1. Summary of main findings

Between 2003/04 and 2007/08 TNS, an independent research company, conducted four annual surveys among schools in the School Sport Partnership Programme on behalf of the Department for Children, Schools and Families (DCSF). The surveys collected information on the levels of participation in Physical Education (PE)¹ and school sport² in partnership schools and were used to measure progress towards a Public Service Agreement (PSA) target. The surveys took place during May-July each year, with the most recent one involving the participation of a total of 21,631 schools. This represents a response rate of 99%.

Participation in PE and school sport

- Overall the 2007/08 survey found that 90% of pupils in partnership schools participated in at least two hours of high quality PE and out of hours school sport in a typical week. This means that the 2008 PSA target of 85% participation has been exceeded by five percentage points.
- Primary (96%) and special schools (93%) achieved particularly high rates of participation in two hours of PE and school sport. In secondary schools the figure was lower at 83%.
- There were also large differences in terms of levels of participation between year groups. For Years 1-9 participation rates were all in excess of 85%. However there is a noticeable drop in Years 10 and 11, with participation rates at 71% and 66% respectively.
- All 450 School Sports Partnerships achieved a participation level of at least 75% in 2007/08, which means that a further element of the PSA target has also been met.

¹ PE is the planned teaching and learning programme in *curriculum time* that meets the requirements of the national curriculum for physical education.

² School sport includes any activity that requires skilfulness and is part of the school's planned formal, semi-formal, supervised or led provision. School sport typically takes place *out of school hours*.

- The series of five surveys shows that much progress has been made over time. The first survey in 2003/04 recorded that 62% of pupils participated in at least two hours of PE and school sport. This has increased every year to reach the current level of 90%. The greatest improvements have been in Years 1-4. Years 10 and 11 have shown only modest improvements over a relatively low baseline figure.
- There are minimal differences in terms of participation rates in different Government regions, and all regions have made year on year progress. In urban areas participation levels were slightly lower than in rural areas, although the gap between the two has narrowed over the course of the series of surveys.
- The best performing schools in terms of their participation in PE and school sport tend to be in more affluent areas and have a relatively low proportion of children from an Ethnic Minority Heritage.
- Pupils spent an average of 118 minutes each week participating in curriculum PE during 2007/08. This represents an increase from 103 minutes in 2003/04. These rates were similar across Years 1-9, but drop noticeably at Years 10 and 11. Consistent year on year improvements have been recorded for Years 1-6. For Years 10 and 11 there have been small decreases in the average curriculum PE time over the course of the surveys.
- 78% of pupils participated in at least 120 minutes of curriculum PE - compared to just 34% in the first (2003/04) survey.

Participation in intra and inter-school competitive activities

- Aside from school sports days, 66% of pupils took part in intra-school competitive activities during 2007/08. Participation was at its highest in Years 3-9, but clearly lower in Years 1, 2, 10 and 11.
- Over the last two years (where comparable data is available) the proportion of pupils participating in intra-school competition has risen from 58% to 66%.
- In 2007/08 41% of pupils across Years 1-11 participated in inter-school competition, compared to 35% in 2006/07. Levels of activity peaked at Years 5 and 6.

Sports provision

- The average number of sports provided by schools during 2007/08 academic year was 17.5. This compares to a baseline figure of just 14.5 in 2003/04.
- Football, dance, gymnastics, athletics and cricket are the most widely available sports and are provided by nine in ten schools.
- The increase in the average number of sports provided has been driven by big increases in the availability of multi-skills clubs, tennis, fitness, outdoors/adventurous activity, orienteering, badminton, cycling, golf, table tennis, canoeing, archery, mountaineering, martial arts and rowing.

Club links

- Schools had links to an average of 7.6 different clubs during the 2007/08 academic year - up from a baseline of just 5.0 different sports in the first (2003/04) survey.
- By far the most common link is for football, followed by cricket, dance, rugby union, swimming and athletics.

Community sports, dance and multi-skill clubs

- Across Years 2-11, 32% of pupils participated in one or more sports, dance or multi-skill clubs with links to the school during 2007/08. This represents an increase from an original baseline of just 19% in 2003/04.

Gifted and talented

- Across Years 5-11 an average of 7% of pupils are currently registered as gifted and talented because of their ability in PE and/or school sport. This means that there are some 290,000 pupils in partnership schools who are registered. This compares to just 3% in the first 2003/04 survey.

Sports volunteering and leadership

- 16% of pupils across Years 1-13 were involved in sports volunteering and leadership during the 2007/08 academic year, up from 12% in 2006/07.

- Comparisons over time are limited to Years 10-13, but show a consistent movement upwards from an initial measure of 9% in 2003/04 to 20% in the latest survey.

2. Background and objectives

2.1 Background

Physical Education³ (PE) and school sport⁴ play an important role in school life. They help to raise standards, improve behaviour and health, increase attendance and develop social skills. In the five years to 2008, over £1.5 billion will have been invested to transform PE, school sport and club links.

A joint Department for Children, Schools and Families (DCSF)⁵ / Department for Culture, Media and Sport (DCMS) Public Service Agreement Target (PSA) was set in 2004 to enhance the take-up of sporting opportunities by 5 -16 year olds as follows:

‘Enhance the take-up of sporting opportunities by 5 to 16 year olds so that the percentage of school children in England who spend a minimum of two hours each week on high quality⁶ PE and school sport within and beyond the curriculum increases from 25% in 2002⁷ to 75% by 2006 and to 85% by 2008, and to at least 75% in each School Sport Partnership by 2008.’

The national PE, School Sport and Club Links strategy brings together eight different strands, one of which is the School Sport Partnership Programme (formerly the School Sport Co-ordinator Programme). The programme is based around ‘families’ of schools which are brought together to increase both the quality and quantity of sporting opportunities for young people. Partnerships are made up of secondary, primary and

³ PE is the planned teaching and learning programme in *curriculum time* that meets the requirements of the national curriculum for physical education.

⁴ School sport includes any activity that requires physical skilfulness and is part of the school’s planned formal, semi-formal, supervised or led provision. School sport typically takes place *out of school hours*.

⁵ The DCSF was previously known as the DfES (Department for Education and Skills). The DCSF was formed in June 2007.

⁶ High quality is defined as ‘producing young people with the skills, understanding, desire and commitment to continue to improve and achieve in a range of PE, sport and health-enhancing physical activities, in line with their abilities.’ *Learning through PE and Sport - A guide to the PE, School Sport and Club Links Strategy*.

⁷ The 2002 baseline was an estimate of the level of PE and school sport participation in England

special schools which usually have a Specialist Sports College acting as the hub of the family. At the heart of the programme is the Partnership Development Manager (PDM) who is responsible for managing the partnership, while in every secondary school there is a School Sport Co-ordinator (SSCo), and in every primary or special school a Primary Link Teacher (PLT) or Special School Link Teacher (SSLT) who is responsible for leading the strategy at that particular school. Staff are funded by the programme to allow them to do this.

The partnerships were set up in a number of phases, starting in September 2000, and rolled out during 2000 to 2006. By the end of 2007 all maintained schools (21,727) in England were in School Sport Partnerships, arranged into 450 different partnerships.

Between 2003/04 and 2007/08 TNS, an independent research company, conducted a series of five annual surveys of schools to monitor the success of the programme. The first survey in 2003/04 involved the participation of 6,547 of the 8,105 eligible schools and showed that 62% of children aged 5-16 participated in at least two hours of PE and school sport. The subsequent three surveys showed that this percentage increased to 69% in 2004/05, to 80% in 2005/06 and to 86% in 2006/07 among partnership schools. These increases took place as the programme rolled out, with the number of schools participating in the programme increasing year after year.

In 2007/08 TNS conducted the fifth and final survey in the programme, reflecting the fact that the particular strategy had reached an end. The findings of this survey are presented in this report.

2.2 Research objectives

The objectives of the research were to collect the following information:

- What proportion of pupils in schools undertake at least two hours of high quality PE and sport within and beyond the curriculum?
 - How does this vary by year group?
 - How does this vary by type of school?
 - How does this vary by a range of other factors - for example, uptake of Free School Meals (FSM)?

- What is the average curriculum time pupils in Partnership schools spend undertaking high quality PE and school sport?
 - How does this vary by year group?
 - How does this vary by type of school?
 - How does this vary by a range of other factors - for example, uptake of FSM?
- How many pupils by year group are involved in intra school sport and school sport competitive activities?
- How many pupils by year group are involved in inter school competitions?
- What is the range of sports offered?
- Is the range delivered via a formal link between schools and clubs?
- How many pupils participate in clubs linked to the schools in the Partnerships?
- How many pupils are registered as gifted, talented or able because of their ability in PE / school sport?
- How many pupils are actively involved in sports volunteering and leadership?

2.3 Methodological approach

The 2007/08 survey aimed to collect information from all partnership schools in the maintained sector in England (21,727 schools). In addition, it collected information from a small number of independent schools, but this information is *not* included in this report.

As in previous years, the 2007/08 survey required schools to provide answers to ten questions. These questions could either be answered on paper or online via a dedicated website. All partnerships were required to have active involvement within the survey process and PDMs were required to take responsibility for data collection within their partnership. TNS sent questionnaires in bulk to PDMs for distribution to their schools; the PDM was asked to take responsibility for distribution to individual schools, tracking responses, and ensuring that questionnaires were returned to TNS.

In the survey instructions, schools / PDMs were informed that ideally they should complete the questionnaire online, but a paper copy of the questionnaire was also provided in case they could not do this. Different deadlines were used for online and paper completion: schools returning the paper questionnaire were required to do so by

12 June 2008, while those completing the online questionnaire were required to do so by 3 July 2008.

A survey website was developed which not only provided access to the online questionnaire, but also to other materials to assist with the survey. The website also provided a PDM area where each PDM could log on and track which of the schools in their partnership had returned a questionnaire and, for online responses only, download a copy of the actual data submitted. Both an online and a telephone helpline were made available to support partnerships during the process.

Survey packs were sent to PDMs in May 2008. Each pack contained a covering letter, a set of survey instructions for PDMs, a list of schools in the partnership, a pre-printed questionnaire and a step-by-step guide to the survey for each school.

Returns were carefully monitored on a daily basis at TNS, and all PDMs in partnerships with zero returns were sent an email, shortly after the deadline for paper returns, reminding them of the final online deadline and to check that everything was in order.

By the final deadline, a total of 21,631 usable responses had been received, as follows:

- 92% on the web
- 7% on paper

This represents an overall response rate of over 99%. Nine out of ten of all partnerships achieved a 100% response rate and only five partnerships achieved a response rate below 95%, the lowest partnership response rate being 91%.

2.4 Validation exercise

In addition to the main data collection, a validation exercise took place to verify the accuracy of the answers to four of the key questions within the survey. These questions were:

- **Q1.** What is the total curriculum time in minutes that all pupils in each year group spend taking part in PE in a typical week?
- **Q2.** What is the total number of pupils in each year group who participate in at least two hours of high quality PE and out of hours school sport in a typical week?
- **Q8.** What is the total number of pupils in each year group who have participated in one or more community sports, dance or multi-skill clubs with links to the school during this academic year?
- **Q10.** What is the total number of pupils in each year group actively involved in sports volunteering and leadership this academic year?

The validation exercise comprised visits to 10% of the 450 partnerships which were selected at random (45 in total). At each partnership a face-to-face interview was carried out with the PDM and with eight randomly selected SSCos / PLTs. The exercise was conducted between the last week in June and the end of term (in July 2008). TNS concluded that the majority of schools kept records which verified the figures they had submitted and, even when these were not available, researchers were satisfied from the verbal accounts of the approach adopted by schools. It was concluded, as in 2005/6 and 2006/7, that survey had produced robust results. In line with previous years, this year's validation exercise did not suggest there had been any systematic misreporting of data.

On completion of the exercise, TNS concluded that there are still minor difficulties with some of the terminology used in the survey, including what constitutes a club link and what should be included in sports volunteering and leadership. However, survey terminology and instructions have been deliberately kept as consistent as possible so as not to compromise time series data. Overall the exercise suggested that the survey had run smoothly and that PDMs, SSCos and PLTs were becoming increasingly adept at conducting the survey.

2.5 Reporting

This report covers all schools in all Phases of the School Sport Partnership Programme which were operational in the 2007/08 academic year and which completed a questionnaire by the stated survey deadline. Where appropriate, comparisons are made with the previous four waves of data collection (2003/04, 2004/05, 2005/06 and 2006/07).

For simplicity the figures shown in the text and charts in this report have been rounded to the nearest percentage point.

The appendices to this report contain detailed tables which list results on key questions for all partnerships and Local Authorities, together with a copy of the questionnaire.

3. Participation in PE and School Sport

Schools were asked to submit figures to indicate the number of pupils in each year group who participated in *at least two hours of high quality PE and out of hours school sport in a typical week*. This is a key measure which relates directly to the PSA target which has been set at 85% for 2008 across all schools.

3.1 Participation in at least two hours of PE and school sport - overall

The 2007/08 survey found that overall 90% of pupils in partnership schools participated in at least two hours of high quality PE and out of hours school sport in a typical week. This means that the 2008 PSA target of 85% has been exceeded by five percentage points. As has been the case throughout the series of surveys, there are quite large differences between year groups and reflecting this, by school type. For Years 1-9 participation rates were all in excess of the 85% target, and indeed for Years 1-8 the figures all exceeded 90%. However, there is a very clear drop in Years 10 and 11, with participation rates at 71% and 66% respectively.

Regarding school type, primary schools (96%) and special schools (93%) achieved very high participation rates, while at a secondary level the figure fell to 83%, reflecting the lower participation rates in Years 10 and 11. Participation rates by year group and type of school are presented in Figure 1.

Figure 1: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - analysis by year group and school type (2007/08)

In addition to the overall target, there was also a target which required each individual School Sport Partnership to achieve a two hour PE / out of hours school sport participation rate of 75% or above by 2008. There are a total of 450 partnerships, and all achieved this target: the lowest level recorded for any individual partnership was 78% and the highest was 100%. Figure 2 shows the distribution of the 450 individual partnerships on this measure.

Figure 2: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - number of partnerships achieving different participation rates (2007/08)

Of the 450 partnerships, 75 top performing partnerships achieved average participation rates of 95% or more among their pupils. 186 achieved average participation rates of 90% - 94% and 151 partnerships achieved rates of between 85% and 89%. Just 39 partnerships were below 85% participation.

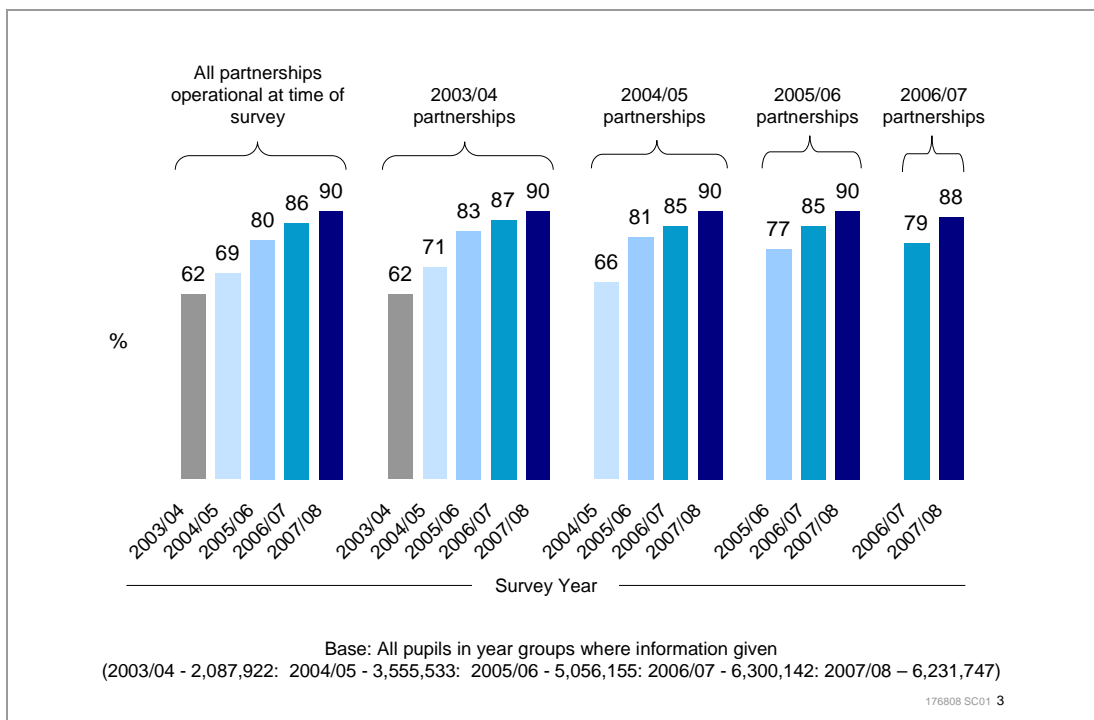

3.2 Participation in at least two hours of PE and school sport - trends

Figure 3 compares the results from the latest 2007/08 survey with those from the previous four surveys. It provides an analysis over time and compares:

- *All partnerships* which were operational at the time of the relevant survey - over time the number of partnerships, schools and pupils increases considerably, as the programme rolled out (from just over 2 million pupils in 2003/04 to over 6 million in 2007/08). While this is an interesting measure, it is important to note that it does not represent a consistent set of partnerships over time. Bearing this in mind, a further analysis is provided which does track the results of a consistent set of partnerships, as follows:

- The *longest established* partnerships - those partnerships which have been operational since 2003/04
- Those partnerships which have been operational since 2004/05
- Those partnerships which have been operational since 2005/06
- The most recently established partnerships - those partnerships which have been operational since 2006/07

Figure 3: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - comparison of partnerships established in 2003/04, 2004/05, 2005/06 and 2006/07

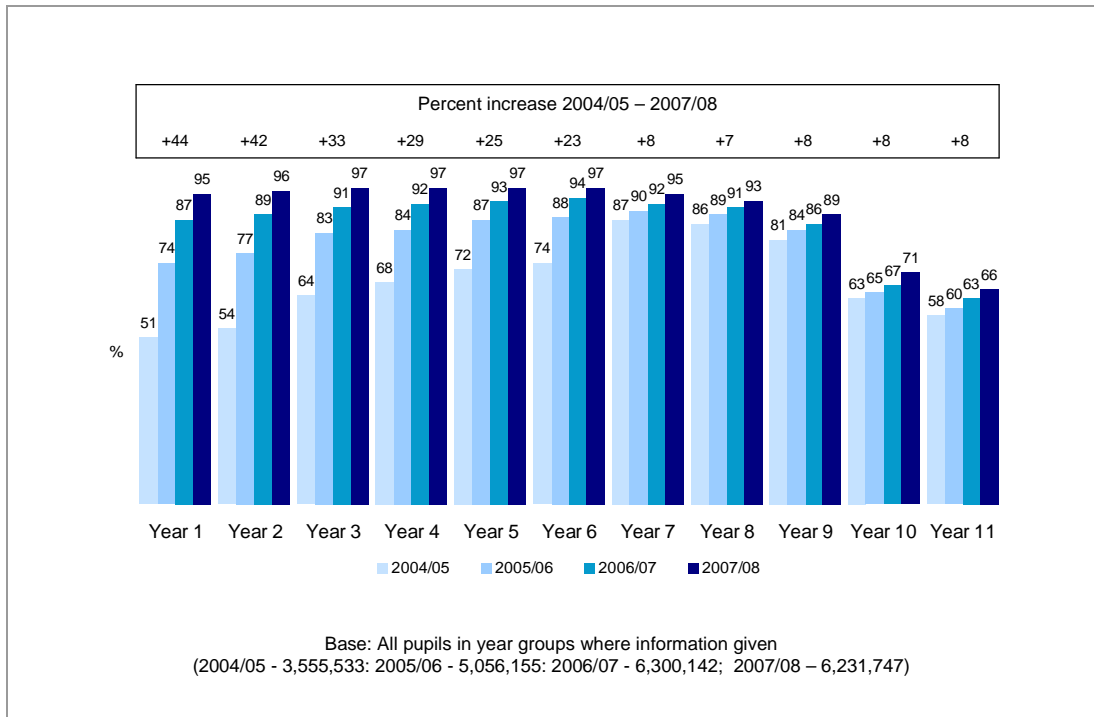

The chart shows how much progress has been made over time. The first survey which took place in 2003/04 recorded that 62% of pupils participated in at least two hours of high quality PE and school sport. This has increased year on year to the latest 90% figure, with the target of 85% actually being exceeded one year before the target date of 2008.

Previous surveys have shown that there is a clear link between the length of time a partnership has been established and the level of participation achieved, with those established the longest reaching higher participation levels than those established more recently. However, the latest survey shows that the most recently established partnerships (set up in 2006/07) now have very similar participation levels to the earliest established partnerships (established in 2003/04). Specifically participation among the former now stands at 88% of pupils, compared to 90% of pupils among the 2003/04 partnerships (and indeed 90% among both the 2004/05 and the 2005/06 partnerships). The chart also shows how there have been year on year increases for all phases of partnerships, although partnerships established in 2003/04 have shown small increases in the 2007/08 survey, reflecting the fact that the participation rate was already very high in the 2006/07 survey (87%).

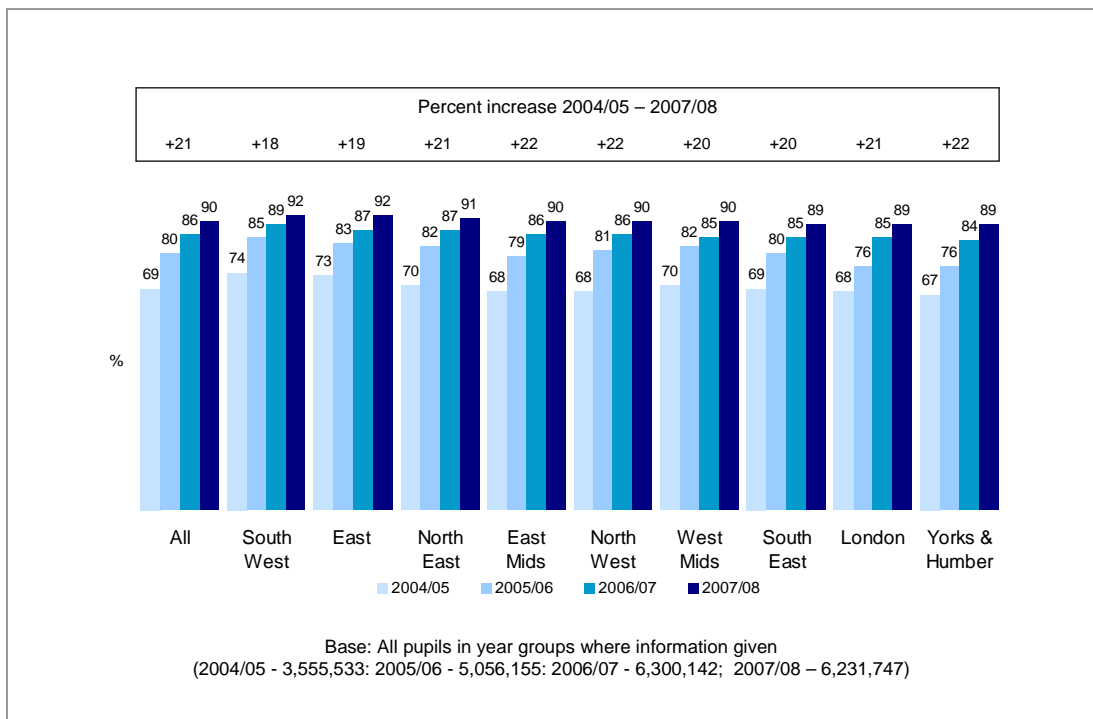

The report now looks at changes in individual year groups over time, comparing data from the last four surveys. It firstly shows how increases have been achieved for each individual year group at every survey. Secondly, it shows that the greatest progress in terms of percentage change has been achieved in Years 1 (from 51% in 2004/05 to 95% in 2007/08, an increase of 44%), 2 (increase of 42%), 3 (increase of 33%) and 4 (increase of 29%). In contrast there has been less progress among Years 7, 8 and 9 - but here participation levels were already very high - and among Years 10 and 11, which have relatively low levels of participation.

Figure 4: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - analysis by year group over time

Looking at an analysis by Government Region (Figure 5) it is clear that there are minimal differences in terms of participation rates in different areas of the country. The highest figures are recorded in the South West and the East at 92%, but these are only three percentage points higher than in the lowest regions of the South East, London and Yorkshire and Humberside. All regions have made year on year progress.

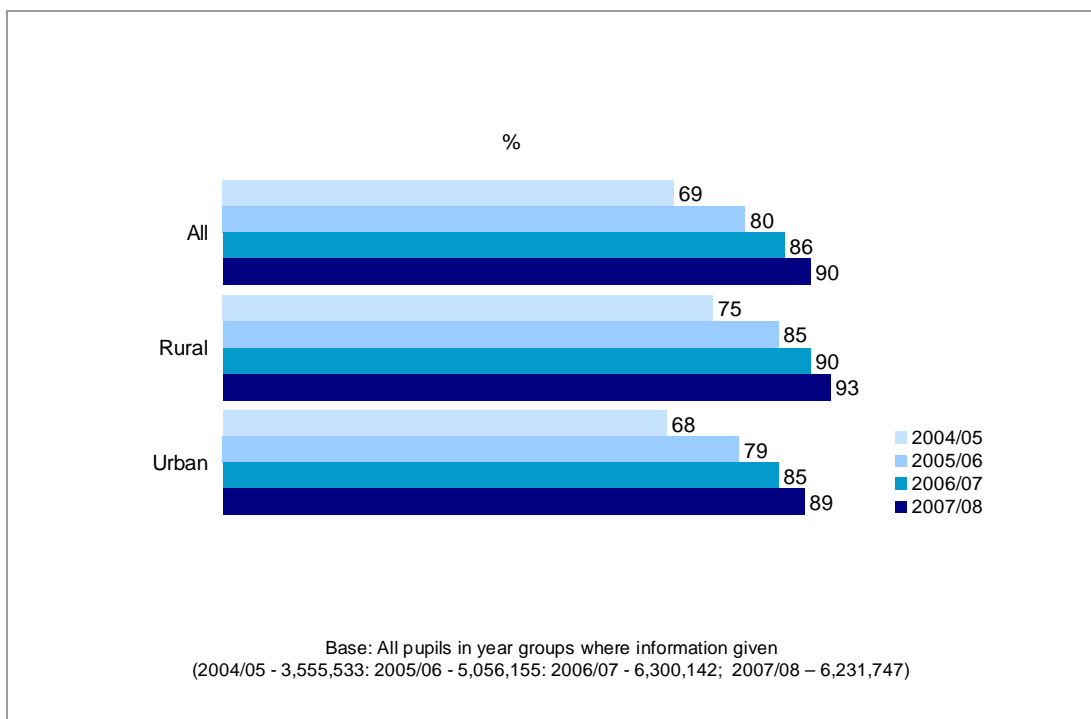

Figure 5: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - analysis by region

In urban⁸ areas participation levels were slightly lower than in rural areas (89% v 93% in the 2007/08 survey). This has been a consistent pattern over the course of the surveys, although the gap between urban and rural areas has narrowed from seven percentage points in 2004/05 to four percentage points in 2007/08.

⁸ Urban is defined as settlements with a population of 10,000 or more. Rural is defined as smaller settlements.

Figure 6: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - analysis by area type

The following series of charts looks at how participation rates relate to a number of socio-economic and school related factors. In the next four charts schools have been divided into three categories according to their performance on the two hour take-up of high quality PE and out of hours school sport in a typical week. The three categories have been defined as follows⁹:

- Very high performing schools - all with 100% of their pupils achieving the two hour PE / school sport target (a total of 17,222 schools)
- High performing schools - comprising schools where between 85% and 99% of pupils achieve the two hour PE / school sport target (a total of 985 schools)
- Lower performing schools - comprising the relatively small number of schools where less than 85% of pupils achieve the two hour PE / school sport target (a total of 2,918 schools)

⁹ The thresholds for the three categories of schools were changed in this year's report, to account for the fact that increasing numbers of schools have achieved 100% pupil participation in two hours of PE / school sport.

Figure 7 shows the relationship between the performance of schools with regard to the proportion of pupils achieving the two hour target and the proportion of pupils who are eligible for Free School Meals (FSM)¹⁰. It shows that in the schools which perform highest in terms of their pupils' participation in two hours of PE / school sport there tend to be slightly fewer pupils who are eligible for FSM than in schools where there are lower levels of participation in the two hour PE / school sport target (31% compared to 33%). These differences are, however, small, and perhaps surprisingly small given that FSM is very strongly associated with other measured attainment outcomes.

Figure 7: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - analysis by percentage of children eligible for free school meals (2007/08)

¹⁰ High FSM is defined as more than 20% of children; medium as 7% - 19% of children; low as less than 7% of children

A similar analysis compares the performance on the two hour PE/school sport target with the schools' Index of Multiple Deprivation (IMD) (see Figure 8). It shows there is a relationship between the two measures, with the best performing schools tending to be in the more affluent areas. Specifically 33% of lower performing schools were in relatively deprived areas, compared with just 28% of very high performing schools. As with the analysis of FSM, these differences are relatively small.

Figure 8: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - analysis by Index of Multiple Deprivation (2007/08)

There also exists a relationship between the ethnic minority heritage (EMH) composition of the school and the level of participation in PE / school sport (Figure 9). Around a third (37%) of schools which achieve 100% PE / school sport participation rates have a relatively high level of EMH pupils, whereas 42% of schools with the lowest levels of participation have a relatively high level of EMH pupils.

Figure 9: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - analysis by Ethnic Minority Heritage (2007/08)

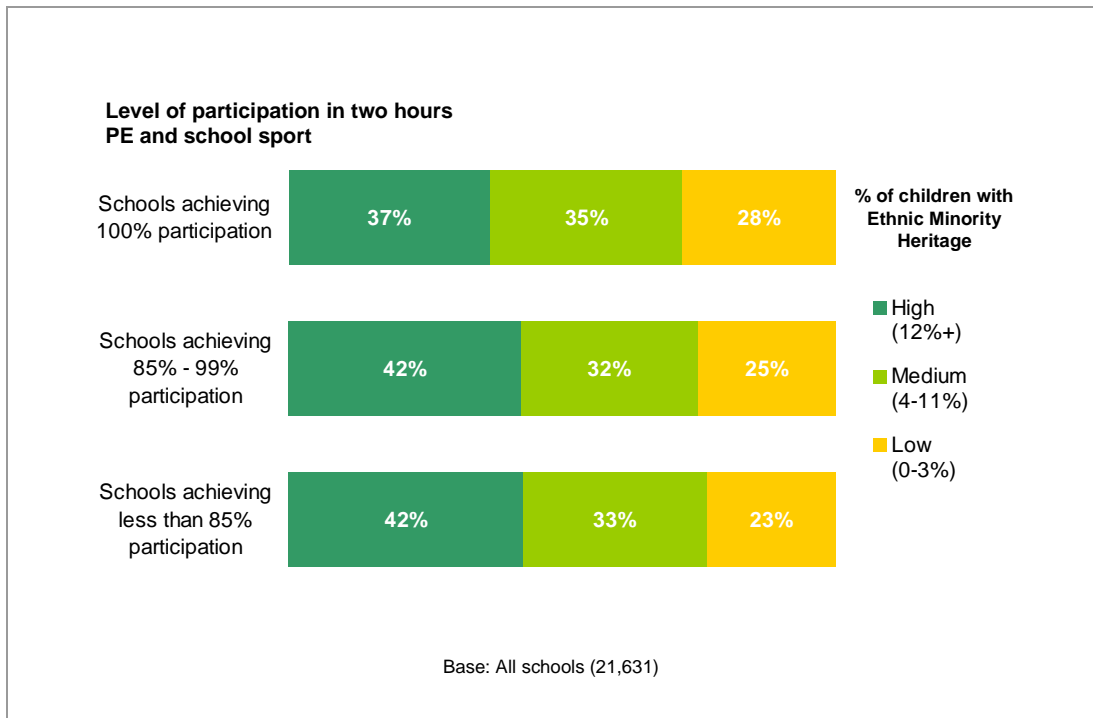

Figure 10 shows that there is a very slight relationship between the proportion of pupils with Special Educational Needs (SEN) in a school and its performance on meeting the two hour PE / school sport target. There is evidence to suggest that lower performing schools tend to have a slightly higher proportion of children with SEN than is the case for higher performing schools.

Figure 10: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - analysis by Special Educational Needs (2007/08)

Figure 11 presents the percentage of pupils participating in two or more hours of high quality PE and out of hours school sport in a typical week by school type. The percentage of pupils at boys only and at mixed schools participating in at least two hours of PE / school sport is much higher than at girls only schools, where it is 69% (note however that there are only 233 girls only schools, out of a total of 21,631 partnership schools). Over time it is clear that the greatest increases in participation levels have been in mixed schools (which represent the vast majority of schools) while in boys only schools (of which there are 250 such schools) the figures started at a high level and the increases have therefore been more modest. In girls only schools the increase over time has been slightly greater than in boys only schools, but the former still lag a long way behind the latter.

Figure 11: Percentage of pupils who participated in at least two hours of high quality PE and out of hours school sport in a typical week - analysis by school type (2007/08)

3.3 Curriculum time spent on PE - overall patterns

In addition to information about numbers of pupils participating in PE and school sport, schools were also required to submit information about the total curriculum time (in minutes) that all pupils spend taking part in PE in a typical week. Results by year group are presented in terms of the average numbers of minutes for each year group.

Figure 12: Total curriculum time that all pupils in each year group spend taking part in PE in a typical week - analysis by year group and school type (2007/08)

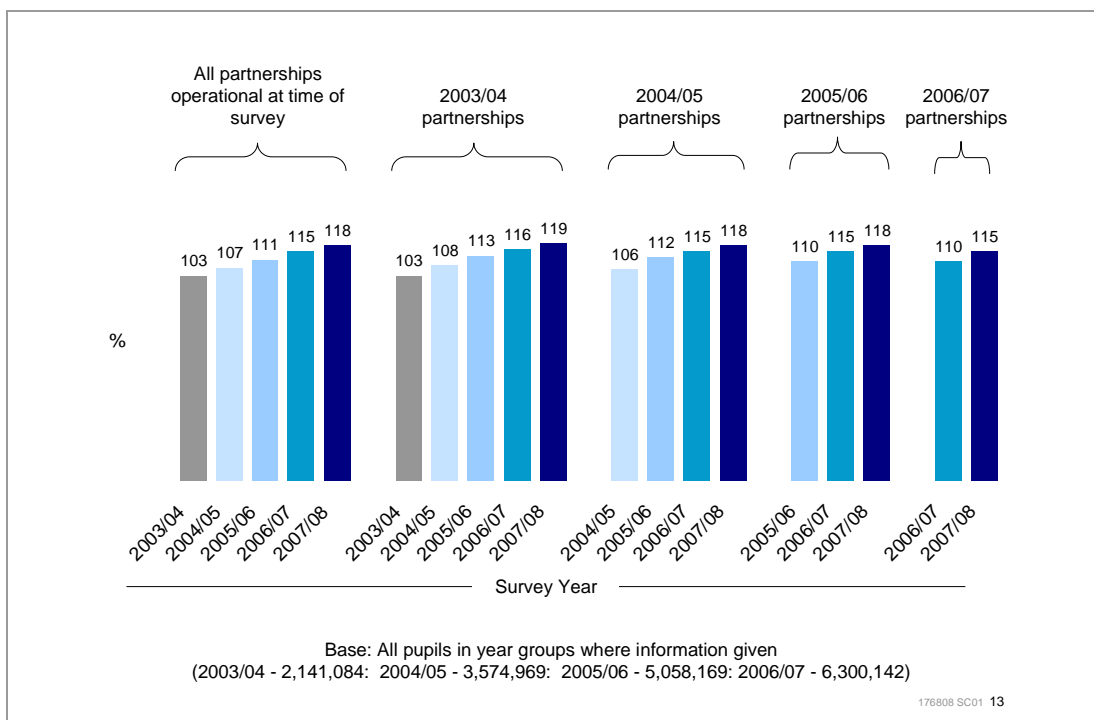

Pupils spent an average of 118 minutes participating in curriculum PE in a typical week during 2007/08. As with the percentage of pupils participating in at least two hours of PE and school sport, rates were fairly similar across Years 1-9, but then dropped by around 20 minutes at Years 10 and 11 to 99 minutes and 96 minutes respectively. The average amount of curriculum PE was highest in special schools at 138 minutes. In secondary schools it was 114 minutes, reflecting the lower amount of curriculum PE in Years 10 and 11.

3.4 Curriculum time spent on PE - more detailed analysis and trends

An examination of the results over time for all partnerships included in the survey (which vary over time, with more partnerships and schools coming on stream) shows that the average curriculum time spent on PE has increased from 103 minutes in 2003/04 up to 118 minutes in 2007/8, i.e. an average increase of 15 minutes across all schools.

Looking at the data by the length of time that the partnerships have been established shows that the most recently established (2006/07) partnerships have slightly less curriculum time on PE on average (115 minutes) than the longer established partnerships which are between 118 and 119 minutes. As with the question on participation in PE and school sport, there have been increases every year for partnerships established in 2003/04, 2004/05, 2005/06 and 2006/07.

Figure 13: Total curriculum time that all pupils in each year group spend taking part in PE in a typical week - comparison of partnerships established in 2003/04, 2004/05, 2005/06 and 2006/07

In Years 1-6 there have been very consistent year on year improvements in terms of the average amount of curriculum PE pupils take part in. Between 2004/05 and 2007/08 an increase of between 19 minutes and 25 minutes was recorded for each of these year groups. In Years 7 to 9 there have been smaller increases - but the figures in these year groups have always been relatively high. In Years 10 and 11, participation decreased slightly between 2004/05 and 2006/07, but seems to have started to reverse this trend in 2007/08.

Figure 14: Total curriculum time that all pupils in each year group spend taking part in PE in a typical week -analysis by year group over time

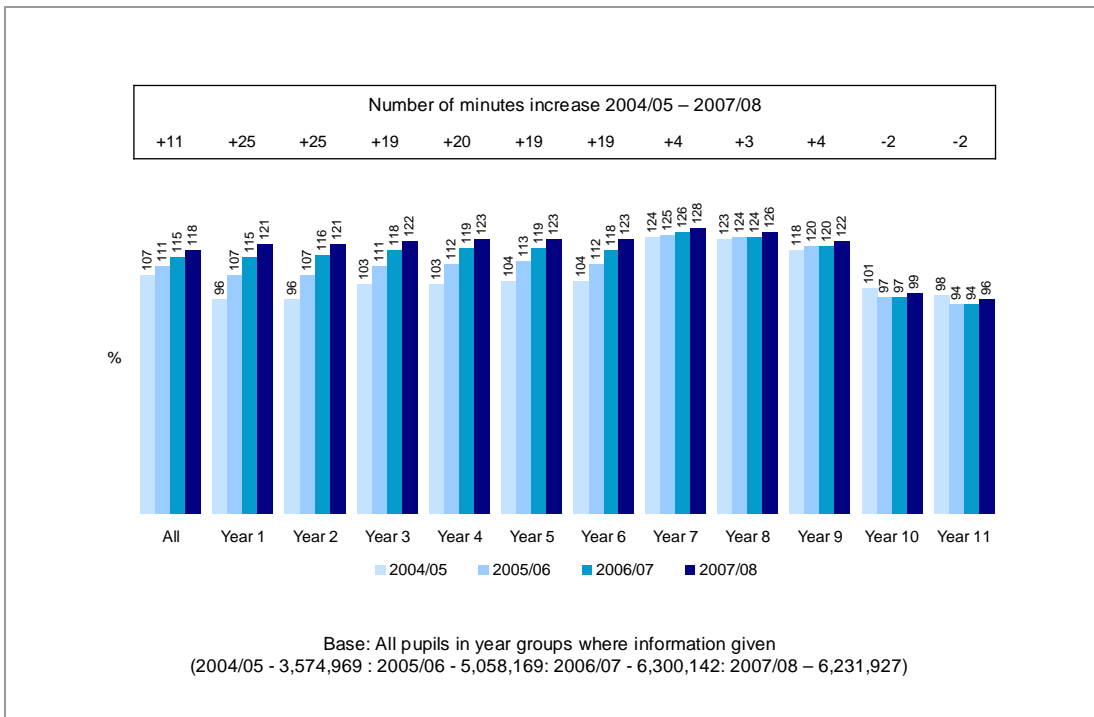

Figure 15 shows in detail the range of minutes that pupils spend taking part in curriculum PE. Across all year groups just 8% of pupils participated in less than 90 minutes of curriculum PE in a typical week, with 14% having between 90-119 minutes, 66% between 120-149 minutes and 12% participated in more than 150 minutes curriculum PE. This means that 78% of pupils participated in at least 120 minutes of curriculum PE. In each of Years 1-9, at least 78% of pupils participated in 120 minutes or more of curriculum PE, which has a major impact on the success of the overall levels of participation in PE and school sport. At the other end of the scale, about two in five of those in Years 10 and 11 participate in at least 120 minutes of curriculum PE. There are much higher numbers in Years 7 and 8 participating in 150 minutes, around twice the proportion compared to other years.

By way of comparison, in 2003/04 just 34% of pupils participated in at least 120 minutes of curriculum, compared to 78% recorded in the latest survey.

Figure 15: Total curriculum time that all pupils in each year group spend taking part in PE in a typical week - ranges (2007/08)

Given that 78% of all pupils received at least two hours of curriculum PE, and the fact that 90% participate in at least two hours of PE and school sport, this means that overall 12% of pupils achieve their two hours of PE and school sport through a 'top up' of out of hours school sport including lunch time or break time activities, rather than through curriculum PE. Figure 16 looks at this on an individual year group level. It shows that for Years 1-9 the two hour PE and school sport target is mainly achieved through curriculum time alone. However, for Years 10 and 11, there is a much greater emphasis on out of hours school sport to support the curriculum time, and even so it is of course the case that a much smaller proportion of pupils in these year groups achieve the two hour target.

Figure 16: Analysis of how two hours of PE and school sport target is achieved - by year group (2007/08)

An examination of data from the previous surveys on how the two hour PE and school sport target has been achieved (Figure 17) reveals that there has increasingly been a focus of curriculum PE, which has been the primary reason why the two hour target has been achieved. However, for Years 10 and 11, the analysis reveals that any increases in the curriculum time have been modest as have the increases in the amount of out of hours schools sport. The combination of these two factors account for the lower levels of progress for these year groups.

Figure 17: Analysis of how two hours of PE and school sport target is achieved - analysis over time for Years 10 and 11

4. Participation in intra- and inter-school competitive activities

4.1 Intra-school competitive activities

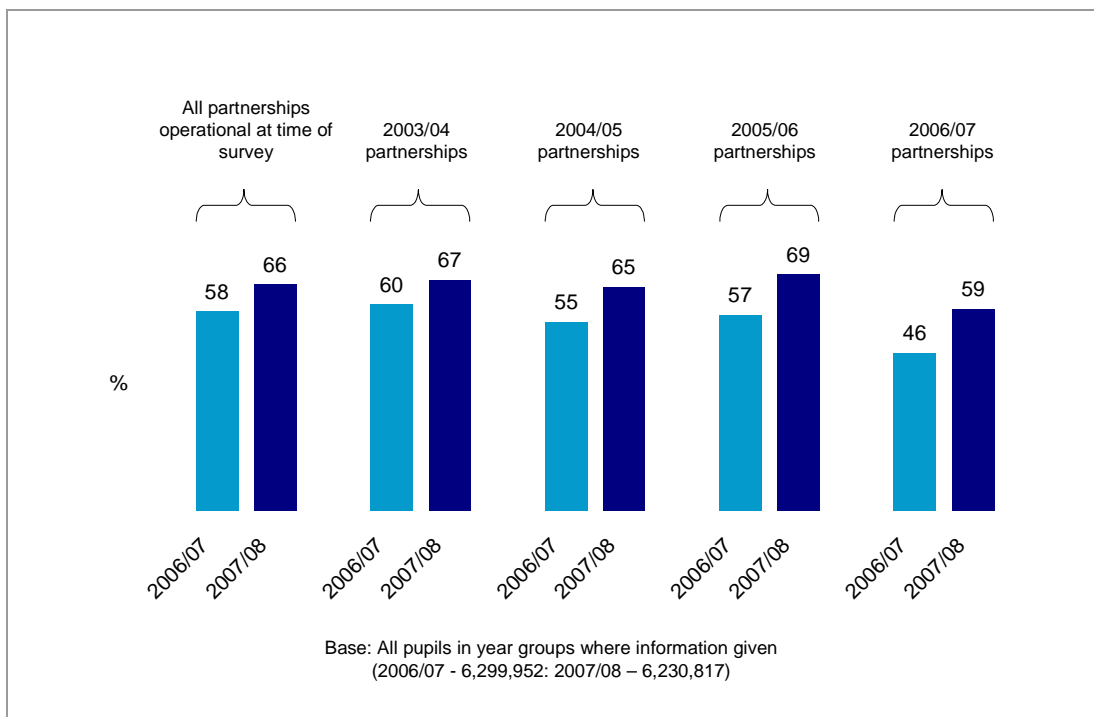

During the 2007/08 academic year 66% of pupils took part in intra-school (i.e. *within* the school) competitive activities, excluding school sports days. Within secondary schools the figure stood at 67% while for primary schools it was 65%. In special schools it was slightly lower at 62%. Looking at individual year groups, participation in intra-school competitive activities was at its highest in Years 3-9, but much lower in Years 1 and 2, and Years 10 and 11.

Figure 18: Percentage of pupils involved in intra-school competitive activities during this academic year - analysis by year group and school type (2007/08)

Comparable figures on this question are only available for 2006/07, as in that year there was a tightening of the survey question to emphasise that school sports days should not be included in the reporting of intra-school competitive activities. However, the next chart compares the 2006/07 and the 2007/08 data, and also looks at when partnerships were established.

Figure 19: Percentage of pupils involved in intra-school competitive activities during this academic year - comparison of partnerships established in 2003/04, 2004/05, 2005/06 and 2006/07

Over the last two years there has been an increase in the proportion of pupils engaging in intra-school competitive activities - up from 58% in 2006/07 to the current level of 66%. In terms of the dates when partnerships were established, it is clear that the most recently established partnerships (2006/07) have a lower level of participation in intra-school competition than do the longer established partnerships. However the latest data shows an increase for partnerships established in all four years.

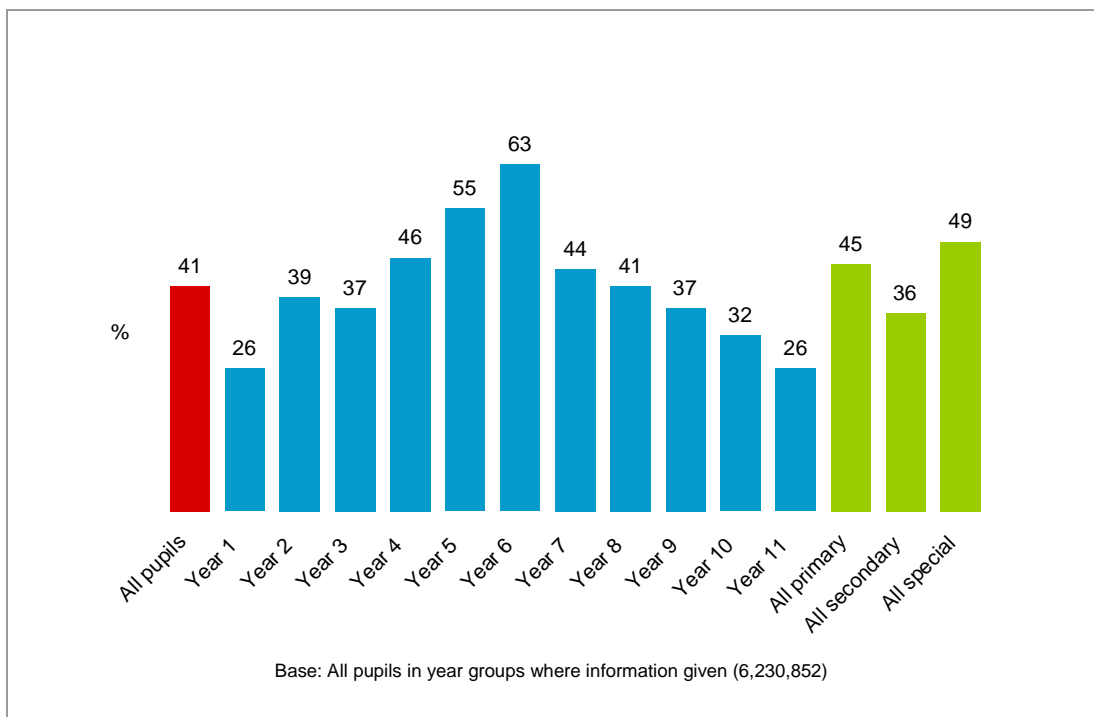

4.2 Sports Days

In answer to a separate question, 99% of schools reported that they had held at least one school sports day or equivalent during the 2007/08 academic year. This represents a steady increase from the 2006/7 and 2005/6 surveys when respectively 98% and 97% of schools reported that they had held at least one school sports day or equivalent. In 2007/8 incidence of school sports days varied by school type - for primary schools the figure was 99%, while for secondary and special schools it was 97% and 96% respectively.

4.3 Inter-school competition

In addition to information about intra-school competition (i.e. competition between schools), the survey also measures the number of pupils who had taken part in inter-school competition during the relevant academic year.

Figure 20: Percentage of pupils involved in inter-school competition during this academic year - analysis by year group and school type (2007/08)

Across Years 1-11 an average of 41% of pupils participated in inter-school competition during the 2007/08 academic year, compared to 35% recorded in the 2006/07 survey. Levels of activity peaked in Years 5 and 6 at 55% and 63% respectively but were much lower in Years 1, 10 and 11 in particular. In special schools an average of 49% of pupils had taken part in inter-school competition during the 2007/08 academic year, compared to 45% of pupils in primary schools and 36% of pupils in secondary schools.

For the first three years of the survey, the question on inter-school competitive activities only covered Years 4-11, and was extended in 2006/07 to cover Years 1-3 in light of feedback from Partnership Development Managers and schools to the effect that there was inter-school competitive activity among the lower age groups. We can therefore look at trends across the five surveys based just on those in Years 4-11.

Figure 21: Percentage of pupils involved in inter-school competition during this academic year - comparison of partnerships established in 2003/04, 2004/05, 2005/06 and 2006/07 (based on Years 4-11 only)

Based solely on Years 4-11, there has been a consistent rise over time among all partnerships operational at the time of the particular survey - from a baseline of 33% in 2003/04 to the latest figure of 43% of pupils who are involved in inter-school competition. Partnerships established in all four years showed increases every year, with most recently established partnerships now achieving levels which are similar to the longest established partnerships (41% v. 43%).

In addition to the question on inter-school competition included in the main questionnaire, in the 2007/08 survey additional questions were asked of PDMs concerning inter-school activity across the whole of the partnership. PDMs were asked:

Over the course of this academic year, during term time, what percent of pupils across the whole of your Partnership would you estimate take part in organised sports competitions between schools?

A high proportion of PDMs (34%) felt unable to answer the question, and even among those who did provide an answer, the majority indicated that it was just a 'rough estimate'. Because of this the detailed results are not being presented in this report, as their level of reliability is likely to be much lower than for the other questions included in the survey.

5. Sports provision

Schools were asked to indicate the range of sports provided by their school during the academic year, using a list of sports provided in the questionnaire. In 2007/08 a number of sports were added to the list for the first time (baseball, fencing and handball) but the mean figures reported exclude these sports, for the purposes of comparability.

The average number of the listed sports provided by schools during the 2007/08 academic year was 17.5. This again represents an increase over previous years - from an average of 14.5 in 2003/04, to 14.9 in 2004/05, to 16.0 in 2005/06 and 17.0 in 2006/07. The number of listed sports provided varied by school type, with an average of 22.3 provided in secondary schools, 19.8 in special schools and 16.5 in primary schools.

* = Less than 0.5%

Base: All schools (2003/04 - 6,574; 2004/05 - 11,498; 2005/06 - 16,898; 2006/07 - 21,745; 2007/08 - 21,631)
 † surveys prior to 2006/07 did not include 'tag rugby' in definition

Overall the patterns of sports provision in terms of the most widely available sports have remained fairly constant over the five years that this survey has been conducted.

Football, dance, gymnastics, athletics and cricket are the most widely available sports and are provided by nine in ten schools. Many sports - particularly less mainstream sports - have shown considerable increases in their availability over the last five years, and it is this that has driven the overall increase in the mean number of sports provided.

The main increases in availability have been:

- Multi-skill clubs ¹¹ - up from just 26% in 2003/04 to 74% in 2007/08
- Tennis - up from 70% in 2003/04 to 79% in 2007/08
- Fitness - up from 58% in 2003/04 to 77% in 2007/08
- Outdoors / adventurous activity - up from 68% in 2003/04 to 75% in 2007/08
- Orienteering - up from 46% in 2003/04 to 62% in 2007/08
- Badminton - up from 31% in 2003/04 to 39% in 2007/08
- Cycling - up from 21% in 2003/04 to 46% in 2007/08
- Golf - up from 14% in 2003/04 to 38% in 2007/08
- Table tennis - up from 26% in 2003/04 to 34% in 2007/08
- Canoeing - up from 17% in 2003/04 to 30% in 2007/08
- Archery - up from 7% in 2003/04 to 24% in 2007/08
- Mountaineering - up from 7% in 2003/04 to 13% in 2007/08
- Martial arts - up from 4% in 2003/04 to 14% in 2007/08
- Rowing - up from 2% in 2003/04 to 9% in 2007/08

The only sports that show a decline over time are judo - from 8% in 2003/04 to just 1% in the latest survey, and netball - from 84% to 81%.

The apparent increase in rugby league in 2006/07 is probably due to a definitional change and the inclusion of 'tag rugby' within the definition.

¹¹ Clubs set up under the PESSCL strategy that use a variety of approaches and contexts to help children develop physical skills (co-ordination, movement, thinking, body awareness) from a broad and appropriate development vocabulary.

The three new sports included for the first time in 2007/08 were available in the following proportion of schools:

- Handball - 10%
- Fencing - 9%
- Baseball - 7%

6. Club links

Figure 23 shows the sports or activities which schools had links to during the academic year. On average partnership schools had links to 7.6 different clubs - up from 7.0 in 2006/07 and from a baseline of just 5.0 different sports in the first survey in 2003/04. In terms of school type, secondary schools had links to an average of 11.7, primary schools an average of 7.0 and special schools an average of 6.1.

Figure 23: Club links during this academic year

* = Less than 0.5%

Base: All schools (2003/04 - 6,574; 2004/05 - 11,498; 2005/6 - 16,898; 2006/07 - 21,745; 2007/08 - 21,631)
† surveys prior to 2006/07 did not include 'tag rugby' in definition

Consistently across all five surveys by far the most common link has been for football, with 79% of schools in the 2007/08 survey reporting links with football clubs. This is followed by cricket (57%), dance (49%), rugby union (48%), swimming (45%) and athletics (43%). These broadly reflect the most widely available sports shown in the previous chapter except that gymnastics which is a widely available sport does not feature in the top sports for which schools have club links.

For a large number of the listed sports there have been considerable improvements over time in terms of the proportion of schools which have relevant club links. The following sports have all shown increases of more than ten percentage points between the first and final survey:

- Cricket - up from 45% in 2003/04 to 57% in 2007/08
- Dance - up from 28% in 2003/04 to 49% in 2007/08
- Rugby union - up from 39% in 2003/04 to 48% in 2007/08
- Swimming - up from 26% in 2003/04 to 45% in 2007/08
- Athletics - up from 32% in 2003/04 to 43% in 2007/08
- Tennis - up from 27% in 2003/04 to 40% in 2007/08
- Gymnastics - up from 24% in 2003/04 to 40% in 2007/08
- Multi-skill clubs - up from 7% in 2003/04 to 31% in 2007/08
- Golf - up from 9% in 2003/04 to 22% in 2007/08
- Martial arts - up from 6% in 2003/04 to 17% in 2007/08

No sports have shown a decline in terms of the proportion of schools having relevant club links over the course of the five surveys.

The three sports which were added to the 2007/08 survey recorded the following figures:

- Fencing - 4%
- Baseball - 1%
- Handball - 1%

7. Community sports, dance and multi-skill clubs

The survey collected information about pupils in Years 2 - 11 concerning their participation in one or more sports, dance or multi-skill clubs with links to the school during the academic year.

Figure 24: Percentage of pupils participating in one or more community sports, dance or multi-skill clubs with links to the school during this academic year - analysis by year group and school type

Across Years 2-11, 32% of pupils had participated in one or more sports, dance or multi-skill clubs with links to the school during the academic year. Large differences were apparent in the proportions of those in different year groups who had taken part in one or more community sports, dance or multi-skill clubs - in primary schools the proportion increased by year group, to reach a peak of 43% and 44% in Years 5 and 6 respectively. At Year 7, on entry into secondary school, the proportion declined significantly to 30%, and reached a low of just 19% in Year 11. In the line with this, the overall figure among primary schools was 40%, compared to just 25% in secondary schools.

Figure 25: Percentage of pupils participating in one or more community sports, dance or multi-skill clubs with links to the school during this academic year - comparison of partnerships established in 2003/04, 2004/05, 2005/06 and 2006/07

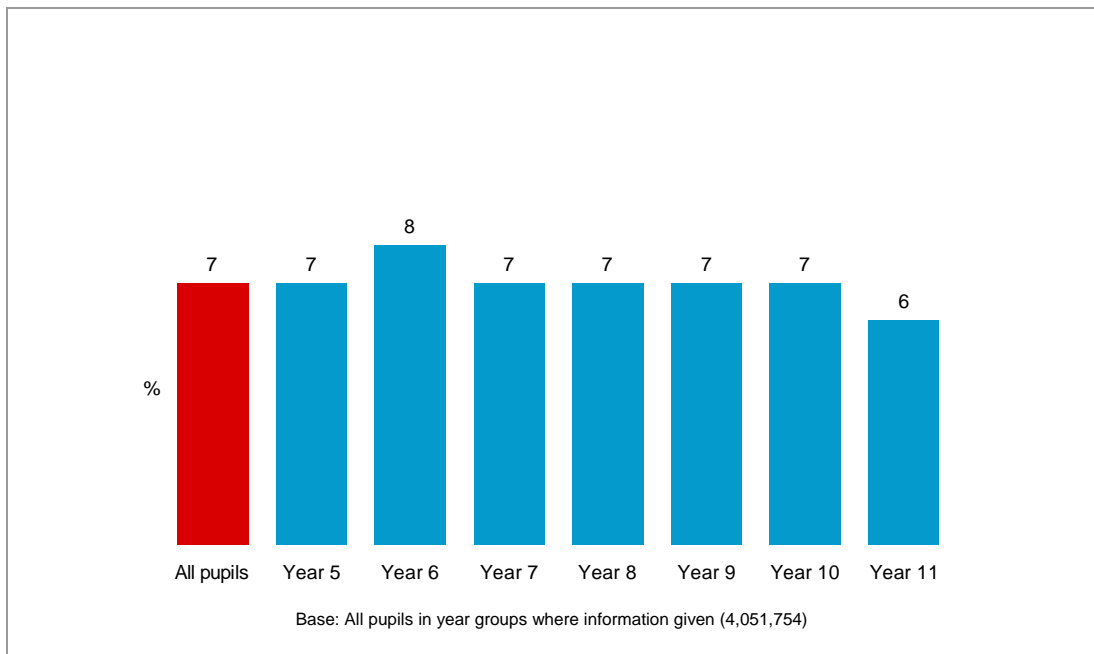

It is apparent that the proportion of pupils in Years 2-11 participating in one or more sports, dance or multi-skills clubs has increased each year the survey has taken place, from just 19% in 2003/04 up to 32% in 2007/08. This increase is apparent among partnerships established in different years. The longest established partnerships have now achieved 34% participation in club links, while the most recently established have achieved 28%.

8. Gifted and talented pupils

The Gifted and Talented strand of the PESSCL strategy was launched in September 2002. It is part of the Government's strategy to improve gifted and talented education. It aims to improve the quality of teaching, coaching and learning for talented young sports people in order to raise their aspirations and to improve their performance, motivation and self esteem. It is also encouraging more talented young sports people to join junior sports clubs and to develop and strengthen the relationship between schools and the National Governing Bodies of sport.

Figure 26: Percentage of pupils currently registered as gifted and talented because of their ability in PE and / or school sport (Years 5-11 only)

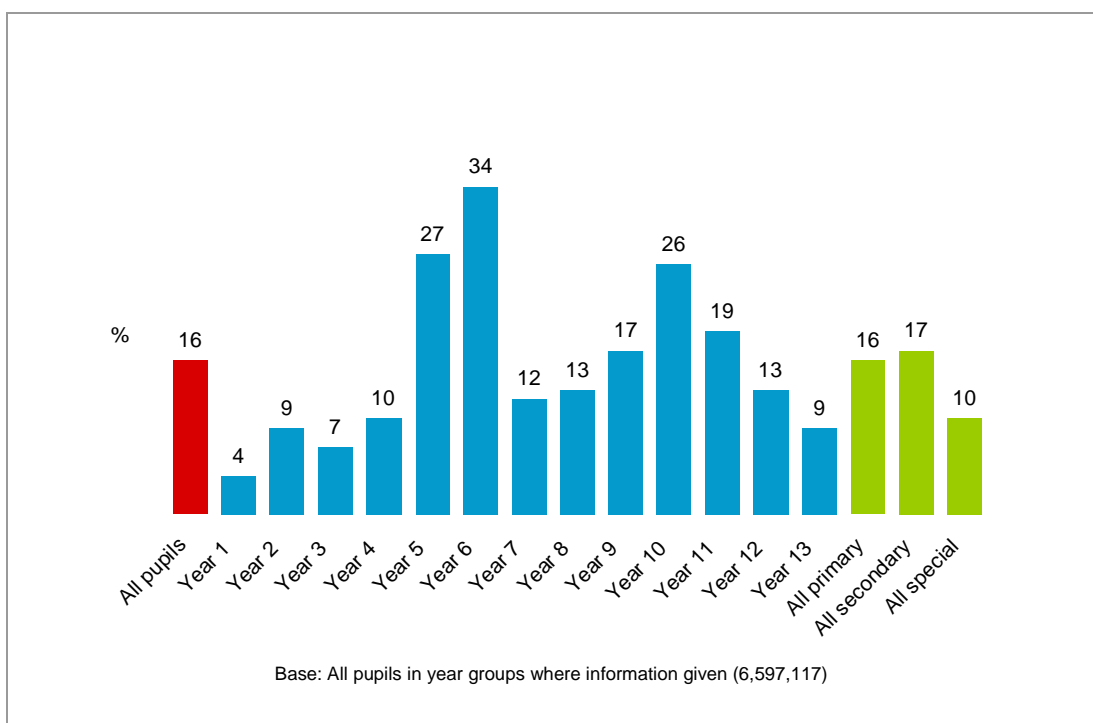

Questions on the gifted and talented programme were limited to pupils in Years 5-11, as before this age group it is difficult to identify pupils in this way. Across Years 5-11 an average of 7% of pupils are currently registered as gifted and talented because of their ability in PE and/or school sport. This means that there are a total of nearly 290,000 pupils in partnership schools who are currently registered as gifted and talented. The total number within each year group is very similar.

The figures presented for the latest 2007/08 survey are very similar to those recorded for the previous survey, where again 7% of pupils across Years 5-11 were registered as gifted and talented. Looking further back, there has been some increase from an original baseline figure of 3% in the first 2003/04 survey.

9. Sports volunteering and leadership

The final question in the survey collected information on the numbers of pupils actively involved in sports volunteering and leadership during the academic year. The question covers pupils in Years 1-13, although in 2005/06 it covered only Years 3-13, and prior to that it was just limited to Years 10-13.

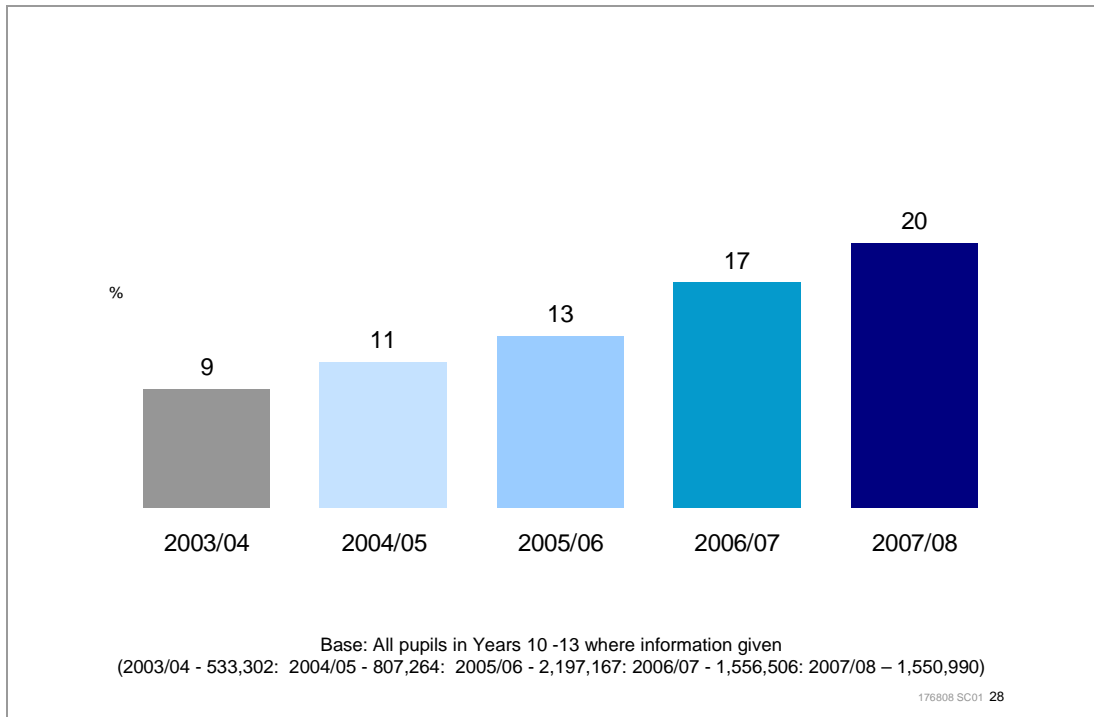

Figure 27: Percentage of pupils actively involved in sports volunteering and leadership this academic year - analysis by year group and school type (2007/08)

A total of 16% of pupils across Years 1-13 were involved in sports volunteering and leadership during the 2007/08 academic year. This means that more than 1 million pupils have been involved in partnership schools. As in previous years the figures vary considerably by year group, peaking at Year 6 (34%), Year 5 (27%) and Year 10 (26%). In secondary schools the average figure was 17% and in primary schools it was 16%. In special schools it was lower at 10%.

Figure 28 shows the comparison over time, but limited to Years 10-13, to allow comparisons to be made across all five surveys.

Figure 28: Percentage of pupils actively involved in sports volunteering and leadership this academic year - comparison of results over time (Years 10-13 only)

Over the course of the five surveys there has been a considerable increase in the numbers of pupils in Years 10-13 actively involved in sports volunteering and leadership - from a baseline of 9% in 2003/04 up to the latest figure of 20%.

For the last two years we have comparable data based on all pupils from Years 1-13. Here there has also been an increase - from 12% up to 16% in 2007/08 among pupils in Years 1-13.

Figure 29: Percentage of pupils actively involved in sports volunteering and leadership this academic year - analysis by region (Years 1-13 - 2007/08)

If we look at the results for the individual regions, it is clear that there are some small differences. The East of England has the highest proportion of pupils who are actively involved in sports volunteering and leadership at 20%, while the West Midlands, London, and the East Midlands are all at a lower level. These are very similar regional patterns to those observed in the previous surveys.

10. Conclusions

This report draws to a conclusion the series of five surveys which have evaluated the School Sport Partnership Programme over the period 2003/04 to 2007/08. Much has been achieved over these five years. The 'headline' is of course that the 2008 PSA target of 85% pupil participation in at least two hours of PE and out of hours school sport has not only been achieved, but has been exceeded by five percentage points, and was indeed already met a year early in 2006/07. Furthermore, all partnerships have achieved the target of at least 75% of their pupils participating in two hours of PE and school sport, with the poorest performing partnership achieving 78% participation, and 75 of the 450 partnerships achieving 95% participation or above.

These results lead us to believe that over the last five years there has been a major change brought about in schools by the PE, School Sport and Club Links strategy, with pupils across the country benefiting from it. The progress in primary schools has been particularly impressive. The first survey in 2003/04 revealed that levels of participation in Years 1 and 2 were particularly weak, with only 51% and 54% respectively of pupils achieving two hours. Now the 2007/08 results show that in these two year groups - and indeed across all six primary year groups - participation is at 95% or more.

Progress in secondary schools has been more modest. While there have been improvements, these have been relatively small, and in Years 10 and 11 only 71% and 66% of pupils respectively participated in at least two hours of PE and schools sport.

The School Sport Partnership Programme was rolled out over a number of years, and this is partly reflected in some of the results, which indicate that the longest established partnerships tend to be achieving the best results. However, such differences are very small, and it is encouraging to see that, for example, partnerships established in 2006/07 recorded an average participation level of 88%, compared to 90% for partnerships which were established before 2006/07.

The research provides some insight into regional and socio-demographic differences in terms of participation in school sport. Regional differences are minimal and all regions have made year on year progress. However, there is a link between levels of participation and affluence, with the best performing schools tending to be in the more affluent areas, and a similar link between performance and the proportion of children from an Ethnic Minority Heritage. While these differences are small, they highlight equalities issues which need to continue to be addressed.

The research has shown that excellent results regarding the two hour target have largely been achieved through progress on the amount of curriculum PE time which pupils are involved in. This has increased from an average of 107 minutes to 118 minutes, with a corresponding increase from 34% of pupils participating in at least 120 minutes curriculum PE in 2003/04 up to 78% of pupils in 2007/08. Large increases such as these have not been apparent in Years 10 and 11, and progress towards the targets has therefore been much less obvious for these year groups.

Clear advances have been made in terms of widening the repertoire of sports available to pupils - from a baseline of just 14.5 different sports to 17.5. Indeed with the exception of judo and netball there are no (listed) sports where availability has declined, and indeed there are a large number where we have seen very substantial increases in terms of levels of availability over the course of the five surveys. Of particular note is the huge increase in the availability of multi-skill clubs (up from 26% in 2003/04 to 74% in 2007/08), although there are of course many other examples of substantial increases in availability for such sports as fitness, orienteering, cycling, golf, canoeing and archery, to name but a few. This increase in availability of sports across schools has also been reflected in an increased number of club links.

The latest study also shows how much progress there has been in the area of gifted and talented and in terms of sports volunteering and leadership. Although the percentages look relatively small, among pupils aged 5-11 there has been an increase from 3% registered as gifted and talented in 2003/04 to 7% in 2007/08. Similarly for sports leadership and volunteering, which has increased among Years 10-13 from 9% in 2003/04 to 20% in 2007/08. Now more than 1 million children in partnership schools are involved in sports volunteering and leadership across the country.

Appendix B: Questionnaire

Physical Education, School Sport and Club Links Survey 2007/08

The purpose of this survey is to help you, your partnership and the Government to evaluate progress towards meeting the aims of the national PE, school sport and club links strategy.

We would like you to complete the questionnaire online at www.tnsinfo.com/sportsurvey
If this is not possible, then you can fill in this paper booklet.

A guide to the survey has been produced to help you understand the questions and complete the questionnaire. The guide provides definitions for the key terms used in the questions and other useful information. You should have received a copy of the guide but if do not have it, you can get a copy from the survey website. We hope you find completing the survey straightforward.

Your School URN:

Your Partnership number:

School name and address:

Contact name (for queries):

Telephone number (for queries):

IMPORTANT DATES

If you choose to complete the **paper** questionnaire: you must return this completed booklet by **12 June 2008**

If you choose to complete the **online** questionnaire: you must submit your data on the website by **3 July 2008**

Your responses will be electronically captured therefore please ensure:

- Your answers are written clearly within the confines of each box.
- You use only Black / Blue Biro.
- You DO NOT use CORRECTION FLUID.
- If you make a mistake, please cross through the error and write the correct answer next to the box.

About your school

In order to be able to report accurately on the information you provide, we need current and accurate information about the number of pupils in each year group in your school. Please provide this information below.

How many pupils do you have in each year group?

Enter total number of pupils per year group
(put 0 if none, do not leave cells blank)

Year 1	<input type="text"/>	Year 7	<input type="text"/>
Year 2	<input type="text"/>	Year 8	<input type="text"/>
Year 3	<input type="text"/>	Year 9	<input type="text"/>
Year 4	<input type="text"/>	Year 10	<input type="text"/>
Year 5	<input type="text"/>	Year 11	<input type="text"/>
Year 6	<input type="text"/>	Year 12	<input type="text"/>
		Year 13	<input type="text"/>
			<input type="text"/>
			<input type="text"/>
			<input type="text"/>

Question 1

What is the total curriculum time in minutes that ALL pupils in each year group spend taking part in PE* in a typical week?

Enter total curriculum time in minutes
(put 0 if none, leave cells blank if there are no pupils in that year group)

Year 1	<input type="text"/>	Year 7	<input type="text"/>
Year 2	<input type="text"/>	Year 8	<input type="text"/>
Year 3	<input type="text"/>	Year 9	<input type="text"/>
Year 4	<input type="text"/>	Year 10	<input type="text"/>
Year 5	<input type="text"/>	Year 11	<input type="text"/>
Year 6	<input type="text"/>		

**Definition of 'PE': The planned teaching and learning programme in curriculum time that meets the requirements of the national curriculum for physical education.*

Question 2

What is the total number of pupils in each year group who participate in at least two hours of high quality PE and out of hours school sport* in a typical week?

Enter total number of pupils per year group
(put 0 if none, leave cells blank if there are no pupils in that year group)

Year 1	<input type="text"/>	Year 7	<input type="text"/>
Year 2	<input type="text"/>	Year 8	<input type="text"/>
Year 3	<input type="text"/>	Year 9	<input type="text"/>
Year 4	<input type="text"/>	Year 10	<input type="text"/>
Year 5	<input type="text"/>	Year 11	<input type="text"/>
Year 6	<input type="text"/>		

***Definition of 'school sport'**: Any activity that requires physical skilfulness and is part of the school's planned formal, semi-formal, supervised or led provision. School sport typically takes place out of hours.

TIPS ON ANSWERING QUESTION 2

If your answer to Question 1 is equal to or more than 120 minutes for any year group, the answer to this question will be the total number of pupils in that year group. In this case, you do not need to calculate time spent on school sport or additional PE.

If your answer to Question 1 is less than 120 minutes for any year group, to answer this question you need to take the following steps.

- Check which pupils have additional time for PE and how much additional time they actually have. This will include lessons that the rest of the year group does not have, for example GCSE PE, GCSE Dance or an extra PE lesson that some pupils have while others study an additional modern foreign language.
- Find out how long each pupil spends taking part in school sport in a typical week.
- Estimate whether each pupil participates in at least two hours of PE and school sport a week, including additional PE and school sport.
- Enter the number of pupils in each year group who participate in at least two hours of PE and school sport in a typical week.

Question 3

What is the total number of pupils in each year group involved in intra-school competitive activities during this academic year?

Note: **School sports days do not count** as intra-school competitive activities. Please refer to the survey guide for clarification of the definition.

Enter total number of pupils per year group
(put 0 if none, leave cells blank if there are no pupils in that year group)

Year 1	<input type="text"/>	Year 7	<input type="text"/>
Year 2	<input type="text"/>	Year 8	<input type="text"/>
Year 3	<input type="text"/>	Year 9	<input type="text"/>
Year 4	<input type="text"/>	Year 10	<input type="text"/>
Year 5	<input type="text"/>	Year 11	<input type="text"/>
Year 6	<input type="text"/>		

Question 4

Did you hold at least one school sports day or equivalent event during this academic year? Please X yes or no

yes 1

no 2

Question 5

What is the total number of pupils in each year group who have taken part in inter-school competition during this academic year?

Enter total number of pupils per year group
(put 0 if none, leave cells blank if there are no pupils in that year group)

Year 1	<input type="text"/>	Year 7	<input type="text"/>
Year 2	<input type="text"/>	Year 8	<input type="text"/>
Year 3	<input type="text"/>	Year 9	<input type="text"/>
Year 4	<input type="text"/>	Year 10	<input type="text"/>
Year 5	<input type="text"/>	Year 11	<input type="text"/>
Year 6	<input type="text"/>		

Question 6

Which of the following sports or activities has your school provided this academic year? Please X yes or no for each sport

	Yes	No		Yes	No
Angling	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Kabaddi	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Archery	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Karate	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Athletics (includes cross-country)	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Lacrosse	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Badminton	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Martial arts (except judo and karate)	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Baseball	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Mountaineering	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Basketball	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Multi-skill clubs	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Boccia	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Netball	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Bowls	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Orienteering	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Boxing	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Outdoor and adventurous activity	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Canoeing	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Rounders	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Cricket	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Rowing	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Cycling	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Rugby league (includes tag rugby)	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Dance	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Rugby union (includes tag rugby)	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Equestrian	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Sailing	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Fencing	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Skateboarding	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Fitness	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Softball	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Football	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Squash	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Goalball	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Swimming	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Golf	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Table tennis	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Gymnastics	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Tennis	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Handball	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Triathlon	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Hockey	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Volleyball	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Judo	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Other	<input type="checkbox"/> 1	<input type="checkbox"/> 2

If you crossed 'yes' for other, please provide details:

Question 7

For which sports or activities do you have links* to clubs? Please X yes or no for each sport

	Yes	No		Yes	No
Angling	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Kabaddi	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Archery	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Karate	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Athletics (includes cross-country)	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Lacrosse	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Badminton	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Martial arts (except judo and karate)	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Baseball	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Mountaineering	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Basketball	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Multi-skill clubs	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Boccia	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Netball	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Bowls	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Orienteering	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Boxing	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Outdoor and adventurous activity	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Canoeing	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Rounders	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Cricket	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Rowing	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Cycling	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Rugby league (includes tag rugby)	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Dance	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Rugby union (includes tag rugby)	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Equestrian	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Sailing	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Fencing	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Skateboarding	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Fitness	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Softball	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Football	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Squash	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Goalball	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Swimming	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Golf	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Table tennis	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Gymnastics	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Tennis	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Handball	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Triathlon	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Hockey	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Volleyball	<input type="checkbox"/> 1	<input type="checkbox"/> 2
Judo	<input type="checkbox"/> 1	<input type="checkbox"/> 2	Other	<input type="checkbox"/> 1	<input type="checkbox"/> 2

If you crossed 'yes' for other, please provide details:

* **Definition of 'links':** a school has links to clubs when pupils are actively guided towards club activities, either in a quality assured setting at the club itself, or on the school premises. Activities on the school premises would include regular coaching sessions and out-of-hours clubs organised by the club's coaches, but would not include one-off 'taster' sessions

Question 8

What is the total number of pupils in each year group who have participated in one or more community sports, dance or multi-skill clubs with links to the school during this academic year?

Enter total number of pupils per year group
(put 0 if none, leave cells blank if there are no pupils in that year group)

Year 2	<input type="text"/>	Year 7	<input type="text"/>
Year 3	<input type="text"/>	Year 8	<input type="text"/>
Year 4	<input type="text"/>	Year 9	<input type="text"/>
Year 5	<input type="text"/>	Year 10	<input type="text"/>
Year 6	<input type="text"/>	Year 11	<input type="text"/>

Question 9

What is the total number of pupils in each year group currently registered as gifted and talented because of their ability in PE and/or school sport?

Enter total number of pupils per year group
(put 0 if none, leave cells blank if there are no pupils in that year group)

Year 5	<input type="text"/>	Year 7	<input type="text"/>
Year 6	<input type="text"/>	Year 8	<input type="text"/>
		Year 9	<input type="text"/>
		Year 10	<input type="text"/>
		Year 11	<input type="text"/>

PLEASE TURN OVER →

Question 10

What is the total number of pupils in each year group actively involved in sports volunteering and leadership this academic year?

Enter total number of pupils per year group
(put 0 if none, leave cells blank if there are no pupils in that year group)

Year 1	<input type="text"/>	Year 7	<input type="text"/>
Year 2	<input type="text"/>	Year 8	<input type="text"/>
Year 3	<input type="text"/>	Year 9	<input type="text"/>
Year 4	<input type="text"/>	Year 10	<input type="text"/>
Year 5	<input type="text"/>	Year 11	<input type="text"/>
Year 6	<input type="text"/>	Year 12	<input type="text"/>
		Year 13	<input type="text"/>

This questionnaire is important as it provides a record of what your school has achieved. Please now go back and check that you have given a full and accurate answer to ALL questions.

Please speak to your Partnership Development Manager (PDM) about returning this booklet. Your PDM may want you to send it back to him/her or they may want you to send it directly to TNS, the company responsible for processing the results.

If you are asked to send it directly to TNS, please check with your PDM to see if he/she wants you to keep a copy of this booklet.

You will not be able to get a copy once you have sent it to TNS.

TNS, Rye Park House, London Road, High Wycombe, Bucks. HP11 1EF

**Please ensure you complete and return your questionnaire on time.
The deadlines are printed on the front page.**

If you have any questions regarding this survey, please speak to your Partnership Development Manager.
