission Statement		
1.2 The commitment to support more able and talented pupils is an intrinsic part of teaching and learning strategies and is reflected in all other school policies over time	Teaching and learning Policy Subject policies Department handbooks Other policies including assessment		
1.3 The school has a comprehensive whole school strategy for More Able & Talented pupils that:	Policy on provision for more able and talented pupils		
 has aims and objectives linked to the school's aims and objectives 	School's Prospectus School development plan		
 defines more able & talented pupils in the context of the school 			
 has appropriate strategies to identify more able and talented pupils 	Range (see Standard 2)		

 outlines the provision that the school makes 	Statement re provision Pastoral care policy	
 accepts that supporting more able and talented pupils is the responsibility of all staff 	Staff meeting minutes where strategies discussed	
 includes the principles of equality of opportunity 	Policy for Inclusion and/or Equal Opportunities Policy	
1.4 The school has an action plan that supports the implementation, monitoring and evaluation of provision	Action Plan for promoting provision for more able and talented pupils School Development Plan	

Standard 2: Identification strategies and criteria			
CRITERIA	POSSIBLE EVIDENCE	ACTIONS	COMMENTS
2.1 The school has a clear rationale for the identification of more able and talented pupils that is inclusive and:	Policy on provision for more able and talented pupils		
 encompasses all children who have abilities and talents above those found normally within the school 	Policy for Inclusion or equality of opportunity		
 recognises particular talents in the arts and sport as well as academic subjects 	Subject policies		
 recognises that provision is a key part of identification 	Curriculum Policy Statement showing breadth and balance and range of opportunities		
 is based on a range of objective criteria 	Appropriate subject specific criteria as well as generic		
seeks the views of all those involved with the child including parents, carers, teachers, teaching assistants, the pupils themselves, other pupils and other professionals that the school may consult	Pupil questionnaires and/or semi- structured interviews Teacher, parent/carer, peer nomination forms Evidence of regular reviews with teachers and co-ordinator for more able and talented provision		

2.2 The school has an appropriate range of strategies to identify more able and talented pupils that:	Assessment Policy Range of assessment strategies	
 involves all staff 	Uses expertise of subject leaders	
 includes a wide range of assessment opportunities 	Analysis of qualitative and quantitative data including appropriate tests/ observations /judgements	

Standard 3: A target for improvement of the school's provision and the performance of more able and talented pupils			
CRITERIA	POSSIBLE EVIDENCE	ACTIONS	COMMENTS
3.1 The school has targets to improve both the quality and range of its provision to support all potential talent to ensure • breadth • depth • pace	School development plan Policy and action plan for provision for more able and talented pupils Annual Report to Parents Curriculum Statement School-wide opportunities Extra Curricular programmes School based enrichment opps. Community based enrichment opps.		
 3.2 The school has SMART targets for improving the performance of; the most able pupils the whole school individual pupils 	School Target Setting Individual Pupil Targets Evidence that progress towards these targets is monitored and evaluated		
3.3 The school tracks pupil attainment to ensure that more able and talented pupils make suitable progress	Teacher Assessments Pupil tracking		
3.4 The school ensures that records/data are used to support transition	Transition records Transition planning		
3.5 The school analyses its data and compares performance with similar schools	Value Added Data		

3.6 Teachers use formative	Teacher Assessment	
assessment and positive marking to	Pupils' books	
assess the next steps in pupil's	Teachers' Records	
learning	Annotated Planning	
3.7 Teachers encourage more able	Self assessment recording	
and talented pupils to assess their	Pupil contributions to reports	
own performance and set personal	Individual pupil targets	
targets		

CRITERIA	POSSIBLE EVIDENCE	ACTIONS	COMMENTS
4a.1 The school's policy for	Teaching and Learning Policy		
Teaching and learning includes:	School Curriculum		
4a.1i.recognition of the need to	Department handbook		
meet the range of learning styles	Staff handbook		
of all pupils	Schemes of work and teaching		
4a.1ii. promotion of independent	plans		
learning	Lesson observation		
4a.1iii. guidance on providing a	Annotated plans		
range teaching approaches	Formative assessment records		
4a.1iv. teaching strategies which	Inspection reports		
are based on assessment for	Medium and short term plans that		
learning	include:		
4a.1v. guidance on differentiation	Extension / enrichment tasks		
so that more able and talented	Activities to develop independent		
pupils are challenged in lessons	learningTasks that require a		
4a.1vi.promotes teaching pupils	problem solving approach / built in		
in different ways including	choice		
lectures, seminars tutorials and	Opportunities for higher order		
one-to-one sessions	questioning		
	Evidence of planning for pupil self		
	review and reflection		
	Guidance on classroom		
	organisation		
	Evidence of flexible grouping,		
	individual, paired and collaborative work		

4a.2 Provision for more able and Talented learners is identified as a focus in the school's policy for monitoring teaching and learning	Identified as a focus in the lesson observation proforma Completed proformas show comments on provision for more able and talented pupils		
Standard 4b: The curriculum offers			
CRITERIA	POSSIBLE EVIDENCE	ACTIONS	COMMENTS
4b.1 The school has a commitment	School Curriculum		
to offering a broad, balanced and			
flexible curriculum in order to			
recognise that:	Cohool Droops atus		
4b.1i. a wide range of	School Prospectus		
opportunities will support	Departmental guidance, Schemes of work		
identification of particular abilities, talents and skills	Taster courses		
abilities, talents and skills	Enterprise learning opportunities to		
	allow for the identification of		
	leadership, entrepreneurial and		
	interpersonal skills		
4b.1ii. pupils' preferred learning	School Curriculum which includes		
styles need to be taken account	innovative models of learning		
of so that pupils can progress at	beyond the classroom which is		
different rates and along different	developed in collaboration with		
pathways	schools/colleges/ HE/ employer		
point and a	partnerships.		
	Vocational units to enhance		
	learning in academic programme		
4b.1iii. all pupils need to have a	Links with other partners inc.		
broad range of learning	schools, colleges, clubs and		
experiences including work-	national organisations for sport		
related learning	and the arts, the community and		

	employers		
	Work experience programme and		
	reports. Feedback from partners		
	and employers.		
4b.1iv.creativity and enterprise is	Schemes of work, Plans, School		
important in all aspects of	Curriculum		
learning	Teaching and learning Policy		
4b.1v. new technologies have the	ICT policy, Partnership		
potential to broaden learning	agreements		
opportunities	Records of achievement		
4b.1vi. opportunities to take risks	Schemes of work, Plans, School		
should be given	Curriculum		
	Teaching and learning policy,		
	enrichment programmes,		
	work experience		
	Collaborative learning		
	Risk and Challenge activities		
	Opportunities to be active		
	independent thinkers		
Standard 4c: The provision address	ses the pastoral care of more able a	and talented pupils as wel	I as their learning needs
CRITERIA	POSSIBLE EVIDENCE	ACTIONS	COMMENTS
4c.1The school has a programme of	PSHE policy		
pastoral support that:	Pastoral care programmes		
4c.1i. provides appropriate	Pupil mentors		
mentoring and support for more able	Tutorials		
and talented pupils	Counselling services		
4c.1ii. provides regular reviews of	Review programme		
pupils' attitudes to learning	Attendance		
	Course completion rates		

4c.2l Careers Education and Guidance provides opportunities for self-development, career exploration and career management skills NB. Most of this is in a secondary context but schools should be able to demonstrate that pupils understand what adults do and the range of possibilities open to them	Careers guidance programme linked with a range of providers Destination of more able and talented pupils Work placements Pupil feedback on careers advice Experience of the world of work i.e. visits and visitors Mini-enterprise activities Real-life contexts for learning	
4c.2ii. Careers guidance is appropriately aspirational.	Business and enterprise activities Inspirational speakers Destination of more able and talented pupils	
4c.2iii. Pupils with talents receive appropriate guidance on the continuing development of their talents and their long term opportunities	Pupil interviews Transition strategies Transition plan	
4c.3 The school has strategies to support transition into the next phase of education, higher education and work.	Transition policy/ transfer documentation Pupil's Record	
4c.4. More able and talented pupils are encouraged to make a positive contribution to the school and the community	Evidence of participation in charity and community activities Active participation in School's Council Taking on leadership roles Mentoring Younger able learners	

Standard 5: Regular reviews to identify underachievement and support individual pupils				
CRITERIA	POSSIBLE EVIDENCE	ACTIONS	COMMENTS	
5.1 The provision for and progress of	Primary – termly staff meeting			
more able and talented pupils are	Secondary – termly dept/ annually			
reviewed and discussed by all staff	whole school			
5.2 The school regularly reviews the	Analysis of pupil attainment by			
performance of specific groups of	specific group			
pupils to ensure that there is no	Where underachievement			
significant underachievement i.e.	identified targets are set and			
gender, ethnic groups	actions agreed			
5.3 The school has appropriate	Teacher observation			
systems in place to identify	Pupil tracking			
underachievement	Test results			
	Generic checklists			
5 4 Marcalla de l'Olevia la cilia	Pupil / parent interviews			
5.4 More able and talented pupils	Record of review meetings			
who are underachieving have	School, group or individual targets			
specific targets and learning goals	and action plans			
including:				
 SMART targets (Specific, 				
Measurable, Achievable,				
Realistic and Time related)				
 details of steps to be taken to 				
help pupils achieve their				
targets				
 the skills to be learned are 				
outlined in the plan				
 an appropriate personalised 				
programme of study that they				
have helped to develop				

Standard 6: A commitment to improve the skills of all staff in the school to meet the needs of more able and talented pupils			
CRITERIA	POSSIBLE EVIDENCE	ACTIONS	COMMENTS
6.1 There is a whole school co- ordinator for more able and talented pupils	Job description Co-ordinator's handbook		
6.2 Training for staff includes:	CPD programme including:		
 strategies for the identification of able pupils 	external courses longer accredited courses		
formative assessment	reading		
 strategies to provide appropriate challenge and support 	action research		
 strategies to develop/enhance pupils' self esteem 	 twinning / group working with other schools 		
 differentiation 	 staff meetings 		
learning stylesquestioning Skills	 staff library with range of materials to promote ideas 		
 thinking skills 	inset days		
 problem solving skills 	 opportunities for staff to feedback ideas from training 		
Staff development shows progression and is based on analysis of need	Individual staff development profiles Performance Management / Appraisal Policy and records		
6.3 The performance of more able and talented pupils is the subject of regular staff discussion	Staff meeting minutes		

6.4 Provision for more able and talented pupils is part of the induction programme for new staff and information about the school's policy and practice are included in the staff handbook	Induction programme Staff handbook Department handbooks Networking, external support, membership of national organisations	
6.5 Support staff receive appropriate training and development	CPD programme	

Standard 7: The school has programmes to support exceptionally able pupils				
CRITERIA	POSSIBLE EVIDENCE	ACTIONS	COMMENTS	
7.1 Exceptionally able pupils are identified	Pupil records			
7.2 The school provides an individualised programmes for each exceptionally able pupil	Individualised programmes/plans			
7.3 A range of teaching strategies has been identified to meet the needs of exceptionally able pupils	Policy on provision for more able and talented pupils Teaching and learning Policy Lesson observations			
7.4 The school has established links with other organisations and institutions to support exceptionally able pupils, including:	NACE			
links with other phases and HE	Infant to Junior Primary to Secondary Secondary to HE			
 on line support 	Internet links			
 links with out-of-school providers and national associations 	Specialist Associations inc. sports, music, arts			
 master classes 				

Standard 8: The school has a range of appropriate resources including ICT				
CRITERIA	POSSIBLE EVIDENCE	ACTIONS	COMMENTS	
8.1 Teaching and learning materials	Audit of resources including			
are used effectively to support more	teachers' resources for all			
able and talented pupils in all	curriculum areas			
curriculum areas	Teaching Plans			
	Classroom observation			
8.2 Teaching materials are regularly	Challenging texts for younger			
reviewed by the co-ordinator for	readers			
more able and talented pupils to	Maths resources with less written			
ensure they meet the needs of the	text. Subject resources that			
pupils, provide appropriate challenge	develop higher order skills/problem			
but are age appropriate	solving. ICT based learning			
	programmes. Sports and Arts			
	facilities/resources			
8.3 The school library has books that	Wide range of texts guidance on			
will meet the needs of all abilities	use of library/resources offered to			
within the school	pupils and teachers			
8.4 Pupils have independent access	Library policy			
to both library and ICT resources	ICT policy			
and are encouraged to make use of	Timetables			
these resources for private study –				
incl before/after school				
8.5 The technology within the school	Access to ICT beyond IT lessons			
is being used to support more able				
and talented pupils				
8.6 The school teaches pupils study	Curriculum policy			
skills that will encourage	Teaching and learning Policy			
independent working	Policy on cross curricular skills			
8.7 The school has a range of	Staff library			
teachers' resources to support				
planning and innovation
