

Population Statistics for Children and Young Adults

JULY 2006

Population statistics for children and young adults

Hugh Cochrane

Introduction

This paper provides population estimates for 2004, for children and young adults by Strategic Health Authorities (boundaries from 1 July 2006) and Primary Care Trusts (current boundaries).

Notes on data source and presentation

The source of the population mid-year estimates is data from the Office for National Statistics (ONS), for mid-year resident populations as at 30 June, based on the 2001 national census. Figures given are unrounded (see note on presentation below).

Definition of resident population

The estimated resident population of an area includes all people who usually live there, whatever their nationality. Members of HM Forces and US Armed Forces in England and Wales are included on a residential basis wherever possible. HM Forces stationed outside England and Wales are not included. Students are taken to be resident at their term time address

Further information on methodology is available on the ONS website at <http://www.statistics.gov.uk/about/data/methodology/specific/population/PEMethodology/> and datasets can be downloaded at <http://www.statistics.gov.uk/statbase/Product.asp?vlnk=601&More=N>

Presentation of data

Population statistics by age group at SHA level would normally be published rounded to the nearest thousand and at PCT level rounded to the nearest hundred, as they are estimates and are not accurate to any further level of detail. The figures in Tables 1 and 2 are given to the nearest whole number to facilitate the calculation of rates and the aggregation of age groups. In any presentation of data derived from this publication it is recommended that the figures are rounded to the nearest 1,000 at SHA level and to the nearest 100 at PCT level.
