THE CHILDREN AND YOUNG PEOPLE FUNDING PACKAGE

Extended Schools

Foreword

My vision is to establish a network of Extended Schools across Northern Ireland supporting the raising of school standards, fostering the health, well-being and social inclusion of children and young people and the regeneration and transformation of local communities. Schools can be hubs of their local community offering a range of activities before, during and beyond the traditional school day, engaging with their local community, connecting local people with local services.

Maria Eagle MP
Minister for Education

This is a bold and exciting vision but one that I believe is entirely achievable. Most schools already offer a range of activities such as Breakfast Clubs and After School Clubs and are able to do so through a combination of voluntary effort, school funds and resources raised from grant making organisations. The best programmes also include working closely with families and with statutory and voluntary agencies, recognising the shared common aim of improving children's life-chances. Through the Children and Young People Funding Package, we are now able to support this activity with a targeted funding stream. As a first step, funding will be made available to over one-third of all schools in Northern Ireland, aimed at those schools operating in the most disadvantaged areas.

Education is already making a considerable contribution to community regeneration and well-being by improving the life chances and aspirations of young people. It is one of the key themes of Government's Neighbourhood Renewal Strategy aimed at tackling deprivation and disadvantage in urban areas. Extended schools can make a significant contribution to reducing differentials and improving the quality of life for children and young people particularly from

disadvantaged areas. This initiative can build still further on what has been achieved by securing the active engagement of their communities. Positive engagement with families; sharing facilities with local community groups; and establishing close links with statutory and voluntary agencies working in the area, will help reinforce the position of the school and highlight its pivotal role in terms of its contribution to personal, health and community development.

Developing Extended Schools will be a challenge, and it is important therefore that schools enter this programme willingly. Many teachers are already involved in extended services and it is not the intention that this programme should place additional demands on teachers to work longer hours or be required to take on additional responsibilities. Extended services could be delivered by the school directly or by the school working in partnership with others.

Thus I encourage all schools being offered funding to consider the issue carefully, and to grasp the opportunity willingly. I ask the school principals to discuss it with their governors, staff and pupils and the local community and, if encouraged to participate, to submit the Expression of Interest pro-forma within the agreed timescale.

A handwritten signature in black ink that reads "Maria Eagle". The signature is written in a cursive style with a large, looped 'M' and 'E'.

The Honourable Maria Eagle, MP
Parliamentary Under Secretary of State
Minister with responsibility for Education in Northern Ireland

- 1.1 The aim of the Children and Young People funding package, launched by the Secretary of State on 7th March 2006, is

'To reduce underachievement and improve the life chances of children and young people by enhancing their educational development and fostering their health, well-being and social inclusion through the integrated delivery of the support and services necessary to ensure every child has the best start in life.'

- 1.2 Ministers have decided that the Department of Education will be the lead Department in taking forward the development of the Children and Young People funding package, in collaboration with the Department of Health Social Services and Public Safety, the Department for Social Development, and the Office of the First Minister and Deputy First Minister. An Inter-Departmental Group will meet as required to co-ordinate and discuss actions across the Package.
- 1.3 The Extended Schools concept is at the core of the Children and Young People funding package and some £10m has been earmarked to support activities based on schools' particular circumstances and needs per year for the next two years. These will be diverse but must be linked to the key outcomes for children and may include breakfast clubs, after school study support and after school youth, sport and leisure activities, programmes for parents and community use of schools, creating a new ethos and culture for schools, facilitating partnerships and collaboration in order to deliver better outcomes for children and young people. The focus will be on supporting learning, healthy lifestyles and creativity, with funding allocated directly to schools. This is a regional policy to be applied consistently across all Board areas.
- 1.4 The purpose of this document is to outline aspects of the new policy, how it will be implemented and to clarify the roles and responsibilities of the various parties involved.

2 WHAT IS AN EXTENDED SCHOOL?

- 2.1 An Extended School provides a range of services and activities, sometimes during or beyond the school day, to help meet the needs of children, their families and the wider community. In doing so, Extended Schools will engage in collaboration and partnership with neighbouring schools and statutory and voluntary and community sector organisations operating in the community.
- 2.2 The Children and Young People Funding Package is seen as having the potential to make a very significant contribution to the Government's 10 Year Strategy for Children and Young People in Northern Ireland and within this, Extended Schools have a particular role to play. The strategy is being built around an Outcomes Framework which provides a basis on which action planning can take place within individual Extended Schools and, if appropriate, across groups of schools.
- 2.3 The high level outcome areas based around a central outcome "Living in a Society which respects their rights" are:
- Being Healthy
 - Enjoying, Learning and Achieving
 - Living in Safety and with Stability
 - Experiencing Economic and Environmental Well-Being
 - Contributing Positively to Community and Society
- Appendix 5 shows how Extended Schools can contribute within each of these areas and suggests a number of activities and measures.
- 2.4 In the case of Extended Schools, Government wishes to see the establishment of the school as the hub of its local community and it being an organisation which engages positively and actively with neighbouring schools and statutory and voluntary and community sector organisations operating in the local community – all efforts concentrated on meeting the needs of the pupils in the school and the wider community.

2.5 There is no single model of an Extended School. It is possible, however, to identify a shared understanding of what 'Extended' means and how schools and their partners could cover a range of services and activities in a variety of ways.

An Extended School is therefore a school which:

- views working with its pupils, families and community as an essential element in raising the standard of pupils' achievement;
- builds partnerships with neighbouring schools, the further education sector and other statutory, voluntary, business and community organisations to develop and deliver better services for the community as a whole and for children and young people and their families in particular;
- helps to strengthen families and communities through providing opportunities for lifelong learning and personal development; and
- uses its accommodation flexibly and outside of school hours for the good of learners and the community.

2.6 The term 'services' is used to denote any measure which enables children to improve their life chances and achieve their potential, therefore the services offered by an Extended School may include:

- swift and easy referral to a wide range of specialist support services such as social services and nursing services, which may be available on the school premises, or located nearby;
- support for families including opportunities for training in parenting skills, supporting their children's learning, leisure activities, ICT skills, healthy living skills;
- a varied menu of activities such as breakfast clubs, homework clubs, study support, adult and peer mentoring, youth clubs, sport, music tuition, dance and drama, arts and crafts, special interest clubs, summer schemes;

- wider community access to ICT, sports and arts facilities, including adult learning; and
- high quality childcare available 8am-6pm all year round either directly through the school or in partnership with other providers (this can include signposting arrangements).

This does not mean that an Extended School has to offer all of these services or that it should limit its provision to these services but rather should respond to the particular needs and aspirations of its community.

- 2.7 Most schools in Northern Ireland already offer extended services though none, as yet, offer the full spectrum of Extended School activities. They do so through a combination of voluntary effort and goodwill of staff, in some cases utilising financial support obtained from various sources including other government departments, EU funding, and grants from Trusts or the Big Lottery. An important consideration in implementing this new funding stream is that it should be used to support new activities and initiatives. However, though it is recognised that in some cases the source of funding used to support existing activity may be time bounded, mindful of the need, of course, to avoid duplicate or displacement funding.
- 2.8 Some countries use the term Full Service School. Generally, these are schools offering the full range of services for children, young people and the wider community and which have a particular emphasis on integrating and partnering services such as social services, health services and childcare. Although it is possible within Northern Ireland that an Extended School may achieve this level of activity, it will still be termed an 'Extended School'.
- 2.9 It is anticipated that the creation of an Extended School will require time and capacity building to meet its objectives, thus it will be a process which schools constantly evaluate and change to meet need.

3.1 Research and our own experiences in Northern Ireland indicate that there are major benefits to be gained from engagement in Extended Schools:

3.2 Benefits for **all pupils**:

- Improved learning and achievement
- Increased motivation and self-esteem
- Improved access to specialist support to meet pupils' wider needs
- Increased positive attitude towards learning
- Enhanced opportunities to learn new skills and talents and develop existing skills and talents
- Improved health and well-being

3.3 Benefits for the **school**:

- Additional facilities and equipment
- Greater opportunities for staff for flexible working and career development
- Improved collaboration with neighbouring schools and youth provision
- Enhanced partnership working with the community and statutory agencies
- Greater awareness of the community and pupil diversity
- Greater appreciation of the parents' role within education

3.4 Benefits for **families**:

- Improvements in child behaviour and social and health skills
- Better understanding of families' backgrounds, cultures, concerns, goals and needs
- Greater parental involvement in children's learning and development
- Opportunities to develop parenting skills and to discuss parenting issues with other parents and professionals
- More opportunities for local adult education and family learning
- Greater availability of specialist support for families

3.5 Benefits for **communities**:

- Improved community planning and better access to essential services
- Improved local availability of sports, arts and other facilities
- Local career development opportunities
- Improved outcomes for families and children
- Better supervision of children outside school hours
- Closer relationships with the school

- 4.1 The intention is that the programme should be targeted on children and young people who are disadvantaged, marginalised or have the most limited access to current services. This does not mean that only these children require Extended Schools, but for the purposes of the funding package this criteria was adopted. Schools outside of these parameters may also become 'extended' but will not have access to a particular funding stream from the Department of Education to achieve their goals. It is therefore necessary to develop a method for identifying the schools with greatest need, balancing this against the need to ensure that each school selected can have access to a meaningful amount of funding. Once selected, the school will have an opportunity to decide whether it wishes to participate i.e. participation will be voluntary. Any funding calculation will be based on the total number of pupils enrolled in the school at the time of the most recent school census (October 2005) and the profile of the school as submitted by the school in its census return.

Measures of Deprivation

- 4.2 Free School Meal Entitlement (FSME) has a long established link to social deprivation (and also to low levels of educational achievement). As such it is a readily available and robust indicator of social deprivation for the pupils attending individual schools. In October 2005, the average FSME % in schools was 19.48%. However, FSME is not a robust measure of disadvantage in nursery schools, mainly because of the pattern of attendance of pupils, and thus, in this case, the Department depends on the percentage of children enrolled whose parent/s are in receipt of income based Job Seekers Allowance.
- 4.3 Alongside this measure, the Northern Ireland Multiple Deprivation Measure 2005 (NIMDM 2005) is a measure of multiple deprivation at the small area level. The model of multiple deprivation which underpins the NIMDM 2005 is based on the idea of distinct domains of deprivation which can be recognised and measured separately. These are experienced by individuals living in an area. People may be counted as deprived in one or more of the domains, depending on the number of types of deprivation that they experience. The overall MDM is

conceptualised as a weighted area level aggregation of these specific domains of deprivation.

4.4 There are seven 'domains' that make up the Multiple Deprivation Measure and describe the 'category' of deprivation they cover. The domains are as follows:

- Income deprivation.
- Employment deprivation.
- Health Deprivation & Disability deprivation.
- Education & Training deprivation.
- Proximity to Services deprivation.
- Living Environment deprivation.
- Crime & Social Disorder deprivation.

4.5 Information on these domains is available at ward level and also at a sub-ward level. Wards have varied population sizes in Northern Ireland. They range from around 750 people in a ward in Moyle to around 9,500 people in Belfast. NISRA has also developed Super Output Areas (SOAs). These are aggregates of 2001 Census Output Areas and are a relatively small scale unit, containing an average of just less than 2000 people. There are a total of 890 SOAs in Northern Ireland (further information can be found at www.ninis.nisra.gov.uk).

Neighbourhood Renewal Areas

4.6 Neighbourhood Renewal, the Government's strategy to tackle the complex multi-dimensional nature of deprivation continues to roll out across the 35 most deprived urban areas in Northern Ireland, as measured using the Noble Index of multiple deprivation. Neighbourhood Partnerships, representative of key political, community, statutory, voluntary and private sectors have been established in 25 of the 35 Neighbourhood Renewal areas, and work is ongoing to establish partnerships in the remaining 10 areas. Details of all of these areas together with the appropriate contact details for the Department for Social

Development, Development Office staff, who support Neighbourhood Partnerships, are attached at Appendix 7).

4.7 Once established, Neighbourhood Partnerships will develop Vision Statements. These should say what the Partnership want their neighbourhood to look like at the end of the 7-10 year period and describe what sort of place the neighbourhood should be in the future. Action Plans identifying local needs and setting priorities against these will follow. These plans will represent the agreed programmes and actions to be delivered for a 3 year period by the range of statutory, private and community organisations in order to deliver against the vision.

4.8 The strategic aims of the Neighbourhood Renewal Strategy are to:

- develop confident communities that are able and committed to improving the quality of life in their areas;
- develop economic activity in the most deprived neighbourhoods and connect them to the wider economy;
- improve social conditions for the people who live in the most deprived neighbourhoods through better co-ordinated public services and the creation of safer environments; and
- help create attractive, safe, sustainable environments in the most deprived neighbourhoods.

The expectation is that learning and other family support services offered through Extended Schools can have a positive impact on children's and families achievements, motivation and self-esteem. The initiative will make a significant impact in areas of Neighbourhood Renewal where the school can be a major focal point for the community. As it is expected that improvements in educational attainment will be a key priority for Neighbourhoods, there is a clear link between the neighbourhood action plans and plans for Extended Schools and it is important that the development of neighbourhood action plans reflects the extended schools initiative where appropriate.

4.9 However the pattern of schooling in Northern Ireland is such that although the profile of pupils in nursery and primary schools will reflect that of the

community within which the school is located, the same does not hold true for the post-primary sector.

- 4.10 Crucially, however, there are other areas of disadvantage in Northern Ireland, which although not formally recognised as neighbourhood renewal areas, perhaps because of population size, nevertheless they experience many of the problems found in neighbourhood renewal areas. These schools will be categorised by a higher than average incidence of FSME in the school attended by these communities.

Nursery, Primary and Special Schools

- 4.11 The Department does not currently hold information on the postcode of children attending nursery, primary and special schools, although arrangements are being put in place to collect this information in the 2006/7 school year. Thus an alternative measure has been developed.
- 4.12 Nursery and Primary schools tend to draw the majority of their pupils from the neighbourhoods closest to them. In such instances therefore it should be sufficient to include schools with a high incidence of FSME or which are located in deprived wards. Some special schools tend to attract pupils from the neighbouring community while others have a wider catchment area.
- 4.13 The Department will therefore include within the policy all nursery, primary or special schools which:
- a. are located in neighbourhood renewal areas or in the 30% lowest ranking wards or SOAs in the Education domain; or
 - b. have a FSME of 37% or higher, or in the case of nursery schools an income based Job Seekers Allowance percentage in excess of 37%.

Post-Primary Schools

- 4.14 The Department holds records of the home postcode of all pupils in post-primary schools. Thus it is possible and relatively easy to assess the extent to which individual pupils in post-primary schools are being drawn from Neighbourhood Renewal Areas and other deprived areas of Northern Ireland.

4.15 For post-primary schools therefore, the Department will include within the policy all post-primary schools with:

- 51% or more of its enrolment as at October 2005 drawn from Neighbourhood Renewal areas and/or from the 30% most deprived wards in the education domain; or
- a FSME % greater than 37%.

4.16 Details of the schools identified using this approach are listed in Appendix 1.

Good Practice

4.17 The targeting of funding at the most disadvantaged areas means that there will be some schools that will not be funded yet, in some cases, these schools have been to the forefront in developing and piloting extended services. These schools have much to offer other schools with less developed programmes and, in recognition of this, the Department has set aside a proportion of the overall budget for allocation to a small number of selected schools. Schools which consider themselves models of good practice and which are not listed in Appendix 1 may self-nominate by contacting their local Education and Library Board. In putting themselves forward, schools need to:

- a. provide strong evidence (including examples of planning, delivery and monitoring and evaluation) of how they demonstrate excellent practice;
- b. provide evidence of their activities linked to the 5 high outcome areas;
- c. propose how they would disseminate this across other schools; and
- d. partner or cluster with one or more other schools identified for funding under the programme.

5 FUNDING METHODOLOGY AND FINANCIAL MANAGEMENT ISSUES

- 5.1 As many schools have already shown, delivery of extended services may not necessarily require a large amount of money to support them. Quite clearly, however, additional resources will facilitate the development and delivery of a programme of activities of appeal to pupils and the wider community utilising a wide range of skills and expertise, both within and outside the school. It will also allow for Extended School staff to devote time in which to develop partnerships and collaborate more closely with colleagues in neighbouring schools, statutory agencies and organisations in the voluntary and community sector.
- 5.2 Resources for Extended Schools are provided for that purpose and must only be used for that purpose. It will not be possible to divert funds from the school's Extended School budget into its delegated budget, provided under LMS arrangements. The Department will be working closely with colleagues in the Education and Library Boards on a Financial Management Guide that will set out the means by which funds are to be managed and the associated accounting arrangements. This is expected to be available before 1st September 2006. In the case of controlled and maintained schools resources will be earmarked for individual schools but held by the Education and Library Board, in the same way as the delegated LMS Budget is held at present. Voluntary grammar and grant maintained integrated schools are funded directly by the Department and thus, funding made available to these schools will be provided by the Department.
- 5.3 All childcare provision and community use of school facilities (unless by not-for-profit organisations) **must** be self-financing or funded by means of funds secured from other sources. It is anticipated that schools will provide business plans to indicate how this will occur. Activities directly related to children's learning must be free, but schools are at liberty to determine their own charging policies in relation to other activities. All fees and charges should be set out in the school's fees and charges policy.

Rationale Underpinning the Funding Allocation

- 5.4 It is important that every eligible school receives a minimum amount yet at the same time larger schools will have greater capacity to provide a wider range of activities and services. However, there are economies of scale, and these need to be reflected in the distribution formula.

Calculation of Funding Allocations

- 5.5 An allocation has been calculated for each school based on:
- a. a block allocation to every school of £3,000;
 - b. a sliding scale whereby:
 - the first 100 pupils are funded at £100 each
 - the next 100 at £75 each
 - the next 100 at £50 each
 - the next 150 at £25 each
 - the next 100 at £20 each
 - all remaining pupils at £10 each
 - c. where schools join in a cluster with schools in the same neighbourhood, they will be entitled to a 15% network allowance as an incentive to enter into these arrangements. Clusters must be composed of a minimum of 3 schools and demonstrate partnership working.

The pupil numbers used in the calculation are the numbers submitted by the school in the annual school census of October 2005 with part-time pupils counted as 0.5.

- 5.6 Budgets can only be indicative at this stage because not all schools invited to do so may wish to participate. Details of the indicative budget are set out beside each school listed in Appendix 1. Final budget allocations will be made once Expressions of Interest have been received.

Clusters

5.7 Where 3 or more schools in the same geographical area wish to form a cluster, each of the schools in the cluster will be entitled to a cluster allocation equivalent to 15% of their core allocation. Clusters must be geographic and if possible should be cross phase and, ideally, cross sector. All schools in the cluster must demonstrate partnership working with the other schools. This can be achieved by, for example:

- opening up after school provision to pupils in other schools within the cluster;
- sharing of resources;
- joint working on specific activities;
- single point of delivery for whole cluster activities 'Enhanced Community Activity'.

A joint action plan should be compiled listing these activities and individual action plans compiled by the school identified with responsibility for the action. In working up these action plans it would be helpful to consult with the appropriate DSD Development Officer to ensure that the potential for impact of the proposed activity is maximised and that no duplication of effort or funding takes place. Contact details are provided in Appendix 7.

Expression of Interest

5.8 All schools wishing to participate as a funded Extended School must complete an Expression of Interest pro-forma and submit it to their local Education and Library Board as soon as possible and by 29th September 2006 at the latest. The pro-forma may be copied from Appendix 2, or alternatively copies may be obtained by telephoning your local Education and Library Board, details listed in Appendix 3.

Release of Funding

5.9 Access to the full allocation will be dependent on the preparation of an Action Plan and its approval (see next section). However, in recognition of the costs associated with the action planning process, schools may

access 25% of their allocation following receipt of their Expression of Interest. This will also allow those schools that wish to do so, to organise and pilot activities in the summer. Schools wishing to draw down funding in advance of submitting their action plan should write to the Board indicating for what purposes the resources will be used.

6 ACTION PLANNING AND DESIRED OUTCOMES

- 6.1 Extended Schools will draw up an action plan setting out the various activities that it plans either alone or in partnership with others. The template for an action plan is set out in Appendix 4, and a number of illustrative activities have been included to serve as examples. The activities that are planned should be aligned to the 5 high level outcomes. Where an activity contributes across outcome areas, simply place the activity within the outcome which is judged most relevant. In all schools the action plan should be integrated into the school's development plan.
- 6.2 A toolkit for Extended Schools has been developed which provides practical advice on Extended Schools in general and on particular activities. This can be accessed at www.rtuni.org/extendedschools and will be further developed as the policy is implemented.
- 6.3 A series of performance indicators has been developed related to one or more of the high level outcome areas as a means by which trends and progress can be monitored. Although it will be possible to monitor these at an individual ward level, it would be inappropriate, because of the influence of other policies and activities, to suggest that there is a direct link with Extended Schools. Thus, in order to have effective monitoring and evaluation, it is necessary to develop a series of intermediate performance measures which can be used with confidence by individual schools, although, here again, it will not be possible to disentangle the relative impact of various policies and actions within the school. Appendix 5 sets out a range of performance indicators and illustrative activities for each outcome area.
- 6.4 A critical first step in the action planning process is to identify the needs of pupils, parents and the wider community and to match this against gaps in provision. In the case of schools in neighbourhood renewal areas the Neighbourhood Renewal Partnership will have information which can be drawn on. This may be accessed via the appropriate the DSD Development Officer, details are set out in Appendix 7. Elsewhere, local community groups and local councils may well have information that can be used. It is not the intention that schools should take on responsibility for services already being provided by other organisations. However

schools are expected to be able to signpost that these services are available. Detailed guidance of the auditing process is available in the toolkit provided to support Extended Schools.

- 6.5 Pupils should be given an opportunity to put their views forward through, for example the School Council, Focus Groups or surveys. Indeed this process can be an excellent learning opportunity for pupils not only in terms of the survey itself but in supporting Citizenship within the curriculum. The Department is anxious to emphasise that this is not envisaged as a major analytical exercise taking up valuable time, rather schools are expected to be able to demonstrate that they have taken account of the needs and wishes of their pupils and the wider community. It is important also that the process does not raise expectations that cannot be fulfilled but clearly establishes that this is an audit to identify gaps in provision that it **may** be able to meet.
- 6.6 Research shows that Extended School services are most successful when they are provided in a more relaxed setting than that which will apply during the formal school day. However, the school needs to see these activities as an integral part of the school and reflect this within its School Development Plan; and in the day to day arrangements for management within the school.
- 6.7 The size of the Extended School programme offered by individual schools will need to take account of its size and the amount of money that it has been allocated. Clearly smaller schools may find it difficult to offer some programmes and thus schools are encouraged to work closely with schools and other organisations in their area. Building and maintaining effective partnerships lie at the heart of a successful Extended School. This simple truth recognises that no single organisation can meet all the family's needs. Activities can be offered:

Directly by the school with the school making the necessary staffing and administrative arrangements;

Collaboratively or in Partnership arrangements with neighbouring schools or agencies and organisations, perhaps sharing the costs, rotating responsibility or simply quid pro quo agreements;

Third Party Delivery – where a third party, perhaps from the voluntary and community sector offers provision through an agreement with the school.

Supporting Healthy Schools

- 6.8 The Department of Education and the Department of Health, Social Services and Public Safety are developing a new healthy schools policy to support schools as settings that enable children and young people to learn and develop in ways which support good physical and mental health and well-being. Extended Schools will have an important role in helping to deliver this policy by working with others to establish a whole school approach to health and well-being. Schools are therefore asked to pay particular attention to this aspect of Extended Schools.

Co-location and Integration of Services

- 6.9 Co-location of services on site offers improved access for children, young people and their families. The benefits are not however confined to those to whom the service is directed. Schools can see immediate benefits not only through time saved in trying to contact social services and health services but also in that the closer working relationship means improved communication about the needs and progress of individual children. The service provider will also see benefits through fewer missed appointments and improved communication.

Schools Operating in Clusters

- 6.10 There are many advantages in joining in with nearby schools to form a cluster. This has benefits for the schools involved through a sharing of resources and facilities but more importantly has benefits for the pupils and the community in that it provides access to a greater range of opportunities. Those organisations providing funding for activities are more likely to want to deal with a cluster than with individual schools. Where schools join a cluster the Action Plan will be a joint action plan for the cluster though it needs to show actions and activities at each individual school. Initially the ELB co-ordinator can act as chairperson but it is anticipated that this will rotate amongst the schools, with the school of the chairperson being responsible for the cluster during their tenure. The cluster may also wish to involve the appropriate DSD Development Office

to ensure that all relevant information about initiatives and activities as part of the Neighbourhood Renewal programme in that area is known. Contact details are provided in Appendix 7. It would be useful for the cluster to draw up a constitution or agreement to which each school would subscribe (an example is available in the toolkit see www.rtuni.org/extendedschools). Schools not being funded under this programme may nevertheless join a cluster subject to the approval of the Extended Schools Project Board which will take into account the views of the other schools in the cluster. They will then be a participating member contributing their own resources or expertise.

Sources of Support and Advice

- 6.11 Individual schools will be able to access support and advice from:
- the **Extended Schools co-ordinator** employed by the Education and Library board and who has responsibility for the management and co-ordination of the Extended Schools programme across the board area;
 - officers of the Council for Catholic Maintained Schools (in the case of Catholic Maintained Schools);
 - a training programme for school staff which is being developed; and,
 - the **on-line toolkit** accessible at www.rtuni.org/extendedschools.
- 6.12 The Extended School co-ordinator will help and advise the school on aspects of extended services and will also help broker partnership agreements between schools (or groups of schools) and other agencies where schools seek such support. Schools are encouraged to work closely with the Extended Schools co-ordinator as this will assist in the action planning process.

Scope of Activities Covered by Action Plans

- 6.13 As stated it would not be realistic to expect small schools working individually to be able to deliver activities across all the outcome areas. However by the same token it is important that there is a balance of activity across Northern Ireland. It is important also that schools receiving

funding are able to demonstrate that they are using the resources effectively in the provision of extended services.

Action Plan Approval Process

- 6.14 Once the school has drawn up its plans, the plans should be sent to the Education and Library Board. The Board should have arrangements in place to have Action Plans signed off within 6 weeks of receipt. The final date for submission of Action Plans is 30th November 2006 and all Action Plans must be signed off by 5th January 2007. All action plans will be subject to consideration by an Extended Schools Project Board established in each Board area and which will draw representation from the Board itself and CCMS together with a range of statutory and voluntary sector representatives in the area. The Project Board should be in place in each Education and Library Board by 29th September 2006.
- 6.15 Once all Action Plans have been signed off, the Board will submit to the Department a summary action plan setting out the main areas of activity against the 5 high level outcomes across all schools.

Management Information

- 6.16 Schools must have arrangements in place to collect quantitative and qualitative information about each planned action and, if possible, evidence that progress has been made in achieving the desired outcomes. Thus the Department will expect schools to collect and retain, in an easily retrievable form, data such as:
- a. levels of participation;
 - b. any feedback reports from pupils, teachers, parents and the local community on particular programmes; and
 - c. where readily available, information on outcomes as set out in Appendix 6.

Summary of Key dates

29 th September	Deadline for return of Expression of Interest
29 th September	ELB to have established Extended Schools Project board in its area
30 th November	Deadline for return of Action Plans
5 th January 2007	Deadline for sign-off of Action Plans by ELB
29 th June 2007	Deadline for receipt of Annual Reports by schools or school clusters
28 th September 2007	Deadline for receipt of Annual Report by Education and Library Board

7

ROLES AND RESPONSIBILITIES WITH REGARD TO EXTENDED SCHOOLS

7.1 A key requirement is that the structure being put in place now needs to have a regional basis so there is a seamless transition to new bodies established under the Review of Public Administration. The key organisations involved are:

- Department of Education (including the Education and Training Inspectorate);
- Other Government Departments (principally DSD, DHSSPS, OFM/DFM and DCAL);
- Education and Library Boards;
- CCMS, NICIE and CnaG;
- Schools;
- Other Statutory Agencies; and
- Voluntary and Community Sector.

DEPARTMENT OF EDUCATION (DE)

7.2 The Department has responsibility for:

- Policy – developing the policy and keeping it under review;
- Finance – securing the resources, determining the funding and financial management arrangements;
- Regulatory – providing the framework within which the policy should operate, including any legislative authorities;
- Standards – Putting monitoring and evaluation arrangements in place to track policy outcomes; and
- Securing arrangements with other government departments for an integrated delivery of services.

7.3 This role involves the Department in:

- Defining the desired policy outcomes and the mechanisms for delivery including how Extended Schools will be identified and funded;
- Developing a funding mechanism which funds schools and takes into account factors which reflect relative need;
- Determining how the policy will be applied, including any support arrangements;
- Identifying a set of key performance indicators to be used in assessing the extent to which the policy is delivering desired policy outcomes and associated with this and, in consultation with the Education and Training Inspectorate, establishing the monitoring and evaluation arrangements;
- Organising the integrated delivery of services, including inspection, with other government departments;
- Ensuring that the Extended School initiative maintains a regional consistency; and
- Address issues that inhibit the development of Extended Schools.

The Role of Other Government Departments

7.4 The main Government Departments involved in the policy are:

- a. The Department of Social Development (DSD), in particular through the links to Neighbourhood Renewal Strategies and community capacity building;
- b. The Department of Health and Social Services and Public Safety (DHSSPS), in particular through the development of childcare and the regulation and inspection of childcare, the provision of evidence-based advice and support on healthy schools policy, the potential involvement of the voluntary and community sector and the

improved integration of education, health and social services at a local level; and,

- c. The Department of Culture Arts and Leisure (DCAL), in particular through links to the work of the Sports Council and the Arts Council.

The Role of The Education and Library Boards

7.5 The Review of Public Administration and the creation of a single Education Authority is planned for implementation in April 2008. Ministers have determined that the arrangements being developed regarding the role and responsibilities of the five Education and Library Boards must take this into account. In particular policy and practice, including the interpretation of policy and financial arrangements must be consistent across all participating schools, irrespective of the area in which they are located.

7.6 Education and Library Boards will:

- provide support arrangements for schools or clusters of schools and co-ordinate the implementation of Extended School provision within their areas; this should include membership of Neighbourhood Renewal Partnership Boards;
- establish an Extended Schools Project Board to consider action and make recommendations to the Board;
- ensure that finances allocated to schools for Extended School activities are used for the purposes allocated; and
- contribute to the development of policy by reflecting back to DE any issues arising with regard to the operation of Extended Schools.

7.7 CCMS will:

- promote the initiative generally within Catholic Maintained Schools;
- encourage and facilitate clustering arrangements within the sector and across sectors;
- liaise with Trustees in relation to the use of school buildings;

- promote the involvement of schools with other improvement initiatives including Neighbourhood Renewal;
- support the work of the Extended Schools co-ordinators; and
- serve of the Extended Schools Project Board in each area.

8 MANAGEMENT ISSUES

- 8.1 For extended services to effectively meet the needs of pupils, families and communities it is essential that schools are organised effectively. Ensuring that those school staff who choose to work in the extended services can work effectively with colleagues in other agencies will be key in developing effective partnerships.
- 8.2 Some existing staff, teaching and non-teaching may be able to contribute to programmes both within and beyond their existing subject areas within the school. Additional roles can offer opportunities for increased income, for career development or for more flexible working hours. **But such involvement must be optional.** There is no expectation that existing members of staff **must** be involved – schools may wish to explore other possibilities including the recruitment of new staff (either direct or as a shared appointment) or making arrangements with third-party organisations.
- 8.3 The leadership and vision provided by the Principal is crucial to the success of the Extended Schools. In larger schools this will usually be underpinned by another member of staff being responsible for the day-to-day management of activities.
- 8.4 The intention is that those schools identified for inclusion within the policy should opt in. Consideration should be given to the fact that while school staff may not necessarily be involved in the direct delivery of extended services, there will be additional work falling to the Principal and senior staff in terms of guiding and overseeing the work. For those schools which decide to engage in direct delivery there may be implications for workloads of staff. **It is essential therefore that schools consult closely with all staff within the school before final decisions on participation are made.**

Role of Governors / Trustees

- 8.5 The Board of Governors has ultimate responsibility for deciding whether a school should offer additional activities, or the establishment of partnerships, and what form these services should take. Before making decisions, governors need to be aware of what is being proposed, the

potential benefits and the implications. As with the core responsibilities of the school it is expected that the day-to-day management and practical delivery of services can be delegated to others but it is the governors who will have the ultimate responsibility. In Catholic Maintained Schools the Trustees will also have a key role as owners of the school. As such their approval will be necessary for any use of the school beyond normal activity.

Child Protection

- 8.6 Standard vetting arrangements will apply to any staff recruited or appointed to provide services for pupils or young children. Extended School provision is likely to provide increased levels of access to school premises by adults. Where adults and children are jointly involved in activities, schools will need to ensure that there are adequate staffing arrangements in place so that pupils and young children are not left unsupervised. Schools will also have to change their child protection policies to ensure that the measures they contain include all the activities of the school, and the implication these may have for partners.

Legal and Insurance Issues

- 8.7 Schools should be aware that some activities may not be possible because of restrictions regarding the use of the school premises (e.g. in the deeds) and in some cases there could be insurance considerations. Schools are encouraged to take advice from their Education and Library Board and/or managing authority regarding their proposed programme.

Transport

- 8.8 Schools must ensure that there are adequate arrangements in place for pupils to travel to and from school. Close co-operation with the Board Transport Section is therefore essential. Further information on this is in the toolkit.

9

MONITORING, REPORTING AND EVALUATION

- 9.1 The Department of Education has commissioned the Education and Training Inspectorate (ETI) to undertake a baseline survey of Extended Schools provision during 2006/7 academic year. In addition ETI will include extended services and the contribution it is making to children's learning and well-being as part of district visits, routine inspection activity and dedicated survey activities when several organisations will be visited and a cross-cutting report prepared and published. As the lead Inspectorate for the inspection element of monitoring and evaluation of the Children and Young People Funding Package, ETI will develop, in consultation with other Inspectorates, integrated inspection procedures in order to evaluate the quality of integrated service delivery envisaged as a key element of the package.
- 9.2 Inspection and survey activity will focus on issues such as:
- why a school has chosen to offer a particular activity (evidence from audit);
 - the impact which extended services is having on the learning and well-being of pupils and the standards they achieve;
 - the extent to which the school engages meaningfully and successfully in collaborative projects;
 - the management, organisation and delivery of extended services; and
 - value for money.

Self-evaluation

- 9.3 A self-evaluation guide will be produced to assist schools in assessing the extent to which the services being provided comply with best practice.

In-Year Monitoring

- 9.4 The Board will maintain financial monitoring returns showing planned and actual spend by each school for each month of the year. These will be updated and submitted to the Department on a 3 monthly basis and as requested.
- 9.5 In addition, each school will receive at least one monitoring visit per year from an Education and library Board official who will discuss aspects of the delivery of the Extended School action plan within the school and produce a pro-forma report, a copy of which will be sent to the school, the Extended Schools Project Board and the Department.

Annual Reporting – Schools

- 9.6 At the end of the academic year each school (or cluster of schools if so organised) will prepare a short report, in a format to be determined by the Department in conjunction with partner bodies, setting out details of the various activities being undertaken together with an assessment of the impact which these have had on pupils within the school(s) and the wider community. The first report should be submitted to the Extended Schools Project Board and the Education and Library Board in June 2007.

Annual Reporting – Education and Library Boards

- 9.7 By September 2007 each Education and Library Board will publish an annual report detailing:
- the various schools and clusters of schools which were funded;
 - a summary of the activities undertaken, shown within the 5 high level outcome areas;
 - a financial report showing income and expenditure by each school or cluster; and
 - the Board's assessment of the impact which the activity has had and any priorities for the future.

Publication in this context is published on the Board's website and notification being sent to the Department.

List of Schools Identified to Participate and Indicative Budgets

Belfast Education and Library Board Area

School Reference No	School Name	Core Allocation
1010063	Currie Primary School	£14,200
1010146	Euston Street Primary School	£22,700

5/1 Landscaping Project	<p>The rough ground immediately outside the school grounds is owned by the Council but is unattractive.</p> <p>Present activity: Schools raised £15k for charity last year. Schools put on a concert for senior citizens last year. Several pupils already actively involved in community based organisations. Art Departments combined to paint a mural in the local hospital.</p>	<p>The Council has been approached and will assist in a scheme to landscape the area to provide attractive seating for parents waiting for their child. Year 10 Pupils will survey parents regarding how the area might be landscaped. Working to the budget provided by the Council the children will design the scheme and after further consultation with parents will present this to local councillors and council officials.</p>	<p>Mrs D, a Classroom Assistant and a keen gardener is prepared to work with 8 pupils on the project from 3pm – 4.30pm on Tuesdays. Mr S., Head of the Maths Dept has agreed to assist in the survey design and analysis and Miss J of the Science Department has agreed to assist pupils in the identification of suitable plants. All manual labour will be carried out by the Council.</p>	<p>Staff salaries £500 Stationery £20 Extended Schools Budget (other costs met by Council).</p>	<p>An unattractive area will be transformed. Pupils will have an opportunity to develop:- Team-working skills, IT skills, Numeracy Skills, Project Management, Presentational and Inter-personal skills. Science and Geography skills will also be developed. Greater pride in school and surrounding area.</p>	<p>The Council Officer leading the project has agreed to give the pupils feedback on their project and the way it was presented. Parents will be surveyed to obtain their reaction to the completed project. The pupils will also be asked to complete an evaluation form at the end of the project.</p>
